Effective Programs for Latino Students Robert E. Slavin, Margarita Calderón, Margarita Calderon. 2012-11-12

Latino (or Hispanic) children are one of the fastest-growing groups in U.S. schools today. On average, these students perform worse than Anglo students on measures of academic achievement and other measures of academic success, and their drop-out rate is high. There are schools of excellence among those serving Latino children, but the majority of these children are placed at risk by schools and community institutions unable to build on the cultural, personal, and linguistic strengths these children are likely to bring with them to school. Schools serving Latino students need programs based on high-quality research, capable of being replicated and adapted to local circumstances and needs. The purpose of this book is to present the current state of the art with respect to research on effective instructional programs for Latino students in elementary and secondary grades. Surprisingly, this has not been done before; there are many books on the situation of Latino students in U.S. schools, but none so far have reviewed research on the outcomes of programs designed to enhance the academic achievement of these students. The chapters represent a broad range of methodologies, from experimental to correlational to descriptive, and the solutions they propose are extremely diverse. Each examines, in its own way, programs and practices that are showing success. Together, they present a rich array of research-based effective programs that are practical, widely available, and likely to make a profound

difference. What binds the chapters together is a shared belief that Latino students can succeed at the highest levels if they receive the quality of instruction they deserve, and a shared belief that reform of schools serving many Latino students is both possible and essential. This is a book filled with statistics, description, and reviews of research--but even more, it is filled with optimism about what schools for Latino students can be, and what these students will achieve. It is a highly relevant and useful resource for educators, policymakers, and researchers who want to use research to inform the decisions they make about how to help Latino students succeed in elementary and secondary schools, and beyond.

Supplement Dr Robert E Slavin, PH D.2007-07-24 The Eighth Edition of this popular text from renowned educational psychologist Robert Slavin translates theory into practices that teachers can use in their classrooms with a further inquiry into the concept of intentionality and a thorough integration of standards. This edition maintains its in-depth, practical coverage with a focus on the intentional teacher by presenting up-to-the-minute research that a reflective, intentional teacher can apply. An intentional teacher, according to Slavin, is one who constantly reflects on his or her practice and makes instructional decisions based on a clear conception of how these practices affect students. To help readers become intentional teachers, the author offers a set of questions to guide them and models best practices through classroom examples. Firmly rooted in research, up-to-date theory, and classroom-tested applications, Educational Psychology prepares teachers as no other text does. It teaches them to think about how students develop and learn, to make decisions before and during instruction, and to consider what constitutes evidence that their students are learning and succeeding. This edition includes a new focus on reflection, new cases, sections on brain research, programs for language minority students, technology, No Child Left Behind, and after

school and summer school programs. It contains new critiques of assessment and accountability strategies and a substantially updated treatment of programming for students with special needs.

When Kids Can't Read, what Teachers Can Do G. Kylene Beers.2003 For Kylene Beers, the question of what to do when kids can't read surfaced in 1979 when she met and began teaching a boy named George. When George's parents asked her to explain why he couldn't read and how she could help, Beers, a secondary certified English teacher with no background in reading, realized she had little to offer. That moment sent her on a twenty-three-year search for answers to the question: How do we help middle and high schoolers who can't read? Now, she shares what she has learned and shows teachers how to help struggling readers with comprehension, vocabulary, fluency, word recognition, and motivation. Filled with student transcripts, detailed strategies, reproducible material, and

extensive booklists, Beers' guide to teaching reading both instructs and inspires.

An Educational Psychology Textbook Equity.2014-10-10 The first half of the book focuses on broader questions and principles taken from psychology per se, and the second half focuses on somewhat more practical issues of teaching. All parts of the book draw on research, theory, and practical wisdom wherever appropriate. Chapter 2 is about learning theory, and Chapter 3 is about development. Chapter 4 is about several forms of student diversity, and Chapter 5 is about students with disabilities. Chapter 6 is about motivation. Following these somewhat more basic psychological chapters, we turn to several lasting challenges of classroom life—challenges that seem to be an intrinsic part of the job. Chapter 7 offers ideas about classroom management; Chapter 8, ideas about communicating with students; Chapter 9, about ways to assist students' complex forms of thinking; and Chapter 10, about planning instruction systematically. The book closes with two chapters about assessment of learning.
