Expanding the Lexicon Sabine Arndt-Lappe,Angelika Braun,Claudine Moulin,Esme Winter-Froemel.2018-01-22 The creation of new lexical units and patterns has been studied in different research frameworks, focusing on either system-internal or system-external aspects, from which no comprehensive view has emerged. The volume aims to fill this gap by studying dynamic processes in the lexicon - understood in a wide sense as not being necessarily limited to the word level - by bringing together approaches directed to morphological productivity as well as approaches analyzing general types of lexical innovation and the role of discourse-related factors. The papers deal with ongoing changes as well as with historical processes of change in different languages and reflect on patterns and specific subtypes of lexical innovation as well as on their external conditions and the speakers' motivations for innovating. Moreover, the diffusion and conventionalization of innovations will be addressed. In this way, the volume contributes to understanding the complex interplay of structural, cognitive and functional factors in the lexicon as a highly dynamic domain.

*The Benefits of Learning* Tom Schuller,John Preston,Cathie Hammond,Angela Brassett-Grundy,John Bynner.2004-02-26 How do education and learning really impact on people's lives? The Benefits of Learning is a detailed, systematic and vivid account of the impact of formal and informal education on people's lives. Based on extended interviews with adults of all ages, it shows how learning affects their health, family lives and participation in civic life, revealing the downsides of education as well as the benefits. At a time when education is in danger of being narrowly regarded as an instrument of economic growth, this study covers: \* the interaction between learning and people's physical and psychological well-being \* the way learning impacts on family life and communication between generations \* the effect on people's ability and motivation to take part in civic and community life. Packed with detail from adults' own accounts of their lives, the book reveals how learning enables people to sustain themselves and their communities in the face of daily stresses and strains, as well as sometimes transforming their lives. The book opens up new

avenues for debate. It is a valuable resource for education researchers and of particular interest to education policy makers, adult education practitioners, health educators and postgraduate students in education.

Volume 5: Innovation in underground engineering, materials and equipment - Part 1 contains the contributions presented in the eponymous Technical Session during the World Tunnel Congress 2019 (Naples, Italy, 3-9 May 2019). The use of underground space is continuing to grow, due to global urbanization, public demand for efficient transportation, and energy saving, production and distribution. The growing need for space at ground level, along with its continuous value increase and the challenges of energy saving and achieving sustainable development objectives, demand greater and better use of the underground space to ensure that it supports sustainable, resilient and more liveable cities. The contributions cover a wide range of topics, from artificial intelligence techniques for geomechanical forecasting, via fiber reinforced concrete segmental lining, to advanced 4-channel scan systems for tunnel inspection. The book is a valuable reference text for tunnelling specialists, owners, engineers, archaeologists, architects, artists and others involved in underground planning, design and building around the world, and for academics who are interested in underground constructions and geotechnics.
