Manifestations of Stroke M. Paciaroni,G. Agnelli,V. Caso,J. Bogousslavsky.2012-02-16 Stroke is the most common neurologic disease and the leading cause of adult disability in Western countries. The initial diagnosis of stroke is clinical and needs to be done as rapidly as possible to guarantee optimal medical and interventional therapy. The emergency stroke management depends heavily upon stroke scores to quantify the damage and to speed up the diagnosis process. Unfortunately, several important stroke syndromes are not taken into consideration in these currently used stroke scores and therefore tend to be overlooked and not treated. Compiled by leading international experts, this book provides an excellent overview on current stroke syndromes, including particularly problematic clinical pictures. Thus, together with stroke scores, the publication will lead to more thorough assessments in emergency settings. This book is indispensable for neurologists, neurosurgeons, neuroradiologists and physicians involved in the care of stroke patients.

A History of Neuropsychology J. Bogousslavsky,F. Boller,M. Iwata.2019-04-30 Neuropsychology has become a very important aspect for neurologists in clinical practice as well as in research. Being a specialized field in psychology, its long history is based on different historical developments in brain science and clinical neurology. In this volume, we want to show how present concepts of neuropsychology originated and were established by outlining the most important developments since the end of the 19th century. The articles of this book that cover topics such as aphasia, amnesia and dementia show a great multicultural influence due to an editorship and authorship that spans all developmental initiatives in Europe, Asia, and America. This book gives a better understanding of the development of higher brain function studies and is an interesting read for neurologists, psychiatrists, psychologists, neurosurgeons, historians, and anyone else interested in the history of neuropsychology.

Hypnerotomachia Poliphili Francesco Colonna.2019-01-09 Francesco Colonna's weird, erotic, allegorical antiquarian tale, *Hypnerotomachia Poliphili*, together with all of its 174 original woodcut illustrations, has been called the first stream of consciousness novel and was one of the most important documents of Renaissance imagination and fantasy. The author -- presumed to be a friar of dubious reputation -- was obsessed by architecture, landscape and costume (it is not going too far to say sexually obsessed) and its woodcuts are a primary source for Renaissance ideas.

Neuroanatomia e neurologia clinica veterinaria Eric Glass,Alexander de Lahunta.2015-10-01T00:00:00+02:00 Edizione italiana a cura di Massimo Baroni e Francesca Cozzi Questo volume presenta la neurologia clinica veterinaria in stretta correlazione con la neuroanatomia. Partendo dalla presentazione delle vie neuroanatomiche e della neuropatologia si arriva alla comprensione dei segni clinici e delle disfunzioni che osserviamo nei nostri pazienti; la visita neurologica è lo strumento con cui identificare i deficit clinici e arrivare alla localizzazione neuroanatomica ed è il fondamento che, accanto alla conoscenza delle malattie neurologiche, permette la scelta d'indagini diagnostiche appropriate e di una terapia mirata.
