**The Human Factor in Cybercrime and Cybersecurity** E. Rutger Leukfeldt. 2017 With the digitization of society, crime has also digitized. Digitization has consequences for the entire spectrum of crime and raises all sorts of questions. For example, are we dealing with a new type of offender, or with the same old offenders who simply moved their activities online? How can potential victims be made resilient against attacks? And who should protect potential victims: the police, commercial cybersecurity companies, or internet service providers? To date, many of these questions remain unanswered. This is partly because current studies have a strong focus on technology or are exploratory in nature, suffer from methodological limitations and focus on just a few of the many types of cybercrime. The aim of this research agenda is to stimulate research on the human factor in cybercrime and cybersecurity. The agenda provides the state-of-the-art of research on the role of the human factor in this field. In addition, examples are given of important research questions and innovative methods and datasets that are needed for future studies.

**The Third Industrial Revolution** Jeremy Rifkin. 2011-10-04 The Industrial Revolution, powered by oil and other fossil fuels, is spiraling into a dangerous endgame. The price of gas and food are climbing, unemployment remains high, the housing market has tanked, consumer and government debt is soaring, and the recovery is slowing. Facing the prospect of a second collapse of the global economy, humanity is desperate for a sustainable economic game plan to take us into the future. Here, Jeremy Rifkin explores how Internet technology and renewable energy are merging to create a powerful Third Industrial Revolution. He asks us to imagine hundreds of millions of people producing their own green energy in their homes, offices, and factories, and sharing it with each other in an energy internet, just like we now create and share information online. Rifkin describes how the five-pillars of the Third Industrial Revolution will create thousands of businesses, millions of jobs, and usher in a fundamental reordering of human relationships, from hierarchical to lateral power, that will impact the way we conduct commerce, govern society, educate our children, and engage in civic life. Rifkin's vision is already gaining traction in the international community. The European Union Parliament has issued a formal declaration calling for its implementation, and other nations in Asia, Africa, and the Americas, are quickly preparing their own initiatives for transitioning into the new economic paradigm. The Third Industrial Revolution is an insider's account of the next great economic era, including a look into the personalities and players — heads of state, global CEOs, social entrepreneurs, and NGOs — who are pioneering its implementation around the world.

**Cybercriminal Networks** E. R. Leukfeldt. 2016 Cybercriminal networks make use of digital means, such as phishing, malware, or hacking to steal money from customers of financial institutions. The author analyzes the processes of origin, growth, and criminal capabilities to put forward several explanations for the differences found between traditional criminal networks and cybercriminal networks. Although the majority of these cybercriminal networks still rely on real-world social ties for their origin and growth, some networks make full use of the advantages that digitization provides. As a new kind of offender convergence setting, forums provide a fluid form of cooperation, making dependency relationships seen in traditional criminal networks less important. Furthermore, examples were found of prolonged, repeated interaction through online communities, which raises the question to what extent digital social ties differ from their real-world counterparts. This study forms an important evidence-based contribution to the criminological knowledge about cybercriminal networks. Furthermore, based on the empirical results, the author outlines possibilities for situational crime prevention against cybercriminal networks. This book will therefore be of interest both to academics and practitioners in the field of cybercrime and cyber security. Dissertation. [Subject: Criminology, Criminal Law, Cyber Security]

**Politie en gezondheidszorg (CPS 2016 - 3, nr. 40)** L. Gunther Moor, W. Vanderplasschen, A. van Dijk. 2016-08-10 In de uitvoering komen politie en gezondheidszorg elkaar vanuit hun eigen functie regelmatig tegen. De contacten kunnen betrekking hebben op (drugs-)overlast of gerelateerde problemen, zedenzaken, psychiatrische stoornissen bij (veel-)plegers, geweld, calamiteiten en crisissituaties. Het gemeenschappelijke element bij al deze zaken is dat zij direct de leefbaarheid en veiligheid van buurtbewoners raken. Politie en gezondheidszorg hebben niettemin een andere functie en finaliteit, wat tot grensproblemen kan leiden. En toch is het ondertussen overduidelijk dat de aanpak van veel urgente maatschappelijke problemen om een gecombineerde aanpak vraagt van beide sectoren. Ondanks deze groeiende nood aan een betere afstemming en gemeenschappelijke aanpak bestaat er relatief weinig literatuur over de raakvlakken en vormen van samenwerking tussen politie en gezondheidszorg. Dit Cahier voorziet in deze leemte. De Cahiers Politiestudies verschijnen trimestrieel. Zij zijn onderworpen aan een internationale double blind peer review en worden samengesteld door de gasteditoren, de hoofdredacteur en de editorial board, i.s.m. de redactie.
