2000 IUCN Red List of Threatened Species Craig Hilton-Taylor. 2000 Release of the 2000 Red List is a major landmark for IUCN. It is the first time that listings of animals and plants have been combined and the first time that the Red List has been produced on CD-ROM. The 2000 Red List combines new assessments including all bird species, many antelope and bat species, most primates and sharks, all Asian freshwater turtles, more molluscs, and many others with those from previous publications. The combination of animals and plants into a single list containing assessments of more than 18,000 taxa (11,000 of which are threatened species) and the move towards improved documentation of each species on the list means that a hard-copy version of the Red List would run to several volumes. This, combined with the fact that the Red List will be updated annually, led to the decision to release the Red List in electronic format, via the World Wide Web and as a CD-ROM.

Twelve Years a Slave Solomon Northup. 2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe.

Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Diagnosis & Treatment of Uveitis C Stephen Foster, Albert T Vitale. 2013-03-30 Uveitis is inflammation of the middle layer of the eye, which is known as the uvea or uveal tract. It is a complex condition with a variety of causes and clinical manifestations, including injury, infection or an underlying condition. This 1200pp second edition brings ophthalmologists fully up to date with the latest developments in diagnosing and treating uveitis. Beginning with the basic principles of the disease, its diagnosis and management, the following sections discuss the treatment of numerous different infectious, non infectious, masquerade and autoimmune syndromes. Basic science, differential diagnosis, pathology and clinical management are discussed for each condition. Written by specialists from the Massachusetts Eye Research and Surgery Institution (MERSI) and John A Moran Eye Center in the USA, this comprehensive new edition includes 699 colour images and illustrations. Key points Comprehensive, second edition bringing ophthalmologists fully up to date with diagnosis and treatment of uveitis Discusses different uveitis syndromes - infectious, non infectious, masquerade and autoimmune Authored by US ophthalmic specialists Includes 699 full colour images and illustrations First edition published in 2001 by Saunders

The Grape Genome Dario Cantu, M. Andrew Walker. 2019-11-13 This book describes the current state of international grape genomics, with a focus on the latest findings, tools and strategies employed in genome sequencing and analysis, and genetic mapping of important agronomic traits. It

also discusses how these are having a direct impact on outcomes for grape breeders and the international grape research community. While *V. vinifera* is a model species, it is not always appreciated that its cultivation usually requires the use of other *Vitis* species as rootstocks. The book discusses genetic diversity within the *Vitis* genus, the available genetic resources for breeding, and the available genomic resources for other *Vitis* species. Grapes (*Vitis vinifera* spp. *vinifera*) have been a source of food and wine since their domestication from their wild progenitor (*Vitis vinifera* ssp. *sylvestris*) around 8,000 years ago, and they are now the world's most valuable horticultural crop. In addition to being economically important, *V. vinifera* is also a model organism for the study of perennial fruit crops for two reasons: Firstly, its ability to be transformed and micropropagated via somatic embryogenesis, and secondly its relatively small genome size of 500 Mb. The economic importance of grapes made *V. vinifera* an obvious early candidate for genomic sequencing, and accordingly, two draft genomes were reported in 2007. Remarkably, these were the first genomes of any fruiting crop to be sequenced and only the fourth for flowering plants. Although riddled with gaps and potentially omitting large regions of repetitive sequences, the two genomes have provided valuable insights into grape genomes. Cited in over 2,000 articles, the genome has served as a reference in more than 3,000 genome-wide transcriptional analyses. Further, recent advances in DNA sequencing and bioinformatics are enabling the assembly of reference-grade genome references for more grape genotypes revealing the exceptional extent of structural variation in the species.

Flowering Plants · Dicotyledons Klaus Kubitzki, Clemens Bayer. 2013-04-17 This encyclopedia contains a comprehensive treatment of the taxonomy of the families and genera of ferns and seed plants. The present volume, the fifth in this series, deals with three major groups of dicotyledons, the Capparales, Malvales, and Non-betalain Caryophyllales.

Pediatric Retina James D. Reynolds, Scott E. Olitsky. 2010-09-14 Pediatric retinal diseases are not simply retinal diseases that occur in children; rather, they are unique disorders that often are not found in adults. This textbook of the pediatric retina offers in-depth guidance on congenital and acquired diseases of the retina in the pediatric population. It is organized according to disease onset and timing, as well as anatomy. All chapters are written by leading authorities in the field from both the pediatric and the retinal perspective. A multidisciplinary approach to the topic is adopted, and critical information is included on disease classification and diagnosis, pathophysiology, genetics, complications, and prognosis. Pediatric Retina will be a useful source of information for pediatric ophthalmologists, retina specialists, and other eye care providers who care for children.

