The NGBS also includes green practices for land development projects as well as assisted living facilities, residential board, and care facilities, and group homes. The NGBS includes high-performance building practices in six areas: Lot Design and Development, Resource Efficiency, Water Efficiency, Energy Efficiency, Indoor Environmental Quality, and Building Operation & Maintenance. The NGBS has four primary certification levels-- Bronze, Silver, Gold and Emerald, providing residential building professionals options to integrate sustainability and high-performance into their project at a level most appropriate for their business model, customer base and local housing market. A new compliance path (Certified) customized for single-family and townhome dwellings is added in the 2020 Edition. The NGBS also offers a compliance path for residential and mixed-use communities with four levels of land development practices, ranging from One-Star through Four-Star. The NGBS continues to provide architects, builders, and developers the flexibility needed to design and construct homes and mixed-use buildings that are

Inspector Skills Stephen A. Van Note.2014 Inspector Skills is the first text to focus on the “other” skills that are essential for success as a construction inspector. These “soft skills” are the non-

technical traits and behaviors that enhance an inspector's ability to interact with others and to successfully carry out his or her job duties. Inspector Skills aims to raise awareness of the importance of soft skills and to provide guidance toward recognizing and improving those skills. When coupled with the technical knowledge of codes and construction practices, developing effective soft skills elicits cooperation, generates respect and credibility, and improves the image of inspectors and code safety departments. Inspector Skills was written for construction inspectors in all disciplines and will also benefit students, permit technicians, plan reviewers and building officials. --Publisher's description.
