Cultural Linguistics and World Englishes Marzieh Sadeghpour, Farzad Sharifian.2020-12-04 This book investigates the study of World Englishes from the perspective of Cultural Linguistics, a theoretical and analytical framework for cultural cognition, cultural conceptualisations and language that employs and expands on the analytical tools and theoretical advancements in a number of disciplines, including cognitive psychology/science, anthropology, distributed cognition, and complexity science. The field of World Englishes has long focused on the sociolinguistic and applied linguistic study of varieties of English. Cultural Linguistics is now opening a new venue for research on World Englishes by exploring cultural conceptualisations underlying different varieties of English. The book explores ways in which the analytical framework of Cultural Linguistics may be employed to study varieties of English around the globe.

Applied Linguistics Research and Good Practices for Multicultural and Multilingual Classrooms Isaak Papadopoulos, Smaragda Papadopoulou.2021 This book aspires to provide a reflective and descriptive account of innovative research works and practices related to promoting and accommodating cultural and linguistic diversity in education. Within a diverse world, classrooms with diversity are not considered to be a major challenge, especially when researchers and teachers are making a joint attempt to accommodate this diversity of skills, competences, knowledge, expertise, feeling, languages, and cultures. This book has been developed to cover various aspects of approaching and supporting multilingual and multicultural classrooms through a selection of chapters, which shed light onto experiences in the field. The contributors of this book report and reflect on practices that raise students' multilingual and inter/multicultural awareness, communication and interaction. They discuss challenges of various contexts and provide perspectives from different angles on the above-mentioned issues underlining the need for continuous research, implementation and reflection in modern diverse classrooms. Teachers and researchers internationally seem to have placed this diversity at the center of their attention and this book is an example of best practices and pieces of research towards supporting such classrooms which have been seen as a crossroad for languages and cultures--

Research Anthology on Applied Linguistics and Language Practices Management Association, Information Resources.2022-04-01 Whether through speech, writing, or other methods, language and communication has been an essential tool for human cooperation and development. Across the world, language varies drastically based on culture and disposition. Even in areas in which the language is standardized, it is common to have many varieties of dialects. It is essential to understand applied linguistics and language practices to create equitable spaces for all dialects and languages. The Research Anthology on Applied Linguistics and Language Practices discusses in-depth the current global research on linguistics from the development of language to the practices in language acquisition. It further discusses the social factors behind language and dialect as well as cultural identity found behind unique traits in language and dialect. Covering topics such as linguistic equity, phonology, and sociolinguistics, this major reference work is an indispensable resource for linguists, pre-service teachers, libraries, students and educators of higher education, educational administration, ESL organizations, government officials, researchers, and academicians.

Exploring Intercultural Communication Zhu Hua.2013-08-15 Routledge Introductions to Applied Linguistics is a series of introductory level textbooks covering the core topics in Applied Linguistics, primarily designed for those beginning postgraduate studies, or taking an introductory MA course as well as advanced undergraduates. Titles in the series are also ideal for language professionals returning to academic study. The books take an innovative 'practice to theory' approach, with a 'back-to-front' structure. This leads the reader from real-world problems and issues, through a discussion of intervention and how to engage with these concerns, before finally relating these practical issues to theoretical foundations. Additional features include tasks with commentaries, a glossary of key terms, and an annotated further reading section. Exploring Intercultural Communication investigates the role of language in intercultural communication, paying particular attention to the interplay between cultural diversity and language practice. This book brings together current or emerging strands and themes in the field by examining how intercultural communication permeates our everyday life, what we can do to achieve effective and appropriate intercultural communication, and why we study language, culture and identity together. The focus is on interactions between people from various cultural and linguistic backgrounds, and regards intercultural communication as a process of negotiating meaning, cultural identities, and - above all - differences between ourselves and others. Including global examples from a range of genres, this book is an essential read for students taking language and intercultural communication modules within Applied Linguistics, TESOL, Education or Communication Studies courses.

