The Geography of Rural Change Brian Ilbery.2014-09-11 The Geography of Rural Change provides a thorough examination of the processes and outcomes of rural change as a result of a period of major restructuring in developed market economies. After outlining the main dimensions of rural change, the book progresses from a discussion of theoretical insights into rural restructuring to a consideration of both the extensive use of rural land and the changing nature of rural economy and society. The text places an emphasis on relevant principles, concepts and theories of rural change, and these are supported by extensive case study evidence drawn from different parts of the developed world. The Geography of Rural Change is written for undergraduates taking courses in human geography, agricultural geography, rural geography, rural sociology, planning and agricultural economics.

Field Guide to the Reptiles of South-East Asia Indraneil Das.2015-06-18 South-East Asia is home to one of the most diverse reptile faunas on Earth. A Field Guide to the Reptiles of South-East Asia is

the first comprehensive guide to the snakes, lizards, crocodiles, tortoises and turtles of the region. Covering more than 1000 species and subspecies in thorough detail, this field guide provides authoritative, up-to-date information on identification, habitat, behaviour, subspecies, distribution and status. The informative text explains the behaviour and morphology of reptiles, as well as how to measure and identify species according to scale counts and other anatomical features. South-East Asia is one of the most important ecotourism destinations in the world, with an expanding local market as wildlife conservation assumes greater prominence locally. This guide is essential reading for anyone interested in the wildlife of the region - wildlife enthusiasts, students, conservation planners and specialists alike.

Hydrometry W. Boiten.2020-10-28 *Hydrometry* presents a thorough introduction to the science of hydrometry: the measurement of flow in open channels. Dealing with both traditional techniques and innovative new methods and instruments, in line with the latest ISO standards, this book deals with the main themes of hydrometry: the measurement of water levels and bed levels, of discharge, and of sediment transport; it considers the use of flow measuring structures, hydrological networks, and the organization of surveys. Dr Boiten has extensive experience of teaching students from many countries and backgrounds, and has distilled this experience into a clear and comprehensive account of hydrology and water resource management. *Hydrometry* will appeal to graduate students and to professionals engaged in hydrology and the management of water resources.

Hydrology in Practice Elizabeth M. Shaw, Keith J. Beven, Nick A. Chappell, Rob Lamb.2017-12-21

Hydrology in Practice is an excellent and very successful introductory text for engineering hydrology students who go on to be practitioners in consultancies, the Environment Agency, and elsewhere. This fourth edition of Hydrology in Practice, while retaining all that is excellent about its predecessor, by Elizabeth M. Shaw, replaces the material on the Flood Studies Report with an equivalent section on the methods of the Flood Estimation Handbook and its revisions. Other completely revised sections on instrumentation and modelling reflect the many changes that have occurred over recent years. The updated text has taken advantage of the extensive practical experience of the staff of JBA Consulting who use the methods described on a day-to-day basis. Topical case studies further enhance the text and the way in which students at undergraduate and MSc level can relate to it. The fourth edition will also have a wider appeal outside the UK by including new material on hydrological processes, which also relate to courses in geography and environmental science departments. In this respect the book draws on the expertise of Keith J. Beven and Nick A. Chappell, who have extensive experience of field hydrological studies in a variety of different environments, and have taught undergraduate hydrology courses for many years. Second- and final-year undergraduate (and MSc) students of hydrology in engineering, environmental science, and geography departments across the globe, as well as professionals in environmental protection agencies and consultancies, will find this book invaluable. It is likely to be the course text for every undergraduate/MSc hydrology course in the UK and in many cases overseas too.

The Canon of Medicine (al-Qānūn Fī'l-ṭibb) Avicenna,Laleh Bakhtiar.2014-10 Vol. 2: Published for the first time in English alphabetical order, vol. 2 (of the 5 original volumes) of Canon of Medicine (Law of Natural Healing), is an essential addition to the history of medicine as it holds a treasure of information on natural pharmaceuticals used for over 1000 years to heal various diseases and disorders. Fully color illustrated with a 150 page, 7000 word index of the healing properties of each of the entries, the text itself is an alphabetical listing of the natural pharmaceuticals of the simple compounds. By simple compounds, Avicenna includes the individual plants, herbs, animals and minerals that have healing properties. Avicenna lists 800 tested natural pharmaceuticals

including plant, animal and mineral substances. The compiler has included the Latin, Persian and Arabic names of the drugs along with artistic renderings of the drugs as illustrations as well as Avicenna's Tables or Grid for each entry that describes the individual, specific qualities of simple drugs.

