The Asian Green Revolution Peter B.R. Hazell.2009 The Green Revolution brought modern science to bear on a widening Asian food crisis in the 1960s. The speed and scale with which it solved the food problem was remarkable and unprecedented, and it contributed to a substantial reduction in poverty and the launching of broader economic growth in many Asian countries. Improved cereal varieties, fertilizers, irrigation, and modern pest control methods lay at the heart of the Green Revolution, yet it was much more than a technology fix. It also required a supporting economic and policy environment. The need for markets that could handle the surge in production and the need to educate farmers about the new technology and ensure that they had access to the inputs and receive an adequate reward to their investments, led governments across Asia to actively intervene in launching and implementing the Green Revolution. Government interventions were also important for ensuring that small farmers were included in the revolution and did not get left behind. Even with the success of the Green Revolution, there are remaining social and environmental problems that still need to be resolved and a continuing need to increase yields to meet Asia's growing food needs. There is also urgent need to bring the Green Revolution in an appropriately modified form to Sub-Saharan Africa.

Contagion and the State in Europe, 1830-1930 Peter Baldwin.1999-08-19 This book is a groundbreaking study of the historical reasons for the divergence in public health policies adopted in Britain, France, Germany and Sweden, and the spectrum of responses to the threat of contagious diseases such as cholera, smallpox and syphilis. In particular the book examines the link between politics and prevention. Did the varying political regimes influence the styles of precaution adopted? Or was it, as Peter Baldwin argues, a matter of more basic differences between nations, above all their geographic placement in the epidemiological trajectory of contagion, that helped shape their responses and their basic assumptions about the respective claims of the sick and of society, and fundamental political decisions for and against different styles of statutory intervention? Thus the book seeks to use medical history to illuminate broader questions of the development of statutory intervention and the comparative and divergent evolution of the modern state in Europe.

Competition Law and Economic Inequality Jan Broulík, Katalin Cseres. 2022-12-15 The gap between the rich and poor is widening across the globe. This book explores whether this major societal challenge of our time can be addressed by the means of competition law. The primary goal of today's competition law is to ensure that market power does not lead to an inefficient production of goods and services. Nevertheless, even such efficiency-oriented curbing of market power may arguably contribute to the reduction of differences in how much people own and earn. Furthermore, many competition law regimes do take into account distributive considerations too. The chapters investigate the relationship between competition law and economic (in)equality from philosophical, historical, and economic perspectives. Their inquiries concern the conceptual foundations of competition law and doctrinal frameworks of individual jurisdictions, as well as specific problems and markets. As such, the book provides a novel and comprehensive overview of whether and how competition law can contribute to more equality in both developed and developing countries. The book is a must-read for researchers, public officials, judges, and practitioners within the competition law community. It will also appeal to anyone more broadly interested in issues of inequality and economic policy.

L'Enseignement de Mâ Ananda Moyî Mâ-Ananda Moyî.2013-11-25 Mâ Ananda Moyî (1896-1982) fut certainement, en Inde, la femme la plus vénérée du XXe siècle. Dès sa petite enfance, elle fut considérée dans son Bengale natal comme un être extraordinairement lumineux. Puis, très vite, des milliers, des millions de personnes vinrent recevoir auprès d'elle la bénédiction du darshan, du contact transfigurateur avec le maître spirituel. Son enseignement le plus souvent silencieux ne se référait à aucun dogme, et son rayonnement s'étendait bien au-delà des différentes écoles de l'hindouisme. Chefs d'État, sanskritistes, moines, hommes et femmes de toutes religions venaient la visiter des quatre coins du monde. La Joie transmise par « Mâ » s'apparentait à la Félicité ineffable qu'ont évoquée les grands mystiques, et qui plonge ses racines dans l'intuition de la non-dualité.

A Pilgrim's Journey Joseph N. Tylenda.2009-09-03 Saint Ignatius of Loyola was a man who saw above and beyond his century, a man of vision and calm hope, who could step comfortably into our era and the Church of our time and show us how to draw closer to Christ. Ignatius' autobiography spans eighteen very important years of this saint's 65-year life...from his wounding at Pamplona (1521) through his conversion, his university studies and his journey to Rome in order to place his followers and himself at the disposal of the Pope. These critical years reveal the incredible transformation and spiritual growth in the soul of a great saint and the events that helped to bring about that change in his life. This classic work merits a long life. Apart from providing a splendid translation of the saint's original text, Father Tylenda has included an informative commentary which enables the modern reader to grasp various allusions in the text-and to gain a better view of a saintly man baring his soul.

Building Coherence and Cohesion María Teresa Taboada.2004-11-29 This book examines the resources that speakers employ when building conversations. These resources contribute to overall coherence and cohesion, which speakers create and maintain interactively as they build on each other's contributions. The study is cross-linguistic, drawing on parallel corpora of task-oriented dialogues between dyads of native speakers of English and Spanish. The framework of the investigation is the analysis of speech genres and their staging; the analysis shows that each stage in the dialogues exhibits different thematic, rhetorical, and cohesive relations. The main contributions of the book are: a corpus-based characterization of a spoken genre (task-oriented dialogue); the compilation of a body of analysis tools for generic analysis; application of English-based analyses to Spanish and comparison between the two languages; and a study of the characteristics of each generic stage in task-oriented dialogue.

Millions Fed David J. Spielman,Rajul Pandya-Lorch.2009 Humanity has made enormous progress in the past 50 years toward eliminating hunger and malnutrition. Some five billion people--more than 80 percent of the world's population--have enough food to live healthy, productive lives. Agricultural development has contributed significantly to these gains, while also fostering economic growth and poverty reduction in some of the world's poorest countries.

