The Total Survey Error Approach Herbert F. Weisberg.2009-12-29 In 1939, George Gallup's American Institute of Public Opinion published a pamphlet optimistically titled The New Science of Public Opinion Measurement. At the time, though, survey research was in its infancy, and only now, six decades later, can public opinion measurement be appropriately called a science, based in part on the development of the total survey error approach. Herbert F. Weisberg's handbook presents a unified method for conducting good survey research centered on the various types of errors that can occur in surveys—from measurement and nonresponse error to coverage and sampling error. Each chapter is built on theoretical elements drawn from specific disciplines, such as social psychology and statistics, and follows through with detailed treatments of the specific types of error and their potential solutions. Throughout, Weisberg is attentive to survey constraints, including time and ethical considerations, as well as controversies within the field and the effects of new technology on the survey process—from Internet surveys to those completed by phone, by mail, and in person. Practitioners and students will find this comprehensive guide particularly useful now that survey research has assumed a primary place in both public and academic circles.

Rethinking Japanese Modernism Roy Starrs.2011-10-14 By adopting an open, multidisciplinary, and transnational approach, this book sheds new light both on the specific achievements and on the often-unexpected interrelationships of the writers, artists and thinkers who helped to define the Japanese version of modernism and modernity.

Food Insecurity and Hunger in the United States National Research Council,Division of Behavioral and Social Sciences and Education,Committee on National Statistics,Panel to Review the U.S Department of Agriculture's Measurement of Food Insecurity and Hunger.2006-05-02 The United States is viewed by the world as a country with plenty of food, yet not all households in America are food secure, meaning access at all times to enough food for an active, healthy life. A proportion of the population experiences food insecurity at some time in a given year because of food deprivation and lack of access to food due to economic resource constraints. Still, food insecurity in the United States is not of the same intensity as in some developing countries. Since 1995 the U.S. Department of Agriculture (USDA) has annually published statistics on the extent of food insecurity and food insecurity with hunger in U.S. households. These estimates are based on a survey measure developed by the U.S. Food Security Measurement Project, an ongoing collaboration among federal agencies, academic researchers, and private organizations. USDA requested the Committee on National Statistics of the National Academies to convene a panel of experts to undertake a two-year study in two phases to review at this 10-year mark the concepts and methodology for measuring food insecurity and hunger and the uses of the measure. In Phase 2 of

the study the panel was to consider in more depth the issues raised in Phase 1 relating to the concepts and methods used to measure food security and make recommendations as appropriate. The Committee on National Statistics appointed a panel of 10 experts to examine the above issues. In order to provide timely guidance to USDA, the panel issued an interim Phase 1 report, *Measuring Food Insecurity and Hunger: Phase 1 Report*. That report presented the panel's preliminary assessments of the food security concepts and definitions; the appropriateness of identifying hunger as a severe range of food insecurity in such a survey-based measurement method; questions for measuring these concepts; and the appropriateness of a household survey for regularly monitoring food security in the U.S. population. It provided interim guidance for the continued production of the food security estimates. This final report primarily focuses on the Phase 2 charge. The major findings and conclusions based on the panel's review and deliberations are summarized.

Parenting Matters National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on Supporting the Parents of Young Children. 2016-11-21 Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. *Parenting Matters* identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Obesogenic Environments Amelia Lake, Tim G. Townshend, Seraphim Alvanides. 2011-06-09 In a world where obesity has now reached epidemic proportions, a thorough understanding of the underlying causes of the problem is essential if society, public health initiatives and government policies are to successfully address the issue. The obesogenic environment describes all the possible influences that our environment presents which encourage overweight and obesity in individuals and populations. Beginning with an overarching introduction to obesity and its implications for health and wellbeing, the book will move on to consider such crucial areas as eating behaviours and food environments, physical activity and the environment, the urban environment, methods, policy and future research directions. Brings together expertise from across a range of disciplines Written by a truly multidisciplinary team of international authors Presents some of the most innovative thinking in the battle against obesity This groundbreaking book brings together for the first time the knowledge of experts with backgrounds in nutrition and dietetics, policy, epidemiology, environmental sciences, medical sciences, town planning and urban design, transport, geography and physical activity in order to offer a multidisciplinary approach to public health, suggesting new

and exciting ways to shape our environment to better support healthful decisions.