Glaucome Primitif À Angle Ouvert Jean Paul Renard, Eric Sellem, Société Française d'Ophthalmologie (SFO). 2014-05-06 Le glaucome est une maladie dégénérative du nerf optique qui entraîne une perte progressive de la vision commençant tout d'abord en périphérie et progressant graduellement vers le centre. Cette maladie est souvent associée à une pression intra-oculaire (PIO) élevée qui comprime et endommage les fibres du nerf optique et de la rétine. Dans d'autres cas, malgré une PIO normale, une circulation sanguine inadéquate entraîne la mort (nécrose) des cellules du nerf optique et de la rétine. La perte de vision associée au glaucome est permanente et irréversible. Sans traitement, cette maladie peut mener jusqu'à la cécité. Le glaucome est une maladie fréquente puisqu'il atteint 2 % de la population totale en France. Ce sujet de santé publique fera l'objet du rapport annuel de la SFO en 2014. Le rapport abordera : - les bases fondamentales et cliniques; - la prise en charge thérapeutique; - les aspects socio-économiques et juridiques; - le dépistage et les incidences en terme de santé publique.

Mahatma Gandhi Dennis Dalton. 2012-02-21 Dennis Dalton's classic account of Gandhi's political

and intellectual development focuses on the leader's two signal triumphs: the civil disobedience movement (or salt satyagraha) of 1930 and the Calcutta fast of 1947. Dalton clearly demonstrates how Gandhi's lifelong career in national politics gave him the opportunity to develop and refine his ideals. He then concludes with a comparison of Gandhi's methods and the strategies of Martin Luther King Jr. and Malcolm X, drawing a fascinating juxtaposition that enriches the biography of all three figures and asserts Gandhi's relevance to the study of race and political leadership in America. Dalton situates Gandhi within the clash of civilizations debate, identifying the implications of his work on continuing nonviolent protests. He also extensively reviews Gandhian studies and adds a detailed chronology of events in Gandhi's life.

A Reference Grammar of French R. E. Batchelor, M. Chebli-Saadi. 2011-07-14 A Reference Grammar of French is a lively, wide-ranging and original handbook on the structure of the French language. It includes new information on register, pronunciation, gender, number, foreign words (Latin, Arabic, English, Spanish, Italian), adjectives and past participles used as nouns, texting, word order, frequency of occurrence of words, and usage with all geographical names. Examples come not only from France, but also from Quebec, Belgium and Switzerland. Readers will appreciate the initial passages illustrating the grammatical features of a given chapter. Also included is a user-friendly introduction to the French language, from its Latin origins to modern times. A full glossary explains any terms that might confuse the less experienced reader, and the index leads the student through the detailed labyrinth of grammatical features. This handbook will be an invaluable resource for students and teachers who want to perfect their knowledge of all aspects of French grammar.

The Forests of the Congo Basin Carlos de Wasseige. 2012 The 2010 State of the Forest report (SOF) benefited from financial support from the European Union, the United States, Germany, France and UNESCO. It represents the collaborative effort of over 100 individuals from a diversity of institutions and the forestry administrations of the Central African countries. The SOF process began with the selection and definition of indicators relevant to monitoring the state of forests in Central Africa. The indicators are structured around three thematic areas: (i) forest cover; (ii) management of production forests; and (iii) conservation and biodiversity. They are presented in a hierarchical structure at the regional, national and management unit (i.e. logging concessions and protected areas) levels. The indicators were vetted by a representative panel of stakeholders of forest management in Central Africa. The indicators are used to guide an annual data collection process carried out between April and August by national groups of four to ten individuals working within the forestry administrations. The data reported on in the 2010 SOF were primarily collected in 2009 and 2010. Results were validated in national workshops attended by government officials as well as representatives of environmental NGOs, the private sector and development projects. The data provided an important basis for the authors of the 11 chapters of the 2010 SOF, which were under the coordination of a scientific committee of international renown. A final workshop was held 29-30 March, 2011 in Douala to review a draft report. Following amendments based on comments from a wide audience of experts the final layout was completed.

Edible Insects Arnold van Huis, Food and Agriculture Organization of the United Nations. 2013 Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Although the majority of consumed insects are gathered in forest habitats, mass-rearing systems are being developed in many countries. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. It shows the many traditional and potential new uses of insects for direct human consumption and the opportunities for and constraints to farming them for food and feed. It examines the body of research on issues such as insect nutrition and food safety, the use of insects as animal feed, and the processing and preservation of insects and their products. It highlights the need to develop a

regulatory framework to govern the use of insects for food security. And it presents case studies and examples from around the world. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. To fully realise this potential, much work needs to be done by a wide range of stakeholders. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.

