Therapeutic Uses of Cannabis British Medical Association.1997-11-18 At the last Annual Representative Meeting of the British Medical Association a motion was passed that "certain additional cannabinoids should be legalized for wider medicinal use." This report supports this landmark statement by reviewing the scientific evidence for the therapeutic use of cannabinoids and sets the agenda for change. It will be welcomed by those who believe that cannabinoids can be used in medical treatment. The report discusses in a clear and readable form the use and adverse effects of the drug for nausea, multiple sclerosis, pain, epilepsy, glaucoma, and asthma.

The Drug Development Paradigm in Oncology National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Health Care Services, National Cancer Policy Forum.2018-02-12 Advances in cancer research have led to an improved understanding of the molecular mechanisms underpinning the development of cancer and how the immune system responds to cancer. This influx of research has led to an increasing number and variety of therapies in the drug development pipeline, including targeted therapies and associated biomarker tests that can select which patients are most likely to respond, and immunotherapies that harness the body's immune system to destroy cancer cells. Compared with standard chemotherapies, these new cancer therapies may demonstrate evidence of benefit and clearer distinctions between efficacy and toxicity at an earlier stage of development. However, there is a concern that the traditional processes for cancer drug development, evaluation, and regulatory approval could impede or delay the use of these promising cancer treatments in clinical practice. This has led to a number of efforts by patient advocates, the pharmaceutical industry, and the Food and Drug Administration (FDA) to accelerate the review of promising new cancer therapies, especially for cancers that currently lack effective treatments. However, generating the necessary data to confirm safety and efficacy during expedited drug development programs can present a unique set of challenges and opportunities. To explore this new landscape in cancer drug development, the National Academies of Sciences, Engineering, and Medicine developed a workshop held in December 2016. This workshop convened cancer researchers, patient advocates, and representatives from industry, academia, and government to discuss challenges with traditional approaches to drug development, opportunities to improve the efficiency of drug development, and strategies to enhance the information available about a cancer therapy throughout its life cycle in order to improve its use in clinical practice. This publication summarizes the presentations and discussions from the workshop.

The Eight Katherine Neville.2015-07-21 The "fascinating" #1 international bestseller of a quest across centuries by two intrepid women to reunite the pieces of a powerful, ancient chess set (Los Angeles Times Book Review). A fabulous, bejeweled chess set that belonged to Charlemagne has been buried in a Pyrenees abbey for a thousand years. As the bloody French Revolution rages in Paris, the nuns dig it up and scatter its pieces across the globe because, when united, the set contains a secret power that could topple civilizations. To keep the set from falling into the wrong hands, two novices, Valentine and Mireille, embark on an adventure that begins in the streets of Paris and leads to Russia, Egypt, Corsica, and into the heart of the Algerian Sahara. Two hundred years later, while on assignment in Algeria, computer expert Catherine Velis finds herself drawn unwillingly into the deadly "Game" still swirling around the legendary chess set—a game that will require her to risk her life and match wits with diabolical forces. This ebook features an illustrated biography of Katherine Neville including rare images from her life and travels.

Paradise and Hell in Islamic Traditions Christian Lange.2015-12-01 The Muslim afterworld, with its imagery rich in sensual promises, has shaped Western perceptions of Islam for centuries. However, to date, no single study has done justice to the full spectrum of traditions of thinking about the topic

in Islamic history. The Muslim hell, in particular, remains a little studied subject. This book, which is based on a wide array of carefully selected Arabic and Persian texts, covers not only the theological and exegetical but also the philosophical, mystical, topographical, architectural and ritual aspects of the Muslim belief in paradise and hell, in both the Sunni and the Shi'i world. By examining a broad range of sources related to the afterlife, Christian Lange shows that Muslim religious literature, against transcendentalist assumptions to the contrary, often pictures the boundary between this world and the otherworld as being remarkably thin, or even permeable.

The New Arab Wars Marc Lynch.2016-04-26 Political science professor Marc Lynch chronicles 2012 to 2016 - as the Arab Spring soured to Arab winter. He partially defends Barack Obama's administration, criticized for Middle East timidity. Lynch could have offered more policy prescriptions, but he says the region needs an end to autocrats more than it needs new policies. He draws a pessimistic future of declining economies, falling oil prices, political instability and proxy wars. He says the United States should keep retrenching and seek reform partners. Academics and those with regional interests, in particular, will find this food for thought.

