Combining his artistic abilities, wild imagination, and passion for small houses, Deek self-published *Humble Homes, Simple Shacks, Cozy Cottages, Ramshackle Retreats, Funky Forts, and Whatever the Heck Else we could Squeeze in Here* in 2009. This new and expanded edition is a collection of Deek's creative/imaginative sketches for building small houses, shacks, cottages, and forts. Deek's one-of-a-kind sketches are accompanied with hand-written commentary, both instructive and comical. His main purpose is to encourage people to get off the couch and start building. Small Homes Lloyd Kahn. 2017 From the publishers of a popular series of building books comes *Small Homes*, which is highly relevant for these times. Getting smaller, rather than larger. Some 75 builders share their knowledge of building and design, with artistic, practical, and/or economical homes in the United States, Canada, England, Scotland, France, Germany, Spain, New Zealand and Lithuania. This is the seventh in a series of highly-graphic books on homemade building, all of which are interrelated. The series, *The Shelter Library Of Building Books*, include *Shelter*, *Shelter II* (1978), *Home Work* (2004), *Builders of the Pacific Coast* (2008), *Tiny Homes* (2012), and *Tiny Homes on the Move* (2014). Each of these books has over 1,000 photos, and each 2-page spread is carefully laid out with respect to balance of graphics and clarity of information. A running theme with them is that people have been inspired by one book to build their own home, and this will be included in a

subsequent book. For example, many of the homes in Home Work were inspired by Shelter. And so on. The underlying theme with Shelter's books, which has continued for over 40 years, is that it's possible for you to create your own home with your own hands, using natural materials. Some of these homes are in the country, some in small towns, and some in large cities--

Inspiring Tiny Homes Gill Heriz.2018-04-10 Gill Heriz presents a collection of some of the most inspiring small homes in the USA and the UK. Gill Heriz presents a collection of some of the most inspiring small homes in the USA and the UK. People have been living in small spaces for centuries, for reasons of practicality, mobility, flexibility, or personal choice. More recently, tiny homes have become the answer for many who need somewhere affordable to live, and who possess the creativity and energy to make something different. A small home can be relatively cheap to build or convert, and gives its owner choices, reflecting the way they want to live and their concern for the impact they have on the environment. Tiny homes can also be stunningly beautiful and imaginative. They ask their owners to be discerning about what belongings they have—what is necessary and what is beautiful. The choices are individual and can be seen as part of a movement away from money and property-slavery to a more simple and connected way of living. Gill Heriz has brought together a collection of some of the most incredible small homes, from houseboats on the water, trailers in the countryside, and micro-apartments in the city, to treehouses in the woods. A traditional Mongolian yurt provides off-grid living for a young couple and their baby. A preacher's wagon offers a chic, flexible space for its owners. There is a reclusive shack set in woodland, homes made from recycled Scotch whisky barrels, and a village of tiny houses for the homeless, all providing comfortable and sustainable accommodation for their pioneering owners.

People who support this movement are happy to live in a downsized home -- their tiny house is a lifestyle that they adopt/adapt and are happy in doing so. While one might argue the disadvantages of living in a tiny space, the financial freedom that it brings along cannot be disregarded. The average size of a house in the United States of America was 1,500 square feet in the 1950's; now, when the family sizes are shrinking, the average house size is 2,400 square feet. The lavish spaces in a 2,400 square foot house lies dormant for most part of the year. One such classic example is the living room, which serves its purpose for a couple of hours during the Christmas season... rest of the time its existence is hardly noticed or acknowledged; ditto for the multiple bathrooms, the huge dining room, bedrooms, and garage parking. The cost one pays for a huge home that is hardly used is hefty -- a mortgage that stretches almost until the end of one's retirement. Add to this the maintenance cost and the carbon footprint of a huge house!

Housing Reclaimed Jessica Kellner.2011-10-01 How to build community, reduce waste, and create

affordable, unique homes. Housing is a fundamental human right. For most of human history, our homes were built by hand from whatever local materials were available. However, since the Industrial Revolution, most housing has become little more than quickly constructed, mass-produced, uniform boxes. At the same time, the invention and standardization of the thirty-year mortgage and our ever-increasing reliance on credit has come to mean that most of us never own our homes outright. Housing Reclaimed is a call to arms for nonconventional home builders. It examines how technological advances, design evolution, and resourceful, out-of-the-box thinking about materials and efficiency can help us meet the challenge of building affordable, environmentally friendly, beautiful, and unique homes. Focusing on the use of salvaged and reclaimed materials, this inspirational volume is packed with case studies of innovative projects including: Phoenix Commotion—working together towards low-income home ownership through sweat equity and 100 percent recycled materials HabeRae—revitalizing neighborhoods by creating urban infill using modern technology and sustainable and reclaimed materials Builders of Hope—rescuing and rehabilitating whole houses slated for demolition These projects and others like them demonstrate that building one's own home does not have to be an unattainable dream. This beautifully illustrated guide is a must-read for anyone interested in creating quality zero- or low-debt housing, reducing landfill waste, and creating stronger communities. Jessica Kellner is the editor of Natural Home and Garden magazine and a passionate advocate of using architectural salvage to create aesthetically beautiful, low-cost housing.
