Highlights of Spanish Astrophysics V Jose M. Diego, Luis J. Goicoechea, J. Ignacio González-Serrano, Javier Gorgas. 2010-03-18 Astronomy is a scientific discipline that has developed a rapid and impressive growth in Spain. Thirty years ago, Spain occupied a purely anecdotal presence in the international context, but today it occupies the eighth position in the world in publication of astronomical articles, and, among other successes, owns and operates ninety per cent of the world's largest optical telescope GTC (Gran Telescopio Canarias). The Eighth Scientific Meeting of the Spanish Astronomical Society (Sociedad Española de Astronomía, SEA), held in Santander in July 7-11 2008, whose proceedings are in your hands, clearly shows the enthusiasm, motivation and quality of the present Spanish astronomical community. The event brought together 322 participants, who represent almost 50% of Spanish professional astronomers. This percentage, together with the continuously increasing, with respect to previous SEA meetings, number of oral presentations and poster contributions (179 and 127 respectively), confirms that the SEA conferences have become a point of reference to assess the interests and achievements of astrophysical research in Spain. The most important and current topics of modern Astrophysics were taken into account at the preliminary meeting, as well as the number and quality of participants and their contributions, to select the invited speakers and oral contributors. We took a week to enjoy the high quality contributions submitted by Spanish astronomers to the Scientific Organizing Committee. The selection was difficult. We wish to acknowledge the gentle advice and commitment of the SOC members.

Solve for Happy Mo Gawdat. 2017-03-21 In this "powerful personal story woven with a rich analysis of what we all seek" (Sergey Brin, cofounder of Google), Mo Gawdat, Chief Business Officer at

Google's [X], applies his superior logic and problem solving skills to understand how the brain processes joy and sadness—and then he solves for happy. In 2001 Mo Gawdat realized that despite his incredible success, he was desperately unhappy. A lifelong learner, he attacked the problem as an engineer would: examining all the provable facts and scrupulously applying logic. Eventually, his countless hours of research and science proved successful, and he discovered the equation for permanent happiness. Thirteen years later, Mo's algorithm would be put to the ultimate test. After the sudden death of his son, Ali, Mo and his family turned to his equation—and it saved them from despair. In dealing with the horrible loss, Mo found his mission: he would pull off the type of “moonshot” goal that he and his colleagues were always aiming for—he would share his equation with the world and help as many people as possible become happier. In *Solve for Happy* Mo questions some of the most fundamental aspects of our existence, shares the underlying reasons for suffering, and plots out a step-by-step process for achieving lifelong happiness and enduring contentment. He shows us how to view life through a clear lens, teaching us how to dispel the illusions that cloud our thinking; overcome the brain's blind spots; and embrace five ultimate truths. No matter what obstacles we face, what burdens we bear, what trials we've experienced, we can all be content with our present situation and optimistic about the future.

Witnessing beyond the Human Kate Jenckes.2017-05-01 Provides an innovative and theoretically rigorous approach to the subject of testimony in Latin America. This book rethinks the nature of

testimony beyond the ground of the human in works produced in Chile and Argentina from the 1970s to the present. Focusing on literature by Juan Gelman, Sergio Chejfec, and Roberto Bolaño, as well as art by Eugenio Dittborn, Kate Jenckes argues that these works represent life, death, and the relation between self and other [beyond the human,] that is beyond the sense that we can know and represent ourselves and others, with powerful implications for our understanding of history, community, and politics. Jenckes engages with the work of Jacques Derrida together with the intellectually rigorous field of Chilean aesthetic theory to explore issues related to the nature of testimony.

De-constructing Dahl Laura Viñas Valle. 2016-01-14 This is the first single-authored monograph on Roald Dahl since 1994. Remarkably, in spite of Dahl's commercial success, and the divided opinions he generates, very little scholarly work on the author has been produced. In the light of sociocultural constructivist theory, *De-constructing Dahl* focuses on the critical context, texts and paratexts that make up the packaging of "Dahl." It offers the first thorough overview of the criticism and the language employed to discuss Dahl since the 1970s, the difficulties that using such language entails, and how it still permeates current criticism. It delves into the relationship between Dahl's children's and adult fiction by drawing comparisons and contrasts and exploring the common traits and patterns that bring his whole work together. It also examines how Dahl constructed himself as a children's writer; how his publishing house and allies contribute to mediating and sustaining the

Dahl public persona; the ways that marketing strategies are responsible for the identity of his books; and how editorial decisions about the age range, and, therefore, how the classification of a manuscript as a book for children or for adults constructs particular ideas of what “children’s literature” is, and what is considered “appropriate” or “unsuitable” for children to read.

