The Handbook of Behavior Change Martin S. Hagger, Linda D. Cameron, Kyra Hamilton, Nelli Hankonen, Taru Lintunen. 2020-07-15 Social problems in many domains, including health, education, social relationships, and the workplace, have their origins in human behavior. The documented links between behavior and social problems have compelled governments and organizations to prioritize and mobilize efforts to develop effective, evidence-based means to promote adaptive behavior change. In recognition of this impetus, *The Handbook of Behavior Change* provides comprehensive coverage of contemporary theory, research, and practice on behavior change. It summarizes current evidence-based approaches to behavior change in chapters authored by leading theorists, researchers, and practitioners from multiple disciplines, including psychology, sociology, behavioral science, economics, philosophy, and implementation science. It is the go-to resource for researchers, students, practitioners, and policy makers looking for current knowledge on behavior change and guidance on how to develop effective interventions to change behavior.

Living Standards in Southeast Asia Anne Booth. 2019 *Living Standards in Southeast Asia: Changes over the Long Twentieth Century, 1900-2015* examines changes in living standards across the ten countries of Southeast Asia (Indonesia, Malaysia, Singapore, Philippines, Thailand, Brunei,

Myanmar, Vietnam, Cambodia and Laos) from the early years of the 20th century to the early 21st century. It covers both the last decades of the colonial period, the transition to independence and the decades from 1960 to the 2010s. The study uses a range of monetary and non-monetary indicators to assess how living standards have changed over time. It examines the outcomes in the context of debates about economic growth, inequality and poverty alleviation which began in the 1960s and 1970s, and continue to the present.

An Anglo-Norman Reader Jane Bliss.2018-02-08 This book is an anthology with a difference. It presents a distinctive variety of Anglo-Norman works, beginning in the twelfth century and ending in the nineteenth, covering a broad range of genres and writers, introduced in a lively and thought-provoking way. Facing-page translations, into accessible and engaging modern English, are provided throughout, bringing these texts to life for a contemporary audience. The collection offers a selection of fascinating passages, and whole texts, many of which are not anthologised or translated anywhere else. It explores little-known byways of Arthurian legend and stories of real-life crime and punishment; women's voices tell history, write letters, berate pagans; advice is offered on how to win friends and influence people, how to cure people's ailments and how to keep clear of the law; and stories from the Bible are retold with commentary, together with guidance on prayer and confession. Each text is introduced and elucidated with notes and full references, and the material is divided into three main sections: Story (a variety of narrative forms), Miscellany (including letters,

law and medicine, and other non-fiction), and Religious (saints' lives, sermons, Bible commentary, and prayers). Passages in one genre have been chosen so as to reflect themes or stories that appear in another, so that the book can be enjoyed as a collection or used as a resource to dip into for selected texts. This anthology is essential reading for students and scholars of Anglo-Norman and medieval literature and culture. Wide-ranging and fully referenced, it can be used as a springboard for further study or relished in its own right by readers interested to discover Anglo-Norman literature that was written to amuse, instruct, entertain, or admonish medieval audiences.

A Companion to Familia Romana Jeanne Neumann,Hans H. Ørberg.2016-06-01 This volume is the completely reset Second Edition of Jeanne Marie Neumann's A College Companion (Focus, 2008). It offers a running exposition, in English, of the Latin grammar covered in Hans H. Ørberg's Familia Romana, and includes the complete text of the Ørberg ancillaries Grammatica Latina and Latin-English Vocabulary. It also serves as a substitute for Ørberg's Latine Disco, on which it is based. As it includes no exercises, however, it is not a substitute for the Ørberg ancillary Exercitia Latina I. Though designed especially for those approaching Familia Romana at an accelerated pace, this volume will be useful to anyone seeking an explicit layout of Familia Romana's inductively-presented grammar. In addition to many revisions of the text, the Second Edition also includes new units on cultural context, tied to the narrative content of the chapter.

Hit and Run Nancy Griffin,Kim Masters.2016-01-12 Hit and Run tells the improbable and often hilarious story of how two Hollywood film packagers went on a campaign to reinvent themselves as

studio executives -- at Sony's expense. Veteran reporters Nancy Griffin and Kim Masters chronicle the rise of Jon Peters, a former hairdresser, seventh-grade dropout, and juvenile delinquent, and his soulless soul mate, Peter Guber -- and all the sex, drugs, and fistfights along the way. It is the story of the ultimate Hollywood con job and the standard by which every subsequent business blunder has been measured. Hit and Run delivers rock-solid business reporting liberally laced with inside gossip and outrageous scandal -- plus a new afterword bringing us up to date on the latest fallout from the Guber-Peters legacy.

