Emotion and the Structure of Narrative Film Ed S. Tan.2013-10-16 Introduced one hundred years ago, film has since become part of our lives. For the past century, however, the experience offered by fiction films has remained a mystery. Questions such as why adult viewers cry and shiver, and why they care at all about fictional characters -- while aware that they contemplate an entirely staged scene -- are still unresolved. In addition, it is unknown why spectators find some film experiences entertaining that have a clearly aversive nature outside the cinema. These and other questions make the psychological status of emotions allegedly induced by the fiction film highly problematic. Earlier attempts to answer these questions have been limited to a few genre studies. In recent years, film criticism and the theory of film structure have made use of psychoanalytic concepts which have proven insufficient in accounting for the diversity of film induced affect. In contrast, academic psychology -- during the century of its existence -- has made extensive study of emotional responses provoked by viewing fiction film, but has taken the role of film as a natural stimulus completely for granted. The present volume bridges the gap between critical theories of film on the one hand, and recent psychological theory and research of human emotion on the other, in an attempt to explain the emotions provoked by fiction film. This book integrates insights on the narrative structure of fiction film including its themes, plot structure, and characters with recent knowledge on the cognitive processing of natural events, and narrative and person information. It develops a theoretical framework for systematically describing emotion in the film viewer. The question whether or not film produces genuine emotion is answered by comparing affect in the viewer with emotion in the real world experienced by persons witnessing events that have personal significance to them. Current understanding of the psychology of emotions provides the basis for identifying critical features of the fiction film that trigger the general emotion system. Individual emotions are classified according to their position in the affect structure of a film -- a larger system of emotions produced by one particular film as a whole. Along the way, a series of problematic issues is dealt with, notably the reality of the emotional stimulus in film, the identification of the viewer with protagonists on screen, and the necessity of the viewer's cooperation in arriving at a genuine emotion. Finally, it is argued that film-produced emotions are genuine emotions in response to an artificial stimulus. Film can be regarded as a fine-tuned machine for a continuous stream of emotions that are entertaining after all. The work paves the way for understanding and, in principle, predicting emotions in the film viewer using existing psychological instruments of investigation. Dealing with the problems of film-induced affect and rendering them accessible to formal modeling and experimental method serves a wider interest of understanding aesthetic emotion -- the feelings that man-made products, and especially works of art, can evoke in the beholder.

Suffering Art Gladly Jerrold Levinson.2013-11-14 A collection of newly composed essays, some with a historical focus and some with a contemporary focus, which addresses the problem of explaining the appeal of artworks whose appreciation entails negative or difficult emotions on the appreciator's part - what has traditionally been known as the paradox of tragedy.

Religious Dogmatics and the Evolution of Societies Niklas Luhmann.1984 This volume comprises an English translation of Niklas Luhmann's *Religiöse Dogmatik und gesellschaftliche Funktion* (Chapter two of his 1977 *Funktion der Religion*), which has been the subject of much discussion and controversy in Europe over the past 15 years. Peter Beyer also provides a 50-page introduction which treats some of the main concepts in Luhmann's abstract and difficult thought and also illustrates the way these concepts fit into his overall theory of society and religion.

The Morals and Politics of Psychology Isaac Prilleltensky.1994-07-28 This book explores the moral, social, and political implications of dominant psychological theories and practices. The analysis entails the therapeutic uses of psychoanalysis, cognitive, behavioral, and humanistic psychology, as well as the practice of clinical, school, and industrial/organizational psychology. It is argued that applied psychology strengthens the societal status quo, thereby contributing to the perpetuation of social injustice. Most discussions of morality in psychology deal with the ethical repercussions of practices on individual clients. This book is unique in that it deals with the social ethics of psychology; that is, with the social morality of the discipline. It is also unique in that it offers a comprehensive critique of the most popular psychological means of solving human problems. The author does not stop at the level of critique but provides a vision for including the values of self-determination, distributive justice, collaboration, and democratic participation in psychology. He shows how some of these values have already been adopted by feminist and community psychologists. Given the prominence of psychology in contemporary society, *The Morals and Politics of Psychology* should be of interest to mental health professionals and their clients, as well as to people concerned with morality and social justice.

