A History Of The B-24 Liberator in Over 300 Photographs, Stories And Analysis: Including The U.S. Army Air Forces in World War II: Combat Chronology 1941 - 1945 - American Air Power in WWII

.2015-07-28 PREFACE The chronology is concerned primarily with operations of the US Army Air Forces and its combat units between December 7, 1941 and September 15, 1945. It is designed as a companion reference to the seven-volume history of The Army Air Forces in World War 11, edited by Wesley Frank Craven and James Lea Cate. The research was a cooperative endeavor carried out in

the United States Air Force historical archives by the Research Branch of the Albert F. Simpson Historical Research Center. Such an effort has demanded certain changes in established historical methodology, as well as some arbitrary rules for presentation of the results. After International and US events, entries are arranged geographically. They begin with events at Army Air Forces Headquarters in Washington then proceed eastward around the world, using the location of the headquarters of the numbered air forces as the basis for placement. For this reason, entries concerning the Ninth Air Force while operating in the Middle East follow Twelfth Air Force. When that headquarters moves to England in October 1943, the entries are shifted to follow Eighth Air Force. The entries end with those numbered air forces which remained in the Zone of the Interior, as well as units originally activated in the ZI, then designated for later movement overseas, such as Ninth and Tenth Air Forces. The ZI entries do not include Eighth and Twentieth Air Forces, which were established in the ZI with the original intent of placing them in those geographical locations with which they became historically identified. For these two units, original actions are shown either under AAF or in their intended geographic area of location. All times and dates used are those of the area under discussion. The entry 1/2 Jun indicates that an event occurred during the night between the two given dates, while 1-2 Jun indicates an action over a period of time. In dealing with people, again arbitrary decisions were implemented. For military men below the general officer or equivalent level, full grade and name were used. For general officers and those of equal grade in other US and foreign services, the complete rank (both that at the time first mentioned and the highest rank held prior to the end of the war) and name will be found in the index. Only an abbreviated rank (e.g., Gen or Adm) and last name are used in the text. The exception is where two general officers had the same last name; in such cases, the first name is also included. Similarly for

civilian leaders, only the last name is used; full name and title are given in the index. Location of all towns, islands, etc., is also made in the index. In all cases, attempts were made to cite place names in use by the native population at the time of or immediately before the war. No names imposed by a conqueror are used. For example Pylos Bay, not Navarino Bay, is used. Further, as appropriate, native geographic terms are used: Shima for island in Japanese island groups, See for lake in Germany. However, two exceptions were made. In cases in which the place became infamous because of the actions of the conquering power, that name is preferred—for example Auschwitz would be used rather than the Polish name of Oswiecim. Also, in larger international cities, such as Roma, Koln and Wien, the anglicized name is used. Where a village or hamlet was difficult to locate or where there were several such places with the same name in a general area, the coordinates are given in the index. In some cases, with no extant navigational aids of the attacking force, the best possible guess was made based upon all available evidence. In other instances, such as the bridge at Hay-ti-attacked so often by Tenth Air Force-- a logical guess could not be made. In these cases, a question mark is placed in brackets after the index entry. Accent marks, such as umlauts, were omitted.

Sunk in Kula Gulf John J. Domagalski.2012 The early morning hours of July 6, 1943, found the USS Helena off the Solomon Islands in what would later be known as the Battle of Kula Gulf. But the ship's participation in the battle came to a swift end when three Japanese torpedoes suddenly struck. One hundred and sixty-eight sailors went down with the ship, many never surviving the initial torpedo hits. As the last of the Helena disappeared below the ocean's surface, the remaining crewmen's struggle for survival had only just begun. Sunk in Kula Gulf tells the epic story of the Helena's survivors. Two destroyers plucked more than seven hundred from the sea in a night rescue

operation as the battle continued to rage. A second group of eighty-eight sailors --clustered into three lifeboats--made it to a nearby island and was rescued the next day. A third group of survivors, spread over a wide area, was missed entirely. Clinging to life rafts or debris, the weary men were pushed away from the area of the sinking by a strong current. After enduring days at sea under the hot tropical sun, they finally found land. It was, however, the Japanese-held island of Vella Lavella and deep behind the front lines. The survivors organized and disappeared into the island's interior jungle. Living a meager existence, the group evaded the Japanese for eight days until the Marines and U.S. Navy evacuated the shipwrecked sailors in a daring rescue operation. Using a wide variety of sources, including previously unpublished firsthand accounts, John J. Domagalski brings to life this amazing, little-known story from World War II.

