Reinardus Van den Abeele Baudouin, Baudouin Abeele, Richard Trachsler, Paul Wackers. 2011-12-23
Reinardus aims to promote comparative research in the fields of medieval comic, satirical, didactic, and allegorical literature, with emphasis on beast epic, fable and fabliau, including sources, influences and later developments into the modern period. The methods and critical interpretations it offers are as wide-ranging as is its subject matter, since it considers discussion and the coexistence of conflicting views as more important than the defence of a specific methodological point of view.

Risky Work Environments Dr Christine Owen, Dr Ger Wackers, Professor Pascal Béguin. 2012-10-01
Risky Work Environments provides new insights into the multiple and dynamic trajectories of both near misses and mistakes in complex work environments, based on actual case examples. It also studies the interactions between various activity systems or work practices (design, maintenance, incident investigation, regulation, operation) and their consequences for operational performance. The role of rules and regulations is explored, considering the consequences of deviations and the limitations of enforced compliance. Further, the book explains how to search for, think about and act on information about vulnerability, near misses and mistakes in a way that emphasizes accountability in ways that are not punitive but instead responsible, innovative and provide

opportunities for learning. Writing from different disciplines and theoretical perspectives, the contributors analyse working in risky environments which include air traffic control, offshore mining, chemical plants, neo-natal intensive care units, ship piloting and emergency call dispatch centres. In each chapter the authors present rich empirical data and their analyses illustrate a variety of ways in which, despite imperfect systems, safety and resilience is created in human action. In the chapters where the focus is on error or mistakes, the analysis undertaken reveals the logic of actions undertaken at the time as well as their constraints. The contributors are all active researchers within their disciplines and come from Australia, Finland, France, Norway and the Netherlands. The book will be of direct interest to safety scientists, researchers and scientists, as well as human factors practitioners working in complex technological systems.

Towards an Education for the 21st Century S. John Eggleston.1970

Handbook of Image-Guided Brachytherapy Jyoti Mayadev, Stanley H. Benedict, Mitchell Kamrava.2017-03-21 This handbook provides a clinically relevant, succinct, and comprehensive overview of image-guided brachytherapy. Throughout the last decade, the utility of image guidance in brachytherapy has increased to enhance procedural development, treatment planning, and radiation delivery in an effort to optimize safety and clinical outcomes. Organized into two parts, the book discusses physics and radiobiology principles of brachytherapy as well as clinical applications of image-guided brachytherapy for various disease sites (central nervous system, eye, head and neck, breast, lung, gastrointestinal, genitourinary, gynecologic, sarcoma, and skin). It also describes the incorporation of imaging techniques such as CT, MRI, and ultrasound into brachytherapy procedures and planning. Featuring procedural and anesthesia care, extensive images, contouring examples, treatment planning techniques, and dosimetry for the comprehensive treatment for each

disease site, Handbook of Image-Guided Brachytherapy is a valuable resource for practicing radiation oncologists, physicists, dosimetrists, residents, and medical students.

Maria Chapdelaine Louis Hémon.2020-04-14 Maria Chapdelaine, the quintessential novel of the rugged life of early French-Canadian colonists, is based on the author's experiences as a hired hand in the Saguenay-Lac-Saint-Jean area. A young woman living with her family on the Quebec frontier, Maria endures the hardships of isolation and climate. Maria must eventually choose between three suitors who represent very different ways of life: a trapper, a farmer, and a Parisian immigrant. Powerful in its simplicity, this novel captures the essence of faith and tenacity, the key ingredients of survivance. Translated into many languages, Maria Chapdelaine is enshrined as a classic of Canadian letters. A new introduction by Michael Gnarowski examines its relevance and provides insights into Louis Hemon's life.

Aristotle, Metaphysics Lambda Lindsay Judson.2019-05-26 The Clarendon Aristotle Series is designed for both students and professionals. It provides accurate translations of selected Aristotelian texts, accompanied by incisive commentaries that focus on philosophical problems and issues. The volumes in the series have been widely welcomed and favourably reviewed. Important new titles are being added to the series, and a number of well-established volumes are being reissued with revisions and/or supplementary material. Lindsay Judson provides a rigorous translation of the twelfth book (Lambda) of Aristotle's Metaphysics and a detailed philosophical commentary. Lambda is an outline for a much more extended work in metaphysics - or more accurately, since Aristotle does not use the term 'metaphysics', in what he calls 'first philosophy', the inquiry into 'the principles and causes of all things'. Aristotle discusses the principles of natural and changeable substances, which include form, matter, privation and efficient cause; he argues that

principles of this sort are, at least by analogy, the principles of non-substantial items as well. In the second half of the book he turns to unchanging, immaterial substances, first arguing that there must be at least one such substance, which he calls 'God', to act as the 'prime unmoved mover', the source of all change in the natural world. He then explores the nature of God and its activity of thinking (it is the fullest exposition there is of Aristotle's extraordinary and very difficult conception of his supreme god, its goodness, and its activity), and in the course of arguing for a plurality of immaterial unmoved movers he provides important evidence for the leading astronomical theory of his day (by Eudoxus) and for his own highly impressive cosmology. The commentary on each chapter or pair of chapters is preceded by a Prologue, which sets the scene for Aristotle's often very compressed discussion, and explores the general issues raised by that discussion. The Introduction discusses the place of Lambda in the *Metaphysics*, and offers a solution to the problem of the unity of Aristotle's project in the book.

