**The Fourth Industrial Revolution** Klaus Schwab.2017-01-03 World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine “smart factories” in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on

how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

RAND examined the existing Qatari education system, recommended options for building a world-class system, and supported implementation of the chosen option, which is based on internationally benchmarked curriculum standards and parental choice of schools.

**Value Added Tax Fraud** Marius-Cristian Frunza. 2018-12-07 Serving as an introduction to one of the hottest topics in financial crime, the Value Added Tax (VAT) fraud, this new and original book aims to analyze and decrypt the fraud and explore multi-disciplinary avenues, thereby exposing nuances and shades that remain concealed by traditional taxation oriented researches. Quantifying the impact of the fraud on the real economy underlines the structural damages propagated by this crime in the European Union. The 'fraudsters' benefit when policy changes are inflicted in an economic space without a fully fledged legal framework. Geopolitical events like the creation of the Eurasian Union and 'Brexit' are analyzed from the perspective of the VAT fraud, thereby underlining the foreseeable risks of such historical turnarounds. In addition, this book also provides a unique collection of case studies that depict the main characteristics of VAT fraud. Introduction to VAT

Fraud will be of interest to students at an advanced level, academics and reflective practitioners. It addresses the topics with regards to banking and finance law, international law, criminal law, taxation, accounting, and financial crime. It will be of value to researchers, academics, professionals, and students in the fields of law, financial crime, technology, accounting and taxation.

*Strengthening Forensic Science in the United States* National Research Council, Division on Engineering and Physical Sciences, Committee on Applied and Theoretical Statistics, Policy and Global Affairs, Committee on Science, Technology, and Law, Committee on Identifying the Needs of the Forensic Sciences Community. 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform

and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

**Globalization and Social Responsibility** Kiyemet Tunca Caliyurt, David Crowther. 2008-12-11

Over the last decade the question of the relationship between organisations and society has been subject to much debate, often of a critical nature. The decade has seen protests concerning the actions of organisations, exposures of corporate exploitation and unfolding accounting scandals. At the same time ethical behaviour and a concern for the environment have been shown to have a positive correlation with corporate performance. The nature of corporate social responsibility is therefore a topical one for businesses and academics. There are however many different perspectives upon what is meant by corporate social responsibility and how this might be applied within organisations. This book explores some of these different perspectives based upon the experiences of different people in different parts of the world. There has been much written about globalisation - some of it positive and much of it negative. It is a subject which arouses definite opinions. Despite the fact that the word globalisation is part of the title of this book it is not our intention to contribute to this debate. Instead we use the word globalisation in its original sense to represent the ubiquity of the concern for Corporate Social Responsibility (CSR) which is the subject matter of this book. Specifically we are concerned with the social contract between an organisation and its stakeholders. It is apparent that any actions which an organisation undertakes will have an effect not just upon itself but also upon the external environment within which that organisation resides. In considering the effect of the organisation upon its external environment it must be recognised that this environment includes both the business environment in which the firm is operating, the local societal environment in

which the organisation is located and the wider global environment. Effectively therefore there is a social contract between organizations and their stakeholders. Recognition of the rights of all stakeholders and the duty of a business to be accountable in this wider context therefore has been largely a relatively recent phenomenon. The economic view of accountability only to owners has only recently been subject to debate to any considerable extent. In the current environment there is a need to debate this issue and its implications. This book therefore recognises the international scope of the interest in corporate social responsibility both through the contributions made by the authors of the respective chapters, who come from various parts of the world, and also through the international importance of the perspectives offered by these contributors. In doing so the various authors demonstrate that corporations are a part of society just as much as each of us is as a individual. Furthermore they demonstrate that the issues and concerns are not local ones but are international in scope and concern us all. The contributions to this book provide a representation of the range of concern for this relationship and the range of topics which fall within the subject matter of CSR. Among the authors who have contributed to this book are representatives from every continent and from a wide range of disciplines. The topics which are considered in the various chapters are equally diverse.

**de Wet: Plays Two** Reza de Wet.2015-09-23 Includes the plays African Gothic, Good Heavens and Breathing In A farm lies in ruin. And with mother and father now gone, a brother and sister face eviction by an officious lawyer. Abandoned, they endlessly enact the rituals of punishment once visited upon them by their parents. Widely regarded as a milestone in South African theatre, the multi-award winning play African Gothic tells the story of their final 'dance macabre'. Despite overwhelming critical acclaim, it was also fiercely condemned by Afrikaans conservatives as being a subversive portrayal of repression. Good Heavens is a comedy thriller with the dark poetic heart of a folk-tale. Two spinster sisters, with their ailing mother and simple-minded brother, await the annual visit of their youngest sister. Deeply envious of her beauty and youth, they hatch a diabolical plot to rid themselves of her forever. In Breathing In, on a stormy night in the last bitter months of the Second Anglo-Boer War, a seriously wounded General and his faithful Adjutant encounter a mysterious woman and her seductive other-worldly daughter, and are confronted with the subtle

methods of survival these women have been forced to adopt. Accustomed to the rigours of war, the courageous Adjutant now faces a terrible choice.

**The Treatment of Metastatic Non-small Cell Lung Cancer (NSCLC) in New Era of**

**Personalised Medicine** Vera Hirsh, Barbara Melosky. 2015-10-20 Lung cancer is the leading cause of cancer related mortality in Canada and USA. Majority of the patients present in advanced stage of the disease and of these only about 2% will be alive at 5 years. NSCLC is the most common form of lung cancer, accounting for approximately 87% of cases. Systemic chemotherapies have been used to treat metastatic NSCLC for decades, but the improvements of outcomes have reached a plateau. Recent advances in understanding signalling pathways for malignant cells, their interconnections, the importance of various receptors and biomarkers and the interplay between various oncogenes have led to the development of targeted treatments that are improving both efficacy and safety of the treatments. Knowledge about the advantages of treatments with the targeted agents in metastatic NSCLC is growing rapidly. Combining various targeted agents or sequencing them properly will be important in the era of personalised medicine and overcoming development of the resistance to various targeted agents will be challenging. The importance of a team work, from the diagnosis through various treatments, to supportive care, from the interventional radiologists, pneumologists or surgeons, who have to obtain a satisfactory tumor tissue specimen, to pathologists, radiation and medical oncologists, to supportive care specialists, will be described in our publications. We will cover completely present and future approaches to personalised medicine in this rapidly evolving field of metastatic NSCLC.