Hidden Warbirds Nicholas A. Veronico, Nick Veronico. 2013-06-17 Veronico explores the romantic era of World War II warbirds and the stories of some of its most famous wrecks, including the Swamp Ghost (a B-17E which crashed in New Guinea in the early days of World War II and which was only recently recovered), and Glacier Girl (a P-38, part of The Lost Squadron, which crashed in a large ice sheet in Greenland in 1942). Throughout, Veronico provides a history of the aircraft, as well as the unique story behind each discovery and recovery with ample illustrations.

**Hitler's Secret Pirate Fleet** James P. Duffy. 2001-06-30 They were the deadliest ships of World War II--nine German commerce raiders disguised as peaceful cargo ships, flying the flags of neutral and allied nations. In reality, these heavily armed warships roamed the world's oceans at will, like 20th-century pirates. They struck unsuspecting freighters and tankers out of the darkness of night or from behind a curtain of fog and mist. For almost three years they led the Royal Navy on a deadly chase from sea to sea, seeding Allied ports with hundreds of mines and, on one occasion, even

bombarding a shore installation. Masquerading as unarmed merchantmen, the raiders carried an awesome array of weapons cleverly hidden behind false structures and concealed inside empty packing crates on their decks. Seaplanes and motorboats helped them seek out their victims on the vast seas. They then fed off of these unsuspecting targets, pumping fuel from their prey into their own tanks and taking food from captured pantries to feed their own crews and the thousands of prisoners that they picked up along the way. These secret ships also acted as supply ships for U-boats, helping their fellow hunters remain at large for longer periods. At sea for months--or even years--those raider sailors lucky enough to survive were hailed as heroes when they returned home.

Abandoned Places of World War I Neil Faulkner.2021-11-02 From the preserved remains of the mighty Przemyśl fortress to the underwater wreckage of German warship SMS Scharnhorst near the Falkland Islands, Abandoned Places of World War I features more than 150 striking photographs from around the world. An overgrown concrete bunker at Ypres; a rusting gun carriage in a field in Flanders; perfectly preserved trenchworks at Vimy, northern France; a rocky mountaintop observation post high in the Tyrolean mountains. More than 100 years after the end of World War I, the conflict's legacy can still be seen from Europe to the South Atlantic. Abandoned Places of World War I explores more than 100 bunkers, trench systems, tunnels, fortifications, and gun emplacements from North America to the Pacific. Included are defensive structures, such as Fort Douaumont at Verdun, the site of the Western Front's bloodiest battle; the elaborately constructed tunnels of the Wellington Quarry, near Arras, designed to provide a safe working hospital for wounded British soldiers; and crumbling concrete pill boxes in Anzac Cove, Turkey.

**World War II on Film** David Lührssen.2020-11-09 World War II on Film examines the war through the lens of 12 films. The movies selected include productions made during World War II and in each succeeding decade, providing a sense of how different generations perceive the war. World War II on Film provides a succinct yet well-grounded appraisal of that war as seen through 12 representative films. The book separates fact from fiction, showing where the movies were accurate and where they departed from reality, and places them in the larger context of historical and social events. Each movie chosen represents a particular aspect of the conflict, including the air war over Europe, the condition of prisoners of war, Nazi atrocities, and the British evacuation at Dunkirk. Unlike most histories of Hollywood during World War II or the genre of war movies, World War II on Film examines in depth the relation between the depictions of events, beliefs, attitudes, and ways of

life as seen on film with reality as documented by historians or recorded by journalists or eye-witnesses to the war. The volume will appeal to high school and college readers, as well as general interest readers and film buffs.