US Foreign Policy in the Middle East Geoffrey F. Gresh, Tugrul Keskin.2018-04-17 The dawn of the Cold War marked a new stage of complex U.S. foreign policy involvement in the Middle East. More recently, globalization and the region's ongoing conflicts and political violence have led to the U.S. being more politically, economically, and militarily enmeshed - for better or worse—throughout the region. This book examines the emergence and development of U.S. foreign policy toward the Middle East from the early 1900s to the present. With contributions from some of the world's leading scholars, it takes a fresh, interdisciplinary, and insightful look into the many antecedents that led to current U.S. foreign policy. Exploring the historical challenges, regional alliances, rapid political change, economic interests, domestic politics, and other sources of regional instability, this volume comprises critical analysis from Iranian, Turkish, Israeli, American, and Arab perspectives to provide a comprehensive examination of the evolution and transformation of U.S. foreign policy toward the Middle East. This volume is an important resource for scholars and students working in the fields of Political Science, Sociology, International Relations, Islamic, Turkish, Iranian, Arab, and Israeli Studies.

Migration and Islamic Ethics .2019-11-11 Migration and Islamic Ethics, Issues of Residence, Naturalization and Citizenship addresses how Islamic ethical and legal traditions can contribute to current global debates on migration and displacement; how Islamic ethics of mu'akha, ḍiyāfa, ijāra, amān, jiwār, sutra, kafāla, among others, may provide common ethical grounds for a new paradigm of social and political virtues applicable to all humanity, not only Muslims. The present volume more broadly defines the Islamic tradition to cover not only theology but also to encompass ethics, customs and social norms, as well as modern political, humanitarian and rights discourses. The first section addresses theorizations and conceptualizations using contemporary Islamic examples, mainly in the treatment of asylum-seekers and refugees; the second, contains empirical analyses of contemporary case studies; the third provides historical accounts of Muslim migratory experiences. Contributors are: Abbas Barzegar, Abdul Jaleel, Dina Taha, Khalid Abou El Fadl, Mettursun Beydulla, Radhika Kanchana, Ray Jureidini, Rebecca Gould, Said Fares Hassan, Sari Hanafi, Tahir Zaman.

On Archaeology of Sainthood and Local Spirituality in Islam Georg Stauth.2015-07-31 Saints, their places, the rituals of their veneration - the heroes and martyrs they represent or to whom they are

often connected with - and the beliefs in their powers have often been described as being counter-thematic to the constructive issues of modern society in our times. However, in the Middle East - and certainly this is true for many other world regions and other world religions - local saints, Jewish, Christian and Islamic, have gained a very ambiguous status in religious movements, political struggles and events of social re-construction. In the case of Islam, perhaps more openly, modernists and fundamentalists alike attempt to abolish or to re-formulate the agenda of venerating the saints. However, at the same time saints and their localities have become a sort of overcharged symbolic incidence in the modern presence of Islam, in politics, in the media and - perhaps on a more hidden ground - in the struggle of ideas. In this volume historians, islamologists, anthropologists and sociologists give a multiple description of the inherent issues of the unhampered continuity of Muslim saints and their significance. With this volume 5, the Yearbook of the Sociology of Islam is linking empirical research on individual saints (including cases from Egypt, Turkey, Algeria, Syria and Morocco) with the debates around Islam and modernity. Georg Stauth teaches Sociology at the University of Bielefeld, Germany, and has widely published on Islam and Theory of Modernity.

Management of Chemotherapy-Induced Nausea and Vomiting Rudolph M. Navari.2016-01-25 This book provides a comprehensive review of new agents, a detailed description of new uses of current agents, and an integration of the available agents in clinical practice. A description of a detailed clinical approach provides clinical practitioners with the most up-to-date recommendations for the prevention and treatment of chemotherapy-induced nausea and vomiting (CINV) in various clinical settings. CINV is one of the most feared treatment related toxicities. Patient surveys for the past thirty years consistently demonstrate patients' perception of deterioration in quality of life due to chemotherapy treatments. The introduction of the antiemetics, serotonin 5-HT₃ receptor antagonists and the neurokinin-1 receptor antagonists, have improved the control of chemotherapy-induced emesis, but the treatment of chemotherapy-induced nausea remains a significant clinical problem. Patients continue to have quality of life issues which prevent normal functioning during active treatment. New agents such as the second generation 5-HT₃ receptor antagonist palonosetron and the new neurokinin-1 receptor antagonists rolapitant and netupitant are being introduced into clinical practice, and it is anticipated that these new agents will improve the control of CINV. Agents such as olanzapine (a FDA approved anti-psychotic), gabapentin (a FDA approved neuroleptic), and ginger (a food additive), which have been used primarily for other indications, are now being tested as potential, effective antiemetics. This work represents the first available comprehensive summary that details all new antiemetic agents and, particularly, their clinical role in treating patients; an important reference for practitioners seeking to improve the quality of life of patients undergoing chemotherapy.

