Communication Research Methodology Gary Petty, Cheryl Campanella Bracken, Elizabeth B. Pask.2017-02-17 This introduction to communication research methods takes the student from the conceptual beginnings of a research project through the design and analysis. Emphasizing the correct questions to ask and how to approach the answers, authors Gary Petty, Cheryl Campanella Bracken, and Elizabeth Babin approach social science methods as a language to be learned, requiring multiple sessions and reinforcement through practice. They explain the basics of conducting communication research, facilitating students' understanding of the operation and roles of research so that they can better critique and consume the materials in their classes and in the media. The book takes an applied methods approach, introducing students to the conceptual elements of communication science and then presenting these elements in a single study throughout the text, articulating the similarities and differences of individual methods along the way. The study is presented as a communication campaign, involving multiple methodologies. The approach highlights how one method can build upon another and emphasizes the fact that, given the nature of methodology, no single study can give complete answers to our research questions. Unique features of the text: It introduces students to research methods through a conceptual approach, and the authors demonstrate that the statistics are a tool of the concepts. It employs an accessible approach and casual voice to personalize the experience for the readers, leading them through the various stages and steps. The presentation of a communication campaign demonstrates each method discussed in the text. This campaign includes goals and objectives that will accompany the chapters, demonstrates each individual methodology, and includes research questions related to the communication campaign. The tools gained herein will enable students to review, use, understand, and critique research, including the various aspects of appropriateness, sophistication and utility of research they encounter.

Thinking Like a Researcher Jake Harwood.2017-12-31 Thinking Like a Researcher: An Engaged Introduction to Communication Research Methods challenges students to assume the role of a researcher to learn how to solve problems and analyze relevant, real-world situations. The book presents students with an array of research problems as seen through the eyes of four different types of researchers: a college newspaper staff member; an intern at a city government health agency; a political campaign intern; and a recent college graduate working at a public relations firm. Students adopt these roles and, in doing so, learn how to apply research methods to a specific problem, analyze the resulting data, and produce written research to communicate their findings. The text is organized around extended examples that frame pairs of chapters. The first chapter in each pair deals with methods (What would you do to gather data to answer the question?) and the second with analysis (What do you do with the resulting data?). Throughout, students are prompted to fill in blanks, provide responses, and guess the answers to questions. They learn how to use appropriate and accessible tools to run analyses on real data and cultivate results. Featuring a uniquely intuitive and immersive approach, Thinking Like a Researcher is an exemplary textbook for introductory courses in communication research and statistics. Jake Harwood (Ph.D., University of California at Santa Barbara) is a professor of communication at the University of Arizona, where he teaches courses in research methods and statistics, intergroup communication, communication and music, and intergenerational communication. He is the author of Understanding Communication and Aging and Communication and Music in Social Interaction.
