Where Europe Begins: Stories Yoko Tawada.2007-05-17 A gorgeous collection of fantastic and dreamlike tales by one of the world's most innovative contemporary writers. Chosen as a 2005 Times Literary Supplement Book of the Year, *Where Europe Begins* has been described by the Russian literary phenomenon Victor Pelevin as a spectacular journey through a world of colliding languages and multiplying cities. In these stories' disparate settings—Japan, Siberia, Russia, and Germany—the reader becomes as much a foreigner as the author, or the figures that fill this book: the ghost of a burned woman, a traveler on the Trans-Siberian railroad, a mechanical doll, a tongue, a monk who leaps into his own reflection. Through the timeless art of storytelling, Yoko Tawada discloses the virtues of bewilderment, estrangement, and Hilaritas: the goddess of rejoicing.

Expressionism and Film Rudolf Kurtz.2016-03-21 *Expressionism and Film*, originally published in German in 1926, is not only a classic of film history, but also an important work from the early phase of modern media history. Written with analytical brilliance and historical vision by a well-known contemporary of the expressionist movement, it captures Expressionism at the time of its impending

conclusion—as an intersection of world view, resoluteness of form, and medial transition. Though one of the most frequently-cited works of Weimar culture, Kurtz’s groundbreaking work, which is on a par with Siegfried Kracauer’s *From Caligari to Hitler* and Lotte Eisner’s *The Haunted Screen*, has never been published in English. Its relevance and historical contexts are analyzed in a concise afterword by the Swiss scholars Christian Kiening and Ulrich Johannes Beil.

Patterns of Commoning David Bollier, Silke Helfrich. 2015-11-06 What accounts for the persistence and spread of commoning, the irrepressible desire of people to collaborate and share to meet everyday needs? How are the more successful projects governed? And why are so many people embracing the commons as a powerful strategy for building a fair, humane and Earth-respecting social order? In more than fifty original essays, *Patterns of Commoning* addresses these questions and probes the inner complexities of this timeless social paradigm. The book surveys some of the most notable, inspiring commons around the world, from alternative currencies and open design and manufacturing, to centuries-old community forests and co-learning commons - and dozens of others. David Bollier (www.bollier.org) is an American author, activist and independent scholar who has studied the commons for nearly twenty years. Silke Helfrich (commonsblog.wordpress.com) is a German author and independent activist of the commons who blogs at www.commonsblog.de, and cofounder of the Commons-Institut in Germany. With Michel Bauwens, Bollier and Helfrich are cofounders of the Common Strategies Group. For more information, go to the book's website, *Patterns of Commoning* (www.patternsofcommoning.org)

Urban Margins Martina Rieker. 2008 Urban studies of the global South have paid particular attention to megacities, such as Mumbai or Johannesburg, while more peripheral urban landscapes--including small and medium-sized towns as well as the margins of megacities themselves--remain

overlooked. Emerging from the work of the Shehr Comparative Urban Landscapes Network, an academic initiative that seeks to further a social-historical and critical understanding of contemporary cities and urban practices, this special issue of Social Text takes up the question of marginality in contemporary urban cartographies in the Middle East, South Asia, and Africa. Urban Margins explores the complex processes through which citizens produce and negotiate these marginalized landscapes and in turn are informed by them. Focusing on Douala in Cameroon and Dakar in Senegal, one essay discusses how the state's failure to provide for its citizens has led many to turn to informal networks and affiliations--whether kin-based, local, translocal, gendered, religious, or secular--for survival. Rendering the urban landscape of these cities in terms of these networks and the ways that they shape a citizen's interaction with the city, the essay considers the political possibilities for African cities where diverse multilingual and ethnic populations face the challenges, pitfalls, and compromises of coexistence. Examining how female migrant workers negotiate various spaces within the urban landscape of the free trade zone outside of Colombo, Sri Lanka, another essay details how the city represents a site of personal autonomy and political possibilities for both women and men. One contributor addresses the city of Ramallah in the embattled West Bank--the de facto Palestinian capital and the only cosmopolitan space within the occupied territories--to consider how the Palestinian urban middle class remains haunted by the unmodern within its own history and present. Another surveys changes in the cultural significance of roads, forts, and town walls in Bahla, Oman, in the aftermath of the country's 1970 coup d'etat. Contributors. Writing Against Death Susan Bainbrigge.2005 Aims to re-evaluate Simone de Beauvoir's extensive autobiographical oeuvre, exploring its place in relation to the French autobiographical canon. This study presents readings, which engage critically with existentialism, feminist theory, and autobiographystudies generally, in particular focusing on the question of 'autothanatography'.

