Scientific Writing for Impact Factor Journals Eric Lichtfouse.2013-01-01 Publish or Perish. This old adage illustrates the importance of scientific communication; essential to research, it also represents a strategic sector for each country's competitiveness. An often-neglected topic, scientific communication is of vital importance, with new information technologies accelerating and profoundly changing how knowledge is disseminated. The necessity of optimally disseminating experts' findings has also become crucial to researchers, institutes and universities alike, which has prompted the recent advent of Impact Factors for the evaluation and financing of research, the goal being for scientific knowledge to be equally distributed to a very broad audience, especially to the media, entrepreneurs and sociopolitical players. This handbook presents the golden rules for publishing scientific articles. In order to do away with major recurring errors, the author explains how to easily structure an article and offers support for the typical mistakes made by native French speakers publishing in English, tips on how to make the style more academic of more general to fit your intended readership and, in the book's closing section, suggests new publishing techniques of the Internet age such as the micro-article, which allows researchers to focus their findings into a single innovative point. The major principles presented can be applied to a broad range of documents such as theses, industry reports, publicity texts, letters of intent, CVs/resumes, blogs and press releases, as all of these documents involve presenting information on advances, discoveries, innovations, or changes to our previous knowledge.

International Operations Networks John Johansen,Sami Farooq,Yang Cheng.2016-09-17 Although the area of International Manufacturing Network (IMN) and International Operations Network (ION) has received considerable attention in the literature, most of studies appear multifaceted and interdisciplinary, and thereby require thorough investigation from both academic and practical perspectives, in order to deepen our related understanding. The book seeks advanced contributions that will combine theoretical insights and empirical experience by offering a detailed examination of IMN and, further, ION from various perspectives. This book can be used as a reference material for scholar-practitioners, business executives, and university researchers who need to deepen their understanding on the importance and influence of IMN and ION as well as their development. The book is important because there are few reference/resource materials available related to IMN and ION.

The Changing Role of Women in Higher Education Heather Eggins.2016-10-11 This book sets out to examine the changing role of women in higher education with an emphasis on academic and leadership issues. The scope of the book is international, with a wide range of contributors, whose expertise spans sociology, social science, economics, politics, public policy and linguistic studies, all of whom have a major interest in global education. The volume examines the ways in which the leadership role and academic roles of women in higher education are changing in the twenty first century, offering an up-to-date policy discussion of this area. It is in some sense a sequel to the earlier volume by the same Editor, *Women as Leaders and Managers in Higher Education*, but with very different emphases. The pressures now are to respond to the demands of the technological age and to those of the global economy. Today there are more highly qualified and experienced female academics, and more expectation of their gaining the highest posts. Challenges still remain, particularly in terms of the top posts, and in equal pay. The discussion of global policy issues affecting the role of women in higher education is combined with country case studies, several of which are comparative. Together they examine and unpack the particular situations of women in a wide range of higher education systems, from Brazil to the US to Europe to Africa and the Far East, noting the shift towards more flexibility, more personal choice and a greater acceptance by society of their abilities. This volume is a useful and influential addition to published work in this area, and is aimed at the intelligent general reader as well as the scholar interested in this topic.

to ensure conceptual learning before introducing specific techniques and “tricks of the trade”. The book concentrates on a number of current research applications, and will present a detailed approach to each while emphasizing the applicability of techniques to other problems. The field of topics is wide, ranging from compressive (non-uniform) sampling in MRI, through automated retinal vessel analysis to 3-D ultrasound imaging and more. The book is amply illustrated with figures and applicable medical images. The reader will learn the techniques which experts in the field are currently employing and testing to solve particular research problems, and how they may be applied to other problems.