Language, Media and Globalization in the Periphery Sender Dovchin.2018-05-11 The title seeks to show how people are embedded culturally, socially and linguistically in a certain peripheral geographical location, yet are also able to roam widely in their use and takeup of a variety of linguistic and cultural resources. Drawing on data examples obtained from ethnographic fieldwork trips in Mongolia, a country located geographically, politically and economically on the Asian periphery, this book presents an example of how peripheral contexts should be seen as crucial sites for understanding the current sociolinguistics of globalization. Dovchin brings together several themes of wide contemporary interest, including sociolinguistic diversity in the context of popular culture and media in a globalized world (with a particular focus on popular music), and transnational flows of linguistic and cultural resources, to argue that the role of English and other languages in the local language practices of young musicians in Mongolia should be understood as linguascapes. This notion of linguascapes adds new levels of analysis to common approaches to sociolinguistics of globalization, offering researchers new complex perspectives of linguistic diversity in the increasingly globalized world.

Translation as Communication across Languages and Cultures Juliane House.2015-10-30 In this interdisciplinary book, Juliane House breaks new ground by situating translation within Applied Linguistics. In thirteen chapters, she examines translation as a means of communication across different languages and cultures, provides a critical overview of different approaches to translation, of the link between culture and translation, and between views of context and text in translation. Featuring an account of translation from a linguistic-cognitive perspective, House covers problematic issues such as the existence of universals of translation, cases of untranslatability and ways and means of assessing the quality of a translation. Recent methodological and research avenues such as the role of corpora in translation and the effects of globalization processes on translation are presented in a neutral, non-biased manner. The book concludes with a thorough, historical account of the role of translation in foreign language learning and teaching and a discussion of new challenges and problems of the professional practice of translation in our world today. Written by a highly experienced teacher and researcher in the field, Translation as Communication across Languages and Cultures is an essential resource for students and researchers of Translation Studies, Applied Linguistics and Communication Studies.

Cultural Memory of Language Susan Samata.2014-11-20 I can't even speak my own language, were the words overheard in a college staffroom that triggered the writing of this book. Calling something 'my own' implies a personal, proprietorial relationship with it. But how can it be your own if you cannot speak it? The Cultural Memory of Language looks at unintended monolingualism - a lack of language fluency in a migratory cultural situation where two or more languages exist at 'home'. It explores family history and childhood language acquisition and attrition. What is the present everyday experience of language use and life between two cultures? Examining interview data, Samata uncovers a sense of inauthenticity felt by people who do not fully share a parent's first language. Alongside this features a sense of concurrent anger, and a need to assign blame. Participation in the language, even to the extent of phatic or formulaic phraseology, occasions feelings of authentic linguistic and cultural inclusion. The book thus uncovers appreciable (and measurable) benefits in positive self-image and a sense of well-being. Looking at how people view language is essential - how they view the language they call their own is even more important and this book does just that in a qualified applied linguistic environment.

Language Policy, Culture, and Identity in Asian Contexts Amy B.M. Tsui,James W. Tollefson.2017-09-25 Bringing together scholarship on issues relating to language, culture, and identity, with a special focus on Asian countries, this volume makes an important contribution in terms of analyzing and demonstrating how language is closely linked with crucial social, political, and economic forces, particularly the tensions between the demands of globalization and local identity. A particular feature is the inclusion of countries that have been under-represented in the research literature, such as Nepal, Bangladesh, Brunei Darussalam, Pakistan, Cambodia, Vietnam, and Korea. The book is organized in three sections: Globalization and its Impact on Language Policies, Culture, and Identity Language Policy and the Social (Re)construction of National Cultural Identity Language Policy and Language Politics: The Role of English. Unique in its attention to how the domination of English is being addressed in relation to cultural values and identity by non-English speaking countries in a range of sociopolitical contexts, this volume will help readers to understand the impact of globalization on non-English speaking countries, particularly developing countries, which differ significantly from contexts in the West in their cultural orientations and the way identities are being constructed. Language Policy, Culture, and Identity in Asian Contexts will interest scholars and research students in the areas of language policy, education, sociolinguistics, applied linguistics, and critical linguistics. It can be adopted in graduate and advanced undergraduate courses on language policy, language in society, and language education.