The Cancer Atlas Ahmedin Jemal.2015 This atlas illustrates the latest available data on the cancer epidemic, showing causes, stages of development, and prevalence rates of different types of cancers by gender, income group, and region. It also examines the cost of the disease, both in terms of health care and commercial interests, and the steps being taken to curb the epidemic, from research and screening to cancer management programs and health education.

Shifting Burdens Shahra Razavi.2002 * Details the effects of structural adjustment policies imposed on agriculture, and their effect on gender relations within rural areas in the developing world * Empirically grounded case studies from India, Mexico, South Africa, Uganda, and Vietnam Over the past ten years neoliberal policy shifts in rural development across the globe have reduced the role of government, consigning the costs of services to the rural poor themselves. But what are the gender effects of this change? The contributors unravel the ways in which economic and social structures, institutions, and policy outcomes are mediated by gender as a social relationship, and consider the degree to which a diversified livelihoods strategy, touted as the means by which rural families are struggling to improve their standard of living, accurately describes what is taking place on the ground.

Comparative Embryology of Angiosperms Vol. 1/2 Brij M. Johri,Kunda B. Ambegaokar,Prem S. Srivastava.2013-06-29 COMPARATIVE EMBRYOLOGY OF ANGIOSPERMS is a review of the developmental processes leading to sexual reproduction in flowering plants. On the basis of embryological data and certain evidences from other areas of study, it lays special emphasis on the relationship among and within the families and orders of angiosperms. Occasionally, inaccuracies in observation and interpretation are pointed out, alternative interpretations offered, gaps in our knowledge highlighted, and prospects outlined. The text is documented with 36 tables, 376 figures, and about 5000 literature citations, which contribute to making this book comprehensive. Besides students and research workers interested in angiosperm embryology, taxonomists, plant breeders, agriculturists, and horticulturists will also find much useful information in this treatise.

Africa United Nations Environment Programme.2008 This stunning 400-page Atlas is a unique and powerful publication which brings to light stories of environmental change at more than 100 locations spread across every country in Africa. There are more than 300 satellite images, 300 ground photographs and 150 maps, along with informative graphs and charts that give a vivid visual portrayal of Africa and its changing environment that provide scientific evidence of the impact that natural and human activities have had on the continent's environment over the past several decades. The observations and measurements of environmental change help gauge the extent of progress made by African countries towards reaching the United Nation's Millennium Development Goals. More importantly, this book contributes to the knowledge and understanding that are essential for adaptation and remediation, and should be of immense value to all those who want to know more about Africa and who care about the future of this continent.

Flowering Plants · Dicotyledons Klaus Kubitzki,Jens G. Rohwer,Volker Bittrich.2013-06-29 This volume - the first of this series dealing with angiosperms - comprises the treatments of 73 families, representing three major blocks of the dicotyledons: magnoliids, centrosperms, and hamamelids. These blocks are generally recognized as subclasses in modern textbooks and works of reference.

We consider them a convenient means for structuring the hundreds of dicotyledon families, but are far from taking them at face value for biological, let alone monophyletic entities. Angiosperm taxa above the rank of family are little consolidated, as is easily seen when comparing various modern classifications. Genera and families, in contrast, are comparatively stable units -and they are important in practical terms. The genus is the taxon most frequently recognized as a distinct entity even by the layman, and generic names provide the key to all information available about plants. The family is, as a rule, homogeneous enough to conveniently summarize biological information, yet comprehensive enough to avoid excessive redundancy. The emphasis in this series is, therefore, primarily on families and genera.

Global Strategy for Infant and Young Child Feeding World Health Organization. 2003 WHO and UNICEF jointly developed this global strategy to focus world attention on the impact that feeding practices have on the nutritional status, growth and development, health, and thus the very survival of infants and young children. The strategy is the result of a comprehensive two-year participatory process. It is based on the evidence of nutrition's significance in the early months and years of life, and of the crucial role that appropriate feeding practices play in achieving optimal health outcomes. The strategy is intended as a guide for action; it identifies interventions with a proven positive impact; it emphasizes providing mothers and families the support they need to carry out their crucial roles, and it explicitly defines the obligations and responsibilities in this regard of governments, international organizations, and other concerned parties.

Before the Revolution Victoria González-Rivera. 2015-06-17 Those who survived the brutal dictatorship of the Somoza family have tended to portray the rise of the women's movement and feminist activism as part of the overall story of the anti-Somoza resistance. But this depiction of heroic struggle obscures a much more complicated history. As Victoria González-Rivera reveals in this book, some Nicaraguan women expressed early interest in eliminating the tyranny of male domination, and this interest grew into full-fledged campaigns for female suffrage and access to education by the 1880s. By the 1920s a feminist movement had emerged among urban, middle-class women, and it lasted for two more decades until it was eclipsed in the 1950s by a nonfeminist movement of mainly Catholic, urban, middle-class and working-class women who supported the liberal, populist, patron-clientelistic regime of the Somozas in return for the right to vote and various economic, educational, and political opportunities. Counterintuitively, it was actually the Somozas who encouraged women's participation in the public sphere (as long as they remained loyal Somocistas). Their opponents, the Sandinistas and Conservatives, often appealed to women through their maternal identity. What emerges from this fine-grained analysis is a picture of a much more complex political landscape than that portrayed by the simplifying myths of current Nicaraguan historiography, and we can now see why and how the Somoza dictatorship did not endure by dint of fear and compulsion alone.

