Engineering Technology Education in the United States

National Academy of Engineering,Committee on Engineering Technology Education in the United States.2017-01-27

The vitality of the innovation economy in the United States depends on the availability of a highly educated technical workforce. A key component of this workforce consists of engineers, engineering technicians, and engineering technologists. However, unlike the much better-known field of engineering, engineering technology (ET) is unfamiliar to most Americans and goes unmentioned in most policy discussions about the US technical workforce.

Engineering Technology Education in the United States seeks to shed light on the status, role, and needs of ET education in the United States.
