Buttress's World Guide to Abbreviations of Organizations L. Pitman.2012-12-06 The previous edition of this directory extended its coverage of the Far East, Australasia and Latin America, areas previously under-represented. For this new edition emphasis has been given to increasing the number of entries for organizations from Britain, the United States and Australia, and particular attention has been paid to new political organizations in Central and Eastern Europe and the former Soviet Union. The number of entries included has gone up to over 68,000 of which over 9,000 are new or amended. Cross-references from defunct organizations in the previous edition have been deleted, and references (indicated by ex and now) added for organizations which have changed their name since the previous edition. As before, the range of organizations included is broad and only purely local organizations have been excluded. This directory therefore lists official and unofficial organizations, national and international, on all SSubjects: political, economic and social. Acronyms

of parent bodies of subsidiary organizations are given where appropriate and equivalencies are used to link acronyms in different languages for the same organization. Further information about the organizations listed can be found in the sources listed in the bibliography. I would like to thank Henry Heaney and Graeme Mackintosh for their advice, and David Grinyer for his technical support.

Global Health John J. Kirton. 2017-05-15 In recent years, especially since the end of the cold war, the field of global health has become increasingly linked with and central to the more traditional concerns of international relations. The spread of communicable diseases, the challenge of migrating health workers and the development of new technologies and medicines have all contributed to the ever-expanding issue of global health. International organizations such as the World Health Organization, the utilization of techniques such as the creation of the framework convention on tobacco control and the development of civil society organizations such as the Gates Foundation, have all changed the face and framework of global health. Among the many benefits to the expanding interdisciplinary study of health is the possibility of preventing millions of unnecessary deaths occurring every year. By assembling from a wide array of disciplines and fields the central works that define the field in international relations today, this innovative work explores the future of global health and the possible benefits of expanding the interdisciplinary path even further.