Preaching about Racism Carolyn B. Helsel.2018-12-04 Equipping pastors to address racism faithfully from the pulpit. Of all the activities that come with being a minister, sermon preparation can loom largest - especially when racism is the subject. You've got to address racism with your white congregation from the pulpit. But, truthfully, you can't wrap your head around how to preach about this topic thoughtfully and sensitively. In Preaching about Racism, preaching professor and pastor Carolyn Helsel speaks directly to other faith leaders about how to address racism from the pulpit. In her first book, Anxious to Talk about It: Helping White Christians Talk Faithfully about Racism, Helsel addressed the anxiety white Christians experience around conversations about race. In this follow-up, Helsel provides strategies and a theoretical framework for crafting biblical and theological sermons that incorporate insights from social sciences and psychology, gleaned from more than a decade of writing and teaching about racism. Written for the busy pastor, several chapters are quick reads - helpful reminders as you prepare a thoughtful and sensitive sermon - while others dig deeper on the theory behind the crucial work of dismantling racism.

Gladstone Centenary Essays David Bebbington,Roger Swift.2000-03-01 W. E. Gladstone towers over the politics of the nineteenth century. He is known for his policies of financial rectitude, his

campaigns to settle the Irish question and his championship of the rights of small nations. He remains the only British Prime Minister to have served for four separate terms. In 1998 an international conference at Chester College brought together Gladstone scholars to mark the centenary of his death, and many of the papers presented on that occasion are published in this volume. Covering the whole of the statesman's long political life from the first Reform Act to the last decade of the nineteenth century, they range over topics as diverse as parliamentary reform and free trade, Gladstone's English Nonconformist supporters and his Irish Unionist opponents. A select bibliography, arranged by subject, supplies guidance for further research. The collection forms a tribute, appreciative but critical, to the Grand Old Man of British politics.

Making Citizen-Soldiers Michael S. Neiberg.2001-09-01 This book examines the Reserve Officers Training Corps program as a distinctively American expression of the social, cultural, and political meanings of military service. Since 1950, ROTC has produced nearly two out of three American active duty officers, yet there has been no comprehensive scholarly look at civilian officer education programs in nearly forty years. While most modern military systems educate and train junior officers at insular academies like West Point, only the United States has relied heavily on the active cooperation of its civilian colleges. Michael Neiberg argues that the creation of officer education programs on civilian campuses emanates from a traditional American belief (which he traces to the colonial period) in the active participation of civilians in military affairs. Although this ideology changed shape through the twentieth century, it never disappeared. During the Cold War military buildup, ROTC came to fill two roles: it provided the military with large numbers of well-educated officers, and it provided the nation with a military comprised of citizen-soldiers. Even during the Vietnam era, officers, university administrators, and most students understood ROTC's dual role. The Vietnam War thus led to reform, not abandonment, of ROTC. Mining diverse sources, including military and university archives, *Making Citizen-Soldiers* provides an in-depth look at an important, but often overlooked, connection between the civilian and military spheres.

Toward a Global Autonomous University Edu-factory Collective.2009 What was once the factory is now the university. We started off with this apparently straightforward affirmation, not in order to assume it but to question it; to open it, radically rethinking it, towards theoretical and political research. University corporatization and the rise of a global university are not unilateral impositions or developments completely contained by capitalist rationality. Rather they are the result--absolutely temporary and thus reversible--of a formidable cycle of struggles. The problem is to transform the

field of tension delineated by the processes analyzed in this book into specific forms of resistance and the organization of escape routes. This is Edu-factory's starting point and objective, its style and its method.