Tycho Brahe's Path to God Max Brod.2007-10-03 Though best known for his editing and posthumous publication of his friend Franz Kafka's writing, Max Brod was a major novelist in his own right. Tycho Brahe's Path to God, widely considered his finest work and viewed by many as a small masterpiece, concerns the relationship between the great Danish astronomer and the younger, intellectually superior Johannes Kepler. Brod's representation of this complicated relation grew out of his acquaintance with the young Albert Einstein, reproduces his struggles with the Expressionist poet Franz Werfel, and strangely anticipates the most famous act Brod would ever perform: publishing Kafka's writings without his permission. As Brahe attempts to create a diplomatic compromise between the old Ptolemaic system of planetary motion and its modern, Copernican revision, Kepler discards the principle of compromise root and branch. Their conflict thus becomes an emblem of the struggle between a weakened tradition and a self-conscious modernity. The novel manages to convey the intimate, emotional reality of a seventeenth-century political conflict as well as the psychological, political, and artistic turmoil of Brod's own time. This revival of the richly allusive and deeply resonant Tycho Brahe's Path to God is a true literary event.

The Formation of Campaign Agendas Holli A. Semetko, Jay G. Blumler, Michael Gurevitch, David H. Weaver, Steve Barkin. 2013-04-15 This unusual volume seeks to accomplish three related goals: * to assess the extent and limits of media power in election campaigns * to extend the concept of media agenda-setting to include the contributions of powerful news sources in the process of election agenda formation * to evaluate the impact of national system variables (differences in political and media systems) on the balance of party and media forces in the formation of campaign agendas In the process, it searches for ways of measuring the discretionary power of the media in electoral politics, testing this in terms of the relative ability of journalists and politicians to shape election campaign agendas.

Colonialist Photography Eleanor M. Hight, Gary D. Sampson. 2013-06-17 Colonialist Photography is an absorbing collection of essays and photographs exploring the relationship between photography and European and American colonialism. The book is packed with well over a hundred captivating images, ranging from the first experiments with photography as a documentary medium up to the decolonization of many regions after World War II. Reinforcing a broad range of Western

assumptions and prejudices, Eleanor M. Hight and Gary D. Sampson argue that such images often assisted in the construction of a colonial culture.

Tigers of the Snow and Other Virtual Sherpas Vincanne Adams.2014-05-06 Sherpas are portrayed by Westerners as heroic mountain guides, or tigers of the snow, as Buddhist adepts, and as a people in touch with intimate ways of life that seem no longer available in the Western world. In this book, Vincanne Adams explores how attempts to characterize an authentic Sherpa are complicated by Western fascination with Sherpas and by the Sherpas' desires to live up to Western portrayals of them. Noting that diplomatic aides at world summit meetings go by the name Sherpa, as do a van in the U.K. built for rough terrain and a software product from Silicon Valley, Adams examines the authenticating effects of this mobile signifier on a community of Himalayan Sherpas who live at the base of Mount Everest, Nepal, and its deauthenticating effects on anthropological representation. This book speaks not only to anthropologists concerned with ethnographic portrayals of Otherness but also to those working in cultural studies who are concerned with ethnographically

grounded analyses of representations. Throughout Adams illustrates how one might undertake an ethnography of transnationally produced subjects by using the notion of virtual identities. In a manner informed by both Buddhism and shamanism, virtual Sherpas are always both real and distilled reflections of the desires that produce them.

The Heritage of Our Times Ernst Bloch.2018-03-15 Heritage of Our Times is a brilliant examination of modern culture and its legacy by one of the most important and deeply influential thinkers of the 20th century. Bloch argues that the key elements of a genuine cultural tradition are not just to be found in the conveniently closed and neatly labeled ages of the past, but also in the open and experimental cultural process of our time. One of the most compelling aspects of this work is a contemporary analysis of the rise of Nazism. It probes its bogus roots in German history and mythology at the very moment when the ideologies of Blood and Soil and the Blond Beast were actually taking hold of the German people. The breadth and depth of Bloch's vision, together with the rich diversity of his interest, ensure this work a place as one of the key books of the 20th century.

The Great Exhibition of 1851 Jeffrey A. Auerbach.1999-01-01 The book challenges the common view that the Exhibition symbolized peace, progress, prosperity, and the emergence of an industrial middle class. Auerbach suggests instead that the Great Exhibition became a cultural battlefield on which proponents of different visions of industrialization, modernization, and internationalism fought for ascendancy in the struggle for a new national identity.--BOOK JACKET.