Rapid Health Assessment Protocols for Emergencies World Health Organization.1999 This book provides a collection of ten protocols for conducting rapid health assessments in the immediate aftermath of different types of emergencies. Noting the vital importance of rapid and accurate information in the earliest stage of an emergency, the protocols respond to the urgent need for common standardized technical tools for assessing damage, gauging health risks, and gathering the information immediately needed by decision-makers at the national and international level. The protocols were prepared by WHO in collaboration with a large number of international agencies and experts with broad experience in the field of emergency management. Although all protocols follow a common format, each is specific to the circumstances, potential hazards, and immediate information needs that characterize a distinct type of emergency. Emphasis is placed on the exact information needed, the best sources of data and methods for rapid collection, and the specific questions that need to be answered in order to draw initial conclusions and direct immediate actions. Although the advantages of using experienced assessments teams are stressed, the book also explains how the protocols can be used to train general health workers as part of emergency preparedness. The book opens with an introductory protocol covering the aims and methods, responsibilities, complexities, and inherent difficulties of rapid health assessments. Addressed to health authorities as well as assessment teams, the chapter also includes abundant advice on preparedness for emergencies. Details range from the comparative need for speed in different types

of emergencies, through a suggested format for presenting the results of assessments, to a list of common logistic, organizational, and technical errors. Advice on the best working practices, including ways to avoid being an emergency tourist, is also provided. Against this background, the additional nine protocols are presented according to a common format which covers the purpose of the assessment, preparedness, the steps to follow during the assessment, assessing the impact on health, assessing local response capacity and immediate needs, and presenting results. A general protocol on epidemics of infectious origin is followed by protocols specific to meningitis outbreaks, outbreaks of viral haemorrhagic fever, including yellow fever, and outbreaks of acute diarrhoeal disease, with information specific to dysentery and cholera. Sudden-impact natural disasters are covered in the next protocol, which includes a day-by-day list of information priorities for different stages of the disaster. A protocol dealing with sudden population displacements offers guidelines for conducting rapid health assessments in all emergencies caused by sudden displacement of refugees or population groups within a country. Included are a sample checklist for rapid assessments and a sample form for weekly reports on morbidity and mortality. Subsequent protocols deal with the special situations of nutritional emergencies and chemical emergencies, including those caused by food contaminated with chemicals or toxins. The final protocol addresses the difficult task of conducting assessments in complex emergencies in which the cause of the emergency, as well as the assistance to the afflicted, is complicated by intense levels of political considerations. The protocol includes a form which has recently been used for rapid health assessment at local level in Bosnia and Herzegovnia. The book concludes with a brief summary of survey techniques, followed by a tabular presentation of reference values for assessing needs, hazards, and logistic requirements in developing countries.

Profil Struktur, Bumbu, dan Bahan dalam Kuliner Indonesia Murdijati Gardjito, Rhaesfaty Galih Putri, Swastika Dewi.2018-08-14 Dalam buku ini telah dilakukan bedah kuliner terhadap 34 “cuisine” Indonesia dari aspek struktur, bumbu, serta bahannya. Dalam buku ini terangkum profil struktur, bumbu, dan bahan dalam kuliner Indonesia yang terdiri atas ribuan jenis hidangan yang dapat tersaji di meja makan seluruh bangsa Indonesia yang sebelumnya belum pernah dihitung. Kuliner yang terkait dengan aspek sosial budaya dari berbagai etnis di Indonesia telah didapatkan dan dicari benang merahnya satu sama lain. Dari hasil penelitian ini didapatkan lebih dari tiga ribu nama hidangan yang terdiri atas makanan utama (208 macam), lauk pauk nabati dan hewani (1.800 macam), kudapan basah dan kering (hampir seribu macam), dan minuman dari seluruh negeri

