What Doctors Feel Danielle Ofri.2013-06-04 A look at the emotional side of medicine—the shame, fear, anger, anxiety, empathy, and even love that affect patient care Physicians are assumed to be objective, rational beings, easily able to detach as they guide patients and families through some of life's most challenging moments. But doctors' emotional responses to the life-and-death dramas of everyday practice have a profound impact on medical care. And while much has been written about the minds and methods of the medical professionals who save our lives, precious little has been said about their emotions. In *What Doctors Feel*, Dr. Danielle Ofri has taken on the task of dissecting the hidden emotional responses of doctors, and how these directly influence patients. How do the stresses of medical life—from paperwork to grueling hours to lawsuits to facing death—affect the medical care that doctors can offer their patients? Digging deep into the lives of doctors, Ofri examines the daunting range of emotions—shame, anger, empathy, frustration, hope, pride, occasionally despair, and sometimes even love—that permeate the contemporary doctor-patient connection. Drawing on scientific studies, including some surprising research, Dr. Danielle Ofri offers up an unflinching look at the impact of emotions on health care. With her renowned eye for dramatic detail, Dr. Ofri takes us into the swirling heart of patient care, telling stories of caregivers caught up and occasionally torn down by the whirlwind life of doctoring. She admits to the humiliation of an error that nearly killed one of her patients and her forever fear of making another. She mourns when a beloved patient is denied a heart transplant. She tells the riveting stories of an intern traumatized when she is forced to let a newborn die in her arms, and of a doctor whose daily glass of wine to handle the frustrations of the ER escalates into a destructive addiction. But doctors don't only feel fear, grief, and frustration. Ofri also reveals that doctors tell bad jokes about "toxic sock syndrome," cope through gallows humor, find hope in impossible situations, and surrender to ecstatic happiness when they triumph over illness. The stories here reveal the undeniable truth that emotions have a distinct effect on how doctors care for their patients. For both clinicians and patients, understanding what doctors feel can make all the difference in giving and getting the best medical care.

How Do I Feel? Rebekah Lipp.2023-05-18 (PAPERBACK VERSION) Finalist in the New Zealand Children & Young Adults Books Awards 2022 Storylines Notable Books 2021 - Non-Fiction Winner #1 NZ Bestseller With 60+ definitions to help improve emotional literacy, How Do I Feel?, is all about helping our children learn to recognise and label emotions and feelings. Join Aroha and her friends as they share how different emotions might feel in the body and how each emotion might be helpful. This emotions dictionary is all about helping children find the words for how they truly feel. Learning to recognise and label our emotions correctly is such an important skill for life. Giving our children this language helps to build emotional literacy. It is a gift to give children the tools to know how to recognise what they truly feel and that it is okay to feel all emotions. When they know that no emotion is 'good' or 'bad' and that all emotions provide messages, then it takes away any attachment

to that emotion being part of who they are. We may have experienced this ourselves being labelled 'naughty' or 'out of control' due to feeling angry a lot. However, this behaviour is just a way for a child to communicate. Diving deeper into why they are acting that way, why they may be feeling the things they are, can help us find some answers with our child. It can also help us find ways to help them empower themselves with tools to feel better. Use this book to start conversations about different emotions. If you can, give examples of things you have experienced. When you see a child experiencing an emotion, help your child label it. Are you feeling ... right now? This book can be used with children from 5 years of age up to 100+ as everyone might get something from the book. There are over 200 emotions and so we couldn't include them all in just one book, however, this book is the most extensive book about emotions for children. Paperback - full colour Pages - 142 Size - 216mm x 280mm (Landscape) Recommended Age - 5 years - 100 years+

I Want To Tell You How I Feel Ron Johnson, Deb Brock.2020-09-18 In their book, *I Want to Tell You How I Feel*, husband and wife psychologists, Deb Brock and Ron Johnson, provide a paradigm for understanding what may be the most important element of human psychology. They suggest that people's feelings can be understood, valued, and utilized in order to enliven them personally and enhance them interpersonally to such a degree that they can find true contentment, meaning, and satisfaction in life. They have dared to unpack the murky waters of feelings with precision without falling prey to simplistic ideas of feelings nor complex neurological assessment of feelings. The authors propose that if people grasp how they feel, they will subsequently grasp how other people feel, and in this interchange of feelings, they will profoundly enhance communication and ultimately relationships. Johnson and Brock propose a unique paradigm for understanding feelings by first suggesting that feelings, while undefined, are the most basic experience and expression of one's core self, sometimes called soul or spirit. The authors immediately admit to the undefined nature of such words as feelings, core self, soul, or spirit but note that such elements of humanity can be understood and utilized just as the equally undefined words love, time, and distance are undefined. While undefined, feelings can be observed in their experience and expression which comes sequentially physically, emotionally, cognitively, and actively. Thus, an important concept that Johnson and Brock propose is that emotion is the second experience one has when experiencing or expressing feelings but not the entirety of one's feelings, and for many people not the most important. They suggest that some people are inclined to express or experience their feelings emotionally while others may be more inclined to physical manifestations, cognition, or activity in experience and expression of feelings. The authors suggest a commensurate four-part paradigm of personality temperament that often reflects one's preference for experiencing and expressing feelings. They further delineate the four basic emotions suggesting that are love-based emotions of joy and sadness and two defense-based emotions of fear and anger. With the groundwork of the book in this depth understanding of feelings, emotions, and personality temperament, Brock and Johnson present a myriad of scenarios between people demonstrating how to use their basic understanding of feelings. In these later chapters the authors focus on practical, down-to-earth examples of how people fail to communicate their feelings and examples of how they can succeed in feeling communication. They suggest rules for engagement in one chapter. They devote another chapter to the concept of emotional hurt which, they suggest, is often at the heart of miscommunication, and suggest ways of understanding, managing, and communicating hurt before it turns to defensive-based emotions of anger or fear. Drs. Johnson and Brock have compiled a valuable book that is grounded in equal measures of science, theory, and their 100 years of experience in the field of psychology. Read this book and you will be compelled to think deeper, feel deeper, and communicate better.

