Algebra B.L. van der Waerden.2003-10-17 This beautiful text transformed the graduate teaching of algebra in Europe and the United States. It clearly and succinctly formulated the conceptual and structural insights which Noether had expressed so forcefully and combined it with the elegance and understanding with which Artin had lectured. This second volume of the English translation of B.L. van der Waerden's text Algebra is the first softcover printing of the original translation.

Shakespeare and the Challenge of the Contemporary Francesca Clare Rayner.2021-09-23 Contemporary performance is a particularly stimulating area for the study of how Shakespeare is produced and received in different cultural contexts. Francesca Clare Rayner's original and thought-provoking book highlights the diversity and experimentalism of contemporary performance practices through a focus on unexplored performances in Portugal. This book references key debates within contemporary performance studies on intermediality, globalization and political participation and analyses their particular configurations within the Portuguese context. These case studies represent clear alternatives to the market-driven view of the contemporary as the continual reproduction of the new and the topical for global consumers. Instead, they recast the contemporary as a site of disempowerment, crisis and erasure in a Europe fragmented by economic austerity, political divisions around Brexit, ecological vacillation and an anxious refashioning of global relations between North and South.
