**Ethics for Fundraisers** Albert Anderson.1996-03-22 Invoking a variety of classical and contemporary models, Albert Anderson examines what it means to think and act ethically. Proceeding from the views of Immanuel Kant and John Stuart Mill—who created perhaps the two most influential, albeit competing, ethical frameworks—Anderson poses the choice between what we understand to be our moral duty and what will likely result in the greatest good for the majority. He applies these notions to a wide range of situations familiar to nonprofit development officers, volunteer, and organizations. His goal is to help readers rethink decision-making and the principles that guide their decisions.

**The Neurobiology of Olfaction** Anna Menini. 2009-11-24 Comprehensive Overview of Advances in Olfaction The common belief is that human smell perception is much reduced compared with other mammals, so that whatever abilities are uncovered and investigated in animal research would have little significance for humans. However, new evidence from a variety of sources indicates this traditional view is likely overly simplistic. The Neurobiology of Olfaction provides a thorough analysis of the state-of-the-science in olfactory knowledge and research, reflecting the growing interest in the field. Authors from some of the most respected laboratories in the world explore various aspects of olfaction, including genetics, behavior, olfactory systems, odorant receptors, odor coding, and cortical activity. Until recently, almost all animal research in olfaction was carried out on orthonasal olfaction (inhalation). It is only in recent years, especially in human flavor research, that evidence has begun to be obtained regarding the importance of retronasal olfaction (exhalation). These studies are beginning to demonstrate that retronasal smell plays a large role to play in human behavior. Highlighting common principles among various species - including humans, insects, *Xenopus laevis* (African frog), and *Caenorhabditis elegans* (nematodes) - this highly interdisciplinary book contains chapters about the most recent discoveries in odor coding from the olfactory epithelium to cortical centers. It also covers neurogenesis in the olfactory epithelium and olfactory bulb. Each subject-specific chapter is written by a top researcher in the field and provides an extensive list of reviews and original articles for students and scientists interested in further readings.

**Molecular Genetics of Host-Specific Toxins in Plant Disease** Keisuke Kohmoto,Olen C. Yoder.2012-12-06 For investigators engaged in the study of toxins generally, and host-specific toxins in particular, it is a rare treat to attend a meeting in which toxins involved in plant pathogenesis are emphasized. A gathering of this type provides opportunity to consider the discovery of new toxins,

their chemical structures, genes encoding enzymes that control their biosyntheses, their sites of action and physiological effects on plants, and their roles (if any) in pathological processes. Having acknowledged the inspiration fostered by a 'toxin meeting', however, it is important to point out that the program of this symposium was generously sprinkled with 'nontoxin' talks. These contributions generated cross-disciplinary discussion and promoted new ways of thinking about relationships among factors required for plant disease development. The point can be illustrated by considering just one example. We have in the past often regarded diseases mediated by host-specific toxins and diseases involving 'gene-for-gene' relationships as representing two different classes of fungal/plant interaction. This is largely because the key molecular recognition event in so-called 'toxin' diseases leads to compatibility, whereas the corresponding event in 'gene-for-gene' diseases leads to incompatibility. Yet the race specific elicitors produced by the 'gene-for-gene' fungi *Cladosporium fulvum* (De Wit, Adv. Bot. Res. 21:147- 185, 1995) and *Rhynchosporium secalis* (Rohe et al. , EMBO J.

*Federal Taxes on Gratuitous Transfers* Joseph M. Dodge,Wendy C. Gerzog,Bridget J.

Crawford.2014-12-09 This book deals with the federal income tax as it bears on gratuitous transfers and with the federal wealth transfer taxes. The federal wealth transfer taxes presently consist of a partially unified estate and gift tax and a generation-skipping tax. The federal transfer tax system is separate and apart from the federal income tax. Features: Emphasis on text, statutes, and regulations, rather than cases (especially cases that involve routine application of law to facts) Building block organization (simple to complex estates), rather than segmented organization according to Code sections. Extensive use of questions and problems to aid students High-profile authorship in Joseph M. Dodge (a highly regarded tax specialist), Wendy C. Gerzog, and Bridget J. Crawford (both well-established in the field) The book reconstitutes the Estate and Gift tax course from the ground up in light of modern estates practice. For example, special valuation rules are treated as basic, as opposed to being just tacked on as other books treat them. More emphasis on valuation and use of FLPs than in other books. Valuation is introduced early on and integrated with other material Integration of related income tax materials, including income taxation of estates and trusts Relation of tax doctrine to tax planning strategies Focus on doctrine that influences the practice of estate and trust law, rather than doctrine for its own sake Reference to state law (including recent developments) as it bears on transfer tax issues, with full coverage of issues raised by community property systems

Dynamic Business Process Management in the Knowledge Economy Marek Szelągowski.2019-06-21

This book describes modern dynamic business process management (dynamic BPM), which is considerably different from traditional BPM from 20, 10, or even 5 years ago. It demonstrates why traditional BPM is not sufficient in the knowledge economy (KE), while also highlighting the opportunities provided by dynamic BPM – the form of management that practitioners and academics deal with on a daily basis. This involves mastering and implementing e.g. case management, process mining, and RPA, and integrating them with knowledge management. But more importantly, dynamic BPM makes full use of the dynamism of knowledge workers: the people who actually create innovative products and services tailored to the specific needs of clients. The book was primarily written for those managers who see advantageous opportunities amidst the ongoing changes. Accordingly, it focuses more on innovations emerging from practice than on theoretical, academic reflection. In addition to helping organizations operating in the KE to prepare for and implement process management, the book is intended as a source of inspiration for process management researchers and iBPMS system vendors.

**Periods Gone Public** Jennifer Weiss-Wolf.2017-10-10 The first book to explore menstruation in the current cultural and political landscape and to investigate the new wave of period activism taking the world by storm. After centuries of being shrouded in taboo and superstition, periods have gone mainstream. Seemingly overnight, a new, high-profile movement has emerged—one dedicated to bold activism, creative product innovation, and smart policy advocacy—to address the centrality of menstruation in relation to core issues of gender equality and equity. In *Periods Gone Public*, Jennifer Weiss-Wolf—the woman *Bustle* dubbed one of the nation's “badass menstrual activists”—explores why periods have become a prominent political cause. From eliminating the tampon tax, to enacting new laws ensuring access to affordable, safe products, menstruation is no longer something to whisper about. Weiss-Wolf shares her firsthand account in the fight for “period equity” and introduces readers to the leaders, pioneers, and everyday people who are making change happen. From societal attitudes of periods throughout history—in the United States and around the world—to grassroots activism and product innovation, Weiss-Wolf challenges readers to face stigma head-on and elevate an agenda that recognizes both the power—and the absolute normalcy—of menstruation.