muscular disorders, and psychotic states and the use of THC to treat schizophrenia, Alzheimer's, ADHD, Tourette's, Parkinson's, impotence, depression, lupus, COPD, and chronic pain, among many other physical, neurological, and emotional conditions. The author examines the various cannabis-derived medications available, such as Cannabinol, Dronabinol, and Marinol, and the main methods of administering cannabis. He offers a complete discussion of safe use, possible side effects, contraindications, and precautions (including during pregnancy and chemotherapy), alongside research data that confirms cannabis as one of the least toxic substances in existence. Iran's Networks of Influence in the Middle East The International Institute for Strategic Studies (IISS). 2020-03-31 Tehran's ability to fight by, with and through third parties in foreign jurisdictions has become a valuable and effective sovereign capability that gives Iran strategic advantage in the region. Tehran has possessed a form of this capability since the Islamic Revolution in 1979, but its potency and significance have risen sharply in the past decade, to the point where it has brought Iran more regional influence and status than either its nuclear or ballistic-missile programmes. The IISS Strategic Dossier Iran's Networks of Influence provides an understanding of how Iran builds, operates and uses this capability. Based on original field research, open-source information and interviews with a range of sources, the dossier conducts an audit of Iran's activities in the principal regional theatres of Iraq, Lebanon, Syria and Yemen, and its reach into Bahrain, Saudi Arabia and Kuwait. It includes an examination of Tehran's nurturing of groups such as the Houthis in Yemen, the Badr Organisation in Iraq, Hizbullah in Lebanon and Shia militias in Syria, and details related to recruitment, weapons supply, logistics and command-and-control systems. Iran's Networks of Influence is intended through objective, fact-based analysis to inform both policymakers and practitioners, and to stimulate debate on the wider significance of Iran's use of third-party partners and the strategic depth they afford Tehran. The dossier also examines the advantages that Iran possesses through its recent experience of conflict, and its ability to mobilise and deploy

sympathetic Shia communities across theatres. In a time of rising tension in the region, the dossier looks at how Iran might further develop the use of its partnership capability and the risks and constraints it might face.

Climbing the Mountain Paul Stoller, Mitchel Stoller. 2015-11-28 "You have cancer." Three words that will change your life forever. The diagnosis is often followed by surgery, chemotherapy, radiation therapy and many other stress-inducing treatments. Your future will seem like an insurmountable mountain. John, a 50-year-old corporate lawyer, found himself facing this exact situation when he was diagnosed with a low grade follicular lymphoma. But John was determined to win his fight. Doing research on how to cope with cancer, he found a way to cope with it and is now in long-term remission. Using his story, the authors provide a guide to climbing that mountain. They show how using preparation (research), practice (exercise and activity), and a variety of social supports to live well within the parameters that cancer imposes can help you deal with the disease. They consider how to cope with the stresses and strains of diagnosis, first treatment, short-term remission, second treatment, long-term remission and palliative care. In particular, the authors stress the important relationship between exercise, activity, and well-being.