Serendipity to Life Isabel Minaselly.2019-10-30 Las líneas rectas y curvas de este libro son palabras a mí misma. Poemas, reflexiones y puntos de vista. No quiero que estés de acuerdo conmigo, es suficiente con que uno solo de estos versos llegue, y te acaricie el alma. Cuando estés trabajando en tus sueños, recuerda lo siguiente: Las personas que han conseguido el éxito, han tenido las mismas 24 horas al día que tú; si ellos han podido, es seguro, que tú, también puedes. El tiempo es el mismo para todos, aprovéchalo. Extracto del libro Serendipity To Life de Isabel Minaselly

Reclaiming the Inner Child Jeremiah Abrams.1990 The child is the father of the man. -- Wordsworth The inner child, that vital but submerged part of the self that connects us to both the joy and sadness of our childhood, is a key to our achieving fullest expression as adults. This child entity, says our editor Jeremiah Abrams, is the self we truly are and have always been, living within us in the here and now. This volume, a collection of 37 wide-ranging articles, defines and gives concrete reality to the abstract image of the inner child, revealing it to be the unifying symbol of the self, a symbol that represents, according to Carl Jung, the part of the human personality which wants to develop and become whole. The essays from depth psychology, literature, the 12-Step Program perspective, and other disciplines are woven together with Abrams' thoughtful commentary

to address the compelling themes the inner child brings to our awareness. Many of the selections address very practical objectives. - Realizing the promise of the child within and living out its destiny. - Reclaiming the innocence, playfulness, and wonder of the child in adulthood. - Healing the abandoned or abused inner child and resolving old traumas. - Tapping the child as symbol for our creative energy. - Forgiving our parents. - Developing compassionate awareness to be a better parent. - Completing the diverse unfinished business of childhood.

Oscar Masotta: Theory as Action Oscar Masotta. 2018-02-27 Oscar Masotta (Buenos Aires, 1930- Barcelona, 1979) is all but forgotten now, except perhaps in the field of Lacanian studies. This is because in the 1970s, Masotta would challenge the master psychoanalyst on his own turf, creating his own post-Lacanian school of psychoanalysis in Barcelona. But in 1965, aged just 27, Masotta taught at the University of Buenos Aires, lectured at the Di Tella, and edited a book series on communication and media. A product of the newly open post-Perón era--Page 91.

Comparative Literature Steven Tötösy de Zepetnek. 1998 This book serves several purposes, all very much needed in today's embattled situation of the humanities and the study of literature. First, in Chapter One, the author proposes that the discipline of Comparative Literature is a most advantageous approach for the study of literature and culture as it is a priori a discipline of cross-

disciplinarity and of international dimensions. After a Manifesto for a New Comparative Literature, he proceeds to offer several related theoretical frameworks as a composite method for the study of literature and culture he designates and explicates as the systemic and empirical approach. Following the introduction of the proposed New Comparative Literature, the author applies his method to a wide variety of literary and cultural areas of inquiry such as Literature and Cultural Participation where he discusses several aspects of reading and readership (Chapter Two), Comparative Literature as/and Interdisciplinarity (Chapter Three) where he deals with theory and application for film and literature and medicine and literature, Cultures, Peripherality, and Comparative Literature (Chapter Four) where he proposes a theoretical designation he terms inbetween peripherality for the study of East Central European literatures and cultures as well as ethnic minority writing, Women's Literature and Men Writing about Women(Chapter Five) where he analyses texts written by women and texts about women written by men in the theoretical context of Ethical Constructivism, The Study of Translation and Comparative Literature (Chapter Six) where after a theoretical introduction he presents a new version of Anton Popovic's dictionary for literary translation as a taxonomy for the study of translation, and The Study of Literature and the Electronic Age (Chapter Seven), where he discusses the impact of new technologies on the study of literature and culture. The analyses in their various applications of the proposed New Comparative Literature involve modern and contemporary authors and their works such as Dorothy Richardson, Margit Kaffka, Mircea Cartarescu, Robert Musil, Alfred Döblin, Hermann Hesse, Péter Esterházy, Dezső Kosztolányi, Michael Ondaatje, Endre Kukorelly, Else Seel, and others.