The Life Space of the Urban Child Gunter Mey,Hartmut Gunther.2015-01-31 The heart of this book is the translation of *The Life Space of the Urban Child*, written in 1935 by Martha and Hans Heinrich Muchow. *Life Space* provides a fresh look at children as actors and how they absorb their city environments. It uses an empirical base connected with theories about the worlds in which children live. The first section provides historical background on Muchow's study and the author. The second section presents the translation of the *Life Space* study, as well as comments from an environmental psychologist's perspective. The third section reviews the study's theoretical foundations, including the concept of "critical personalism," the perspectives of phenomenology, and the notion of *Umwelt* (environment). The last section addresses various lines of research developed from the *Life Space* study, including Muchow's work in describing children in urban environments, methodological approaches, and the significance of space in social science and educational contexts. The manner in which Martha Muchow conducted her studies is itself of note. She obtained access to the children in their environments and combined observation with cartographies and essays produced by the children. This approach was new at the time and continues to inspire researchers today. This volume is the latest work in Transaction's *History and Theory of Psychology* series.

Life Intense Tristan Garcia.2018-08-13 Our lives today are oppressed by the demand that we live, feel and experience with ever greater intensity. We are enticed to try exotic flavors and smells; urged to enjoy a wide range of sexual experiences; pushed to engage in extreme sports and recreational drugs - all in the pursuit of some new, unheard-of intensity. Tristan Garcia argues that such intensity rarely lives up to its promise. It always comes at a price: one that defines the ethical predicament of contemporary life. The notion of intensity was the hidden key to Garcia's landmark book *Form and Object*. In *The Life Intense*, the first part of his ambitious *Letting Be* trilogy, he begins to develop it in detail. This first book focuses on ethics; the forthcoming volumes will be devoted to politics and then metaphysics.

Three Seductive Ideas Jerome Kagan.2000-04-07 Do the first two years of life really determine a child's future development? Are human beings, like other primates, only motivated by pleasure? And do people actually have stable traits, like intelligence, fear, anxiety, and temperament? This book, the product of a lifetime of research by one of the founders of developmental psychology, takes on the powerful assumptions behind these questions—and proves them mistaken. Ranging with impressive ease from cultural history to philosophy to psychological research literature, Jerome Kagan weaves an argument that will rock the social sciences and the foundations of public policy. Scientists, as well as lay people, tend to think of abstract processes—like intelligence or fear—as measurable entities, of which someone might have more or less. This approach, in Kagan's analysis, shows a blindness to the power of context and to the great variability within any individual subject to different emotions and circumstances. 'Infant determinism' is another widespread and dearly held conviction that Kagan contests. This theory—with its claim that early relationships determine lifelong patterns—underestimates human resiliency and adaptiveness, both emotional and cognitive (and, of course, fails to account for the happy products of miserable childhoods and vice versa). The last of Kagan's targets is the vastly overrated pleasure principle, which, he argues, can hardly make sense of unselfish behavior impelled by the desire for virtue and self-respect—the wish to do the right thing. Written in a lively style that uses fables and fairy tales, history and science to make philosophical points, this book challenges some of our most cherished notions about human nature.