Work Stress and Social Support James S. House.1981 Abstract: Scientific and practical aspects of the role of social support in reducing work stress and improving health are presented for social scientists, social workers, and managers. The material is organized into 3 major sections: theoretical foundations; empirical evidence concerning human and animal data and various work settings; and the application of social support, its sources and their potential, for stress reduction and concomitant mental and physical health improvement. A theoretical treatment of buffering vs the main effects of social support (elaborated in the first 2 sections), and a discussion of problems associated with the detection of conditioning or buffering effects in cross-sectional studies, are

appended. (wz).

Principles and Practice of Brachytherapy Subir Nag.1997-08-12 Here is a comprehensive and up-to-the-minute reference on the clinically recommended use and practice of brachytherapy in the management of malignant tumors. Sections from an all-star team of contributors expertly detail the physics, radiobiology, radiation safety, quality assurance and clinical applications of this vital procedure.

Translating as a Purposeful Activity Christiane Nord.2018-02-19 This bestselling text is a comprehensive overview of functionalist approaches to translation in English. Christiane Nord, one of the leading figures in translation studies, explains the complexities of theories and terms in simple language with numerous examples. Covering how the theories developed, illustrations of the main ideas, and specific applications to translator training, literary translation, interpreting and ethics, *Translating as a Purposeful Activity* concludes with a concise review of both criticisms and perspectives for the future. Now with a Foreword by Georges Bastin and a new chapter covering the recent developments and elaborations of the theory, this is an essential text for students of translation studies and for translator training.

Practical Anthropology Georges Olivier.1969

The Hite Report on Male Sexuality Shere Hite.2014-03 In 7239 questionnaires, men aged between 13 and 79, were analysed, allowing a new cultural interpretation of what it means, sexually, to be male. This book explores this Hite report and reveals men's fears and secrets, attitudes to women, sexual preferences and practices, profoundest joys and disappointments.

Current Radiation Oncology Jeffrey S. Tobias,Patrick R. M. Thomas.1994 Radiotherapy is one of the major specialties within cancer medicine and recent developments are of interest to a wide

international audience. 'Current Radiation Oncology' provides a state-of-the-art review of important areas where change has recently occurred and areas of likely development in the near future. Each chapter provides a provocative account of the topic and places the subject matter in the general context of more established techniques.

Apologia Contra Arianos Athanasius.2017-08-26

Progress in Pattern Recognition Sameer Singh, Maneesha Singh.2007-08-03 This book features a collection of articles presented at the 2007 Workshop on Advances in Pattern Recognition, which was organized in conjunction with the 5th International Summer School on Pattern Recognition. It provides readers with the state-of-the-art algorithms in the area of pattern recognition as well as a presentation of the cutting edge applications within the field.

Ideal Government and the Mixed Constitution in the Middle Ages James M. Blythe.2014-07-14 Ancient Greeks and Romans often wrote that the best form of government consists of a mixture of monarchy, aristocracy, and democracy. Political writers in the early modern period applied this idea to government in England, Venice, and Florence, and Americans used it in designing their constitution. In this history of political thought James Blythe investigates what happened to the concept of mixed constitution during the Middle Ages, when the work of the Greek historian Polybius, the source of many of the formal elements of early modern theory, was unknown in Latin. Although it is generally argued that Renaissance and early modern theories of mixed constitution derived from the revival of classical Polybian models, Blythe demonstrates the pervasiveness of such ideas in high and late medieval thought. The author traces medieval Aristotelian theories concerning the best form of government and concludes that most endorsed a limited monarchy sharing many features with the mixed constitution. He also shows that the major early modern ideas of mixed

constitutionalism stemmed from medieval and Aristotelian thought, which partially explains the enthusiastic reception of Polybius in the sixteenth century. Originally published in 1992. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Constructive Ergonomics Pierre Falzon.2014-09-26 The goal for ergonomics has always been to adapt work, work environments, and machines to humans. But is this goal still sufficient? Does it satisfy the needs of the individual or of societies and organizations as they operate now? Constructive Ergonomics provides an answer to these questions. Rooted both in the academic world and in the world of p

At the Bay Katherine Mansfield.2022-09-15 'At the Bay' is a short story by Katherine Mansfield. In the following chapters, we discover that when Stanley Burnell goes for a swim early in the morning, Jonathan Trout is there; the two men wanted to be the first in the water, and Jonathan expresses sympathy for Stanley. And out in the countryside, Kezia helps Lottie with the stile to Isabel's disapproval. The Samuel Josephs children are said to be rowdy and they don't play with them any more. Then they come upon Rags and Pip, and the latter shows them an emerald he has found in the sand.

