**The 27 Challenges Managers Face** Bruce Tugan.2014-09-09 For more than twenty years, management expert Bruce Tugan has been asking, “What are the most difficult challenges you face when it comes to managing people?” Regardless of industry or job title, managers cite the same core issues—27 recurring challenges: the superstar whom the manager is afraid of losing, the slacker whom the manager cannot figure out how to motivate, the one with an attitude problem, and the two who cannot get along, to name just a few. It turns out that when things are going wrong in a management relationship, the common denominator is almost always unstructured, low substance, hit-or-miss communication. The real problem is that most managers are “managing on autopilot” without even realizing it—until something goes wrong. And if you are managing on autopilot, then something almost always does. The 27 Challenges Managers Face shows exactly how to break the vicious cycle and gain control of management relationships. No matter what the issue, Tugan shows that the fundamentals are all you need. The very best managers hold ongoing one-on-one conversations that make expectations clear, track performance, offer feedback, and hold people accountable. For every workplace problem—even the most awkward and difficult—The 27 Challenges Managers Face shows how to tailor conversations to solve situations familiar to every manager. Tugan offers clear approaches for turning around bad attitudes, reducing friction and conflict, improving low performers, retaining top performers, and even addressing your own personal burnout. The 27 Challenges Managers Face is an indispensable resource for managers at all levels, one anyone managing anyone will want to keep on hand. One challenge at a time, you’ll see how the most effective managers use the fundamentals of management to proactively resolve (nearly) any problem a manager could face.

McNeill.2011-04-27 The third edition of this book is an updated and expanded presentation of the widely used Integrative Developmental Model of Supervision. In contrast to other volumes on clinical supervision, Stoltenberg and McNeill present a comprehensive, time-tested, and empirically investigated model of supervision, rather than a broad summary of other existing or historical approaches. In addition to presenting a model of therapist development that spans beginning through advanced training, the book integrates theory and research from numerous perspectives, including learning, cognition, and emotion, as well as an up-to-date treatment of research directly addressing the supervision process. The model also examines the role of clinical supervision from an evidence-based practice perspective and addresses issues of common factors in therapy. The impact of cultural issues in supervision and training, as well as recent work in a competencies approach to supervision and trainee development, are also examined.

*Supervision Essentials for a Systems Approach to Supervision* Elizabeth Holloway.2016 The heart of clinical supervision is the relationship between the supervisor and supervisee. Elizabeth Holloway's systems approach to supervision conceptualizes this all-important relationship as consisting of several key dimensions, or systems, which interact and together help create and maintain the supervisory relationship. These systems include the client, the trainee, the supervisor, the functions and learning tasks in supervision, and the institution in which the supervision process is taking place. As the author compellingly argues, for clients, trainees, and supervisors alike, our decision-making and actions are always consciously or tacitly embedded within these systems. Understanding the dynamic interplay of the interdependent components of each system is essential to building a strong and thriving supervisory relationship. With detailed case examples (including excerpts and analyses of real supervision sessions with real trainees, as demonstrated in the author's DVD Systems Approach to Psychotherapy Supervision, also available from APA Books), the author skillfully demonstrates the various roles supervisors play, from monitor and advisor, to role model, consultant, and mentor. The unique importance of supervisory competencies, including counseling skills, case conceptualization, ethical practice, intra and interpersonal awareness, and self-evaluation, are examined in full depth.

*Social Work Case Management* Betsy Vourlekis.2017-07-05 This new practice text provides a series of readings focusing on case management in a number of fields and in a variety of settings with different client populations. Supervision Essentials for Cognitive-behavioral Therapy Cory Frank Newman, Danielle Alissa Kaplan. 2016 Cognitive-behavioural therapies are the most popular form of mental health services offered today. But with this popularity comes an urgent need for standardized training and education for emerging cognitive-behavioural therapy (CBT) clinicians. This handy guide offers an evidence-based approach to supervision of emerging CBT practitioners. The authors' approach is based on two key concepts: feedback that is geared toward strengths as well as weaknesses, and stimulates problem-solving and growth; and demonstration, by which a supervisor takes part in role-playing exercises and even shows videos of his or her own work with clients, in order to model the experiential knowledge that trainees need to succeed. Using a wealth of case examples, including material from a supervision session with a real trainee (from the DVD *Cognitive-Behavioral Therapy Supervision*, also available from the American Psychological Association), Newman and Kaplan demonstrate how trainees can learn to think like effective CBT practitioners, from conceptualizing cases and matching interventions to the individual needs of each client, to the comprehensive and subtle understandings of cultural competency and professional ethics.