teridentifikasi hampir 150 macam. Hal ini merupakan salah satu bukti Indonesia merupakan dapur gastronomi terbesar di dunia. Biodiversity (keanekaragaman) yang sangat tinggi dipadu dengan lebih dari 130 jenis bumbu telah mendukung terciptanya hidangan seluruh negeri. Pembahasan bumbu khas daerah dapat dibaca dalam buku ini untuk mengetahui sebaran dan pancaran kenikmatan dalam seluruh pulau zamrud khatulistiwa yang termasyhur itu. Indonesia telah membumbui dunia sejak revolusi cita rasa di Prancis tahun 1500. Hal ini dikemukakan dalam buku ini. Diungkapkan pula pada setiap daerah terdapat bumbu khas masing-masing pada 34 daerah kuliner yang ada. Pengaruh bangsa-bangsa lain di dunia (Arab, Persia, Turki, Kamboja, India, Melayu, dan Cina) serta akulturasi internal etnis dalam negeri seperti pengaruh kuliner Aceh di Minangkabau, pengaruh Minangkabau di Jambi, Riau, Kalimantan Barat, Bugis, dan Mandar, juga pengaruh Jawa di Lampung sangat mewarnai ragam kuliner Indonesia. Hal-hal yang istimewa yang terjadi dalam kuliner Indonesia yang menyangkut struktur, bumbu, dan bahan dibahas tuntas dalam buku ini. Pembaca yang ingin tahu mengenai struktur, bumbu, dan bahan dalam kuliner Indonesia dapat melakukan pendalaman melalui tulisan yang ditulis secara komprehensif ini. Dalam buku ini tergiring arah pemikiran untuk mengidentifikasi ikon kuliner Indonesia dengan berbagai pertimbangan yang penting. Terbukti bahwa rendang dan es cendol telah terpilih sebagai makanan lezat di tingkat dunia. Rijsttafel telah mampu menjadi ikon makanan Indonesia, khususnya di Belanda. Menurut sebarannya, gulai, soto, dan sate pantas menjadi representasi dalam hidangan Indonesia. Disusul hidangan gado-gado, makanan berbasis tempe, serta aneka kudapan berbasis beras, ketan, dan singkong. Memahami kuliner Indonesia sungguh pengalaman berharga karena menikmati hidangan merupakan bagian yang tidak boleh dilewatkan apalagi ditinggalkan dalam hidup ini. Memahami kuliner Indonesia dapat meningkatkan rasa cinta tanah air dan bangsa.

Introduction to Hydrology Warren Viessman, Gary L. Lewis. 1996 This text gives a comprehensive look at the field of hydrology and the current issues affecting the discipline currently. Six parts provide in-depth coverage of the hydrologic cycle, hydrologic measurement and monitoring, surface water hydrology, groundwater hydrology, hydrologic modelling and statistical methods. The inclusion of water quality and social dimensions relates science to public policy.

Atlas of Benthic Foraminifera Ann Holbourn, Andrew S. Henderson, Norman Macleod. 2013-04-03 An up-to-date atlas of an important fossil and living group, with the Natural History Museum. Deep-sea benthic foraminifera have played a central role in biostratigraphic, paleoecological, and paleoceanographical research for over a century. These single-celled marine protists are important

because of their geographic ubiquity, distinct morphologies and rapid evolutionary rates, their abundance and diversity in deep-sea sediments, and because of their utility as indicators of environmental conditions both at and below the sediment-water interface. In addition, stable isotopic data obtained from deep-sea benthic foraminiferal tests provide paleoceanographers with environmental information that is proving to be of major significance in studies of global climatic change. This work collects together, for the first time, new morphological descriptions, taxonomic placements, stratigraphic occurrence data, geographical distribution summaries, and palaeoecological information, along with state-of-the-art colour photomicrographs (most taken in reflected light, just as you would see them using light microscopy), of 300 common deep-sea benthic foraminiferal species spanning the interval from Jurassic - Recent. This volume is intended as a reference and research resource for post-graduate students in micropalaeontology, geological professionals (stratigraphers, paleontologists, paleoecologists, palaeoceanographers), taxonomists, and evolutionary (paleo)biologists.