Handbook of Color Psychology Andrew J. Elliot, Mark D. Fairchild, Anna Franklin. 2015-12-17 We perceive color everywhere and on everything that we encounter in daily life. Color science has progressed to the point where a great deal is known about the mechanics, evolution, and development of color vision, but less is known about the relation between color vision and psychology. However, color psychology is now a burgeoning, exciting area and this Handbook provides comprehensive coverage of emerging theory and research. Top scholars in the field provide rigorous overviews of work on color categorization, color symbolism and association, color preference, reciprocal relations between color perception and psychological functioning, and variations and deficiencies in color perception. The Handbook of Color Psychology seeks to facilitate cross-fertilization among researchers, both within and across disciplines and areas of research, and is an essential resource for anyone interested in color psychology in both theoretical and applied areas of study.

Black Identities Mary C. WATERS. 2009-06-30 The story of West Indian immigrants to the United States is generally considered to be a great success. Mary Waters, however, tells a very different story. She finds that the values that gain first-generation immigrants initial success--a willingness to work hard, a lack of attention to racism, a desire for education, an incentive to save--are undermined by the realities of life and race relations in the United States. Contrary to long-held beliefs, Waters finds, those who resist Americanization are most likely to succeed economically, especially in the second generation.

Charity and Poverty in Advanced Welfare States Cameron Parsell, Andrew Clarke, Francisco Perales. 2021-09-20 This book conceptualises the role of charity to people who are poor in wealthy countries and outlines a set of practical and conceptual ideas for how it could be reimagined. Despite professionalised welfare states and strong economies, in many advanced industrialised nations, charity continues to play a major role in the lives of people who are poor. Extending what we know about how neoliberalism drives a decayed welfare state that outsources welfare provisioning to charities and community initiatives, this book asks how can we understand and conceptualise society's willingness to engage in charitable acts towards the poor, and how can charity be reimagined to contribute to justice in an unjust society? Through interrogating multiple data sources, including government datasets, survey datasets, media analyses, and ethnographic data, this book shows that charity is not well-suited to addressing the material dimension of poverty. It argues the need for a revised model of charity with the capacity to contribute to social solidarity that bridges social divisions and is inclusive of the poor. Presenting a model for reimagining charity which enables reciprocity and active contributions from recipients and providers, this book shows how power imbalances flowing from the unidirectional provision of charity can be reduced, allowing opportunities for reciprocal care that foster both well-being and solidarity. This book will be of

interest to all scholars and students of social policy, public policy, social welfare, sociology, and social work.

Eat Like a Human Bill Schindler.2024-01-11 Vegan or carnivore? Vegetarian or gluten-free? Keto or Mediterranean? Fasting or Paleo? Our relationship to food is filled with confusion and insecurity. Every day we hear about a new ingredient that is good or bad, a new diet that promises everything. But the truth is that none of those labels matter. The secret to becoming healthier, losing weight, living a pain-free and energetic life and healing the planet has nothing to do with counting calories, reducing portion sizes or feeling deprived - the key is re-learning how to eat like a human. This means finding food that is as nutrient-dense as possible, and preparing that food using methods that release those nutrients and make them safe and bioavailable to our bodies, which is exactly what allowed our ancestors, millions of years ago, to not only live but thrive. Archaeologist and primitive technologist Dr Bill Schindler draws on cutting-edge science and a lifetime of research to show readers how to live like modern 'hunter-gatherers' by using the same strategies our ancestors used - as well as techniques still practiced by many cultures around the world - to make food as safe, nutritious, bioavailable and delicious as possible. With each chapter dedicated to a specific food group, in-depth explanations of different foods and cooking techniques and concrete takeaways, as well as 75+ recipes, *Eat Like a Human* will permanently change the way you think about food, and help you live a happier, healthier, and more connected life.

Security Supervision and Management IFPO.2007-12-14 The International Foundation for Protection Officers (IFPO) has for many years provided materials to support its certification programs. The current edition of this book is being used as the core text for the Security Supervision and Management Training/Certified in Security Supervision and Management (CSSM) Program at IFPO. The CSSM was designed in 1988 to meet the needs of the security supervisor or senior protection officer. The book has enjoyed tremendous acceptance and success in the past, and the changes in this third edition, vetted by IFPO, make it still more current and relevant. Updates include 14 new chapters, 3 completely revised chapters, Student Performance Objectives in each chapter, and added information on related resources (both print and online). * Completion of the Security Supervision and Management Program is the initial step toward the Certified in Security Supervision and Management (CSSM) designation * Over 40 experienced security professionals contribute chapters in their area of specialty * Revised throughout, and completely updated with 14

new chapters on topics such as Leadership, Homeland Security, Strategic Planning and Management, Budget Planning, Career Planning, and much more. * Quizzes at the end of each chapter allow for self testing or enhanced classroom work