Cinder & Ella Kelly Oram.2019-11-08 What would you do if your anonymous Internet best friend turned out to be Hollywood's hottest celebrity?Cinder458: Your blogiversary is coming up, right?EllaTheRealHero: Do all those Hollywood friends of yours know you use words like blogiversary?Cinder458: Of course not. I need your address. Got you a blogiversary present.Cinder got me a gift? My heart flipped. Not that I was in love with my Internet best friend or anything. That would be utterly ridiculous. The boy was cocky and stubborn and argued with everything I said just to be infuriating. He also had lots of money, dated models—which meant he had to be hot—and was a closet book nerd. Funny, rich, hot, confident, book lover. Definitely not my type. Nope. Not at all. It's been almost a year since eighteen-year-old Ella Rodriguez was in a car accident that left her crippled, scarred, and without a mother. After a very difficult recovery, she's been uprooted across the country and forced into the custody of a father that abandoned her when she was a young child. If Ella wants to escape her father's home and her awful new stepfamily, she must convince her doctors that she's capable, both physically and emotionally, of living on her own. The problem is, she's not ready yet. The only way she can think of to start healing is by reconnecting with the one person left in the world who's ever meant anything to her—her anonymous Internet best friend, Cinder.Hollywood sensation Brian Oliver has a reputation for being trouble. There's major buzz around his performance in his upcoming film *The Druid Prince*, but his management team says he won't make the transition from teen heartthrob to serious A-list actor unless he can prove he's left his wild days behind and become a mature adult. In order to douse the flames on Brian's bad-boy reputation, his management stages a fake engagement for him to his co-star Kaylee. Brian isn't thrilled with the arrangement—or his fake fiancée—but decides he'll suffer through it if it means he'll get an Oscar nomination. Then a surprise email from an old Internet friend changes everything....With a heartwarming online celebrity romance reminiscent of Jennifer E. Smith's *This Is What Happy Looks Like*, bestselling young adult author Kelly Oram has struck gold with her new adult contemporary retelling of the timeless fairytale classic *Cinderella*.A story that has it all: tears, laughs, sparks and a drop-dead swoonworthy hero. Give it a while and DreamWorks will pick up this story for a movie adaptation, no doubt. Anna Katmore, Author of *Play With Me & Neverland* Both funny and heart-wrenching, *Cinder and Ella* will give you all the feels. It's the best twist on the *Cinderella* tale I have come across. I am not just a fan of Kelly Oram. I am an addict. Cassie Mae, author of *Switched & How To Hook A Bookworm* *Cinder & Ella* is a beautiful modern-day fairytale with a great cast of characters that made me laugh and swoon. It had me staying up late at night to read just one more chapter, and at the end, I was left with a big grin on my face. A Philosophy of Mass Art Noël Carroll.1998 We live in a world dominated by mass art. Movies, TV, pulp literature, comics, rock music—both broadcast and recorded—surround us everywhere in the industrialized world and beyond. However, despite the fact that for the majority mass art supplies the primary source of aesthetic experience, the area has been neglected entirely by analytic philosophers of art. In *The Philosophy of Mass Art*, Noel Carroll, a leading figure in the field of aesthetic philosophy, attempts to address that lacuna. He shows why philosophers have previously resisted and/or misunderstood mass art and he develops frameworks for understanding the relation of mass art to the emotions, morality, and ideology discussing the accounts of such theorists in the field as Collingwood, Adorno, Benjamin, McLuhan, and Fiske. Mixing conceptual analysis and many vivid examples, the author proposes the first significant attempt at a philosophy of mass art in the analytical tradition concluding there are strong grounds for approaching mass art in the same fashion as high art.

Ecological Communication Niklas Luhmann.1989-08-15 Niklas Luhmann is widely recognized as one of the most original thinkers in the social sciences today. This major new work further develops the theories of the author by offering a challenging analysis of the relationship between society and the environment. Luhmann extends the concept of ecology to refer to any analysis that looks at connections between social systems and the surrounding environment. He traces the development of the notion of environment from the medieval idea—which encompasses both human and natural systems—to our modern definition, which separates social systems from the external environment. In Luhmann's thought, human beings form part of the environment, while social systems consist only of communications. Utilizing this distinctive theoretical perspective, Luhmann presents a comprehensive catalog of society's reactions to environmental problems. He investigates the spheres of the economy, law, science, politics, religion, and education to show how these areas relate to environmental issues. *Ecological Communication* is an important work that critically examines claims central to our society—claims to modernity and rationality. It will be of great importance to scholars and students in sociology, political science, philosophy, anthropology, and law.