Introduction to Physical Hydrology Richard J. Chorley. 2019-04-10 Originally published in this form in 1971, the content of this book was originally part of a larger composite volume 'Water, Earth and Man' (1969) which provided a synthesis of hydrology, geomorphology and socio-economic geography. This volume brings together the systematic theme of physical hydrology while maintaining a link with the original book which emphasised the benefit of the study of water being considered in the widest sense within the physical and social environments.

Alluvial Fan Flooding National Research Council, Division on Earth and Life Studies, Commission on Geosciences, Environment and Resources, Committee on Alluvial Fan Flooding. 1996-11-07

Alluvial fans are gently sloping, fan-shaped landforms common at the base of mountain ranges in arid and semiarid regions such as the American West. Floods on alluvial fans, although characterized by relatively shallow depths, strike with little if any warning, can travel at extremely high velocities, and can carry a tremendous amount of sediment and debris. Such flooding presents unique problems to federal and state planners in terms of quantifying flood hazards, predicting the magnitude at which those hazards can be expected at a particular location, and devising reliable mitigation strategies. Alluvial Fan Flooding attempts to improve our capability to determine whether areas are subject to alluvial fan flooding and provides a practical perspective on how to make such a determination. The book presents criteria for determining whether an area is subject to flooding and provides examples of applying the definition and criteria to real situations in Arizona, California, New Mexico, Utah, and elsewhere. The volume also contains recommendations for the Federal Emergency Management Agency, which is primarily responsible for floodplain mapping, and for state and local decisionmakers involved in flood hazard reduction.

Stream Hydrology Nancy D. Gordon, Thomas A. McMahon, Brian L. Finlayson, Christopher J. Gippel, Rory J. Nathan. 2013-05-03 Since the publication of the first edition (1994) there have been rapid developments in the application of hydrology, geomorphology and ecology to stream management. In particular, growth has occurred in the areas of stream rehabilitation and the evaluation of environmental flow needs. The concept of stream health has been adopted as a way of assessing stream resources and setting management goals. Stream Hydrology: An Introduction for Ecologists Second Edition documents recent research and practice in these areas. Chapters provide information on sampling, field techniques, stream analysis, the hydrodynamics of moving water, channel form, sediment transport and commonly used statistical methods such as flow duration and

flood frequency analysis. Methods are presented from engineering hydrology, fluvial geomorphology and hydraulics with examples of their biological implications. This book demonstrates how these fields are linked and utilised in modern, scientific river management. Emphasis on applications, from collecting and analysing field measurements to using data and tools in stream management. Updated to include new sections on environmental flows, rehabilitation, measuring stream health and stream classification. Critical reviews of the successes and failures of implementation. Revised and updated windows-based AQUAPAK software. This book is essential reading for 2nd/3rd year undergraduates and postgraduates of hydrology, stream ecology and fisheries science in Departments of Physical Geography, Biology, Environmental Science, Landscape Ecology, Environmental Engineering and Limnology. It would be valuable reading for professionals working in stream ecology, fisheries science and habitat management, environmental consultants and engineers.

Indonesian Primates Sharon Gursky-Doyen, Jatna Supriatna. 2010-01-15 Indonesia possesses the second largest primate population in the world, with over 33 different primate species. Although Brazil possesses more primate species, Indonesia outranks it in terms of its diversity of primates, ranging from prosimians (slow lorises and tarsiers), to a multitude of Old World Monkey species (macaques, langurs, proboscis monkeys) to lesser apes (siamangs, gibbons) and great apes (orangutans). The primates of Indonesia are distributed throughout the archipelago. Partly in response to the number of primates distributed throughout the Indonesian archipelago, Indonesia is classified as the home of two biodiversity hotspots (Wallacea and Sundaland). In order to be classified as a hotspot, an area must have a large proportion of endemic species coupled with a high degree of threat including having lost more than 70% of its original habitat. Two areas within

Indonesia meet these criteria. The tremendous diversity of primates in Indonesia, in conjunction with the conservation issues facing the primates of this region, created a need for this volume.