Applied Linguistics for Teachers of Culturally and Linguistically Diverse Learners Erdogan, Nabat,Wei, Michael.2019-06-30 Irrespective of the language (first, second, or foreign) taught, knowledge of linguistics and its application is a must for language teachers. However, most TESOL programs use general linguistics textbooks that deal with the science of linguistics (as theory), disregarding its implications (practice) for teaching English language learners. Applied Linguistics for Teachers of Culturally and Linguistically Diverse Learners is an essential scholarly publication that seeks to contribute to TESOL and language teacher education programs in order to assist educators to apply their knowledge to help linguistically and culturally diverse learners succeed in school and life. Highlighting an array of topics such as bilingualism, morphology, and sociolinguistics, this book is ideal for educators, educational programs, professionals, academicians, professors, linguists, and students.

The Many Faces of Multilingualism Piotr Romanowski,Martin Guardado.2020-10-12 Multilingualism has become an increasingly common global phenomenon especially in the last two decades. Therefore, multilingual programmes have now been regarded as a cornerstone of education systems in many countries around the world. Learning multiple languages helps us plug into a globalised world and strengthen links with a multitude of speakers from a diversified reality we live in. Thanks to the researched cases described in the chapters, further developments aimed at fostering multilingual practices in the contemporary world will be enhanced. The chapters included in the present volume, provide an overview of current theory, research and practice in the field. They deal with such prominent research topics as multilingual education, language policies, language contact, identity of multilingual speakers, to name only a few. The selected chapters focus on the numerous and heterogeneous relations between languages. They also incorporate a series of contextualized studies with diverse research designs applied in different settings across the globe. Exploring Digital Communication Caroline Tagg.2015-04-10 Routledge Introductions to Applied Linguistics is a series of introductory level textbooks covering the core topics in Applied Linguistics, primarily designed for those beginning postgraduate studies or taking an introductory MA course, as well as advanced undergraduates. Titles in the series are also ideal for language professionals returning to academic study. The books take an innovative 'practice to theory' approach, with a 'back-to-front' structure. This leads the reader from real-world problems and issues, through a

discussion of intervention and how to engage with these concerns, before finally relating these practical issues to theoretical foundations. Exploring Digital Communication aims to discuss real-world issues pertaining to digital communication, and to explore how linguistic research addresses these challenges. The text is divided into three sections (Problems and practices; Interventions; and Theory), each of which is further divided into two subsections which reflect linguistic issues relating to digital communication. The author seeks to demystify any perceived divide between online and offline communication, arguing that issues raised in relation to digital communication throw light on language use and practices in general, and thus linguistic interventions in this area have implications not only for users of digital communication but for linguists' general understanding of language and society. Including relevant research examples, tasks and a glossary, this textbook is an invaluable resource for postgraduate and upper undergraduate students taking New Media or Communication Studies modules within Applied Linguistics and English Language courses.

Language Across Boundaries British Association for Applied Linguistics. Meeting.2001 A selection of papers from the millennium conference of the British Association of Applied Linguistics. The boundaries of the title have been widely interpreted, ranging from work on the linguistic repercussions of individual and group identity boundaries, to work dealing with ways of crossing national and cultural boundaries through language learning.