*Abandoned London* Katie Wignall.2021-04-14 Despite London's gleaming surface, the city has another side, one of secrets, dilapidation, and mystery. Wander through disused Underground stations; ornate Victorian sewers and waterworks; crumbling but beautiful Art Deco cinemas and empty swimming pools; bombed-out churches and eerie docklands; and ruined mansions and overgrown cemeteries, all haunting relics from a time gone by. Arranged thematically from transport and industry to residential and recreational, these entries cover both the modern city and the historical metropolis.

Abandoned World War II Aircraft, Tanks & Warships Chris McNab,Amber Books.2021-07-06

Illustrated with more than 150 unique photographs, *Abandoned World War II Weapons* allows the history buff and general reader to explore the detritus of this great, destructive conflict in every part of the world. The scattered remains of a German bomber on Spitsbergen Island; Sherman tanks waterlogged off Omaha Beach; Japanese merchant ships sunk off the coast of New Guinea. More than 75 years after the end of World War II, the conflict's legacy can still be seen from the Arctic wastes to the Solomon Islands of the South Pacific. The six years of World War II produced a greater number and variety of weapons than any other conflict before or since. This included more than 5 million tanks, armored fighting vehicles, and other self-propelled weapons; 8 million artillery guns; almost a million military aircraft; more than 50,000 ships and submarines; as well as many millions

of rifles, machine guns, and handguns. Today, in every corner of the world, the remnants of this epic conflict can still be seen. Long-buried partisan weapons caches in the Belorussian forest; sand-covered trucks in the Sahara desert; crashed American bombers and Japanese anti-aircraft guns in the jungles of New Guinea; tank wrecks on old military training grounds; thousands of unexploded bombs in the depths of the world's seas and oceans; or the hundreds of aircraft and 30 Japanese ships destroyed in Truk Lagoon, the biggest graveyard of ships in the world and today a popular dive site.

**Operation Rising Sun** David W. Jourdan,James P. Delgado.2020-06-01 In 1944 Allied codebreakers learned the Imperial Japanese Navy had dispatched the cargo submarine I-52 to occupied France with tons of military supplies and payment--in gold--for German assistance. I-52 undertook the mission as part of the Yanagi missions, a military program meant to alleviate Japan's desperate need for military material and technical knowledge. After tracking I-52 from Asia to the Atlantic, the Allies destroyed the vessel in a battle that ended the Yanagi missions and left I-52 an unlikely treasure ship on the seafloor. David W. Jourdan adds to the history of I-52 with a spellbinding account of his efforts to find the sunken submarine. One of the first joint American-Russian research expeditions, the search for the wreck combined a team effort, exhaustive detective work, and a dramatic battle with the sea. The effort paid off when the group found I-52's nearly intact hull three miles down. The expedition also earned an unexpected historical dividend when it uncovered one-of-a-kind recordings of American Avenger torpedo bomber attacks on an enemy submarine. Part war tale and part seagoing adventure, Operation Rising Sun tells the story of the two very different missions to find submarine I-52.

[International Law of Underwater Cultural Heritage](#) Kim Browne,Murray Raff.2023-01-01 This book

brings together three distinct areas of International Law – namely Environmental, Heritage and Ocean Law – to address the international legal protection of historically significant wrecks, with particular focus on the environmental hazards they may pose. The confluence of Heritage Law and the Law of the Sea with International Environmental Law represents an important development in international governance strategies for the twenty-first century, in particular those legal and administrative regimes that concern the world’s oceans and underwater cultural heritage protection. Importantly, connections between international legal regimes, such as the 1982 Law of the Sea, and institutions like the International Maritime Organisation (IMO) and United Nations Education Scientific Cultural Organisation (UNESCO), can play a crucial part in governance strategies that involve the regulation of marine pollution and historic shipwrecks.

