Impro Keith Johnstone. 2012-11-12 Keith Johnstone's involvement with the theatre began when George Devine and Tony Richardson, artistic directors of the Royal Court Theatre, commissioned a play from him. This was in 1956. A few years later he was himself Associate Artistic Director, working as a play-reader and director, in particular helping to run the Writers' Group. The improvisatory techniques and exercises evolved there to foster spontaneity and narrative skills were developed further in the actors' studio then in demonstrations to schools and colleges and ultimately in the founding of a company of performers, called The Theatre Machine. Divided into four sections, 'Status', 'Spontaneity', 'Narrative Skills', and 'Masks and Trance', arranged more or less in the order a group might approach them, the book sets out the specific techniques and exercises which Johnstone has himself found most useful and most stimulating. The result is both an ideas book and a fascinating exploration of the nature of spontaneous creativity.

Improvising Theory Allaine Cerwonka, Liisa H. Malkki. 2008-11-15 Scholars have long recognized that ethnographic method is bound up with the construction of theory in ways that are difficult to teach. The reason, Allaine Cerwonka and Liisa H. Malkki argue, is that ethnographic theorization is essentially improvisatory in nature, conducted in real time and in necessarily unpredictable social situations. In a unique account of, and critical reflection on, the process of theoretical improvisation in ethnographic research, they demonstrate how both objects of analysis, and our ways of knowing and explaining them, are created and discovered in the give and take of real life, in all its unpredictability and immediacy. *Improvising Theory* centers on the year-long correspondence between Cerwonka, then a graduate student in political science conducting research in Australia, and her anthropologist mentor, Malkki. Through regular e-mail exchanges, Malkki attempted to teach Cerwonka, then new to the discipline, the basic tools and subtle intuition needed for anthropological fieldwork. The result is a strikingly original dissection of the processual ethics and politics of method in ethnography.

The Pianist's Guide to Historic Improvisation John J. Mortensen.2020-04-02 Keyboard artists in

the time of J.S. Bach were simultaneously performers, composers, and improvisers. By the twentieth century, however, the art of improvisation was all but lost. Today, vanishingly few classically-trained musicians can improvise with fluent, stylistic integrity. Many now question the system of training that leaves players dependent upon the printed page, and would welcome a new approach to musicianship that would enable modern performers to recapture the remarkable creative freedom of a bygone era. *The Pianist's Guide to Historic Improvisation* opens a pathway of musical discovery as the reader learns to improvise with confidence and joy. Useful as either a college-level textbook or a guide for independent study, the book is eminently practical. Author John Mortensen explains even the most complex ideas in a lucid, conversational tone, accompanied by hundreds of musical examples. Mortensen pairs every concept with hands-on exercises for step-by-step practice of each skill. Professional-level virtuosity is not required; players of moderate skill can manage the material. Suitable for professionals, conservatory students, and avid amateurs, *The Pianist's Guide* leads to mastery of improvisational techniques at the Baroque keyboard.

Abrahamic Reflections on Randomness and Providence Kelly James Clark, Jeffrey Koperski. 2021-09-27 This open access book addresses the question of how God can providentially govern apparently ungovernable randomness. However, scientific advances since the 19th century pose serious challenges to traditional views of providence. From Darwinian evolution to quantum mechanics, randomness has become an essential part of the scientific worldview. An interdisciplinary team of Muslim, Christian and Jewish scholars—biologists, physicists, philosophers and theologians—addresses questions of randomness and providence.
