Osmanlı Şiiri Kılavuzu, 2. cilt Ahmet Atilla Şentürk.2016 Osmanlı'nın gündelik hayatı, sosyal yapısı, toplum gelenekleri, inançları, ordu ve askerliği, güzel sanatları, antropolojisinin yanı sıra şiir ve edebiyatına dair her şey... Bu kitap günümüz insanının Fuzûlî, Bâkî, Nedîm gibi şairlerin eserlerini kolayca okuyup anlayabilmesi amacıyla hazırlandı. Bu şiiri vücuda getiren 650 civarında dîvân ve mesnevînin yaklaşık 2.000.000 beyti taranıp eski edebiyatın nirengi noktaları madde başları haline getirilerek zengin örneklerle izah edildi. Osmanlı Şiiri Kılavuzu'ndaki madde başlıkları, bugün yanlış bir adlandırmayla daha çok "Divan Şiiri" diye bilinen edebiyatın temel kavramlarını örnekleriyle açıklıyor. Kılavuzu kullananların ellerine aldıkları eski bir şiir metnini, önemli ölçüde çözüp tadına varabileceği inancındayız. Eski şiir, aradaki engeller kaldırıldığında gerçekten okuması ve yorumlaması son derece zevkli bir meşgaledir. Bu şiirin her beyti, bize yüzyıllar öncesinden gönderilmiş birer bilmece gibidir. Bunları çözmek, insanda heyecan ve bir yenisini daha çözüp anlama isteği uyandırır. Bundan 300-500 sene önce yaşamış bir söz ustasının zihninin kıvrımlarından kopan ince bir nüktelyi 21. yüzyılda yeniden keşfedip zevkine varabilmek, bambaşka bir heyecan konusudur. Milletimizin Osmanlı Şiiri Kılavuzu sayesinde tarih ve kültürüyle daha güçlü bağlar kurabileceğine inanıyoruz.

Improvement of Crops in the Era of Climatic Changes Parvaiz Ahmad, Mohd Rafiq Wani, Mohamed Mahgoub Azooz, Lam-Son Phan Tran. 2013-11-12 Current trends in population growth hint that global food production is unlikely to gratify future demands under predicted climate change scenarios unless the rates of crop improvement are accelerated. Crop production faces numerous challenges, due to changing environmental conditions and evolving needs for new plant-derived materials. These challenges come at a time when the plant sciences are witnessing remarkable progress in understanding fundamental processes of plant growth and development. Drought, heat, cold and salinity are among the major abiotic stresses that often cause a series of morphological, physiological, biochemical and molecular alterations which adversely affect plant growth, development and productivity, consequently posing a serious challenge for sustainable food production in large parts of the world, particularly in emerging countries. This emphasizes the urgency of finding better ways to translate new advances in plant science into concrete successes in agricultural production. To overcome the pessimistic influence of abiotic stresses and to maintain the food security in the face of these challenges, new, improved and tolerant crop varieties, contemporary breeding techniques, and cavernous understanding of the mechanisms that counteract detrimental climate changes are indubitably needed to sustain the requisite food supply. In this context, *Improvement of Crops in the Era of Climatic Changes, Volume 1* provides a state-of-the-art guide to recent developments that aid in the understanding of plant responses to abiotic stresses and lead to new horizons vis-à-vis prime strategies for translating current research into

applied solutions to create strong yields and overall crop improvement under such unfavourable environments. Written by a diverse group of internationally famed scholars, *Improvement of Crops in the Era of Climatic Changes, Volume 1* is a brief yet all-inclusive resource that is immensely advantageous for researchers, students, environmentalists, soil scientists, professionals, and many others in the quest of advancement in this flourishing field of research.

Food Jean-Louis Flandrin, Massimo Montanari. 2013-05-21 When did we first serve meals at regular hours? Why did we begin using individual plates and utensils to eat? When did cuisine become a concept and how did we come to judge food by its method of preparation, manner of consumption, and gastronomic merit? Food: A Culinary History explores culinary evolution and eating habits from prehistoric times to the present, offering surprising insights into our social and agricultural practices, religious beliefs, and most unreflected habits. The volume dispels myths such as the tale that Marco Polo brought pasta to Europe from China, that the original recipe for chocolate contained chili instead of sugar, and more. As it builds its history, the text also reveals the dietary rules of the ancient Hebrews, the contributions of Arabic cookery to European cuisine, the table etiquette of the Middle Ages, and the evolution of beverage styles in early America. It concludes with a discussion on the McDonaldization of food and growing popularity of foreign foods today.

E-Cigarette Use Among Youth and Young Adults: a Report of the Surgeon General Centers for Disease Control and Prevention,National Center National Center for Chronic Disease Prevention and Health Promotion,U.S. Department of Health and Human Services.2019-07-26 Tobacco use among youth and young adults in any form, including e-cigarettes, is not safe. In recent years, e-cigarette use by youth and young adults has increased at an alarming rate. E-cigarettes are now the most commonly used tobacco product among youth in the United States. This timely report highlights the rapidly changing patterns of e-cigarette use among youth and young adults, assesses what we know about the health effects of using these products, and describes strategies that tobacco companies use to recruit our nation's youth and young adults to try and continue using e-cigarettes. The report also outlines interventions that can be adopted to minimize the harm these

products cause to our nation's youth. E-cigarettes are tobacco products that deliver nicotine. Nicotine is a highly addictive substance, and many of today's youth who are using e-cigarettes could become tomorrow's cigarette smokers. Nicotine exposure can also harm brain development in ways that may affect the health and mental health of our kids. E-cigarette use among youth and young adults is associated with the use of other tobacco products, including conventional cigarettes. Because most tobacco use is established during adolescence, actions to prevent our nation's young people from the potential of a lifetime of nicotine addiction are critical. E-cigarette companies appear to be using many of the advertising tactics the tobacco industry used to persuade a new generation of young people to use their products. Companies are promoting their products through television and radio advertisements that use celebrities, sexual content, and claims of independence to glamorize these addictive products and make them appealing to young people.

Ozone Hole S.A. Abbasi, Tasneem Abbasi. 2017-03-10 This book underscores the re-emergence of the ozone hole problem and deals with it in its current context of exacerbating global warming. It traces the history of the ozone hole from the stage of formation of the stratospheric ozone 'layer', millions of years ago, into the late 20th century when the anthropogenic destruction of that ozone was discovered. The chapters are written to bring the the reader up to the present day. Factors that influence stratospheric ozone are discussed and the ways to halt ozone depletion are cataloged. And more complex interrelationships are being discovered between ozone depletion and two other global concerns: climate change and ocean acidification. This book sheds light on the intricacy of the situation and its portants. The book will be useful to students and researchers looking for a current overview of the ozone hole problem. div