*Hidden Warships* Nicholas A. Veronico. 2015-07-07 A photo-filled tour of wrecked warships around the world, with their stories recounted in “a wonderfully clear [and] lively style” (Seattle Post Intelligencer). Sunk by enemy fire, scuttled, or run aground, the number of World War II-era battleships, cruisers, submarines, and other warships that ended their service on the bottom of the world’s oceans and seas is enormous. In the decades since the conflict, wreck hunters have pored over historical records and combed the world’s oceans to find their remains. Now you too can see them up close—without getting your feet wet. In *Hidden Warships*, naval historian Nicholas A. Veronico details the history, recovery, and preservation of these sunken combat ships—including accounts from the divers and restorers who have worked with them. Beginning with the Japanese midget submarines that attacked Pearl Harbor and continuing into the modern era, including the 2006 sinking of the postwar aircraft carrier USS Oriskany, Veronico provides rich detail on each noteworthy vessel, including over 150 photographs, ship specifications, geographic coordinates, and

more. For the enthusiast who wants an even more complete experience, the book concludes with a list of preserved ships, an Internet resource guide, and a suggested reading list to continue the exploration. Whether you plan on visiting these historic sites yourself or simply enjoy their compelling stories, *Hidden Warships* will guide you, above the surface and underwater, through some of the most famous relics of World War II naval warfare. “A tantalizing selection of sunken vessels, including many recent discoveries.” —*Naval History Magazine*

**The Rohna Disaster** James G. Bennett. 1998 A gripping true-to-life account of a tragic incident in U.S. history that needs to be read by everyone. Congressman Jack Metcalf, U.S. House of Representatives. THE DAY AFTER THANKSGIVING On November 26, 1943, one day after Thanksgiving and one day out to sea, one thousand, nine-hundred and eighty one young American soldiers were presented with the most challenging and terrifying experience of their lives. On that day, they became players in what was to become one of the greatest at-sea tragedies in United States history. More than half of them never survived to tell their story. On that day, two of the WWII's least known but historic incidents occurred. The United States suffered its greatest loss of troops at-sea in its history when the HMT ROHNA a British transport was sunk by a guided missile launched from a German bomber over the Mediterranean Sea, off the coast of North Africa. The ship, with officers and crew of one hundred ninety five was transporting American troops and Red Cross workers to the China-Burma-India Theater of war One thousand and fifteen American troops, three Red Cross workers and one hundred and twenty ship's officers and crewmen perished, a loss second only to that of the *Arizona* at Pearl Harbor. In addition to the record number of casualties that were incurred, the bombing itself was historic because it was the first ever, successful hit by a remote-controlled rocket-boosted bomb, launched in the air from a German bomber, on a merchant

vessel chartered for military use in war time. This incident was, in effect, the dawning of the missile age. The ship, badly in disrepair, was part of Convoy KMF-26 en-route to Bombay, India with men and supplies needed for the little known China - Burma -India theater of WWII. It was a noteworthy historic event that received little notice and still has not been acknowledged by the United States government. Understandably, for security reasons, the War Department immediately suppressed news of this catastrophe. Compounding this tragedy, no details were ever provided to the grieving fathers and mothers. Parents went to their graves never to learn the fate of their sons. Families still do not know how their loved ones died and this disaster continues to remain virtually unknown to the public. Over eight hundred bodies were never recovered, and their remains are scattered over hundreds of miles at the bottom of the Mediterranean Sea. THE ROHNA DISASTER (227P) describes that tragic, but little known incident at sea. Each chapter presents electrifying eyewitness accounts of the inhumane shipboard conditions, the actual bombing and sinking, and the struggles to survive and be rescued in heavy seas at night. Accounts of heroism and courage are woven through each chapter, and the anguish of families, as they waited fifty years in an emotional void, is poignantly told. THE ROHNA DISASTER is, in many respects, told by the people who played their different roles as survivors, rescuers and family members. Every survivor was willing, if not anxious, to share his experience, painful though it often was, some because they wanted to help the author in his search for information about his brother, most, because they felt very strongly that this story should be told and that the casualties should be given an honored place in American history. It is important that history be chronicled, and that this story, an important part of our history, be told, heard, taught and remembered. It is also important that those who played roles in this incredible drama, the survivors, rescuers and casualties, be given their due honor and recognition, and that the

families of those who perished, who have a right to know what happened to their loved ones, be given an opportunity to learn that truth. This book was written for those reasons. We are slowly losing a unique breed of people, the likes of which we will never