Extending Applied Linguistics for Social Impact Doris S. Warriner, Elizabeth R. Miller.2021-06-03 Drawing on--but also extending--the theories and methods of applied linguistics, this book demonstrates how scholars of language might work together and with non-language specialists to address pressing concerns and issues of our time. Chapters explore efforts to recognize the legitimacy of stigmatized language varieties in public and institutional domains, museum-based science education for linguistically diverse children, how corpus analysis might illuminate the tension between the language choices and commitments of certain leaders, the embodied and artistic forms of meaning-making that challenge norms of Whiteness, and the transformative power of translanguaging in community-based theater. In addition, the volume demonstrates ways to enhance equity in healthcare delivery for immigrant families, examines the experiences of cultural health navigators working with refugee-background families, and highlights the value of raising public awareness of language issues related to social justice. These accounts show that applied linguists stand ready to interface with other scholars, other institutions, and the public to make socially-engaged and impactful contributions to the study of language, society, education, and access. Collectively, the authors respond to an important gap in the field and take a significant step towards a more socially-just, accessible, and inclusive approach to applied linguistics.

Applied Cultural Linguistics Farzad Sharifian, Gary B. Palmer.2007-04-11 Research in the relatively new field of cultural linguistics has implications for second language learning and intercultural communication. This volume is the first of its kind to bring together studies that examine the implications for applied programs of research in these domains. Collectively, the contributions explore the interrelationship between language, culture, and conceptualisations. Each study focuses on a different language-and-culture. The languages-cultures studied include Japanese, Chinese, Arabic, Persian, English, Aboriginal English and African English. The particular conceptual bases of the contributions range from theories of embodiment and conceptual metaphors to theories of schemas and cultural scripts. Several authors directly address the application of their observations to the fields of second language/dialect learning and intercultural communication, while others first present a theoretical analysis and then explore its practical implications. Collectively, the contributions establish a novel direction for research in applied linguistics.

Controversies in Applied Linguistics Barbara Seidlhofer.2003 There are several issues in English teaching on which applied linguists take very different positions: e.g. linguistic imperialism, the validity of critical discourse analysis, the pedagogic relevance of corpus descriptions of language, the theoretical bases of second language acquisition research, the nature of applied linguistics itself. This book presents exchanges between scholars arguing different positions, and directs attention to the key points at issue.

Metalinguistic Communities Netta Avineri, Jesse Harasta.2021-09-27 This edited volume brings together ten compelling ethnographic case studies from a range of global settings to explore how people build metalinguistic communities defined not by use of a language, but primarily by language ideologies and symbolic practices about the language. The authors examine themes of agency, belonging, negotiating hegemony, and combating cultural erasure and genocide in cultivating meaningful metalinguistic communities. Case studies include Spanish and Hebrew in the USA, Kurdish in Japan, Pataxó Hãhãhãe in Brazil, and Gallo in France. The afterword, by Wesley L. Leonard, provides theoretical and on-the-ground context as well as a forward-looking focus on metalinguistic futurities. This book will be of interest to interdisciplinary students and scholars in applied linguistics,

linguistic anthropology and migration studies.

Occupying Niches: Interculturality, Cross-culturality and Aculturality in Academic Research Andrzej Łyda, Krystyna Warchał. 2013-12-16

This book presents a collection of thematically focused articles addressing culture-specific features of academic communication, with a particular focus on communication conducted in English as an Additional Language and directed at multicultural audiences. It comprises papers arranged in four sections: Expert writers, Novice writers and readers, Conference participants, and Non-research academic genres. The book explicitly addresses and is centred upon the concept of a research niche understood as a space to be captured and populated, as a temporary location to move or grow out of in the course of individual professional development from novice to expert, and as a space to consciously reach beyond, delimited by one's linguistic, cultural, educational, and geopolitical background. Here the niche is approached as a frame of reference for discussion of what is culture-bound, culture-sensitive, and culture-free in the academic community and its practices.

