The Pulse of Modernism Robert Michael Brain.2015-03-02 Robert Brain traces the origins of artistic modernism to specific technologies of perception developed in late-nineteenth-century laboratories. Brain argues that the thriving fin-de-siècle field of “physiological aesthetics,” which sought physiological explanations for the capacity to appreciate beauty and art, changed the way poets, artists, and musicians worked and brought a dramatic transformation to the idea of art itself.

Neonatal Screening for Critical Congenital Heart Defects Andrew Ewer.2019-06-14 Critical congenital heart defects (CCHDs) are potentially life-threatening malformations that remain a significant cause of neonatal mortality and morbidity. Failure to diagnose these conditions shortly after birth may result in acute cardiovascular collapse and death. The identification of CCHDs by routine newborn clinical examination is routine in many countries, but consistently misses over a third of cases, and, although antenatal ultrasound screening can be very effective in early diagnosis, the provision and accuracy of ultrasound screening is highly variable. As most CCHDs present with mild cyanosis (hypoxaemia), which is frequently clinically undetectable, pulse oximetry is a rapid, simple, painless method of accurately identifying hypoxaemia, which has gained popularity as a screen for CCHD. This Special Issue of the International Journal of Neonatal Screening, devoted to

Neonatal Screening for Critical Congenital Heart Defects (CCHDs), will consider the evidence for CCHD screening with pulse oximetry, the acceptability and cost-effectiveness of this intervention, the additional non-cardiac conditions which it may also identify, and international experiences of introducing CCHD screening across the globe.

High-Altitude Electromagnetic Pulse (HEMP) Testing Department of Defense. 2018-03-07 This Test Operations Procedure (TOP) 01-2-620 This Test Operations Procedure (TOP) is a general outline on test procedures required to determine the effects of a specified High-Altitude Electromagnetic Pulse (HEMP) environment on Army and/or Department of Defense (DoD) equipment. The purpose of these test and analysis procedures is to ascertain the degree to which the Operational Requirements Document (ORD), Concept of Operation (CONOPS), Capability Development Document (CDD), Capability Performance Document (CPD), Army Regulation (AR) 70-751, Independent Evaluation Plan (IEP)/Independent Assessment Plan (IAP) criteria, and US Army Nuclear Hardening Criteria (NHC) are met. Army materiel can consist of complete end items, subsystems, line replaceable units (LRUs), components or piece-parts of major systems. All materiel must be tested and analyzed to its NHC with respect to the performance of all its mission essential functions. Realistic hardware, and practical test configurations and scenarios must be tested and analyzed in order to achieve an accurate and complete Electromagnetic Pulse (EMP) Survivability Test and Assessment (STA). All EMP STAs must include a three phase approach in order to meet the requirements of Department of Defense Directive (DODD) 5000.12, AR 70-75, and its NHC. To ensure all personnel remain cognizant of the safety hazards associated with HEMP testing personnel and system safety procedures should be observed in accordance with Military Standard (MIL-STD) 882D3, AR 385-104, Department of the Army (DA) Pamphlet (Pam) 385-245 and

Department of Defense Instruction (DODI) 6055.116. This TOP adheres to an integrated set of test principles and procedures that will result in timely, reliable, and consistent data for HEMP survivability assessment. Why buy a book you can download for free? We print this book so you don't have to. First you gotta find a good clean (legible) copy and make sure it's the latest version (not always easy). Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. We look over each document carefully and replace poor quality images by going back to the original source document. We proof each document to make sure it's all there - including all changes. If you find a good copy, you could print it using a network printer you share with 100 other people (typically it's either out of paper or toner). If it's just a 10-page document, no problem, but if it's 250-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the latest version from Amazon.com. This book includes original commentary which is copyright material. Note that government documents are in the public domain. We print these large documents as a service so you don't have to. The books are compact, tightly-bound, full-size (8 1/2 by 11 inches), with large text and glossy covers. If you like the service we provide, please leave positive review on Amazon.com. External Communication in Social Media During Asymmetric Conflicts Bernd

Hirschberger.2021-07-31 Social media increasingly shapes the way in which we perceive conflicts and conflict parties abroad. Conflict parties, therefore, have started using social media strategically to influence public opinion abroad. This book explores the phenomenon by examining, (1) which strategies of external communication conflict parties use during asymmetric conflicts and (2) what shapes the selection of these communication strategies. In a comprehensive case study of the conflict in Israel and Palestine, Bernd Hirschberger shows that the selection of strategies of external communication is shaped by the (asymmetric) conflict structure.
