Imprese ibride Paolo Venturi, Flaviano Zandonai. 2016-04-29T00:00:00+02:00 Profit e non profit, pubblico e privato, lavoro e volontariato: i confini tra queste dimensioni appaiono sempre più sfumati di fronte alla comparsa di sfere «ibride» in cui si affermano nuove e molteplici modalità di produrre valore da parte di imprese di capitali, organizzazioni non profit e amministrazioni pubbliche. Le imprese nel senso tradizionale del termine stanno infatti cambiando l'organizzazione della produzione di beni e servizi, fondendo in misura crescente nel loro modello di business le dimensioni economica, sociale e ambientale. Al tempo stesso, i soggetti non profit tendono a incrementare la percentuale di beni e servizi scambiati sul mercato con un accrescimento della componente produttiva. Infine, lo Stato assume il ruolo di soggetto promotore e attore di processi che vedono la partecipazione attiva dei cittadini, mettendo a disposizione il patrimonio di infrastrutture inutilizzate e degradate. Un modo nuovo di essere e agire per creare valore condiviso, sviluppare soluzioni innovative a bisogni non soddisfatti, creare spazi di innovazione sociale che mettono al centro la persona. Gli esempi non mancano e fanno ben sperare.

Medical Talk and Medical Work Paul Atkinson, Professor Paul Anthony Atkinson. 1995-06-15 The development of a sociology of medical knowledge is both assessed and contributed to in *Medical Talk and Medical Work*. Underlying the analysis is research on the work of haematologists, which

offers a rich resource for understanding the complexities and contradictions between physical bodies and social embodiment, medical talk and technical apparatus. Using but moving beyond this specific material, Paul Atkinson demonstrates the strengths and weaknesses of the existing understanding of medical knowledge. Among the issues explored are: the place of interaction among doctors, rather than between doctors and patients, in defining the construction of medical knowledge; the ways in which clinical opinion is socially produced and the nature of the local settings through which this process occurs; and the relations among medical knowledge, medical language and the increasingly technological contexts of contemporary medical practice.

Combating Poverty in Local Welfare Systems Alexandru Panican, Håkan Johansson. 2016-07-12 This book analyzes national anti-poverty measures at a local level via a set of unique and up-to-date empirical studies of minimum income support schemes and activation measures in five European cities. In examining this 'local welfare system' approach, it investigates the role that civil society organizations play, and the governance arrangements that prevail in contacts between public and civil society actors in local anti-poverty strategies. The current financial and economic crisis has caused increasing levels of poverty and unemployment, and put national minimum income protection schemes under severe strain. *Combating Poverty in Local Welfare Systems* therefore represents a timely and important intervention in the political and scientific debates as to whether more 'local welfare' is the solution to the challenges facing European welfare states.

Nudge and the Law Alberto Alemanno, Anne-Lise Sibony. 2015-09-24 Behavioural sciences help refine our understanding of human decision-making. Their insights are immensely relevant for policy-making since public intervention works much better when it targets real people rather than imaginary beings assumed to be perfectly rational. Increasingly, governments around the world are keen to rely on those insights for reshaping public interventions in a wide range of policy areas such as energy, health, financial services and data protection. When policy-making meets behavioural sciences, effective and low-cost regulations can emerge in the form of default rules, smart disclosure and simplification requirements. While behaviourally-informed intervention has a huge potential for policymaking, it also attracts legitimacy and practicability concerns. *Nudge and the Law* takes a European perspective on those issues and explores the legal implications of the emergent phenomenon of behavioural regulation by focusing on the challenges and opportunities it may offer to EU policy-making and beyond.

