**Agricultural Value Chains in India** Ashok Gulati,Kavery Ganguly,Harsh Wardhan.2022-01-01 This open access book provides a clear holistic conceptual framework of CISS-F (competitiveness, inclusiveness, sustainability, scalability and access to finance) to analyse the efficiency of value chains of high value agricultural commodities in India. It is based on the understanding that agriculture is an integrated system that connects farming with logistics, processing and marketing. Farmer's welfare being central to any agricultural policy makes it very pertinent to study how a value chain works and can be strengthened further to realize this policy goal. This book adds value to the existing research by studying the value chains end-to-end across a wide spectrum of agricultural commodities with the holistic lens of CISS-F. It is not enough that a value chain is competitive but not inclusive or it is competitive and inclusive but not sustainable. The issue of scalability is very critical to achieve macro gains in terms of greater farmer outreach and sectoral growth. The research undertaken here brings out some very useful insights for policymaking in terms of what needs to be done better to steer the agricultural value chains towards being more competitive, inclusive, sustainable and scalable. The value chain specific research findings help draw very nuanced policy recommendations as well as present a big picture of the future direction of policy making in agriculture.

**Critical Perspectives on Work and Employment in Globalizing India** Ernesto Noronha,Premilla D'Cruz.2017-03-30 This book showcases issues of work and employment in contemporary India through a critical lens, serving as a systematic, scholarly and rigorous resource which provides an alternate view to the glowing metanarrative of the subcontinent's ongoing economic growth in today's globalized world. Critical approaches ensure that divergent and marginalized voices are highlighted, promoting a more measured perspective of entrenched standpoints. In casting social reality differently, a quest for solutions that reshape current dynamics is triggered. The volume spans five thematic areas, subsuming a range of economic sectors. India is a pre-eminent destination for offshoring, underscoring the relevance of global production networks (Theme 1). Yet, the creation of jobs has not transformed employment patterns in the country but rather accentuated informalization and casualization (Theme 2). Indeed, even India's ICT-related sectors, perceived as mascots of modernity and vehicles for upward mobility, raise questions about the extent of social upgrading (Theme 3). Nonetheless, these various developments have not been accompanied by collective action - instead, there is growing evidence of diminished pluralistic employment relations strategies (Theme 4). Emergent concerns about work and employment such as gestational surrogacy and expatriate experiences attest to the evolving complexities associated with offshoring (Theme 5).

**Procurement of Works** .2000 These Standard Prequalification Documents serve as a guide for those wanting to prequalify to bid on large contracts for projects financed by the World Bank. Qualifying as a bidder is separate from the bid evaluation process. Before invitations to bid on large or especially complex works projects are issued, a process of prequalification is required to select competent bidders. This document helps bidders through the prequalification process. To simplify presentation by applicants for prequalification, standard forms have been prepared for the

submission of relevant information. Guidance notes and examples are provided for the implementing agency making the evaluation. Annexes give information about prequalification that are likely to be of interest to potential bidders on World Bank projects. NOTE: This replaces Standard Prequalification Document: Procurement of Works (September 1999), Stock no. 14601 (ISBN 0-8213-4601-6).

**Slow Violence and the Environmentalism of the Poor** Rob Nixon.2011-06-01 The violence wrought by climate change, toxic drift, deforestation, oil spills, and the environmental aftermath of war takes place gradually and often invisibly. Using the innovative concept of slow violence to describe these threats, Rob Nixon focuses on the inattention we have paid to the attritional lethality of many environmental crises, in contrast with the sensational, spectacle-driven messaging that impels public activism today. Slow violence, because it is so readily ignored by a hard-charging capitalism, exacerbates the vulnerability of ecosystems and of people who are poor, disempowered, and often involuntarily displaced, while fueling social conflicts that arise from desperation as life-sustaining conditions erode. In a book of extraordinary scope, Nixon examines a cluster of writer-activists affiliated with the environmentalism of the poor in the global South. By approaching environmental justice literature from this transnational perspective, he exposes the limitations of the national and local frames that dominate environmental writing. And by skillfully illuminating the strategies these writer-activists deploy to give dramatic visibility to environmental emergencies, Nixon invites his readers to engage with some of the most pressing challenges of our time.

**Hook Point** Brendan Kane.2020-09-29 Hook Point: How to Stand Out in a 3-Second World, by out of the box thinker Brendan Kane, breaks down the most effective strategies to generate new opportunities, innovate and scale your business, and create a compelling brand--both online and off--so you can thrive in the new micro-attention world in which we live. A lot of people know who they are, what they do, and a few even know why they do it--

but even when brands or individuals have clarity in these areas, they often struggle to grab a potential audience's attention for long enough to get them to learn about their attributes. Others have amazing products or services that fail to achieve great success because they don't know how to talk about what they do effectively. This is because digital and social media have reshaped our world into one of micro-attention. There are over sixty billion messages shared on digital platforms each day, and the average person is exposed to between four thousand to ten thousand ads a day. This bombardment of stimuli has changed the way we communicate and market content both online and off. In fact, research shows that you have less than three seconds to capture a person's attention. With such a short window of time, we need to hook audiences quickly, efficiently, and consistently if we want to successfully fuel brand awareness and growth. Luckily, Brendan Kane, an out of the box thinker and strategist who's built platforms for celebrities like Taylor Swift and Rhianna, and worked with Fortune 500 companies like Paramount, Viacom, and MTV has mastered the art of standing out. In *Hook Point: How to Stand Out in a 3-Second World* he reveals the power of hook points--a communication tool that helps marketers package their messages in a succinct, attention-grabbing way that leads to better opportunities both online and off. Whether you're promoting a brand, product, or service this book is the essential guide for making it in our three-second world.

