Essays on the Anatomy of Expression in Painting Sir Charles Bell.1806 First edition of Bell's (1774-1842) important study of the anatomy and physiology of facial expression. The expressions, attitudes, and movements of the human body had always interested scientists as well as artists, but never before had they been treated with such depth and conciseness. The work reflects Bell's brilliance as both artist and anatomist, and inspired Darwin's own *Expression of the Emotions* (1872), which he described Bell as one of the founders of the subject as a branch of science. Republic of Tanzania International Monetary Fund. African Dept..2018-01-16 This paper discusses Tanzania's Seventh Review Under the Policy Support Instrument (PSI). Program performance under the PSI has been broadly satisfactory. Most quantitative targets for June and September 2017 were met. Although progress in structural reforms has been mostly slow, efforts have been boosted to advance them. Macroeconomic policies will need to be closely coordinated. After recording a small fiscal surplus in July-September against a programmed deficit, the government is planning to step up budget implementation, particularly in development spending. The monetary policy stance and liquidity forecasting and management will

need to be closely coordinated with fiscal developments. Strong growth and job creation are needed to address high poverty and a large underemployed youth population.

Epidemiologic Methods for the Study of Infectious Diseases James C. Thomas,David J. Weber.2001-03-22 This is the first comprehensive text on the methodological issues in epidemiologic research on infectious diseases. It will be an invaluable resource both to students of epidemiology and to established researchers. The authors address such questions as: What needs to be considered when enrolling participants in a study of sexually transmitted diseases? What are common sources of measurement error in population-based studies of respiratory infections? What are some sources of existing data for epidemiologic studies of infectious diseases? Answers to these and many other related questions can be found in this well-organized, comprehensive and authoritative volume - the first to thoroughly address the methodologic issues in conducting epidemiologic research on infectious diseases. The book will be an ideal complement to texts on general epidemiology and infectious disease. An introductory section will make it accessible to a wide variety of disciplines by providing an overview of topics that are foundational to understanding infectious disease epidemiology, such as the immunology of infections, the biology of infectious diseases, and concepts of causation, transmission, and dynamics. The rest of the book is structured around sections on data sources and measurement; methods by transmission type; outbreak investigation and evaluation research; and special topics such as HIV/AIDS research, infections in the elderly, and research collaborations in developing countries.

Social Gains from Female Education K. Subbarao,Laura Raney.1993-01-01 This paper on the social gains from female education is part of a series, prepared by the World Bank, on the benefits of improving opportunities for women. The paper suggests that expanding women's opportunities enhances their productivity and earning potential and thus contributes to better economic performance and poverty alleviation. Education raises the productivity and earnings of both men and women. Over time female education also contributes to slower population growth and healthier families. The Bank believes that in efforts to expand women's opportunities, priority should be given to education through the secondary level, reproductive health, agriculture, private entrepreneurship, and the wage labor force. This paper is concerned with the estimation of these social gains from female education at the secondary level. The paper examines the role of female education, measured by gross enrollment rates at the secondary level, relative to, and or in combination with, some health and family planning services that influence fertility and infant mortality. It uses reduced form estimation of the total fertility rate and infant mortality rate. The paper presents cross country regressions based on data drawn from 72 developing countries. The analysis in this paper generally shows that female secondary education, family planning, and health programs all affect fertility and mortality, and the effect of female secondary education appears to be very strong. Results suggest that family planning will reduce fertility more when combined with female education, especially in countries that now have low female secondary enrollment levels. (DK).

Crossbones Nuruddin Farah.2011-09-01 A gripping new novel from today's most important African novelist. (The New York Times Review of Books), the internationally acclaimed author of North of Dawn A dozen years after his last visit, Jeebleh returns to his beloved Mogadiscio to see old friends. He is accompanied by his son-in-law, Malik, a journalist intent on covering the region's ongoing turmoil. What greets them at first is not the chaos Jeebleh remembers, however, but an eerie calm enforced by ubiquitous white-robed figures bearing whips. Meanwhile, Malik's brother, Ahl, has arrived in Puntland, the region notorious as a pirates' base. Ahl is searching for his stepson, Taxliil, who has vanished from Minneapolis, apparently recruited by an imam allied to Somalia's rising religious insurgency. The brothers' efforts draw them closer to Taxliil and deeper into the fabric of the country, even as Somalis brace themselves for an Ethiopian invasion. Jeebleh leaves Mogadiscio only a few hours before the borders are breached and raids descend from land and sea. As the uneasy quiet shatters and the city turns into a battle zone, the brothers experience firsthand the derailments of war. Completing the trilogy that began with Links and Knots, Crossbones is a fascinating look at individuals caught in the maw of zealotry, profiteering, and political conflict, by one of our most highly acclaimed international writers.

West African Agriculture and Climate Change Abdulai Jalloh, Gerald C. Nelson, Timothy S. Thomas, Robert Bellarmin Zougmore, Harold Roy-Macauley. 2013-01-01 The first of three books in IFPRI's climate change in Africa series, *West African Agriculture and Climate Change: A Comprehensive Analysis* examines the food security threats facing 11 of the countries that make up West Africa -- Benin, Burkina Faso, Côte d'Ivoire, Ghana, Guinea, Liberia, Niger, Nigeria, Senegal, Sierra Leone, and Togo -- and explores how climate change will increase the efforts needed to achieve sustainable food security throughout the region. West Africa's population is expected to grow at least through mid-century. The region will also see income growth. Both will put increased pressure on the natural resources needed to produce food, and climate change makes the challenges greater. West Africa is already experiencing rising temperatures, shifting precipitation patterns, and increasing extreme events. Without attention to adaptation, the poor will suffer. Through the use of hundreds of scenario maps, models, figures, and detailed analysis, the editors and contributors of *West African Agriculture and Climate Change* present plausible future scenarios that combine economic and biophysical characteristics to explore the possible consequences for agriculture, food security, and resources management to 2050. They also offer recommendations to national governments and regional economic agencies already dealing with the vulnerabilities of climate change and deviations in environment. Decisionmakers and researchers will find *West African Agriculture and Climate Change* a vital tool for shaping policy and studying the various and likely consequences of climate change.