The Person of the Therapist Training Model Harry J. Aponte, Karni Kissil. 2016-01-08 The Person of the Therapist Training Model presents a model that prepares therapists to make active and purposeful use of who they are, personally and professionally, in all aspects of the therapeutic process—relationship, assessment and intervention. The authors take a process that seems vague and elusive, the self-of-the-therapist work, and provide a step-by-step description of how to conceptualize, structure, and implement a training program designed to facilitate the creation of effective therapists, who are skilled at using their whole selves in their encounters with clients. This book looks to make conscious and planned use of a therapist's race, gender, culture, values, life experience, and in particular, personal vulnerabilities and struggles in how he or she relates and works with clients. This evidence-supported resource is ideal for clinicians, supervisors, and training programs.

*Clinical Supervision* Carol A. Falender, Edward P. Shafranske. 2004-01-01 This book presents a competency-based approach to supervision that emphasizes the use of science-informed theory and practice. Without minimizing the complexity of supervision or ignoring the present scientific standing of the field, we posit that the practice of supervision involves identifiable competencies, which can be learned and in turn promote the supervisee's clinical competence through the integration and application of specific knowledge, skills, attitudes, and values. Furthermore, we present four superordinate values that we believe to be integral to supervision and clinical practice: integrity-in-relationship, ethical values-based practice, appreciation of diversity, and science-informed practice. Finally, we advocate for an approach to supervision that recognizes the personal strengths supervisees bring to their education and clinical training and, drawing on principles derived from positive psychology, informs the learning process and leads to increased competence and self-efficacy. **Counselling Supervision in Context** Michael Carroll, Elizabeth Holloway.1998-12-28 `The book is written in such a way as to challenge and educate through the use of exercises, scenarios and activities. Something it does rather well.... A well-written, practical and informative publication... of value to supervisees, supervisors and all those involved in counsellor and supervisor training' - *Counselling Psychology Review* `This book... argues that the social context is important for the individual client, supervisee and supervisor, as is the context in which the work and supervision are done... it is a clear, well-written and enjoyable book, containing helpful information for both supervisees and supervisors' - *Transformations, The PCSR Journal* There is an increasing awareness of the impact of individual factors on therapeutic work, both with clients and with their counsellors in supervision, but the influence of social contexts on this work has been less clearly articulated. This book provides counsellors with practical information about supervising specific types of clients and in specific organizational settings. Part One addresses four essential aspects of the individual - race, gender, disability and sexual orientation, exploring their influence on the therapeutic relationship and the supervision of trainee and experienced counsellors. Part Two assesses the impact of the organizations where counselling takes place - how different kinds of settings affect work with clients and thus the work of supervision. By highlighting context as a potential source of difficulty for the client, the book encourages trainees and supervisors to look beyond the individual and avoid placing the burden of responsibility for problems upon the client.

**A Guide to Practicum and Internship for School Counselors-in-Training** Jeannine R. Studer.2015-05-01 A Guide to Practicum and Internship for School Counselors-in-Training, 2nd ed, covers all aspects of the practicum and internship experience, from the initial contact with supervisors to detailed descriptions of students' different roles. Readers will gain both an awareness of the school culture and the understanding needed to develop an individualized philosophy of school counseling. for working with special populations of students, understanding the school counselor's role in utilizing the 2012 National Model of the American School Counselor Association (ASCA) including the inherent elements and themes, putting the ASCA ethical standards into practice, and administration of day-to-day tasks. Each chapter contains activities, case studies, worksheets, and images to facilitate understanding, and all material presented is consistent with both the accreditation standards of the Council for the Accreditation of Counseling and Related Educational Programs (CACREP) and the school counselor standards identified by the ASCA.

*Clinical Supervision* Elizabeth Holloway.1995-06-16 In her systems approach to supervision, the author presents a unique system of clinical supervision developed with her colleagues over years of experience as supervisors of psychologists in training. . . . The book is written in a 'reader-friendly' manner and is both theoretical and practical. The prose is clear; the charts are easily decipherable. Research findings are separated onto single pages interspersed throughout pertinent sections and printed in darker shades to draw the eye. The various levels of the supervisory session (transcript, recall, interview, analysis) are placed in columns side by side for easy comparison. The author has succeeded in dissecting the complex instructional strategy of modeling counseling task, function, and skill within the supervisory relationship. Her work is a valuable complement to the existing body of literature. --Susan B. DeVaney in *Counseling Today* The book uses a range of interesting transcripts to illustrate points together with providing up-to-date research information on subjects such as trainee learning needs, supervisor and trainee gender, institutional factors and supervisor experience, to mention but a few. A thought-provoking book and one which I would recommend as profitable reading for those engaged in or considering becoming engaged in the field of supervision. --Gladeana McMahon in *BPS Counselling*