Globalization of Language and Culture in Asia Vinita Vaish. 2010-05-13 The impact of globalization processes on language is an emergent field in sociolinguistics. To date there has not been an in-depth look at this in Asia, although Asia includes the two most populous globalizing economies of the world, India and China. Covering the major themes in the field of globalization and language, this book will take a look at topics such as English emerging as the medium of instruction for subjects like mathematics and science. Another theme is the rise of Mandarin as a potentially 'global' language networking the Chinese diaspora. The cultural contexts of Asia, specifically the Sinic, Hindu and Islamic civilizations give the processes of globalization and language a unique dimension. This book is suitable for researchers and postgraduate students in all fields of sociolinguistic enquiry.

Languages in Action Marinela Burada. 2019-01-24 This book includes a selection of papers in linguistics presented at the 14th Conference on British and American Studies. Its tripartite structure reflects the main topics around which the nineteen contributions cluster. The first part, "Native language profiling: explorations and findings", displays a variety of methodological approaches aimed at highlighting syntactic, morphological, and lexico-semantic aspects of, primarily, English and Romanian. The papers in the second section, "Aspects of language change, bilingualism, and cross-linguistic variation", bring to the fore some of the topical issues falling within the ambit of language contact, such as mixed languages, bilingualism, and code-switching, as well as contrastive investigations of language structure. The research strand in the final part, "Meaning and communication within and across cultures", relates to lexico-pragmatic inquiries into the construction of meaning, focusing on the "language beyond language", as well as on the extent to which the lexical and pragmatic repertoires of various languages can be made to overlap.

Future Directions in Applied Linguistics Christina Gitsaki. 2011-12-08 The field of applied linguistics covers a diverse range of research and practice, and has developed somewhat differently in various parts of the world due to variations in local socio-cultural conditions, needs and issues. However, this local diversity does not reflect a field that is incoherent, but rather one which has a broad, shared international agenda which is invigorated by the diversity brought to the field by local perspectives. The papers in this volume represent some of the major global directions that research in applied linguistics is taking and shed light on how language is used to affect practice. The aim of this volume is to explore some of the key methods and issues which are guiding applied linguistics into the future through an examination of these issues in local contexts, thereby providing a basis for understanding the global directions the field is taking. These directions follow two historically defined paths: those related to educational studies and language teaching, and those related to social issues involving language. In the volume, half the papers focus on the former, examining issues of language teaching, language teacher education and second language acquisition, while the other half examine social issues related to language use, bilingualism and multilingualism, and language policy and planning. The collection of papers presented in this book illustrates how these traditional themes are influenced by the rising forces of globalisation and the use of technology, thus exemplifying both the new and old ways in which the study of language is realised.

Applied Linguists Needed Lida Cope. 2014-06-03 It is a fact that the world's languages are dying at an alarming rate. This comprehensive volume aspires to raise awareness among applied linguists and language practitioners about the needs and concerns of endangered language communities. It suggests that the way forward lies in building language revitalization teams reflecting the levels of expertise that the fields of formal linguistics and applied linguistics have to offer - in how well researchers and practitioners exploit a tremendous networking potential across disciplines to address the needs of revitalization, stabilization, or maintenance in these communities. A wide range of expert contributors addresses the following themes: (1) how varied language teaching contexts dictate what applied linguists bring to the table; (2) how training in applied linguistics can empower members of the speaking community; (3) why we should critically examine the issues and terminology used to describe endangered language contexts; and (4) how linguistic skills can be adapted and integrated, conceptually and pedagogically, into non-traditional teaching contexts. The strength of this collection lies in bringing together expert applied and field linguists whose work represents extensive field experiences, theoretical expertise, and passionate resolve to act. This book was originally published as a special issue of *Language and Education*.