Enhancing Financial Inclusion through Islamic Finance, Volume I Abdelrahman Elzahi Saaid Ali, Khalifa Mohamed Ali, Muhammad Khaleequzzaman.2020-07-01 This book, the first of two volumes, highlights the concept of financial inclusion from the Islamic perspective. An important element of the Sustainable Development Goals (SDGs), financial inclusion has been given significant prominence in reform and development agendas proposed by the United Nations and G-20. The significance of Islamic financial inclusion goes beyond improved access to finance to encompass enhanced access to savings and risk mitigation products, as well as social inclusion that allows individuals and companies to engage more actively in the real economy. It represents one of the important drivers of economic growth. Gender disparity exists within financial access and its extent varies widely across world economies. South Asia, the Middle East and North Africa have the largest gender gaps, with women in these regions being forty per cent less likely than men to have a formal account at a financial institution. Analysing how Islamic financial inclusion can empower individuals, this volume explores the contribution of Islamic microfinance in achieving SDGs and solving income and wealth inequality. Comprising a combination of empirical evidence, theory and modelling, this edited collection illustrates how to improve access to finance, making it essential reading for those researching both Islamic finance and development finance.

A Season of Ghosts Ruskin Bond.2016-11-21 A superb storyteller who keeps his readers in thrall—Statesman It is said that if the smell of the Himalayas creeps into a man’s blood, he will return to the hills again and again. Master storyteller Ruskin Bond shows how this love may persist to death and beyond. The agents of the supernatural may be gentle like the fairy folk in ‘On Fairy Hill’, or malevolent like the well-dressed diners of ‘The Prize’; humorous like the very proper witch, Miss Bellows, in ‘The Black Cat’, or tragic like the haunting Gulabi in ‘Wilson’s Bridge’. Bond aficionados will meet familiar faces in other stories and be thrilled by the gripping mystery, ‘Who Killed the Rani?’ This exciting collection, animated by the brooding presence of the Himalayas, establishes Bond as a connoisseur of the mysterious and macabre.

Video Mining Azriel Rosenfeld, David Doermann, Daniel DeMenthon.2013-03-09 Traditionally, scientific fields have defined boundaries, and scientists work on research problems within those boundaries. However, from time to time those boundaries get shifted or blurred to evolve new fields. For instance, the original goal of computer vision was to understand a single image of a scene, by identifying objects, their structure, and spatial arrangements. This has been referred to as image understanding. Recently, computer vision has gradually been making the transition away from understanding single images to analyzing image sequences, or video. Video understanding deals with understanding of video understanding. sequences, e.g., recognition of gestures, activities, facial expressions, etc. The main shift in the classic paradigm has been from the recognition of static objects in the scene to motion-based recognition of actions and events. Video understanding has overlapping research problems with other fields, therefore blurring the fixed boundaries. Computer graphics,

image processing, and video databases have obvious overlap with computer vision. The main goal of computer graphics is to generate and animate realistic looking images, and videos. Researchers in computer graphics are increasingly employing techniques from computer vision to generate the synthetic imagery. A good example of this is image-based rendering and modeling techniques, in which geometry, appearance, and lighting is derived from real images using computer vision techniques. Here the shift is from synthesis to analysis followed by synthesis. Image processing has always overlapped with computer vision because they both inherently work directly with images.

Structural Textile Design provides detailed insight on different types of designs used for the production of woven and knitted fabrics, highlighting the effect design has on a fabric's properties and applications. With focus on the techniques used to draw designs and produce them on weaving and knitting machines, this book will be of great interest to textile engineers, professionals and graduate students in textile technology and manufacturing.

Mathematical Epidemiology Fred Brauer, Pauline van den Driessche, J. Wu. 2008-04-30 Based on lecture notes of two summer schools with a mixed audience from mathematical sciences, epidemiology and public health, this volume offers a comprehensive introduction to basic ideas and techniques in modeling infectious diseases, for the comparison of strategies to plan for an anticipated epidemic or pandemic, and to deal with a disease outbreak in real time. It covers detailed case studies for diseases including pandemic influenza, West Nile virus, and childhood diseases. Models for other diseases including Severe Acute Respiratory Syndrome, fox rabies, and sexually transmitted infections are included as applications. Its chapters are coherent and complementary independent units. In order to accustom students to look at the current literature and to experience different perspectives, no attempt has been made to achieve united writing style or unified notation. Notes on some mathematical background (calculus, matrix algebra, differential equations, and probability) have been prepared and may be downloaded at the web site of the Centre for Disease Modeling (www.cdm.yorku.ca).