The General Logic trilogy Mauro Contato. 2019-02-28 «I miei libri, perlopiù raccolte di numerose citazioni, considerazioni e per i quali mi si potrà forse accusare di un certo manierismo, sono anche scritti per chi, stanco di letture che "abbaiano e mordono, ma in fondo, lasciano il tempo che trovano" è alla ricerca di una sorta di piccola antologia di scritti indipendenti fuori da ogni cliché.» Sarebbe bello avere una raccolta delle citazioni più significative della letteratura, un'amorevole guida, risultato di dieci anni di letture impegnate e, in alcuni casi, alternative, con analisi approfondite sulla vita e la morte, sulla politica, sull'economia, sul calcio, sulla musica e l'arte in generale. Ecco, l'opera che state tenendo in mano è proprio questo: Mauro Contato ha realizzato questo straordinario volume, in cui possiamo trovare citazioni che spaziano da Francesco Guccini a Jean-Jacques Rousseau, considerazioni frutto di attente riflessioni e soprattutto di un amore incondizionato. L'autore, infatti, ci prende per mano e ci racconta la sua vita, ci trasmette la passione per quello che ha appreso nella sua lunga ricerca e ce la racconta come un padre farebbe con i propri figli. Per dirlo con una citazione del libro: "È una storia scritta su pagine lastricate d'oro." (Giuseppe Genna) Mauro Contato è nato nel 1974 a Monselice dove tutt'ora vive. Si è

laureato nel 2002 in Scienze Politiche presso l'Università degli Studi di Padova. Ha lavorato per diversi anni ricoprendo vari ruoli presso due Agenzie per il lavoro e successivamente come Responsabile del Servizio Clienti presso una Società di vendita di gas ed energia elettrica. Per Europa Edizioni ha pubblicato Taccuino 2011-2013 e Taccuino 2014-2016.

Il malessere della medicina Guido Giarelli.2003 A partire dagli anni '80 lo scenario dei sistemi sanitari nelle società postindustriali ha cominciato a mutare radicalmente con l'avvio delle cosiddette riforme sanitarie: quali le ragioni di tali processi? E quali effetti le riforme hanno prodotto in termini di reale impatto sulla medicina e sui sistemi sanitari? Frutto di un intenso lavoro di ricerca comparata internazionale durato tre anni che si è avvalso di diverse fonti e metodologie (statistiche, documentarie, letteratura specialistica, case-study, interviste a testimoni significativi), questo testo propone un modello di analisi correlazionale dei processi di riforma dei sistemi sanitari occidentali più comprensivo degli approcci di natura prevalentemente economica sin qui dominanti.

Patient Engagement Guendalina Graffigna, Serena Barello, Stefano Triberti.2016-01-01 Patient engagement should be envisaged as a key priority today to innovate healthcare services delivery and to make it more effective and sustainable. The experience of engagement is a key qualifier of the exchange between the demand (i.e. citizens/patients) and the supply process of healthcare services. To understand and detect the strategic levers that sustain a good quality of patients' engagement may thus allow not only to improve clinical outcomes, but also to increase patients' satisfaction and to reduce the organizational costs of the delivery of services. By assuming a relational marketing perspective, the book offers practical insights about the developmental process of patients' engagement, by suggesting concrete tools for assessing the levels of patients' engagement and strategies to sustain it. Crucial resources to implement these strategies are also the new technologies that should be (1) implemented according to precise guidelines and (2) designed according to a user-centered design process. Furthermore, the book describes possible fields of patients' engagement application by describing the best practices and experiences matured in different fields

Insurance 4.0 Bernardo Nicoletti.2020-10-31 Industry 4.0 has spread globally since its inception in 2011, now encompassing many sectors, including its diffusion in the field of financial services. By combining information technology and automation, it is now canvassing the insurance sector, which is in dire need of digital transformation. This book presents a business model of Insurance 4.0 by detailing its implementation in processes, platforms, persons, and partnerships of the insurance companies alongside looking at future developments. Filled with business cases in insurance companies and financial services, this book will be of interest to those academics and researchers of insurance, financial technology, and digital transformation, alongside executives and managers of insurance companies.

Phenomenology of Suicide Maurizio Pompili.2017-10-10 This book will help the reader to understand the suicidal mind from a phenomenological point of view, shedding light on the feelings of suicidal individuals and also those of clinicians. In accordance with the importance that the phenomenological approach attaches to subjectivity and sense of self as the starting points for knowledge, emphasis is placed on the need for the clinician to focus on the subjective experiences of the at-risk individual, to set aside prior assumptions, judgments, or interpretations, and to identify ways of bridging gaps in communication associated with negative emotions. The vital importance of empathy is stressed, drawing attention to the insights offered by neuroimaging studies and the role of mirror neurons in social cognition. It is widely acknowledged that when a clinician meets a person who wants to die by suicide, the clinician does not fully understand what is going on inside the mind of that individual. This book recognizes that any approach to suicide prevention must promote understanding of suicidal thoughts and feelings. The awareness that it fosters and the innovative perspectives that it presents will appeal to a wide readership.