Grasslands of the World Victor R. Squires, Jürgen Dengler, Limin Hua, Haiying Feng. 2018-09-05 This book begins with a brief account of the extraordinary sequence of events that led to emergence of grasslands as major vegetation formations that now occupy some of the driest and hottest and the highest and coldest on earth as well as vast steppes and prairies in more temperate climes. It is the story of grasses successfully competing with forests and woodlands, aided and abetted by grazing herbivores and by humans and their use of fire as a tool. It is a story of adaptation to changing climates and the changing biophysical environments. A major focus of the book is the Palaearctic biogeographic realm that extends over some 45 million km² and thus more than 1/3 of the terrestrial ice-free surface on Earth. It comprises extensive grasslands of different types and origin, which can be subdivided into (1) natural grasslands with (1a) steppes (climatogenic in dry climates), (1b) arctic-alpine grasslands (climatogenic in cold climates) and (1c) azonal and extrazonal grasslands (pedogenic and topogenic) as well as (2) secondary grasslands created and sustained by human activities, such as livestock grazing, mowing or burning. Grasslands of the Palaearctic do not only form a major basis for the agriculture of the region and thus its food supply, but are also crucial for other ecosystem services and host a supra proportional part of the realm's plant and animal diversity. To reflect that suitability of grasslands for biodiversity strongly depends on their state, we apply the term High Nature Value grassland to those natural grasslands that are not degraded (in good state) and those secondary grasslands that are not intensified (semi-natural). The situation in a variety of countries where grasslands are evolving under the influence of global climate change is also considered. Case studies are presented on Southern Africa, Eastern Africa, India, China, South America, North America and Australia. The concluding chapter examines a set of themes arising from the chapters that make up the bulk of this book. The following provide a focus: recent history of grassland biomes - brief recap of current thinking and recent trends with special reference to dry grasslands in the Palaearctic regions; the current status of grasslands and germplasm resources (biodiversity) - an overview; management systems that ensure sustainability; how to recover degraded grasslands; socio-economic issues and considerations in grassland management; the impacts of environmental problems in grasslands such as future climate change and intensification and the problems/prospects facing pastoralists and other grassland-based livestock producers.

Performing al-Andalus Jonathan Holt Shannon.2015-07-28 *Performing al-Andalus* explores three musical cultures that claim a connection to the music of medieval Iberia, the Islamic kingdom of al-Andalus, known for its complex mix of Arab, North African, Christian, and Jewish influences. Jonathan Holt Shannon shows that the idea of a shared Andalusian heritage animates performers and aficionados in modern-day Syria, Morocco, and Spain, but with varying and sometimes contradictory meanings in different social and political contexts. As he traces the movements of musicians, songs, histories, and memories circulating around the Mediterranean, he argues that attention to such flows offers new insights into the complexities of culture and the nuances of selfhood.

P5 eHealth: An Agenda for the Health Technologies of the Future Gabriella Pravettoni,Stefano Triberti.2019-11-29 This open access volume focuses on the development of a P5 eHealth, or better, a methodological resource for developing the health technologies of the future, based on patients' personal characteristics and needs as the fundamental guidelines for design. It provides practical guidelines and evidence based examples on how to design, implement, use and elevate new technologies for healthcare to support the management of incurable, chronic conditions. The volume further discusses the criticalities of eHealth, why it is difficult to employ eHealth from an organizational point of view or why patients do not always accept the technology, and how eHealth interventions can be improved in the future. By dealing with the state-of-the-art in eHealth technologies, this volume is of great interest to researchers in the field of physical and mental healthcare, psychologists, stakeholders and policymakers as well as technology developers working in the healthcare sector.

Suggestions for Addressing Clinical and Non-Clinical Issues in Palliative Care Marco Cascella,Michael John Stones.2021-07-21 Data from the World Health Organization indicate that about 40 million people worldwide require palliative care each year. We must face this enormous problem with appropriate welfare policies and training of up-to-date and competent personnel. In this context, a book that collects the experiences of authors with diverse backgrounds, and operating in different settings of palliative care, can be added to the many editorial products on the subject.

Over five sections, this volume addresses such topics as palliative care in children, infants, and gynecologic oncology patients; the role of the caregiver; the use of drugs; and ethics, organization, and policy issues. Although this book should not be considered as an exhaustive treatise on palliative care, the many topics covered and the experience and competence of the authors involved make it a useful tool for those who are already experts in the field as well as those who are studying this field.

Faithful Education Ali Riaz.2008-09-03 In the wake of the terrorist attacks on September 11, 2011, discussions on ties between Islamic religious education institutions, namely madrassahs, and transnational terrorist groups have featured prominently in the Western media. In the frenzied coverage of events, however, vital questions have been overlooked: What do we know about the madrassahs? Should Western policymakers be alarmed by the recent increase in the number of these institutions in Muslim countries? Is there any connection between them and the global jihad? Ali Riaz responds to these questions through an in-depth examination of the madraassahs in Pakistan, Bangladesh, and India. In *Faithful Education*, he examines these institutions and their roles in relation to current international politics.

