Handbook of Interpersonal Communication Gerd Antos,Eija Ventola.2008-12-10 Interpersonal communication (IC) is a continuous game between the

interacting interactants. It is a give and take - a continuous, dynamic flow that is linguistically realized as discourse as an on-going sequence of interactants' moves. Interpersonal communication is produced and interpreted by acting linguistically, and this makes it a fascinating research area. The handbook, *Interpersonal Communication*, examines how interactants manage to exchange facts, ideas, views, opinions, beliefs, emotion, etc. by using the linguistic systems and the resources they offer. In interpersonal communication, the fine-tuning of individuals' use of the linguistic resources is continuously probed. The language used in interpersonal communication enhances social relations between interactants and keeps the interaction on the normal track. When interaction gets off the track, linguistic miscommunication may also destroy social relationships. This volume is essentially concerned with this fine-tuning in discourse, and how it is achieved among various interactant groups. The volume departs from the following fundamental questions: How do interpersonal relations manifest themselves in language? What is the role of language in developing and maintaining relationships in interpersonal communication? What types of problems occur in interpersonal communication and what kind of strategies and means are used to solve them? How does linguistically realized interpersonal communication interact with other semiotic modes? Interpersonal communication is seen and researched from the perspective of what is being said or written, and how it is realized in various generic forms. The current research also gives attention to other semiotic modes which interact with the linguistic modes. It is not just the social roles of interactants in groups, the possible media available, the non-verbal behaviors, the varying contextual frames for communication, but primarily the actual linguistic manifestations that we need to focus upon when we want to have a full picture of what is going on in human interpersonal communication. It is this linguistic perspective that the volume aims to present to all researchers interested in IC. The volume offers an overview of the theories, methods, tools, and resources of linguistically-oriented approaches, e.g. from the fields of linguistics, social psychology, sociology, and semiotics, for the purpose of integration and further development of the interests in IC., Topics e.g.: Orientation to interaction as primarily linguistically realized processes Expertise on theorizing and analyzing cultural and situational contexts where linguistic processes are realized Expertise on handling language corpora Expertise on theorizing and analyzing interaction types as genres Orientation to an integrated view of linguistic and non-linguistic participant activities and of how interactants generate meanings and interact with space Expertise on researching the management of the linguistic flow in interaction and its successfulness.

The Apocryphal Gospels Jens Schroter.2021-11-19 The New Testament contains four accounts of the life of Jesus. To some people in antiquity, four was too many. Disagreements in the Gospels over what Jesus said and did triggered debate between insiders and drew criticism from outsiders. To other people, four was not enough. As early as the first century, Christians wrote additional gospels, each with their own portrayal of Jesus and depictions of his relationships with his family, his followers, and his Father. While these gospels were not included in the New Testament canon, many continued to be important for Christian thought and practice; all these texts, moreover, are significant for the study of emergent Christianity. This short, accessible introduction draws on current scholarship on the various noncanonical (or apocryphal) gospels to present this fascinating literature to readers eager to learn more about their origins, contents, and meaning. The book begins with a discussion of the distinction between gospels that became canonical and those that came to be regarded as apocryphal. Then, the gospels are presented in chapters arranged according to Jesus' ministry: from Infancy Gospels to texts about Jesus' earthly career to his passion, resurrection, and postresurrection appearances. This book demonstrates how early Christians confronted crises in their communities through story, crafting new accounts of Jesus' life that expanded upon and

sometimes challenged the Gospels that became canonical. The apocryphal gospels are not Scripture, but they are no less valuable for understanding Christianity in its formative centuries and beyond.