Society of Fear Heinz Bude.2017-12-08 From the rise of terrorism to the uncertainties associated with economic crisis and recession, our age is characterized by fear. Fear is the expression of a society on unstable foundations. Most of us feel that our social status is under threat and our future prospects in jeopardy. We are overwhelmed by a sense of having been catapulted into a world to which we no longer belong. Tracing this experience of fear, Heinz Bude uncovers a society marked by disturbing uncertainty, suppressed anger and quiet resentment. This is as true in our close relationships as it is in the world of work, in how we react to politicians as much as in our attitudes towards bankers and others in the financial sector. Bude shows how this fear is not derived so much from a 'powerful other' but rather from the seemingly endless range of possibilities which we face. While this may seem to offer us greater autonomy and freedom, in reality the unknown impact and meaning of each option creates a vacuum which is filled by fear. What conditions lead people to feel anxious and fearful for themselves and others? How can individuals withstand fear and develop ways of making their fears intelligible? Probing these and other questions, Bude provides a fresh analysis of

some of the most fundamental features of our societies today.

Nights in the Big City Joachim Schlör.2016-04-15 This elegantly written book describes the evolving perception and experience of the night in three great European cities: Paris, Berlin, and London. As Joachim Schlör shows, the lighting up of the European city by gas and electricity in the nineteenth and early twentieth centuries brought about a new relationship with the night for both those who toiled at work and those who caroused in restaurants, pubs, and cafes. Nights in the Big City explores this change and offers a stirring portrait of the secrets and mysteries a city can hold when the sun goes down. Sifting through countless police and church archives alongside first-hand accounts, Schlör sets out on his own explorations with a head full of histories, exploring the boulevards and side-streets of these three great capitals. Illustrated with haunting and evocative photographs by, among others, Bill Brandt and André Kertész, and filled with contemporary literary references, Nights in the Big City is a milestone in the cultural history of the city.

Manipulation Christian Coons,Michael Weber.2014-07-01 In all groups -- from couples to nation-states -- people influence one another. Much of this influence is benign, for example giving advice to friends or serving as role models for our children and students. Some forms of influence, however, are clearly morally suspect, such as threats of violence and blackmail. A great deal of attention has been paid to one form of morally suspect influence, namely coercion. Less attention has been paid to what might be a more pervasive form of influence: manipulation. The essays in this volume address this relative imbalance by focusing on manipulation, examining its nature, moral status, and its significance in personal and social life. They address a number of central questions: What counts as manipulation? How is it distinguished from coercion and ordinary rational persuasion? Is it always wrong, or can it sometimes be justified, and if so, when? Is manipulative influence more benign than coercion? Can one manipulate unintentionally? How does being manipulated to act bear on one's moral responsibility for so acting? Given various answers to these questions, what should we think of practices such as advertising and seduction?

Theology Made in Dignity Bert Roebben.2016 In a post-secular society contemporaries are challenged to raise and face existential questions in the midst of a plurality of (religious and non-religious) worldviews.

Children, adolescents and young adults are especially eager for orientation in negotiating this plurality. Religious Education in European schools can provide them with solid insights and a safe space to accept this challenge. In this book the narrative, communicative and spiritual dimensions of religious education are discussed. In the act of theologizing with children, adolescents and young adults, in each other's presence and with a view to wisdom traditions, they are empowered to patiently engage in new ways. Alternative patterns of framing identity and community, experience and interpretation, transcendence and immanence, can then emerge. The book is rooted in the teaching praxis of the author and reaches out to the centers of initial teacher education, where future leaders learn to discover the theological dignity of religious education.