Food Deserts in Chicago United State Commission on Civil Rights.2016-04-28 The Illinois Advisory Committee to the U.S. Commission on Civil Rights submits this report, Food Deserts in Chicago, as part of its responsibility to examine and report on civil rights issues in Illinois under the jurisdiction of the Commission. The Committee has been monitoring the issue of health disparities in Chicago for several years and this report is the culmination of research, a briefing, numerous working group sessions, and, finally, a fact finding meeting on the issue in August 2010. The report was approved by a vote of 18 to 1. At the start of this project, it did not take long to realize that many Chicago neighborhoods are considered food deserts because of the difficulty residents of these areas have in accessing fresh, nutritious foods, in particular fruits and vegetables. Of note to this Committee is the fact that these food desert neighborhoods are almost exclusively in African American neighborhoods.

Information Technology and the U.S. Workforce National Academies of Sciences, Engineering, and Medicine,Division on Engineering and Physical Sciences,Computer Science and Telecommunications Board,Committee on Information Technology, Automation, and the U.S. Workforce.2017-04-18 Recent years have yielded significant advances in computing and communication technologies, with profound impacts on society. Technology is transforming the way we work, play, and interact with others. From these technological capabilities, new industries, organizational forms, and business models are emerging. Technological advances can create enormous economic and other benefits, but can also lead to significant changes for workers. IT and automation can change the way work is conducted, by augmenting or replacing workers in specific tasks. This can shift the demand for some types of human labor, eliminating some jobs and creating new ones. Information Technology and the U.S. Workforce explores the interactions between technological, economic, and societal trends and identifies possible near-term developments for work. This report emphasizes the need to understand and track these trends and develop strategies to inform, prepare for, and respond to changes in the labor market. It offers evaluations of what is known, notes open questions to be addressed, and identifies promising research pathways moving forward.

The Routledge Handbook of Anthropology and Reproduction Sallie Han, Cecília Tomori. 2021-11-09 The *Routledge Handbook of Anthropology and Reproduction* is a comprehensive overview of the topics, approaches, and trajectories in the anthropological study of human reproduction. The book brings together work from across the discipline of anthropology, with contributions by established and emerging scholars in archaeological, biological, linguistic, and sociocultural anthropology. Across these areas of research, consideration is given to the contexts, conditions, and contingencies that mark and shape the experiences of reproduction as always gendered, classed, and racialized. Over 39 chapters, a diverse range of international scholars cover topics including: Reproductive governance, stratification, justice, and freedom. Fertility and infertility. Technologies and imaginations. Queering reproduction. Pregnancy, childbirth, and reproductive loss. Postpartum and infant care. Care, kinship, and alloparenting. This is a valuable reference for scholars and upper-level students in anthropology and related disciplines associated with reproduction, including sociology, gender studies, science and technology studies, human development and family studies, global health, public health, medicine, medical humanities, and midwifery and nursing.

The Story of English in India N. Krishnaswamy, Lalitha Krishnaswamy. 2006 With globalization, English has become an economic necessity and Indians have realized that they have the 'English advantage' over many other countries like China and Japan. India has shed its colonial complexes towards English and has come to terms with the language; Indians have separated the English language from the English. *The Story of English in India* presents historical facts in a socio-cultural framework. The book is a must for all teachers and students of English; it will be useful for all those interested in the politics of language and education in India. Key issues discussed: - Are we indebted to the British for introducing English in India? - What was the role of English during India's struggle for freedom? - Has English united India? - Has English divided India into two - the English knowing classes who govern and the non-English knowing masses who are governed? - Will English ever become an Indian tongue spoken in the great Indian language bazaar? - What will be the future of major Indian languages in the wake of the English onslaught? Will it end in linguistic imperialism and cultural colonialism?

Vampire Capitalism Paul Kennedy.2016-12-25 This book argues that in recent decades an unrestrained vampire-capitalism has emerged, disengaged from the needs of citizens and workers, leading to a deepening of social class, generational, gender, educational and ethnic divisions. The author explores how our cultural obsession with self-realization undermines our capacity for collective action and ability to confront threats such as climate change and the impact of the rapid advance of technology on labour. Drawing on sociology and political economy as well as worldwide case studies, the chapters interrogate how we arrived at these dilemmas and how we might escape them through establishing alternative social economies. *Vampire Capitalism* will be of interest to students and scholars across a range of disciplines, including sociology, social theory, globalisation studies, development studies, political economy, geography, politics and social policy.