SS Peiper Charles Whiting. 2012 On the night of 14 July, 1976 - Bastille Day - an elderly German was brutally murdered in a little French village where he had taken refuge from the evil shadow which had dogged him for the past thirty-two years. His killers were never brought to justice; indeed, no real attempt was ever made to track them down, the affair being politically embarrassing to both the French and the German governments. The murdered man was Jochen Peiper, once the dashing leader of one of the most renowned units in the German Army. The shadow which hung over him was his alleged complicity in the murder of over seventy unarmed American soldiers during the Ardennes offensive in the winter of 1944/45. It is certain that Peiper was not at the fateful crossroads near Malmédy at the time the men died, but that is not to say that they were not killed on his orders. Guilty or not, Peiper was tried and imprisoned after the war and on his release might have been said to have paid his debt for his supposed part in what had become known as the Malmédy Massacre. But there were those who thought otherwise. After exhaustive research, this classic work sees Charles Whiting tell the story of this enigmatic man, regarded by some as a brilliant and dashing leader of men, by others as a Nazi war criminal, with the vividness and punch which characterized Peiper's military career. All the facts may never be uncovered but all that are known are recorded here. What is certain is that Jochen Peiper remains one of the most controversial military figures to emerge from the maelstrom of the Second World War.--Publisher description.

Airport Competition Peter Forsyth, David Gillen, Jürgen Müller, Hans-Martin Niemeier. 2016-03-23 The break-up of BAA and the blocked takeover of Bratislava airport by the competing Vienna airport have brought the issue of airport competition to the top of the agenda for air transport policy in Europe. Airport Competition reviews the current state of the debate and asks whether airport competition is strong enough to effectively limit market power. It provides evidence on how travellers chose an airport, thereby altering its competitive position, and on how airports compete in different regions and markets. The book also discusses the main policy implications of mergers and subsidies.

Lifelogging Stefan Selke. 2016-06-14 The following anthology delivers sound analysis to the theoretical classification of the current societal phenomenon - between innovative, world changing and yet disruptive technology, as well as societal and cultural transformation. Lifelogging, digital self-tracking and the real-time chronicling of man's lifetime, is not only a relevant societal topic in the world of research and academic science these days, but can also be found in literature, cultural pages of the written press and the theatre. The spectrum of Lifelogging ranges from sleep, mood, sex and work logging to Thing and Deathlogging. This leads to several questions: How does one live in a data society? Is "measured" man automatically also "better" man? And if so, what is the cost? Do new categories of reality or principles of social classification develop as a result of Lifelogging? How does the "social view" on things change? The authors in this anthology provide insightful answers to these pressing questions.

Participation and Reconciliation Armin G. Wildfeuer, Sami Adwan. 2011-03-08 In order to make justice work, participation and reconciliation is needed within and between societies, peoples, and nations. In this compilation, authors—senior academics as well as students-- from Bethlehem University, Israel, and the Catholic University of Applied Sciences, Cologne, Germany, contribute to this important field. Thus, to some extent, the book in itself is an example of the subjects it deals with.

The Hitler Book Henrik Eberle, Matthias Uhl. 2009-03-25 Stalin had never been able to shake off the nightmare of Adolf Hitler. Just as in 1941 he refused to understand that Hitler had broken their non-aggression pact, he was in 1945 unwilling to believe that the dictator had committed suicide in the debris of the Berlin bunker. In his paranoia, Stalin ordered his secret police, the NKVD, precursor to the KGB, to explore in detail every last vestige of the private life of the only man he considered a worthy opponent, and to clarify beyond doubt the circumstances of his death. For months two captives of the Soviet Army--Otto Guensche, Hitler's adjutant, and Heinz Linge, his personal valet--were interrogated daily, their stories crosschecked, until the NKVD were convinced that they had the fullest possible account of the life of the Führer. In 1949 they presented their work, in a single copy, to Stalin. It is as remarkable for the depth of its insight into Adolf Hitler--from his specific directions to Linge as to how his body was to be burned, to his sense of humor--as for what it does not say, reflecting the prejudices of the intended reader: Joseph Stalin. Nowhere, for instance, does the dossier criticize Hitler's treatment of the Jews. Today, the 413-page original of Stalin's personal biography of Hitler is a Kremlin

treasure and it is said to be held in President Putin's safe. The only other copy, made by order of Stalin's successor, Nikita Khrushchev, in 1959, was deposited in Moscow Party archives under the code number 462A. It was there that Henrik Eberle and Matthias Uhl, two German historians, found it. Available to the public in full for the first time, *The Hitler Book* presents a captivating, astonishing, and deeply revealing portrait of Hitler, Stalin, and the mutual antagonism of these two dictators, who between them wrought devastation on the European continent.