Cross-Linguistic and Cross-Cultural Perspectives on Academic Discourse Eija Suomela-Salmi, Fred Dervin. 2009-11-19 The goal of this volume is to examine academic discourse (AD) from cross-linguistic and cross-cultural perspectives. The adjective Cross-cultural in the volume title is not just limited to national contexts but also includes a cross-disciplinary perspective. Twelve scientific fields are under scrutiny in the articles. One of the unique aspects of the volume is the inclusion of a variety of foreign languages (English (as a lingua franca), Spanish, French, Swedish, Russian, German, Italian, and Norwegian). Besides, in several articles dealing with oral AD, comparisons and parallels are also established with written AD. The research methodologies used in the studies are varied and they offer an overview of the diversity and richness of approaches to AD. All in all, it is hoped that the volume appeals not only to young researchers but also to confirmed scholars interested in cross-linguistic and cross-cultural aspects of AD. It will also be of interest to language teachers or teachers who are involved with e.g. international students and academic mobility.

Language as a Local Practice Alastair Pennycook. 2010-04-05 *Language as a Local Practice* addresses the questions of language, locality and practice as a way of moving forward in our understanding of how language operates as an integrated social and spatial activity. By taking each of these three elements - language, locality and practice - and exploring how they relate to each other, *Language as a Local Practice* opens up new ways of thinking about language. It questions assumptions about languages as systems or as countable entities, and suggests instead that language emerges from the activities it performs. To look at language as a practice is to view language as an activity rather than a structure, as something we do rather than a system we draw on, as a material part of social and cultural life rather than an abstract entity. *Language as a Local Practice* draws on a variety of contexts of language use, from bank machines to postcards, Indian newspaper articles to fish-naming in the Philippines, urban graffiti to mission statements, suggesting that rather than thinking in terms of language use in context, we need to consider how language, space and place are related, how language creates the contexts where it is used, how languages are the products of socially located activities and how they are part of the action. *Language as a Local Practice* will be of interest to students on advanced undergraduate and post graduate courses in Applied Linguistics, Language Education, TESOL, Literacy and Cultural Studies.

Language, Literature and Culture in a Multilingual Society Ozo-mekuri Ndimele, Mustapha Ahmad. 2016-12-14 The papers here were selected from presentations made at the 24th Annual Conference of the Linguistic Association of Nigeria (LAN) which held at Bayero University Kano. The book contains seventy-seven (77) papers addressing various issues in linguistics, literature and cultures in Nigeria. The book is organized into four sections, as follows: Section One Language and Society; Section Two Applied Linguistics; Section Three Literature, Culture, Stylistics and Gender Studies and Section Four Formal Linguistics.

Language Across Boundaries Janet Cotterill, Anne Ife. 2005-11-17 *Language across Boundaries* is a selection of papers from the millennium conference of the British Association of Applied Linguistics. The thirteen papers are written by applied linguists, from Britain, mainland Europe, the USA, Australia and Singapore, working in a variety of sub-disciplines of the field. The 'boundaries' of the title have been widely interpreted and the book reflects a spectrum of research, ranging from work on the linguistic repercussions of individual and group identity boundaries to work dealing with ways of crossing national and cultural boundaries through language learning and language mediation in the form of translation. Included in the

volumes are the plenary papers given by Jennifer Coates, well known for her work on language and gender, on the expression of alternative masculinities; and by Bencie Woll, holder of the first chair of Sign Language and Deaf Studies in the UK, on the insights to be gained from sign language in exploring language, culture and identity.

Unity and Diversity in Language Use Kristyan Miller, Paul Thompson. 2006-01-23 The papers in this collection, drawn from the 34th Annual Conference of the British Association for Applied Linguistics, reflect a number of different perspectives within the field of applied linguistics at the start of the twenty-first century. While addressing the theme of unity and diversity, each paper prompts critical reflection on tensions within the discipline between stability and change, consensus and controversy, similarity and variation. The interpretation of language use is broad and varied, taking both macro- and micro-perspectives. Topics addressed range from issues of global communication in a world of shifting demographics and technological advances to analyses of specific contexts of interaction, both professional and personal. Furthermore, variation is considered from a number of social-cultural, gender-related, linguistic and discourse perspectives, calling into question terminology, definitions and the nature of evidence at the heart of applied linguistic theory and practice.
