TCP/IP Sockets in Java Kenneth L. Calvert, Michael J. Donahoo. 2011-08-29 The networking capabilities of the Java platform have been extended considerably since the first edition of the book. This new edition covers version 1.5-1.7, the most current iterations, as well as making the following improvements: The API (application programming interface) reference sections in each chapter, which describe the relevant parts of each class, have been replaced with (i) a summary section that lists the classes and methods used in the code, and (ii) a gotchas section that mentions nonobvious or poorly-documented aspects of the objects. In addition, the book covers several new classes and capabilities introduced in the last few revisions of the Java platform. New abstractions to be covered include `NetworkInterface`, `InterfaceAddress`, `Inet4/6Address`, `SocketAddress/InetSocketAddress`, `Executor`, and others; extended access to low-level network information; support for IPv6; more complete access to socket options; and scalable I/O. The example code is also modified to take advantage of new language features such as annotations, enumerations, as well as generics and implicit iterators where appropriate. Most Internet applications use sockets to implement network communication protocols. This book's focused, tutorial-based approach helps the reader master the tasks and techniques essential to virtually all client-server projects using sockets in Java. Chapter 1 provides a general overview of networking concepts to allow readers to synchronize the concepts with terminology. Chapter 2 introduces the mechanics of simple clients and servers. Chapter 3 covers basic message construction and parsing. Chapter 4 then deals with techniques used to build more robust clients and servers. Chapter 5 (NEW) introduces the scalable interface facilities which were introduced in Java 1.5, including the buffer and channel abstractions. Chapter 6 discusses the relationship between the programming constructs and the underlying protocol implementations in more detail. Programming concepts are introduced through simple program examples accompanied by line-by-line code commentary that describes the purpose of every part of the program. No other resource presents so concisely or so effectively the material necessary to get up and running with Java sockets programming. Focused, tutorial-based instruction in key sockets programming techniques allows reader to quickly come up to speed on Java applications. Concise and up-to-date coverage of the most recent platform (1.7) for Java applications in networking technology.

Developing a Keyword Extractor and Document Classifier: Emerging Research and Opportunities Paul, Dimple Valayil.2021-01-08 The main problems that prevent fast and high-quality document processing in electronic document management systems are insufficient and unstructured information, information redundancy, and the presence of large amounts of undesirable user information. The human factor has a significant impact on the efficiency of document search. An average user is not aware of the advanced option of a query language and uses typical queries.

Development of a specialized software toolkit intended for information systems and electronic document management systems can be an effective solution of the tasks listed above. Such toolkits should be based on the means and methods of automatic keyword extraction and text classification. The categorization (or classification) of texts into predefined categories has witnessed a booming interest in the last 10 years due to the increased availability of documents in digital form and the ensuing need to organize them. Thus, research on keyword extraction, advancements in the field, and possible future solutions is of great importance in current times. Developing a Keyword Extractor and Document Classifier: Emerging Research and Opportunities presents an information extraction mechanism that can process many kinds of inputs, realize the type of text, and understand the percentage of the keywords that has to be stored. This mechanism then supports information extraction and information categorization mechanisms. This module is used to support a text summarization mechanism, which leads—with the help of the keyword extraction module—to text categorization. It employs lexical and information retrieval techniques to extract phrases from the document text that are likely to characterize it and determines the category of the retrieved text to present a summary to the users. This book is ideal for practitioners, stakeholders, researchers, academicians, and students who are interested in the development of a new keyword extractor and document classifier method.

Mountains Painted with Turmeric Lila Bahādura Kshatrī.2008 Since its publication in the late 1950s, Mountains Painted with Turmeric has struck a chord in the hearts of hundreds of thousands of Nepali readers. Set in the hills of far eastern Nepal, the novel offers readers a window into the lives of the people by depicting in subtle detail the stark realities of village life. Carefully translated from the original text, Mountains Painted with Turmeric tells the story of a peasant farmer named Dhané (which means, ironically, wealthy one) who is struggling to provide for his wife and son and arrange the marriage of his beautiful younger sister. Unable to keep up with the financial demands of the big men who control his village, Dhané and his family suffer one calamity after another, and a series of quarrels with fellow villagers forces them into exile. In haunting prose, Lil Bahadur Chettri portrays the dukha, or suffering and sorrow, endured by ordinary peasants; the exploitation of the poor by the rich and powerful; and the social conservatism that twists a community into punishing a woman for being the victim of a crime. Chettri describes the impoverishment, dispossession, and banishment of Dhané's family to expose profound divisions between those who prosper and those who are slowly stripped of their meager possessions. Yet he also conveys the warmth and intimacy of village society, from which Dhané and his family are ultimately excluded.