Technology and Vocational Education for Sustainable Development Margarita Pavlova.2008-12-14 Empowerment is the overarching idea used in this book. The term has a variety of meanings in different sociocultural and political contexts, including “self-strength, control, self-power, self-reliance, own choice, life of dignity in accordance with one’s values, capable of fighting for one’s rights, independence, own decision making, being free, awakening, and capability” (The World Bank, 2002, p. 10). However, the World Bank report observed that most definitions focus on issues of “gaining power and control over decisions and resources that determine the quality of one’s life” (p. 10). This interpretation of empowerment provides a useful starting point for the development of the series of interconnected arguments explored here. Establishment of the basis for understanding, identifying and developing strategies through education necessary for individuals to be able to make choices that influence the quality of their lives is the main aim of this book. There are a number of assumptions and boundaries that frame this analysis. First, the book focuses on “agents”; however, empowerment is often conceptualised in terms of relationships between agency and structure (e. g. , Alsop, Bertelsen, & H- land, 2006). Agency could be defined as “an actor’s or group’s ability to make purposeful choices – that is, the actor is able to envisage and purposively choose options” (p. 11).

God is Beautiful Navid Kermani.2018-10-29 The melodious recitation of the Quran is a fundamental aesthetic experience for Muslims, and the start of a compelling journey of ideas. In this important new book, the prominent German writer and Islamic scholar Navid Kermani considers the manner in which the Quran has been perceived, apprehended and experienced by its recipients from the time of the Prophet to the present day. Drawing on a wide range of Muslim sources, from historians, theologians and philosophers to mystics and literary scholars, Kermani provides a close reading of the nature of this powerful text. He proceeds to analyze ancient and modern testimonies about the impact of Quranic language from a variety of angles. Although people have always reflected on the reception of texts, images and sounds that they find beautiful or moving, Kermani explains that Islam provides a particularly striking example of the close correlation, grounded in a common origin, between art and religion, revelation and poetry, and religious and aesthetic experience. This major new book will enhance the dialogue between Islam and the West and will appeal to students and scholars of Islam and comparative religion, as well as to a wider readership interested in Islam and the Quran.

Ludwig Börne Heinrich Heine.2006 First English translation of Heine's controversial though masterful polemic, with introduction and commentary.

In 1840, Heinrich Heine, the major German poet of Jewish origin of the age, published a book on Ludwig Börne, the major German political writer of Jewish origin of the period, who had died three years before. Regarded by Heine and others as his best-written book, it was also his most disastrously conceived. Intended to recover the high ground of revolutionary principle and philosophy against the attacks mounted on him by Börne and his supporters, the book was instead met by a storm of outrage from which it seemed Heine's reputation might never recover. In the course of time, the evaluation was reversed; Heine was increasingly celebrated as a true herald of revolution. His vocabulary of Hellenism and Nazarenism, employed for the first time in Börne, was transmitted into English usage by Matthew Arnold. But Börne itself is Heine's only major work that has never been fully translated into English. The commentary to the edition clarifies the conflict between the two most prominent German-Jewish public intellectuals of their time, corrects the misapprehensions constantly in circulation about their relationship and the book, and reveals the many peculiarities of the text. Jeffrey L. Sammons is Leavenworth Professor of German Emeritus at Yale University and the author of four books on Heine.

Schools of Koranic Commentators Ignác Goldziher. 2006 Goldziher, the greatest Islamicist of his day, and one of the most profound and original scholars in Europe in an age that produced veritable giants in this field, is presented here with what he considered his great opus, first published in 1920 in Leiden. Since his study tour in the East, 1873-1874, he had such a command of Arabic so as to discuss matters of dogmatics, fiqh, poetry, and syntax with local scholars. The work is largely based on his study and translation of Arabic primary sources. He treats the evolution of the science of tafsir from its most elementary stage, the 'Uthmanic' recension, down to early twentieth century interpretations of Rashid Rida and Syed Ameer Ali, touching upon dogmatics, asceticism, mysticism as well as rationalism. The translator, an old hand at translating Goldziher, displays a sensible, pragmatic attitude towards the considerable problem presented by Goldziher's style.

