ICT Innovations for Sustainability Lorenz M. Hilty,Bernard Aebischer.2014-08-06 ICT Innovations for Sustainability is an investigation of how information and communication technology can contribute to sustainable development. It presents clear definitions of sustainability, suggesting conceptual frameworks for the positive and negative effects of ICT on sustainable development. It reviews methods of assessing the direct and indirect impact of ICT systems on energy and materials demand, and examines the results of such assessments. In addition, it investigates ICT-based approaches to supporting sustainable patterns of production and consumption, analyzing them at various levels of abstraction - from end-user devices, Internet infrastructure, user behavior, and social practices to macro-economic indicators. Combining approaches from Computer Science, Information Systems, Human-Computer Interaction, Economics, and Environmental Sciences, the book presents a new, holistic perspective on ICT for Sustainability (ICT4S). It is an indispensable resource for anyone working in the area of ICT for Energy Efficiency, Life Cycle Assessment of ICT, Green IT, Green Information Systems, Environmental Informatics, Energy Informatics, Sustainable HCI, or Computational Sustainability.

Multi-Carrier Spread-Spectrum Khaled Fazel,Stefan Kaiser.2006-02-23 The benefits and success of multi-carrier (MC) modulation on one side and the flexibility offered by the spread spectrum (SS) technique on the other side have motivated many researchers to investigate the combination of both techniques since 1993. This combination known as multi-carrier spread spectrum (MC-SS) benefits from the advantages of both systems and offers high flexibility, high spectral efficiency, simple detection strategies, narrow-band interference rejection capability, etc. The basic principle of this combination is straightforward: The spreading is performed as direct sequence spread spectrum (DS-SS) but instead of transmitting the chips over a single carrier, several sub-carriers are employed. The MC modulation and demodulation can easily be realized in the digital domain by performing IFFT and FFT operations. The separation of the users' signals can be performed in the code domain. MC-SS systems can perform the spreading in frequency direction, which allows for simple signal detection strategies. Since 1993, MC-SS has been deeply studied and new alternative solutions have been proposed. Meanwhile, deep system analysis and comparison with DS-CDMA have been performed that show the superiority of MC-CDMA. The aim of Multi-Carrier Spread-Spectrum is to edit the ensemble of the newest contributions and research results in this new field that have been presented during the 5th International Workshop on Multi-Carrier Spread-Spectrum (MC-SS 2005), held in Oberpfaffenhofen, Germany.

Truce of God Rowan Williams.2005-04-11 In this powerful meditation, Williams probes words such as reconciliation to reveal the profound realism of the concepts of peace and violence as understood in the Bible and in latter Christian tradition.

Marie H. Rider Haggard.2015-10-19 Although in my old age I, Allan Quatermain, have taken to writing--after a fashion--never yet have I set down a single word of the tale of my first love and of the adventures that are grouped around her beautiful and tragic history. I suppose this is because it has always seemed to me too holy and far-off a matter--as holy and far-off as is that heaven which holds the splendid spirit of Marie Marais. But now, in my age, that which was far-off draws near again; and at night, in the depths between the stars, sometimes I seem to see the opening doors through which I must pass, and leaning earthwards across their threshold, with outstretched arms and dark and dewy eyes, a shadow long forgotten by all save me--the shadow of Marie Marais. An old man's dream, doubtless, no more. Still, I will try to set down that history which ended in so great a sacrifice, and one so worthy of record, though I hope that no human eye will read it until I also am forgotten, or, at any rate, have grown dim in the gathering mists of oblivion. And I am glad that I have waited to make this attempt, for it seems to me that only of late have I come to understand and appreciate at its true value the character of her of whom I tell, and the passionate affection which was her bounteous offering to one so utterly unworthy as myself. What have I done, I wonder, that to me should have been decreed the love of two such women as Marie and that of Stella, also now long dead, to whom alone in the world I told all her tale? I remember I feared lest she should take it ill, but this was not so. Indeed, during our brief married days, she thought and talked much of Marie, and some of her last words to me were that she was going to seek her, and that they would wait for me together in the land of love, pure and immortal....