How We Feel Giovanni Frazzetto.2014-06-15 What can a brain scan, or our reaction to a Caravaggio painting, reveal about the deep seat of guilt? How can reading Heidegger, or conducting experiments on rats, help us to cope with anxiety in the face of the world's economic crisis? Can ancient remedies fight sadness more effectively than anti-depressants? What does the neuroscience of acting tell us about how we feel empathy, and fall for an actor on stage? What can writing poetry tell us about how joy works? And how can a bizarre neurological syndrome or a Shakespearean sonnet explain love and intimacy? We live at a time when neuroscience is unlocking the secrets of our emotions. But is science ever enough to explain why we feel the way we feel? Giovanni Frazzetto takes us on a journey through our everyday lives and most common emotions. In each chapter, his scientific knowledge mixes with personal experience to offer a compelling account of the continual contrast between rationality and sentiment, science and poetry. And he shows us that by facing this contrast, we can more fully understand ourselves and how we feel.

How to Feel Sushma Subramanian.2021-02-02 We are out of touch. Many people fear that we are

trapped inside our screens, becoming less in tune with our bodies and losing our connection to the physical world. But the sense of touch has been undervalued since long before the days of digital isolation. Because of deeply rooted beliefs that favor the cerebral over the corporeal, touch is maligned as dirty or sentimental, in contrast with supposedly more elevated modes of perceiving the world. *How to Feel* explores the scientific, physical, emotional, and cultural aspects of touch, reconnecting us to what is arguably our most important sense. Sushma Subramanian introduces readers to the scientists whose groundbreaking research is underscoring the role of touch in our lives. Through vivid individual stories—a man who lost his sense of touch in his late teens, a woman who experiences touch-emotion synesthesia, her own efforts to become less touch averse—Subramanian explains the science of the somatosensory system and our philosophical beliefs about it. She visits labs that are shaping the textures of objects we use every day, from cereal to synthetic fabrics. The book highlights the growing field of haptics, which is trying to incorporate tactile interactions into devices such as phones that touch us back and prosthetic limbs that can feel. *How to Feel* offers a new appreciation for a vital but misunderstood sense and how we can use it to live more fully.

You Can Change How You Feel Gerald Kranzler. 2018-10-17 Men are disturbed not by things, but by the views which they take of them. -Epictetus Do you often feel stuck up to your axle in problems? Do you feel anxious, depressed, guilty, or angry much of the time? Perhaps you can benefit from reading this book. Materials in this book were drawn from the theory and practice of rational-emotive therapy (RET). RET teaches that feelings of anger, depressions, guilt, and anxiety are caused directly by crooked thinking, and that you can learn to live a non self-defeating life if you re-educate yourself emotionally. If you learn how to challenge and contradict your irrational beliefs,

and adopt a more rational philosophy instead, then you can change how you feel.

Craig's goal here is to provide a clear and accessible explanation of the ideas that emerged from his work on the lamina I projection map that he has been developing for the last twenty-five years. -- adapted from Introduction [pages 1-15]

Permission to Feel Marc Brackett, Ph.D..2019-09-03 The mental well-being of children and adults is shockingly poor. Marc Brackett, author of Permission to Feel, knows why. And he knows what we can do. We have a crisis on our hands, and its victims are our children. Marc Brackett is a professor in Yale University's Child Study Center and founding director of the Yale Center for Emotional Intelligence. In his 25 years as an emotion scientist, he has developed a remarkably effective plan to improve the lives of children and adults - a blueprint for understanding our emotions and using them wisely so that they help, rather than hinder, our success and well-being. The core of his approach is a legacy from his childhood, from an astute uncle who gave him permission to feel. He was the first adult who managed to see Marc, listen to him, and recognize the suffering, bullying, and abuse he'd endured. And that was the beginning of Marc's awareness that what he was going through was temporary. He wasn't alone, he wasn't stuck on a timeline, and he wasn't "wrong" to feel scared, isolated, and angry. Now, best of all, he could do something about it. In the decades since, Marc has led large research teams and raised tens of millions of dollars to investigate the roots of emotional well-being. His prescription for healthy children (and their parents, teachers, and schools) is a system called RULER, a high-impact and fast-effect approach to understanding and mastering emotions that has already transformed the thousands of schools that have adopted it. RULER has been proven to reduce stress and burnout, improve school climate, and enhance academic achievement. This book is the culmination of Marc's development of RULER and his way to share the strategies and skills with readers around the world. It is tested, and it works. This book combines rigor, science, passion and inspiration in equal parts. Too many children and adults are suffering; they are ashamed of their feelings and emotionally unskilled, but they don't have to be. Marc Brackett's life mission is to reverse this course, and this book can show you how.