The Logic of Care Annemarie Mol. 2008-05-24 **Shortlisted for the BSA Sociology of Health and Illness Book Prize 2010** What is good care? In this innovative and compelling book, Annemarie Mol argues that good care has little to do with 'patient choice' and, therefore, creating more opportunities for patient choice will not improve health care. Although it is possible to treat people who seek professional help as customers or

citizens, Mol argues that this undermines ways of thinking and acting crucial to health care. Illustrating the discussion with examples from diabetes clinics and diabetes self care, the book presents the 'logic of care' in a step by step contrast with the 'logic of choice'. She concludes that good care is not a matter of making well argued individual choices but is something that grows out of collaborative and continuing attempts to attune knowledge and technologies to diseased bodies and complex lives. Mol does not criticise the practices she encountered in her field work as messy or ad hoc, but makes explicit what it is that motivates them: an intriguing combination of adaptability and perseverance. The Logic of Care: Health and the problem of patient choice is crucial reading for all those interested in the theory and practice of care, including sociologists, anthropologists and health care professionals. It will also speak to policymakers and become a valuable source of inspiration for patient activists.

Family Connections D. H. J. Morgan.1996-08-27 Family Connections is a major new introduction to the study of the family, written by one of the leading scholars in the field. Morgan shows that the study of the family is not a peripheral concern of sociology but rather lies at the heart of sociological theory and research. Family Connections takes the reader through the established debates, such as the relation between family life and the world of work and employment, the impact of class and stratification on the family, and the relevance of gender. Morgan then examines some newer areas of social inquiry, including the sociology of the body, time and space, food, and the home. The relevance of the family to more general topics of sociological theory - such as postmodernity, citizenship, consumption and risk - is discussed. The emphasis throughout is on family relationships as processes which are fluid, complex and open to change.

Machine Medical Ethics Simon Peter van Rysewyk,Matthijs Pontier.2014-09-05 The essays in this book, written by researchers from both humanities and science, describe various theoretical and experimental approaches to adding medical ethics to a machine, what design features are necessary in order to achieve this, philosophical and practical questions concerning justice, rights, decision-making and responsibility in medical contexts, and accurately modeling essential physician-machine-patient relationships. In medical settings, machines are in close proximity with human beings: with patients who are in vulnerable states of health, who have disabilities of various kinds, with the very young or very old and with medical professionals. Machines in these contexts are undertaking important medical tasks that require emotional sensitivity, knowledge of medical codes, human dignity and privacy. As machine technology advances, ethical concerns become more urgent: should medical machines be programmed to follow a code of medical ethics? What theory or theories should constrain medical machine conduct? What design features are required? Should machines share responsibility with humans for the ethical consequences of medical actions? How ought clinical relationships involving machines to be modeled? Is a capacity for empathy and emotion detection necessary? What about consciousness? This collection is the first book that addresses these 21st-century concerns.

Childhood and Children's Culture Flemming Mouritsen,Jens Qvortrup.2002 For over a decade, sociologically oriented childhood research and research on child culture have experienced a dramatic growth within the humanities and the social sciences as well as an increasing prominence at the institutional level. This book is the meeting place of two closely related fields of research: childrens culture and the history of childhood on the one hand, and the sociology and anthropology of childhood on the other. The two 'camps' share a joint methodological view of children as agents in their own lives, environments and even in society at large, yet it is also agreed that their lives and welfare are largely formed by adults and the society in which they live. Both research areas have been vital for the development of new strands of childhood research which are in many ways characterised by a departure from more conventional approaches, concepts and understandings that have dominated childhood research -- and

childhood itself -- in much of the 20th century. The articles in the book represent numerous aspects of the two areas of research. In a critical vein, the sociologically and anthropologically oriented contributions cover studies of structural aspects of childhood as well as qualitative studies of childrens everyday life, while the culturally oriented contributions comprise classical studies of childrens culture products, history, media, play culture and symbolic forms of expression. The articles present general differences and divergences in methods and perspectives, but also show what the two types of approach have in common.