Hegel's Naturalism Terry Pinkard.2013-11 Terry Pinkard draws on Hegel's central works as well as his lectures on aesthetics, the history of philosophy, and the philosophy of history in this deeply informed and original exploration of Hegel's naturalism. As Pinkard explains, Hegel's version of naturalism was in fact drawn from Aristotelian naturalism: Hegel fused Aristotle's conception of nature with his insistence that the origin and development of philosophy has empirical physics as its presupposition. As a result, Hegel found that, although modern nature must be understood as a whole to be non-purposive, there is nonetheless a place for Aristotelian purposiveness within such nature. Such a naturalism provides the framework for explaining how we are both natural organisms and also practically minded (self-determining, rationally responsive, reason-giving) beings. In arguing for this point, Hegel shows that the kind of self-division which is characteristic of human agency also provides human agents with an updated version of an Aristotelian final end of life. Pinkard treats this conception of the final end of being at one with oneself in two parts. The first part focuses on Hegel's account of agency in naturalist terms and how it is that agency requires such a self-division, while the second part explores how Hegel thinks a historical narration is essential for understanding what this kind of self-division has come to require of itself. In making his case, Hegel argues that both the antinomies of philosophical thought and the essential fragmentation of modern life are all not to be understood as overcome in a higher order unity in the State. On the contrary, Hegel demonstrates that modern institutions do not resolve such tensions any more than a comprehensive philosophical account can resolve them theoretically. The job of modern practices and institutions (and at a reflective level the task of modern philosophy) is to help us understand and live with precisely the unresolvability of these oppositions. Therefore, Pinkard explains, Hegel is not the totality theorist he has been taken to be, nor is he an identity thinker, à la Adorno. He is an anti-

totality thinker.

Engraving the Savage Michael Gaudio.2008 In 1585, the British painter and explorer John White created images of Carolina Algonquian Indians. These images were collected and engraved in 1590 by the Flemish publisher and printmaker Theodor de Bry and were reproduced widely, establishing the visual prototype of North American Indians for European and Euro-American readers. In this innovative analysis, Michael Gaudio explains how popular engravings of Native American Indians defined the nature of Western civilization by producing an image of its “savage other.” Going beyond the notion of the “savage” as an intellectual and ideological construct, Gaudio examines how the tools, materials, and techniques of copperplate engraving shaped Western responses to indigenous peoples. Engraving the Savage demonstrates that the early visual critics of the engravings attempted-without complete success-to open a comfortable space between their own “civil” image-making practices and the “savage” practices of Native Americans-such as tattooing, bodily ornamentation, picture-writing, and idol worship. The real significance of these ethnographic engravings, he contends, lies in the traces they leave of a struggle to create meaning from the image of the American Indian. The visual culture of engraving and what it shows, Gaudio reasons, is critical to grasping how America was first understood in the European imagination. His interpretations of de Bry’s engravings describe a deeply ambivalent pictorial space in between civil and savage-a space in which these two organizing concepts of Western culture are revealed in their making. Michael Gaudio is assistant professor of art history at the University of Minnesota.

Competing Germanies Robert Kelz. 2020-02-15 Following World War II, German antifascists and nationalists in Buenos Aires believed theater was crucial to their highly politicized efforts at community-building, and each population devoted considerable resources to competing against its rival onstage. *Competing Germanies* tracks the paths of several stage actors from European theaters to Buenos Aires and explores how two of Argentina's most influential immigrant groups, German nationalists and antifascists (Jewish and non-Jewish), clashed on the city's stages. Covered widely in German- and Spanish-language media, theatrical performances articulated strident Nazi, antifascist, and Zionist platforms. Meanwhile, as their thespian representatives grappled onstage for political leverage among emigrants and Argentines, behind the curtain, conflicts simmered within partisan institutions and among theatergoers. Publicly they projected unity, but offstage nationalist, antifascist, and Zionist populations were rife with infighting on issues of political allegiance, cultural identity and, especially, integration with their Argentine hosts. *Competing Germanies* reveals interchange and even mimicry between antifascist and nationalist German cultural institutions. Furthermore, performances at both theaters also fit into contemporary invocations of diasporas, including taboos and postponements of return to the native country, connections among multiple communities, and forms of longing, memory, and (dis)identification. Sharply divergent at first glance, their shared condition as cultural institutions of emigrant populations caused the antifascist Free German Stage and the nationalist German Theater to adopt parallel tactics in community-building, intercultural relationships, and dramatic performance. Its cross-cultural, polyglot blend of German, Jewish, and Latin American studies gives *Competing Germanies* a wide, interdisciplinary academic appeal and offers a novel intervention in Exile studies through the lens of theater, in which both victims of Nazism and its adherents remain in focus.