20 Poemas de Amor Y Una Canción Desesperanda Pablo Neruda.1995 Few writers of any age have described the pleasures and torments of erotic love with such unsentimental directness and sensual

precision as Pablo Neruda. In this poetry, too, he is at his most accessible, the language of his odes and lyrics refined to the point at which it achieves what one critic has called 'the naturalness of song.' This short selection draws on work from throughout his writing career, from the famous early collection, *Twenty Love Songs and a Song of Despair* of 1924 to key works of his maturity like *Elemental Odes* from 1954 and the autobiographical *Memorial de Isla Negra*. These ten poems formed the subtext for the well-known film *Il Postino* which was based on an apocryphal episode in the life of the Chilean poet and Nobel Laureate. They reveal why many believe that Neruda was the finest love poet of the century.

Un Dia de Inflexion Alejandro Caballero Montes de Oca.2021-07-20 La inflexión llega a la vida en los instantes menos esperados, momentos o situaciones, que suceden, a raíz de los cuales tu vida cambia... Y nada vuelve a ser como antes. Así es como sucede el punto de inflexión. Uno no decide cuándo vendrá ese punto de inflexión y tal vez en algunas ocasiones lo dejamos pasar, aunque tenemos cierto poder sobre nuestras circunstancias, no podemos tener el control sobre todas las situaciones, algunas veces nos convertimos en observadores, diferentes situaciones se interpondrán en nuestro camino, sin embargo, si uno tiene cierta sensibilidad consigo mismo sí que puede empezar a notar cuando le llega un punto de inflexión, cuándo las cosas pueden empezar a cambiar. Nos volvemos más conscientes de la vida.

The Constitutional Foundations of World Peace Richard A. Falk, Robert C. Johansen, Samuel S. Kim, Teacher of Korean Foreign Relations and Korean Politics Department of Political Science Associate Director of the Center for Korean Research East Asia Institute Samuel S Kim. 1993-01-01 This book shows how significant a worldwide constitutional framework can be, both analytically and politically, in efforts to achieve a just and lasting peace. The authors are careful to avoid the pitfalls of legalism and moralism that have often afflicted discussion of world governance in the past, and their analyses are rooted directly within contemporary human struggles for peace, justice, prosperity, and environmentally sustainable societies. The authors demonstrate that when these struggles are examined in light of the planet's changing constitutional framework, their origins and future trajectories are more fathomable intellectually. By examining alternative images of world order, these authors uncover an abundance of practical yet bold policy recommendations for addressing and solving global problems. They also demonstrate that implementing desirable policies can indeed become politically feasible. This book is a compendium of new ideas for managing threats to peace, enhancing U. N. peacekeeping, establishing an effective global environmental authority, aiding the faltering global economy, nurturing the growth of democracy both locally and globally, protecting human rights and ethnic diversity, holding governments and intergovernmental organizations accountable to those they govern, and nurturing humanitarian values among all people.

Achtung-Panzer! Heinz Guderian.1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Descriptive Translation Studies and Beyond Gideon Toury.1995 A replacement of the author's well-known book on Translation Theory, *In Search of a Theory of Translation* (1980), this book makes a case for Descriptive Translation Studies as a scholarly activity as well as a branch of the discipline, having immediate consequences for issues of both a theoretical and applied nature. Methodological discussions are complemented by an assortment of case studies of various scopes and levels, with

emphasis on the need to contextualize whatever one sets out to focus on. Part One deals with the position of descriptive studies within TS and justifies the author's choice to devote a whole book to the subject. Part Two gives a detailed rationale for descriptive studies in translation and serves as a framework for the case studies comprising Part Three. Concrete descriptive issues are here tackled within ever growing contexts of a higher level: texts and modes of translational behaviour □ in the appropriate cultural setup; textual components □ in texts, and through these texts, in cultural constellations. Part Four asks the question: What is knowledge accumulated through descriptive studies performed within one and the same framework likely to yield in terms of theory and practice? This is an excellent book for higher-level translation courses.

