Quick Counting: Numbers Under 100 Oksana Siniukov,Maryna Kuznetsova,Math Country.2021-03-23 The best way to heighten your kid's mental abilities and prepare your child for Gifted and Talented tests! The Math Country team is made up of practicing mathematics teachers with a combined teaching experience of more than 35 years, who are also authors of unique methods of intensive children's education. With our notebooks Quick Counting: Numbers Under 20 you can effectively and efficiently teach your children to add and subtract. Our notebook contains exercises that will help your child not only master actions such as addition and subtraction, but also count within twenty, increase/decrease the number of objects by one, two, three and four using the number line; consolidate the concepts of greater-less-equal; remember how numbers are written and dialed on the abacus; learn to count on an abacus in three or more steps. The material consists of 6 lessons plus additional exercises for homework to repeat. Theoretical material is at the beginning of the notebook with an explanation of how to perform the exercises correctly. A feature of our notebooks is the symbiosis of mental arithmetic and classical mathematics. Mental arithmetic is a UNIQUE method of teaching children that trains the speed of perception and processing of information and allows them to harmoniously develop both hemispheres of the brain at the same time by mentally visualizing the calculations on the abacus. A developed brain is the basis for successful future activities. The colorful notebook uses games as exercises, the main character of which is a curious rabbit Shoosha. The book will allow children to easily and naturally get acquainted with the design of the abacus and the rules of moving the beads. From the first lessons the exercises train the ability to quickly state the previous and the next numbers to a given one, the ability to count from anywhere in direct and in reverse order, and to determine the place of a given number in a number series. In addition, the workbook contains a lot of funny pictures and interesting tasks that create positive motivation for learning and actively develop the logic, memory, attention, and intelligence of children. We wish you and your child success in learning mathematics and mental arithmetic!