Betel-quid and Areca-nut Chewing and Some Areca-nut-derived Nitrosamines IARC Working Group on the Evaluation of Carcinogenic Risks to Humans,International Agency for Research on Cancer.2004 A working group of sixteen experts from seven countries re-evaluated the evidence of the carcinogenicity of betel-quid and areca-nut chewing and some areca-nut related nitrosamines. Betel-quid and areca-nut chewing are widely practised in many parts of Asia and in Asian-migrant communities elsewhere in the world. There are hundreds of millions of users worldwide. They evaluated betel quid with tobacco as carcinogenic to humans (Group 1) on the basis of sufficient evidence of an increased risk of cancer of the oral cavity, pharynx and oesophagus. The working group reviewed epidemiological studies of human cancer, mainly studies from India, Pakistan and Taiwan (China). Studies on betel quid with tobacco and areca nut with tobacco in experimental animals now also provide sufficient evidence of carcinogenicity. The working group also evaluated betel quid without tobacco as carcinogenic to humans (Group 1), on the basis of sufficient evidence of an increased risk of oral cancer. Studies on betel quid without tobacco and areca nut without tobacco in experimental animals now also provide sufficient evidence of carcinogenicity. Areca nut, a common ingredient of betel quid and many different chewing preparations, including those available commercially, has been observed to cause oral submucous fibrosis

*University Research for Innovation* Luc Weber,James J. Duderstadt.2010 Drawn from the 7th Glion Colloquium held in 2009, this volume considers the role of research universities in an innovation-driven global society. Whether in the old world of Europe and North America or in rapidly developing nations, the message is clear: innovation has become the key to prosperity and social well-being in a hypercompetitive global economy. Part I introduces several forms of economic, technological, and social innovation. Part II discusses agents of innovation from the points of view of a

research university, industry, and national innovation policies. Part III presents university leaders from long-established and emerging institutions to compare how regional and institutional characteristics shape innovation strategies. Part IV focuses on approaches to innovation at national and institutional levels, including a U.S. approach to energy challenges, the shift of high-tech industry toward open innovation, and the challenges of creating world-class universities. Part V addresses the intellectual character of innovation and its relationship to the university's mission. Today's economy requires not only leadership in innovation but also educated citizens capable of applying technology, talent, and capital in new ways. Institutions of higher learning must collaborate with industry and government to create a climate and culture that enable innovation to thrive.

**Harvesting Prosperity** Keith Fuglie, Madhur Gautam, Aparajita Goyal, William F. Maloney. 2019-11-05 Back cover blurb Rising agricultural productivity has driven improvements in living standards for millennia. Today, redoubling that effort in developing countries is critical to reducing extreme poverty, ensuring food security for an increasing global population, and adapting to changes in climate. This volume presents fresh analysis on global trends and sources of productivity growth in agriculture and offers new perspectives on the drivers of that growth. It argues that gains from the reallocation of land and labor are not as promising as believed, so policy needs to focus more on the generation and dissemination of new technologies, which requires stepping up national research efforts. Yet, in many of the poorest nations, a serious research spending gap has emerged precisely at the time when the challenges faced by agriculture are intensifying. The book focuses on how this problem can be redressed in the public sector, as well as on reforms aimed at mobilizing new private sector actors and value chains, particularly creating a better enabling environment, reforming trade regulations, introducing new products, and strengthening intellectual property rights. On the demand side, the book examines what recent research reveals about policies to reduce the barriers impeding smallholder farmers from adopting new technologies. Harvesting Prosperity is the fourth volume of the World Bank Productivity Project, which seeks to bring frontier thinking on the measurement and determinants of productivity to global policy makers. "As rightly argued by the authors, growth in agricultural productivity is the essential instrument to promote development in low-income agriculture-based countries. Achieving this requires research and development, upgrading of universities, reinforcement of farmer capacities, removal of constraints to adoption, and the development of inclusive value chains with interlinked contracts. As important, such efforts also need to be placed within a context of comprehensive agricultural, rural, and structural transformations. However, in many countries implementation of the requisite policies has been lagging. This book, with contributions from many top experts in the field, provides the most up-to-date presentation of this argument and explains in detail how to successfully put its ideas into practice. Governments, the private sector, and civil society organizations need to study it carefully to turn the promise of agriculture for development into a reality." Alain de Janvry and Elisabeth Sadoulet Professors of the Graduate School, University of California at Berkeley
