Intermediate Accounting Kin Lo, George Fisher. 2016-01-01 Lo/Fisher is praised for its readability and conversational writing style that helps students better understand difficult concepts in Accounting. Lo/Fisher presents the how and why of reporting accounting information from within an easily-understood theoretical framework. Lo/Fisher has a clean layout that engages the reader with a clear writing style using plain English. This text is built on the current International Financial Reporting Standards (IFRS) and incorporates Accounting Standards for Private Enterprise (ASPE) where appropriate. Our philosophy is that when students understand the current standards, they will be able to analyze and interpret changes in the future. Intermediate Accounting James Stice, Earl Stice, Fred Skousen. 2006-03-29 This intermediate accounting text links accounting principles to the central activities of a business. A user/decision making approach, combined with the necessary coverage of GAAP, prepares the student to understand accounting in terms of a business' activities, which reflects the broadening definition of accounting today. The text's efficient format does not overwhelm students, and its accessible style provides a nice alternative to more encyclopedic, reference-book approaches. The book offers a nice blend of the core concepts of accounting principles, with procedural applications. This approach is supplemented with the most expansive set of end-of-chapter material on the market, thorough integration of today's hot topics (it's the only intermediate text that has an entire chapter on Earnings Management), as well as a robust selection of student and instructor print and technology resources. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.