Resilience and Development Meyer D. Glantz, Jeannette L. Johnson. 2006-04-11 Leading experts review the research on resilience and represent the diverse perspectives and opinions found among both scientists and practitioners in the field. Although the chapters are written to the standards expected by researchers, they are equally useful for program developers and others in applied fields seeking science-based information on the topic. This book is a unique resource in keeping with the growing interest in resilience both in research and interventions.

The Ocean Challenge Badge Food and Agriculture Organization of the United Nations.2018-05-08 The ocean covers 70 percent of the Earth's surface, and is essential for life on our planet – even for those of us who live nowhere near the sea! It provides us all with food and other materials that we need, regulates our climate and provides half of the oxygen we breathe. The ocean also offers us various means of transport and opportunities for recreation. People have long thought that the ocean was so wide and bountiful that it would go on supplying our needs forever, but this is not the case: human activities are causing significant damage to life in the ocean. People are often unaware of the problems created by this heavy reliance, as few of us have the opportunity to look beneath the surface of the sea and see the damage that our actions have caused. This is where the Ocean Challenge Badge comes in: let it take you on a journey to discover the ocean! It is packed with activities to help you learn about how the ocean works, the creatures that live in it, and just how important it is in our everyday lives. You will also discover how YOU can play a role in protecting our ocean for future generations. We hope you will be inspired to take the challenge and celebrate our ocean. So dive in and begin your aquatic discoveries!

Biodiversity and Protected Areas Karen Beazley, Robert Baldwin.2019-04-16 Biodiversity and Protected Areas assembles twelve topics from around the world, illustrating the complexities and promise of addressing the biodiversity crisis. Authors from Mongolia, Africa, India, Canada, Iraq, and the United States dwell on particular aspects and challenges relevant to those regions. Lessons and approaches from interesting localities, coupled with global analyses give the reader a synthetic view of emerging problems. The opportunities for understanding common issues across different geographies abound, such as comparing local conservation in sub-Saharan Africa with a distribution of very small protected areas in Massachusetts. Several topics will be of immediate interest to policymakers. The book is illustrated with numerous color maps and figures and the authors strove for clear, uncomplicated writing. The editors provide an overview of chapters, placing them in the context of other biodiversity and protected area literature. Students and conservationists attempting to broaden their views of biodiversity and protected areas should find this collection to be interesting.

In the Closet of the Vatican Frederic Martel.2019-02-21 The New York Times Bestseller - Revised and Expanded [An] earth-shaking exposé of clerical corruption - National Catholic Reporter The arrival of Frédéric Martel's *In the Closet of the Vatican*, published worldwide in eight languages, sent shockwaves through the religious and secular world. The book's revelations of clericalism, hypocrisy, cover-ups and widespread homosexuality in the highest echelons of the Vatican provoked questions that the most senior Vatican officials--and the Pope himself--were forced to act upon; it would go on to become a New York Times bestseller. Now, almost a year after the book's first publication, Frédéric Martel reflects in a new foreword on the effect the book has had and the events that have come to light since it was first released. *In the Closet of the Vatican* describes the double lives of priests--including the cardinals living with their young assistants in luxurious apartments whilst professing humility and chastity--the cover-up of numerous cases of sexual abuse; sinister scheming in the Vatican; political conspiracy overseas in Argentina and Chile, and the resignation of Benedict XVI. From his unique position as a respected journalist with uninhibited access to some of the Vatican's most influential people and private spaces, Martel presents a shattering account of a system rotten to its very core.

book, Promise Me Once... In the weak, there is strength. In despair, there is hope. My world was dark. Survival was tough. But the end of the world saved me. It taught me to love. To go on living. In its darkness, I found myself. In its bleakness, I found hope. I wasn't the girl I used to be. I was stronger. I was with the man I loved. The cowboy with a quiet presence who took what he wanted, including me. He showed me love and gave me strength. He touched me and I was never the same. I didn't want to love him but I couldn't resist. I was his. But the world was trying to tear us apart. Love may save us or it may be our destruction. We may die for it or sacrifice everything to keep it. The choice will not be simple. Live or die. Love or lose. I was about to find out which one...