Hiding from Humanity Martha C. Nussbaum.2009-01-10 Should laws about sex and pornography be based on social conventions about what is disgusting? Should felons be required to display bumper stickers or wear T-shirts that announce their crimes? This powerful and elegantly written book, by one of America's most influential philosophers, presents a critique of the role that shame and disgust play in our individual and social lives and, in particular, in the law. Martha Nussbaum argues that we should be wary of these emotions because they are associated in troubling ways with a desire to hide from our humanity, embodying an unrealistic and sometimes pathological wish to be invulnerable. Nussbaum argues that the thought-content of disgust embodies magical ideas of contamination, and impossible aspirations to purity that are just not in line with human life as we know it. She argues that disgust should never be the basis for criminalizing an act, or play either the aggravating or the mitigating role in criminal law it currently does. She writes that we should be similarly suspicious of what she calls primitive shame, a shame at the very fact of human imperfection, and she is harshly critical of the role that such shame plays in certain punishments. Drawing on an extraordinarily rich variety of philosophical, psychological, and historical references--from Aristotle and Freud to Nazi ideas about purity--and on legal examples as diverse as the trials of Oscar Wilde and the Martha Stewart insider trading case, this is a major work of legal and moral philosophy.

Moving Color Joshua Yumibe.2012-07-17 Color was used in film well before The Wizard of Oz. Thomas Edison, for example, projected two-colored films at his first public screening in New York City on April 23, 1896. These first colors of early cinema were not photographic; they were applied manually through a variety of laborious processes—most commonly by the hand-coloring and stenciling of prints frame by frame, and the tinting and toning of films in vats of chemical dyes. The results were remarkably beautiful. *Moving Color* is the first book-length study of the beginnings of color cinema. Looking backward, Joshua Yumibe traces the legacy of color history from the beginning of the nineteenth century to the cinema of the early twentieth century. Looking forward, he explores the implications of this genealogy on experimental and contemporary digital cinemas in which many colors have become, once again, vividly unhinged from photographic reality. Throughout this history, *Moving Color* revolves around questions pertaining to the sensuousness of color: how color moves us in the cinema—visually, emotionally, and physically.

Humanities Research Centre.2001 *Cook & Omai: The Cult of the South Seas* draws on the Library's collections and the documentary record to explore a fascinating chapter in the history of the Pacific, and European concerns about the nature of humankind and the world as they saw it. Virtual Tibet Orville Schell.2001-05-01 What has made remote, mountainous Tibet and its only real

celebrity, the Dalai Lama, so abidingly fascinating to the West? In *Virtual Tibet*, Orville Schell, one of the preeminent experts on modern China and Tibet, undertakes a strange and wondrous odyssey into our Tibetan fantasies. He recounts the spellbinding adventures of the Western explorers and spiritualists who for centuries were bent on reaching forbidden Tibet and the holy city of Lhasa. Simultaneously, Schell embarks on a parallel present-day journey from Beastie Boys' Free Tibet concerts to a re-creation of Lhasa in the high Argentine Andes -- the extravagant set of *Seven Years in Tibet*, starring Brad Pitt. At once comic and insightful, *Virtual Tibet* takes us beyond the fantasies to the reality of an isolated country that has repeatedly won the West's adoration, and paid the price for believing that our allegiance is profound.

Greek Prepositions Pietro Bortone. 2010-04-22 This is the most comprehensive history of the Greek prepositional system ever published. It is set within a broad typological context and examines interrelated syntactic, morphological, and semantic change over three millennia. By including, for the first time, Medieval and Modern Greek, Dr Bortone is able to show how the changes in meaning of Greek prepositions follow a clear and recurring pattern of immense theoretical interest. The author opens the book by discussing the relevant background issues concerning the function, meaning, and genesis of adpositions and cases. He then traces the development of prepositions and case markers in ancient Greek (Homeric and classical, with insights from Linear B and

reconstructed Indo-European); Hellenistic Greek, which he examines mainly on the basis of Biblical Greek; Medieval Greek, the least studied but most revealing phase; and Modern Greek, in which he also considers the influence of the learned tradition and neighbouring languages. Written in an accessible and non-specialist style, this book will interest classical philologists, as well as historical linguists and theoretical linguists.