Le svolte della vita - Come curarsi senza perdersi per strada Giovanna Brocchieri.2017-08-16 Abbiamo mai fatto un calcolo di quanti soldi spendiamo in assistenza sanitaria? Abbiamo mai

veramente pensato a quanti benefici possiamo avere? Ma soprattutto... Abbiamo mai pensato a quante risorse avremmo potuto risparmiare? La guida lo spiega chiaramente nelle pagine: illustra non solo le possibilità che spesso ci neghiamo perché siamo poco informati, ma anche i risparmi in termini di tempo e di denaro cui stiamo rinunciando quotidianamente. Cos'è un piano di assistenza sanitaria integrativa? È collegato al mio contratto di lavoro? Posso accedervi se sono una libera professionista? Sono tutte domande che troveranno risposta nella guida Se informati si vince.

Health 4.0: How Virtualization and Big Data are Revolutionizing Healthcare Christoph Thuemmler, Chunxue Bai. 2017-01-07 This book describes how the creation of new digital services—through vertical and horizontal integration of data coming from sensors on top of existing legacy systems—that has already had a major impact on industry is now extending to healthcare. The book describes the fourth industrial revolution (i.e. Health 4.0), which is based on virtualization and service aggregation. It shows how sensors, embedded systems, and cyber-physical systems are fundamentally changing the way industrial processes work, their business models, and how we consume, while also affecting the health and care domains. Chapters describe the technology behind the shift of point of care to point of need and away from hospitals and institutions; how care will be delivered virtually outside hospitals; that services will be tailored to individuals rather than being designed as statistical averages; that data analytics will be used to help patients to manage their chronic conditions with help of smart devices; and that pharmaceuticals will be interactive to help prevent adverse reactions. The topics presented will have an impact on a variety of healthcare stakeholders in a continuously global and hyper-connected world. · Presents explanations of emerging topics as they relate to e-health, such as Industry 4.0, Precision Medicine, Mobile Health, 5G, Big Data, and Cyber-physical systems; · Provides overviews of technologies in addition to possible application scenarios and market conditions; · Features comprehensive demographic and statistic coverage of Health 4.0 presented in a graphical manner.

Sustainable Development Report 2021 Jeffrey Sachs, Christian Kroll, Guillaume Lafortune, Grayson Fuller, Finn Woelm. 2021-10-14 The Sustainable Development Report 2021 features the SDG Index and Dashboards, the first and widely used tool to assess country performance on the UN Agenda 2030 and the Sustainable Development Goals. The report analyses and outlines what needs to happen for the Decade of Action and Delivery of the SDGs. In order to build back better following the Covid-19 pandemic, especially low-income countries will need increased fiscal space. The report frames the implementation of the SDGs in terms of six broad transformations. The authors examine country performance on the SDGs for 193 countries using a wide array of indicators, and calculate future trajectories, presenting a number of best practices to achieve the historic Agenda 2030. The views expressed in this report do not reflect the views of any organizations, agency or programme of the United Nations. This title is available as Open Access on Cambridge Core.

Tumor Response Monitoring and Treatment Planning A. Heuck, P. Lukas, P. Kneschaurek, M. Mayr. 2013-12-11 Medical imaging progressed to a standard undreamt of not very many years ago. The advances are due to continuous development of radiological techniques and the introduction of magnetic resonance imaging. With the improved and new methods three-dimensional target volumes for radiation therapy can be defined with hitherto unknown precision. This leads to an improvement in irradiation techniques and, as a consequence, to a higher likelihood of tumor control and a lower risk of normal tissue complications. Besides the improvement in irradiation techniques the new

imaging methods may enable great strides in tumor response monitoring, not only in the detection of morphological alterations but also by showing physiological changes in the tumor during and after treatment by means of MRI and PET. This not only leads to better prognostic information but may also allow early evaluation of the response to treatment. It may then be possible to individualize the radiation dose but also the alternative-treatment for non-responders. This is certainly a future direction for radiation oncology.