Accountability in education: meeting our commitments UNESCO.2017-10-30 The second edition of the Global Education Monitoring Report (GEM Report) presents the latest evidence on global progress towards the education targets of the UN Sustainable Development Goals. With hundreds of millions of people still not going to school, and many not achieving minimum skills at school, it is clear education systems are off track to achieve global goals. The marginalized currently bear the most consequences but also stand to benefit the most if policy-makers pay sufficient attention to their needs. Faced with these challenges, along with tight budgets and increased emphasis on results-oriented value for money, countries are searching for solutions. Increased accountability often tops the list. The 2017/8 GEM Report shows the entire array of approaches to accountability in education. It ranges from countries unused to the concept, where violations of the

right to education go unchallenged, to countries where accountability has become an end in itself instead of a means to inclusive, equitable and high-quality education and lifelong learning for all. The report emphasizes that education is a shared responsibility. While governments have primary responsibility, all actors - schools, teachers, parents, students, international organizations, private sector providers, civil society and the media 03 have a role in improving education systems. The report emphasized the importance of transparency and availability of information but urges caution in how data are used. It makes the case for avoiding accountability systems with a disproportionate focus on narrowly defined results and punitive sanctions. In an era of multiple accountability tools, the report provides clear evidence on those that are working and those that are not.--Back cover.

Proven Successes in Agricultural Development David J. Spielman,Rajul Pandya-

Lorch.2010-01-01 The world has made enormous progress in the past 50 years toward eliminating hunger and malnutrition. While, in 1960, roughly 30 percent of the world's population suffered from hunger and malnutrition, today less than 20 percent does some five billion people now have enough food to live healthy, productive lives. Agricultural development has contributed significantly to these gains by increasing food supplies, reducing food prices, and creating new income and employment opportunities for some of the world's poorest people. This book examines where, why, and how past interventions in agricultural development have succeeded. It carefully reviews the policies, programs, and investments in agricultural development that have reduced hunger and poverty across Africa, Asia, and Latin America over the past half century. The 19 successes included here are described in in-depth case studies that synthesize the evidence on the intervention's impact on agricultural productivity and food security, evaluate the rigor with which the evidence was collected, and assess the tradeoffs inherent in each success. Together, these chapters provide evidence of what works in agricultural development.

Global Education Monitoring Report 2020 UNESCO.2020-07-07 This publication assesses progress towards Sustainable Development Goal 4 (SDG 4) on education and its ten targets, as well as other related education targets in the SDG agenda. It addresses inclusion in education, drawing attention to all those excluded from education, because of background or ability. The report is motivated by the explicit reference to inclusion in the 2015 Incheon Declaration, and the call to ensure an inclusive and equitable quality education in the formulation of SDG 4, the global goal for education. It reminds us that, no matter what argument may be built to the contrary, we have a moral imperative to ensure every child has a right to an appropriate education of high quality.

Chemical Ecology Anne-Geneviève Bagnères,Martine Hossaert-McKey.2016-08-29 The book features comparative perspectives on the field of chemical ecology, present and future, offered by scientists from a wide variety of disciplines. Here, they cross their analyses of the present state of chemical ecology and its perspectives for the future. Those presented here include complex, multispecies communities and cover a wide range both of organisms and of the types of molecules that mediate the interactions between them. Up to now, no book has presented a solid scientific treatment of a wide range of examples. This book illustrates a diverse panel of the most advanced aspects of this rapidly expanding field.

Global History and New Polycentric Approaches Manuel Perez Garcia,Lucio De Sousa.2017-12-06 This book is open access under a CC BY 4.0 license. Rethinking the ways global history is envisioned and conceptualized in diverse countries such as China, Japan, Mexico or Spain, this collection considers how global issues are connected with our local and national communities. It examines how the discipline had evolved in various historiographies, from Anglo Saxon to southern European, and its emergence in Asia with the rapid development of the Chinese economy motivation to legitimate the current uniqueness of the history and economy of the nation. It contributes to the revitalization of the field of global history in Chinese historiography, which have been dominated by national narratives and promotes a debate to open new venues in which important features such as scholarly

mobility, diversity and internationalization are firmly rooted, putting aside national specificities. Dealing with new approaches on the use of empirical data by framing the proper questions and hypotheses and connecting western and eastern sources, this text opens a new forum of discussion on how global history has penetrated in western and eastern historiographies, moving the pivotal axis of analysis from national perspectives to open new venues of global history.

Players and Pawns Gary Alan Fine.2015-08-06 A chess match seems about as solitary an endeavor as there is in sports: two minds, on their own, in fierce opposition. But is this the case? Inevitably these two minds are in dialogue, and perhaps might be better understood as partners in play. And surrounding that one-on-one contest is a community life that can be as dramatic and intense as the across-the-board confrontation. Gary Alan Fine has spent years immersed in several communities of amateur and professional chess players—children and adults—and in *Players and Pawns* he takes readers deep inside these worlds, revealing a complex, brilliant, feisty world of commitment and conflict. Opening with a close look at a routine, yet financially troubled, tournament in Atlantic City, Fine carries us from planning and setup through the climactic final day's match-ups between the weekend's top players, introducing us along the way to countless players and their relationships to the game. At tournaments like that one, as well as in locales as diverse as collegiate matches and cash games in Manhattan's Washington Square Park, players find themselves part of what Fine terms a "soft community," an open, welcoming space built on their shared commitment to the game. Within that community, chess players find both support and challenges, all amid a shared interest in and love of the long-standing traditions of the game, traditions that help chess players build a communal identity. Full of idiosyncratic characters and dramatic gameplay, *Players and Pawns* is a richly analytical celebration of the ever-fascinating world of competitive chess.