Dietary Supplements Myrna Chandler Goldstein, Mark A. Goldstein MD.2020-06-29 This accessibly written book examines the most commonly taken dietary supplements, exploring what they are and what they're purported to do, and summarizing key research findings regarding their potential health benefits and risks. Today, more than 50 percent of Americans take at least one type of dietary supplement regularly. But do these products actually work? How are they regulated? Are there any potential health risks? *Dietary Supplements: Fact versus Fiction* examines the most commonly used non-nutrient supplements (those that are neither vitamins nor minerals and not essential for human health). Using a standardized structure, each entry discusses a particular supplement's origins, purported benefits, potential risks, and common dosage. Summaries of key research studies are included to help readers make informed decisions about supplements' usefulness. Introductory materials give readers a foundational understanding of how supplements are regulated and labeled and offer practical information about how to read a Supplement Facts panel. For those interested in supplements for a particular health complaint (such as fatigue or pain), a topic finder has also been included.

The Persianate World Nile Green.2019-04-09 At publication date, a free ebook version of this title will be available through Luminos, University of California Press's Open Access publishing program. Visit www.luminosoa.org to learn more. Persian is one of the great lingua francas of world history. Yet despite its recognition as a shared language across the Islamic world and beyond, its scope, impact, and mechanisms remain underexplored. A world historical inquiry into pre-modern cosmopolitanism, *The Persianate World* traces the reach and limits of Persian as a Eurasian language in a comprehensive survey of its geographical, literary, and social frontiers. From Siberia to Southeast Asia, and between London and Beijing, this book shows how Persian gained, maintained, and finally surrendered its status to imperial and vernacular competitors. Fourteen essays trace Persian's interactions with Bengali, Chinese, Turkic, Punjabi, and other languages to identify the forces that extended "Persographia," the domain of written Persian. Spanning the ages of expansion and contraction, *The Persianate World* offers a critical survey of both the supports and constraints of one of history's key languages of global exchange.

Essentials of Interventional Cancer Pain Management Amitabh Gulati, Vinay Puttanniah, Brian M. Bruel, William S. Rosenberg, Joseph C. Hung.2018-12-28 This text provides a comprehensive review and expertise on various interventional cancer pain procedures. The first part of the text addresses the lack of consistency seen in the literature regarding interventional treatment options for specific cancer pain syndromes. Initially, it discusses primary cancer and treatment-related

cancer pain syndromes that physicians may encounter when managing cancer patients. The implementation of paradigms that can be used in treating specific groups of cancer such as breast cancer, follows. The remainder of the text delves into a more common approach to addressing interventional cancer pain medicine. After discussing interventional options that are commonly employed by physicians, the text investigates how surgeons may address some of the more severe pain syndromes, and covers the most important interventional available for our patients, intrathecal drug delivery. Chapters also cover radiologic options in targeted neurolysis and ablative techniques, specifically for bone metastasis, rehabilitation to address patients' quality of life and function, and integrative and psychological therapies. Essentials of Interventional Cancer Pain Management globally assesses and addresses patients' needs throughout the cancer journey. Written by experts in the field, and packed with copious tables, figures, and flow charts, this book is a must-have for pain physicians, residents, and fellows.

Iraq's Shia Warlords and Their Militias Norman Cigar, Strategic Studies Institute. 2015-06-03 As America's de facto co-belligerents who often share the same battlespace in the fight against the Islamic State of Iraq and Syria, the presence and activity of Iraq's Shia warlords and their militias have an impact on U.S. interests and policies at both the strategic and operational levels. The objective of this monograph is to provide a better understanding of the Shia militia phenomenon and to highlight the factors with which U.S. policymakers and U.S. Army planners and commanders will have to deal with respect to operations in Iraq.

Clients Driving Innovation Peter S. Brandon, Shu-Ling Lu. 2008-09-22 In recent years the construction industry has been criticised for lack of successful innovation compared to other major industries. The question of why the industry has not been seen to be innovative has created concern among many involved with construction and property. The driving concern is where the motivation for this innovation should come from. Although construction clients have made an impact in this area, the industry itself seems divided as to whether, when and where clients should drive the innovation process. Clients Driving Innovation brings together an international group of researchers and practitioners to investigate the role of clients in construction innovation. Written in three parts, it covers the context for innovation driven by clients, the client impact on the innovation process and how new ideas can be pushed through into practice. Numerous case studies illustrate the role clients can play and the key issues that need to be addressed. With increasing interest in the contribution clients can make to construction innovation, Clients Driving Innovation will be essential reading for construction management researchers, major construction contractors and clients and government policy makers.