Thou Shalt Not Be Aware Alice Miller.1998-10-15 Originally published in 1984, *Thou Shalt Not Be Aware* explodes Freud's notions of infantile sexuality and helps to bring to the world's attention the brutal reality of child abuse, changing forever our thoughts of traditional methods of child-rearing. Dr. Miller exposes the harsh truths behind children's fantasies by examining case histories, works of literature, dreams, and the lives of such people as Franz Kafka, Virginia Woolf, Gustave Flaubert, and Samuel Beckett. Now with a new preface by Lloyd de Mause and a new introduction by the author, *Thou Shalt Not Be Aware* continues to bring an essential understanding to the confrontation and treatment of the devastating effects of child abuse.

The Many Faces of Shame Donald L. Nathanson.1987-06-01 For almost a century the concept of guilt, as embedded in drive theory, has dominated psychoanalytic thought. Increasingly, however, investigators are focusing on shame as a key aspect of human behavior. This volume captures a range of compelling viewpoints on the role of shame in psychological development, psychopathology, and the therapeutic process. Donald Nathanson has assembled internationally prominent authorities, engaging them in extensive dialogue about their areas of expertise. Concise introductions to each chapter place the authors both historically and theoretically, and outline their emphases and contributions to our understanding of shame. Including many illustrative clinical examples, the book covers such topics as the relationship between shame and narcissism, shame's central place in affect theory, psychosis and shame, and shame in the literature of French psychoanalysis and philosophy.

Religious Education in a Mediatized World Ilona Nord,Hanna Ziperovszky.2017-05-10 In religious education, digitization and mediatization processes result in the transformation of conventional media formats. This leads to the development of new media formats, which in turn necessitates a redefinition of the relationship between religious education and the media. Keeping this in mind, this volume first examines the importance of media for specific theological disciplines, and then discusses current media-pedagogical and media-didactic approaches. Later in the book, the authors develop didactic perspectives on various methods; these include internet-based archive work and the use of digital teaching materials. They also deal with current questions regarding religious education, such as inclusion and cyber bullying, etc. Finally, they identify some of the main didactic challenges for religious instruction in a mediatized world. This volume is a plea for a wider understanding of education, and is based in part on a German-Swedish teaching and research cooperation. Following this example, it focuses on a future-oriented networking of plural forms of education. This resource is designed for students of theology and religious sciences as well as for religious education teachers.

Psychotherapeutic Diagnostics Heinrich Bartuska,Manfred Buchsbaumer,Gerda Mehta,Gerhard Pawlowsky,Stefan Wiesnagrotzki.2008-08-09 For the first time this book provides a comprehensive diagnostic for all different methods in psychotherapy. Because of the individual approaches and structures this could not be realized until now. Experts of seventeen schools-of-thought came together at a round table and drew up guidelines for the daily work of psychotherapists. The result is documented in this book, containing a summary of relevant standard questions; it also includes methodological commentaries for practical implementation. Despite the individual approach of the different types of psychotherapies, this psychotherapeutic diagnostic is applicable for all psychotherapists.

Exkommunikation und Reintegration Gerhard J. Baudy.1980 Allen Religionen fällt u.a. die Aufgabe zu, unverwendbare Ängste rituell und/oder ideologisch zu verbrauchen. Dabei spielt die räumliche Heilsorientierung nach oben und zur territorialen Mitte hin eine herausragende Rolle. Die Arbeit setzt sich zum Ziel, diese Intention ethologisch zu erklären und die komplexe Symbolik der Heilsphantasien tiefenpsychologisch zu durchleuchten. Vor dem Hintergrund ethnographischer Materialien untersucht der Autor den Funktionswandel der rituellen Substrate in den religiösen Bräuchen, Mythen, Märchen und philosophischen Heilssystemen des frühen Griechenlands, soweit diese Todesangst absorbieren und verarbeiten.