La Pièce et le geste Liliane Hilaire-Pérez.2013-11-13 Qu'on l'admire ou qu'on la critique, il semblait entendu que la Révolution industrielle anglaise avait été avant tout une histoire de capital financier, de machines à vapeur et de travailleurs déqualifiés et sous-payés. C'est oublier ceux qui l'ont rendue possible, par leurs talents manuels, leur imagination et leur dynamisme : les techniciens. Pour décrire concrètement ce que fut l'industrialisation, Liliane Hilaire-Pérez nous propose de l'observer là où elle se manifesta en premier lieu comme innovation. En plein essor en Europe au cours du XVIIIe siècle, le marché des bibelots, jouets, instruments scientifiques, outils de précision, est le plus concurrentiel de tous, et le plus innovant. C'est dans les ateliers des mécaniciens venus de tout le continent que se créent alors les matériaux, les machines et les procédés de l'industrie à venir et que se forment ceux qui sauront construire, régler et diriger les machines installées dans les usines. En mettant en scène les talents manuels des techniciens et entrepreneurs, en décrivant le travail qu'ils accomplissent sur les matières, les gestes, les langages et les images, ce livre renouvelle notre connaissance de l'événement fondateur de notre histoire économique. Il contribue par là-même au débat en cours sur l'avenir industriel de l'Europe.

Oer Andrew Wesolek,Anne Langley,Jonathan Lashley.2018-10 For many of us, the drive to affect positive change--however vague or idiosyncratic our sense of this might be--has guided our work in higher education. We champion the pursuit of a college degree because few endeavors can match it in terms of advancing a person's economic mobility (Chetty, Friedman, Saez, Turner, and Yagan; 2017). Despite recent debates about the value of a college degree (Pew Research Center, 2017), the opportunities and financial stability awarded to those with college degrees remain apparent when they are compared to peers who have only graduated high school (Pew Research Center, 2014). And while more Americans have a college degree than ever before (Ryan and Bauman, 2016), access to a formal, post-secondary education continues to be elusive for some. Indeed, over the last ten years, analysts have projected that the cost of attending college would keep 2.4 million low-to-moderate income, college-qualified high school graduates from completing a college degree (Advisory Committee on Student Financial Assistance, 2006). During that same period, college students in the United States saw expenses related to tuition and fees increase by 63 percent, school housing costs (excluding board) increase by 51 percent, textbook prices increase by 88 percent (Bureau of Labor, 2016). Because few students can afford a college education by salary alone, 44.2 million Americans have sought financial aid via student loans. As a result, total student loan debt is now topping \$1.45 trillion in the United States (Board of Governors of the Federal Reserve System, 2017), and student loan delinquency rates are averaging 11.2 percent (Federal Reserve Bank of New York, 2017). The burden of a student's financial decisions extends beyond the mere individual: society will inevitably

carry the weight of this debt for years to come.

Mystics and Zen Masters Thomas Merton.1999-11-29 Thomas Merton was recognized as one of those rare Western minds that are entirely at home with the Zen experience. In this collection, he discusses diverse religious concepts-early monasticism, Russian Orthodox spirituality, the Shakers, and Zen Buddhism-with characteristic Western directness. Merton not only studied these religions from the outside but grasped them by empathy and living participation from within. All these studies, wrote Merton, are united by one central concern: to understand various ways in which men of different traditions have conceived the meaning and method of the 'way' which leads to the highest levels of religious or of metaphysical awareness.

The Making of the English Working Class E. P. Thompson.2016-03-15 A history of the common people and the Industrial Revolution: "A true masterpiece" and one of the Modern Library's 100 Best Nonfiction Books of the twentieth century (Tribune). During the formative years of the Industrial Revolution, English workers and artisans claimed a place in society that would shape the following centuries. But the capitalist elite did not form the working class—the workers shaped their own creations, developing a shared identity in the process. Despite their lack of power and the indignity forced upon them by the upper classes, the working class emerged as England's greatest cultural and political force. Crucial to contemporary trends in all aspects of society, at the turn of the nineteenth century, these workers united into the class that we recognize all across the Western world today. E. P. Thompson's magnum opus, *The Making of the English Working Class* defined early twentieth-century English social and economic history, leading many to consider him Britain's greatest postwar historian. Its publication in 1963 was highly controversial in academia, but the work has become a seminal text on the history of the working class. It remains incredibly relevant to the social and economic issues of current times, with the Guardian saying upon the book's fiftieth anniversary that it "continues to delight and inspire new readers."

Lerner.2012-12-06 Service learning, as defined by the editors, is the generation of knowledge that is of benefit to the community as a whole. This seventh volume in the Outreach Scholarship book series contributes a unique discussion of how service learning functions as a critical cornerstone of outreach scholarship. The sections and chapters of this book marshal evidence in support of the idea that undergraduate service learning, infused throughout the curriculum and coupled with outreach scholarship, is an integral means through which higher education can engage people and institutions of the communities of this nation in a manner that perpetuate civil society. The editors, through this series of models of service learning, make a powerful argument for the necessity of engaged institutions.