Tumor Board Review Robert F. Todd, Kathleen A. Cooney, MD. 2011-10-19 Tumor Board Reviews provides comprehensive coverage of all topics in oncology. Each of the 32 chapters focuses on a specific major disease. A brief overview of epidemiology and risk factors is followed by a sequence of specific presentations organized by tumors stage or disease classification. Each discussion features a case presentation that mimics the format of a tumor board presentation and thus illustrates key diagnostic and management decisions. There is also a discussion of the evidence that supports the clinical management decisions taken in the case, based on current expert panel guidelines. Algorithms and decision tree graphics are used extensively to provide visual support of the decision process. The combination of case presentations and evidence-based management discussions make this volume a unique tool for keeping current with clinical guidelines and provides the reader with a clear understanding of applications of new information for use in daily practice.

The results of many clinical trials are discussed in detail, and readers will find this book to be a useful guide to the evidence-based treatment of breast diseases. The revised edition provides a comprehensive update of the previous version of the book. Specifically, it contains 2 new chapters: "Molecular Classification of Breast Cancer" and "Breast Cancer Molecular Testing for Prognosis and Prediction". In addition, since publication of the previous edition, the results of numerous adjuvant systemic therapy and neo-adjuvant systemic therapy trials have been published, and this edition provides a comprehensive overview of these trials and discusses how they have changed the management of breast cancer. Similarly, there have been, in the last few years, important new developments in the local therapy of breast cancer. This edition discusses these new developments and particularly recent developments and controversies concerning the management of the axilla in patients with primary breast cancer. New guidelines with respect to radiotherapy are also reviewed and discussed. Finally, all chapters in the book are thoroughly revised and updated to provide readers with current understanding of the biology and treatment of breast cancer.

The Health Effects of Cannabis and Cannabinoids National Academies of Sciences, Engineering, and Medicine,Health and Medicine Division,Board on Population Health and Public Health Practice,Committee on the Health Effects of Marijuana: An Evidence Review and Research Agenda.2017-03-31 Significant changes have taken place in the policy landscape surrounding cannabis legalization, production, and use. During the past 20 years, 25 states and the District of Columbia have legalized cannabis and/or cannabidiol (a component of cannabis) for medical conditions or retail sales at the state level and 4 states have legalized both the medical and recreational use of cannabis. These landmark changes in policy have impacted cannabis use patterns and perceived levels of risk. However, despite this changing landscape, evidence regarding the short- and long-term health effects of cannabis use remains elusive. While a myriad of studies have examined cannabis use in all its various forms, often these research conclusions are not appropriately synthesized, translated for, or communicated to policy makers, health care providers, state health officials, or other stakeholders who have been charged with influencing and enacting

policies, procedures, and laws related to cannabis use. Unlike other controlled substances such as alcohol or tobacco, no accepted standards for safe use or appropriate dose are available to help guide individuals as they make choices regarding the issues of if, when, where, and how to use cannabis safely and, in regard to therapeutic uses, effectively. Shifting public sentiment, conflicting and impeded scientific research, and legislative battles have fueled the debate about what, if any, harms or benefits can be attributed to the use of cannabis or its derivatives, and this lack of aggregated knowledge has broad public health implications. The Health Effects of Cannabis and Cannabinoids provides a comprehensive review of scientific evidence related to the health effects and potential therapeutic benefits of cannabis. This report provides a research agenda—outlining gaps in current knowledge and opportunities for providing additional insight into these issues—that summarizes and prioritizes pressing research needs.

Wikisource: Online library of user-submitted and maintained content. While you won't technically find free books on this site, at the time of this writing, over 200,000 pieces of content are available to read. You won't find fiction here - like Wikipedia, Wikibooks is devoted entirely to the sharing of knowledge. You can also browse Amazon's limited-time free

Because this site is dedicated to free books, there's none of the hassle you get with filtering out paid-for content on Amazon or Google Play Books. We also love the fact that all the site's genres are presented on the homepage, so you don't have to waste time trawling through menus. Unlike the bigger stores, Free-Ebooks.net also lets you sort results by publication date, popularity, or rating, helping you avoid the weaker titles that will inevitably find their way onto open publishing platforms (though a book has to be really quite poor to receive less than four stars).