His website, wreckchasing.com, is the go-to source for enthusiasts who want to know more about how to locate vintage airplane wrecks and then tell their stories. In this engaging new book, Veronico explores the romantic era of World War II Warbirds and the stories of some of its most famous wrecks, including the "Swamp Ghost" (a B-17E which crashed in New Guinea in the early days of World War II and which was only recently recovered), and "Glacier Girl" (a P-38, part of "The Lost Squadron," which crashed in a large ice sheet in Greenland in 1942). Throughout, Veronico provides a history of the aircraft, as well as the unique story behind each discovery and recovery with ample illustrations. Hidden Warbirds is aviation history at its best.

*Vanished* Wil S. Hylton.2013-11-05 From a mesmerizing storyteller, the gripping search for a missing World War II crew, their bomber plane, and their legacy. In the fall of 1944, a massive American bomber carrying eleven men vanished over the Pacific islands of Palau, leaving a trail of mysteries. According to mission reports from the Army Air Forces, the plane crashed in shallow water—but when investigators went to find it, the wreckage wasn't there. Witnesses saw the crew parachute to safety, yet the airmen were never seen again. Some of their relatives whispered that they had returned to the United States in secret and lived in hiding. But they never explained why. For sixty years, the U.S. government, the children of the missing airmen, and a maverick team of scientists and scuba divers searched the islands for clues. With every clue they found, the mystery only deepened. Now, in a spellbinding narrative, Wil S. Hylton weaves together the true story of the missing men, their final mission, the families they left behind, and the real reason their disappearance remained shrouded in secrecy for so long. This is a story of love, loss, sacrifice, and faith—of the undying hope among the families of the missing, and the relentless determination of scientists, explorers, archaeologists, and deep-sea divers to solve one of the enduring mysteries of World War II.

**Warships Associated with World War II in the Pacific** Harry Butowsky,National Service.2015-05-20 This theme study has been prepared for the Congress and the National Park System Advisory Board in partial fulfillment of the requirements of Public Law 95-348, August 18,1978. The purpose of the theme study is to evaluate surviving World War II warships that saw

action in the Pacific against Japan and to provide a basis for recommending certain of them for designation as National Historic Landmarks. During the course of this study more than 40 surviving warships and merchantmen dating from World War II were identified and visited. Twenty five of these were found likely to meet the criteria of the National Historic Landmarks Program and are represented by inventory forms in this study. A twenty sixth ship, USS Missouri, is written up because it is listed on the National Register of Historic Places, but is not likely to meet the criteria because of substantial changes made to her since listing. These vessels include most of the major types and classes of warships to see service from 1941 to 1945. The theme study is organized by classes because this is the best way to organize and describe the types of ships that saw service in the war. Many of these classes, especially for the destroyers and submarines, represent the development of warship design theory that evolved as a result of the hard lessons learned in battle against the Japanese during the war. Because of this, many of these classes are individually important represent either an interim or final point in warship design. Includes in this study are aircraft carriers, battleships, cruisers, destroyers, submarines, minesweepers, and a number of other types such as Liberty Ships, and PT Boats. One German submarine is included in this theme study for several reasons: first, it is the only surviving one of its type anywhere; second, it related to War in the Pacific in that the German submarine threat had to be defeated in order to shift strategic emphasis on the Pacific theater. The American battle fleet that fought against Japan in World War II was made up of many of these types of ships, each performing her specialized mission and supporting general fleet operations. The battle fleet in the Pacific provided an attack capability that destroyed Japan's warships and merchant marine and spearheaded the amphibious attacks that threatened the home islands with invasion. The success of the fleet was dependent upon the

successful operation of its many component ships, each performing a specialized mission to accomplish the overall objective of defeating Japan. These twenty six ships represent the elements of a World War II battle fleet in the Pacific that will best enable future generations of Americans to appreciate the magnitude and complexity of naval power that eventually won the war against Japan in 1945.