Gringo Love Marie-Eve Carrier-Moisan. 2020-08-26 In the city of Natal in northeastern Brazil, several local women negotiate the terms of their intimate relationships with foreign tourists, or gringos, in a situation often referred to as sex tourism. These women have different experiences, but they share a similar desire to escape the social conditions of their lives in Brazil. Based on original ethnographic research and presented in graphic form, *Gringo Love* explores the hopes, dreams, and realities of these women against a backdrop of deep social inequality and increasing state surveillance leading up to the 2014 World Cup and 2016 Olympic Games. It touches on important contemporary issues, including sexual economics, transnational mobility, romantic imaginaries, gender representation, race and inequality, and visual methods. The graphic story is accompanied by analysis and contextual discussion, which encourage readers to engage with the narrative and expand their understanding of the broader social issues therein.

Against Expression Craig Dworkin, Kenneth Goldsmith. 2011-01-17 Charles Bernstein has described conceptual poetry pregnant with thought. *Against Expression*, the premier anthology of conceptual writing, presents work that is by turns thoughtful, funny, provocative, and disturbing. Editors Craig Dworkin and Kenneth Goldsmith chart the trajectory of the conceptual aesthetic from early precursors such as Samuel Beckett and Marcel Duchamp through major avant-garde groups of the past century, including Dada, Oulipo, Fluxus, and language poetry, to name just a few. The works of more than a hundred writers from Aasprong to Zykov demonstrate a remarkable variety of new ways of thinking about the nature of texts, information, and art, using found, appropriated, and randomly generated texts to explore the possibilities of non-expressive language. --Book Jacket.

Anti-Literature Adam Joseph Shellhorse. 2017-07-28 *Anti-Literature* articulates a rethinking of what is meant today by "literature." Examining key Latin American forms of experimental writing from the 1920s to the present, Adam Joseph Shellhorse reveals literature's power as a site for radical reflection and reaction to contemporary political and cultural conditions. His analysis engages the work of writers such as Clarice Lispector, Oswald de Andrade, the Brazilian concrete poets, Osman Lins, and David Viñas, to develop a theory of anti-literature that posits the feminine, multimedial, and subaltern as central to the undoing of what is meant by "literature." By placing Brazilian and Argentine anti-literature at the crux of a new way of thinking about the field, Shellhorse challenges

prevailing discussions about the historical projection and critical force of Latin American literature. Examining a diverse array of texts and media that include the visual arts, concrete poetry, film scripts, pop culture, neo-baroque narrative, and others that defy genre, Shellhorse delineates the subversive potential of anti-literary modes of writing while also engaging current debates in Latin American studies on subalternity, feminine writing, posthegemony, concretism, affect, marranismo, and the politics of aesthetics.

For a Greater Purpose Robert J. Marks II, William A. Dembski. 2020-09-02 Walter Bradley made a deal with God: he would unashamedly share his faith with students and faculty, and he would not let academic ambition prevent him from giving his faith and family the time they deserve. The day he could no longer keep that deal, he would leave the academy. He never had to. From his days as a determined graduate assistant sharing his love for Jesus with his first class, to becoming one of the most respected engineering professors in academia, Walter Bradley remained a man of integrity, dedicated to truth and love. He's made a difference in myriad ways from leading a small Bible study for students in his home to defending intelligent design before large crowds of his academic peers. He's equally comfortable performing ground-breaking research for NASA, serving as an expert witness in the courtroom, or empowering people in Africa with appropriate technologies. Through it all, one thing has remained true: Walter Bradley made a crucial difference for good in countless lives. In *For a Greater Purpose: The Life and Legacy of Walter Bradley*, authors Robert Marks and William Dembski detail the story of this remarkable man whose passion for God, science, higher education, and human empowerment provides an excellent model of someone who integrates faith and learning.
