We provide a range of services to the book industry internationally, aiding the discovery and purchase, distribution and sales measurement of books. Project Gutenberg is one of the largest sources for free books on the web, with over 30,000 downloadable free books available in a wide variety of formats. Project Gutenberg is the oldest (and quite possibly the largest) library on the web, with literally hundreds of thousands of free books available for download. The vast majority of books at Project Gutenberg are released in English, but there are other languages available. However, Scribd is not free. It does offer a 30-day free trial, but after the trial you'll have to pay \$8.99 per month to maintain a membership that grants you access to the site's entire database of books, audiobooks, and magazines. Still not a terrible deal! As the name suggests, Open Library

features a library with books from the Internet Archive and lists them in the open library. Being an open source project the library catalog is editable helping to create a web page for any book published till date. From here you can download books for free and even contribute or correct. The website gives you access to over 1 million free e-Books and the ability to search using subject, title and author. PixelScroll lists free Kindle eBooks every day that each includes their genre listing, synopsis, and cover. PixelScroll also lists all kinds of other free goodies like free music, videos, and apps. International Digital Children's Library: Browse through a wide selection of high quality free books for children here. Check out Simple Search to get a big picture of how this library is organized: by age, reading level, length of book, genres, and more. Most free books on Google Play are new titles that the author has self-published via the platform, and some classics are conspicuous by their absence; there's no free

edition of Shakespeare's complete works, for example.
