Negative/Positive Geoffrey Batchen.2020-12-21 As its title suggests, *Negative/Positive* begins with the negative, a foundational element of analog photography that is nonetheless usually ignored, and uses this to tell a representative, rather than comprehensive, history of the medium. The fact that a photograph is split between negative and positive manifestations means that its identity is always simultaneously divided and multiplied. The interaction of these two components was often spread out over time and space and could involve more than one person, giving photography the capacity to produce multiple copies of a given image and for that image to have many different looks, sizes and makers. This book traces these complications for canonical images by such figures as William Henry Fox Talbot, Kusakabe Kimbei, Dorothea Lange, Man Ray, Seydou Keita, Richard Avedon, and Andreas Gursky. But it also considers a number of related issues crucial to any understanding of photography, from the business practices of professional photographers to the repetition of pose and setting that is so central to certain familiar photographic genres. Ranging from the daguerreotype to the digital image, the end result is a kind of little history of photography, partial and episodic, but no less significant a rendition of the photographic experience for being so. This book represents a summation of Batchen's work to date, making it be essential reading for students and scholars of photography and for all those interested in the history of the medium

The New Historical Dictionary of the American Film Industry
Anthony Slide.2014-02-25 The New Historical Dictionary of the American Film Industry is a completely revised and updated edition of Anthony Slide's *The American Film Industry*, originally published in 1986 and recipient of the American Library Association's Outstanding Reference Book award for that year. More than 200 new entries have been added, and all original entries have been updated; each entry is followed by a short bibliography. As its predecessor, the new dictionary is unique in that it is not a who's who of the industry, but rather a what's what: a dictionary of producing and releasing companies, technical innovations, industry terms, studios, genres, color systems, institutions and organizations, etc. More than 800 entries include everything from Academy of Motion Pictures Arts and Sciences to Zoom Lens, from Astoria Studios to Zoetrope. Outstanding Reference Source - American Library Association

Gender, Race, and Class in Media Gail Dines.2003

Through analyses of popular mass media entertainment genres, such as talk shows, soap operas, television sitcoms, advertising and pornography, students are invited to engage in critical mass media scholarship. A comprehensive introductory section outlines the book's integrated approach to media studies, which incorporates three distinct but related areas of investigation: the political economy of production, textual analysis and audience response. The readings include a dozen new original essays, edited for maximum accessibility. The book provides: - A comprehensive, critical introduction to Media Studies - An analysis of race that is integrated into all chapters - Articles on Cultural Studies that are accessible to undergraduates - An extensive bibliography and section on media resources -

Bringing Fossils to Life Donald R. Prothero.2013-11-12 The leading textbook in its field, this work applies paleobiological principles to the fossil record while detailing the evolutionary history of major plant and animal phyla. It incorporates current research from biology, ecology, and population genetics. Written for biology and geology undergrads, the text bridges the gap between purely theoretical paleobiology and solely descriptive invertebrate paleobiology books, emphasizing the cataloguing of live organisms over dead objects. This third edition revises art and research throughout, expands the coverage of invertebrates, includes a discussion of new methodologies, and adds a chapter on the origin and early evolution of life.

Restoration of Amundsen's lantern slides Pietro

Librici.2017-06-03 The book presents for the first time the restoration of Amundsen's glass slides, one of the most beautiful collections of slides in the world. The 248 slides are the photographic testimony of three great explorations: the Northwest Passage (1903-1906), the conquest of the South Pole (1910-1912) and the Maud expedition (1918-1925). Discovered by chance in 1986, the slides were restored in 2009 by Pietro Librici at the National Library of Norway, in a continuous cooperation with the institute team. The restoration is presented analytically in its methodological, technical, scientific and operational aspects, constituting an updated model of intervention. Critical historical studies that accompanied the restoration and the expressive features of the slides have also led the author to identify Amundsen's own style which lies between documentary photography and photographic documentation and make the book a particular opportunity to immerse in the charm of polar expeditions, in the first years of the 20th century when the poles

Queer Asian Cinema Andrew Grossman.2018-10-24 Explore queer themes in films from Hong Kong gangster flicks to Bollywood melodramas! Although Asian films have reached a new height in popularity worldwide, *Queer Asian Cinema: Shadows in the Shade* is the first full-length book in English solely devoted to examining the aesthetics and politics of homosexuality in Asian films. This unique book presents multiple points of view on the portrayal of gay, lesbian, and transgendered people in film throughout Asia. From the subversive sadomasochism of Japan's "pink films" to the hard-boiled world of Hong Kong's gangster movies, *Queer Asian Cinema* analyzes and discusses attitudes toward homosexuality in the full spectrum of Asian film. In addition to studies of the representation of identified gay men, lesbians, and transgendered individuals, it reveals the hidden homoerotic subtext of otherwise conventional films. *Queer Asian Cinema: Shadows in the Shade* examines diverse aspects of Asian films, including: the political and psychological links between feudal and sadomasochist

The Immortal Comedy Agnes Heller.2005-10-17 Immortal Comedy is the first book to 'think' philosophically about the comic phenomenon in general. Although author Agnes Heller had written a book that is both deeply scholarly and meditative on the subject of the comic form in film, literature, and life her writing is eminently approachable. In both its subject and style, Immortal Comedy is a seminal book. In it, Heller takes us on a journey through theories of comedy beginning with classical thought. She then detours through foundational political thinkers who refer to, for instance, laughter and power. We are also introduced to modern systematic approaches to thinking comedy, psychological approaches, and existential approaches. The discerning combination of Heller's individual taste for the pantheon of comedic work and, also, what critics may consider 'less significant' work gives this book a character apart from all others. It is the detail with which Heller makes her discussion, how and where she locates 'the comic,' and probably most significantly her discussion of comedy and our own lives that makes Immortal Comedy a principal book for the entire range of humanities scholars and enthusiasts.