Women as Scribes Alison I. Beach.2004-04-29 Professor Beach's book on female scribes in twelfth-century Bavaria - a full-length study of the role of women copyists in the Middle Ages - is underpinned by the notion that the scriptorium was central to the intellectual revival of the Middle Ages and that women played a role in this renaissance. The author examines the exceptional quantity of evidence of female scribal activity in three different religious communities, pointing out the various ways in which the women worked - alone, with other women, and even alongside men - to produce books for monastic libraries, and discussing why their work should have been made visible, whereas that of other female scribes remains invisible. Beach's focus on manuscript production, and the religious, intellectual, social and economic factors which shaped that production, enables her to draw wide-ranging conclusions of interest not only to palaeographers but also to those interested in reading, literacy, religion and gender history.

Anglicanus Ortus Henry (of Huntingdon), Henry of Huntingdon.2012 Henry, archdeacon of Huntingdon, England (ca 1088-ca 1154) has been admired for centuries as the author of the monumental *Historia Anglorum*. The recent discovery of the *Anglicanus ortus* opens a new window onto this important English author as well as onto the uses of poetry and the knowledge of medicine in medieval England. Written entirely in Latin verse, the *Anglicanus ortus* describes the medicinal uses of 160 different herbs, spices, and vegetables. Henry drew on centuries of learned medicine to compose this work, employing the medical knowledge of ancient authors like Pliny the Elder and Dioscorides and of medieval scholars like Walafrid Strabo, Macer Floridus and Constantine the African. This critical edition is based on the five extant manuscripts and includes a complete English translation on facing pages and a commentary on every poem. An extensive introduction describes the manuscript witnesses in detail, examines Henry's poetic skill and use of sources, and establishes

the place of the Anglicanus ortus in a pivotal era in the history of medicine and natural philosophy.

A Medieval Book of Beasts Willene B. Clark.2006 'The Bestiary' is a book of animals. The 'Second-family' bestiary is the most important version. This study addresses the work's purpose and audience. It includes a critical edition and new English translation, and a catalogue raisonne of the manuscripts.

Graphics Recognition Young-Bin Kwon,Jean-Marc Ogier.2013-02-11 This book constitutes the thoroughly refereed post-conference proceedings of the 9th International Workshop on Graphics Recognition (GREC 2011), held in Seoul, Korea, September 15-16, 2011. The 25 revised full papers presented were carefully selected from numerous submissions. Graphics recognition is a subfield of document image analysis that deals with graphical entities in engineering drawings, sketches, maps, architectural plans, musical scores, mathematical notation, tables, and diagrams. Accordingly the conference papers are organized in 5 technical sessions, covering the topics such as map and ancient documents, symbol and logo recognition, sketch and drawings, performance evaluation and challenge processing.

The five-volume set LNCS 8004--8008 constitutes the refereed proceedings of the 15th International Conference on Human-Computer Interaction, HCII 2013, held in Las Vegas, NV, USA in July 2013. The total of 1666 papers and 303 posters presented at the HCII 2013 conferences was carefully reviewed and selected from 5210 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers accepted for presentation thoroughly cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. This volume contains papers in the thematic area of human-computer interaction, addressing the following major topics: speech, natural language and auditory interfaces; gesture and eye-gaze based Interaction; touch-based interaction; haptic interaction; graphical user interfaces and visualisation.

Product Lifecycle Management Antti Saaksvuori,Anselmi Immonen.2005-12-06 In today`s industrial manufacturing Product Lifecycle Management (PLM) is essential in order to cope with the challenges of more demanding global competition. New and more complex products must be introduced to markets faster than ever before. Companies form large collaborative networks, and the product process must flow flexibly across company borders. This first book on Product Lifecycle Management in English language is designed to introduce the reader to the basic terms and fundamentals of PLM and to give a solid foundation for starting a PLM development project. It gives ideas and examples how PLM can be utilized in various industries. In addition, it also offers an insight into how PLM can assist in creating new business opportunities and in making real eBusiness

possible.

This Engaging World of E-book Books: A Thorough Guide Unveiling the Advantages of Kindle Books: A Realm of Ease and Flexibility E-book books, with their inherent mobility and ease of availability, have freed readers from the limitations of hardcopy books.
