Raman Scattering in Materials Science Willes H. Weber,Roberto Merlin.2013-04-18 Raman scattering is now being applied with increasing success to a wide range of practical problems at the cutting edge of materials science. The purpose of this book is to make Raman spectroscopy understandable to the non-specialist and thus to bring it into the mainstream of routine materials characterization. The book is pedagogical in approach and focuses on technologically important condensed-matter systems in which the specific use of Raman spectroscopy yields new and useful information. Included are chapters on instrumentation, bulk semiconductors and alloys, heterostructures, high-Tc superconductors, catalysts, carbon-based materials, wide-gap and super-hard materials, and polymers.

Handbook of Advanced Plasma Processing Techniques R.J. Shul,S.J. Pearton.2011-06-28

Pattern transfer by dry etching and plasma-enhanced chemical vapor deposition are two of the cornerstone techniques for modern integrated circuit fabrication. The success of these methods has also sparked interest in their application to other techniques, such as surface-micromachined sensors, read/write heads for data storage and magnetic random access memory (MRAM). The extremely complex chemistry and physics of plasmas and their interactions with the exposed surfaces of semiconductors and other materials is often overlooked at the manufacturing stage. In this case, the process is optimized by an informed trial-and-error approach which relies heavily on design-of-experiment techniques and the intuition of the process engineer. The need for regular cleaning of plasma reactors to remove built-up reaction or precursor gas products adds an extra degree of complexity because the interaction of the reactive species in the plasma with the reactor walls can also have a strong effect on the number of these species available for etching or deposition. Since the microelectronics industry depends on having high process yields at each step of the fabrication process, it is imperative that a full understanding of plasma etching and deposition techniques be achieved.

of Science Jaakko Hintikka,D. Gruender,E. Agazzi.2013-04-17 The two volumes to which this is a preface consist of the Proceedings of the Second International Conference on History and Philosophy of Science. The Conference was organized by the Joint Commission of the International Union of History and Philosophy of Science (IUHPS) under the auspices of the IUHPS, the Italian Society for Logic and Philosophy of Science, and the Domus Galilaeana of Pisa, headed by Professor Vincenzo Cappelletti. Domus Galilaeana also served as the host institution, with some help from the University of Pisa. The Conference took place in Pisa, Italy, on September 4-8, 1978. The editors of these two volumes of the Proceedings of the Pisa Conference acknowledge with gratitude the help by the different sponsoring organizations, and in the first place that by both Divisions of the IUHPS, which made the Conference possible. A special recognition is due to Professor Evandro Agazzi, President of the Italian Society for Logic and Philosophy of Science, who was co-opted as an additional member of the Organizing Committee. This committee was otherwise identical with the Joint Commission, whose members were initially John Murdoch, John North, Arpad Szab6, Robert Butts, Jaakko Hintikka, and Vadim Sadovsky. Later, Erwin Hiebert and Lubos Novy were appointed as additional members.

in the ancient Tarachand Empire, eighteen-year-old Kalinda is destined for nothing more than a life of seclusion and prayer. Plagued by fevers, she's an unlikely candidate for even a servant's position, let alone a courtesan or wife. Her sole dream is to continue living in peace in the Sisterhood's mountain temple. But a visit from the tyrant Rajah Tarek disrupts Kalinda's life. Within hours, she is ripped from the comfort of her home, set on a desert trek, and ordered to fight for her place among the rajah's ninety-nine wives and numerous courtesans. Her only solace comes in the company of her guard, the stoic but kind Captain Deven Naik. Faced with the danger of a tournament to the death-- and her growing affection for Deven--Kalinda has only one hope for escape, and it lies in an arcane, forbidden power buried within her.
