How to Draw Anything Sciberia.2019 Remember how you used to draw with confidence and joy as a child' This book will help you harness that natural skill, and along the way you will discover how drawing will give your thoughts clarity, trigger memories, invigorate passions and find solutions. As children, when we learn to write, we gain an important life skill: a practical means of communicating that we end up using almost every day of our lives, if only to jot down a shopping list or dash out an email. As children, we also know instinctively that drawing is a great way to communicate, but later in life it isn't universally valued and nurtured in the way that writing is. It's not seen as a necessity, it's seen as a specialism. As a result, most of us stop drawing completely, apart from the odd doodling. More than that, we lose all confidence in our ability to draw. Yet drawing is an incredibly practical way of turning what's inside your head into something tangible and useful. It can equip you with new means of solving problems, sharing ideas and telling stories. How to Draw Anything sets out to repair our broken relationship with drawing. It will inspire you to pick up that pencil from where you left it all those years ago and start making pictures again. It will give you back the confidence and joy in drawing you never should have lost. And it will take drawing out of the art world and put it into your world, introducing you to drawing as a practical tool for everyday life that will change the way you work, think and communicate. Do something amazing and learn a new skill thanks to the Little Ways to Live a Big Life books!

Who Are You & What Have You Done with My Kid? Amanda Craig.2022-09-20 So you have a Tween! What now? Dr. Amanda Craig knows what it's like to watch your child go from sweet elementary student to moody tween in the span of just a few years and she's here to help navigate you through it! How do we keep our kids close while cultivating the confidence they'll need to grow up? How do we navigate the inevitable dips, divides, and potholes? Where do we find the strength, self-awareness, and wisdom that amount to a path forward? Despite the parenting opportunities in the tween years, we often spend time focused on academics and the social concerns of elementary school then quickly pivot to worries about safety, drugs, sex and the rebellious behavioral issues of the teen years. We think we're connecting but we're not. We miss the neurological explosion that is taking place before us as tweens experience four significant changes that shake them (and us) to their core. Their brains are changing. They feel and experience emotions they do not recognize. They're hyperaware of themselves. They do not know how to express themselves. Most importantly, parents still have a "seat at the table" to make positive impressions on their tweens as they prepare them for the teenage years.
