Learning to Teach Physical Education in the Secondary School Susan Capel, Margaret Whitehead. 2013-04-15 This book focuses on the requirements of student PE teachers in relation to teaching skills and issues covered in PGCE and initial teacher education courses. The new edition of this popular textbook draws together background information about teaching and about PE, basic teaching skills specifically related to physical education and broader knowledge and understanding of issues in the wider context of PE. The book is organized so that each chapter contains text and underpinning theory interspersed with activities that student teachers are asked to undertake either alone, with another student teacher, or with a tutor. This is not a book of teaching tips but promotes critical thinking and reflection to enable student PE teachers to develop into reflective practitioners. Learning to Teach Physical Education in the Secondary School is an essential resource for any student teacher undertaking PGCE or school-based initial teacher education to become a teacher of PE in secondary schools.

Creating Holistic Technology- Enhanced Learning Experiences Lee Yong TAY, Cher Ping LIM. 2013-02-11 Creating Holistic Technology-Enhanced Learning Experiences: Tales of a Future School in Singapore Editors: Lee Yong TAY & Cher Ping LIM The global level of economic, ecological, social, political and cultural integration across nation states and the rapid advancement of technology have brought about transformations that are part of globalisation. Our students are expected to be agents of change rather than passive observers of world events; and at the same time, to live together in an increasingly diverse and complex society and to reflect on and interpret fast changing information. In such a new world order, the holistic development of our students, namely in the cognitive, aesthetics, physical, social and moral, leadership and global domains, is pivotal. This edited book provides descriptive and interpretive accounts of how an elementary school in the FutureSchools@Singapore programme creates holistic technology-enhanced learning experiences for its students at the classroom and school levels. By documenting these accounts and linking them to student learning outcomes, the school will lead the way in providing possible models for the seamless and pervasive integration of information and communication technologies (ICT) into the curriculum for the holistic development of our students.

Slides for Students Gary D. Fisk.2018-10-16 300 million powerpoint presentations are given daily, yet there is a disconnect between the amazing technology of powerpoint and a mediocre student learning experience. To unleash the full potential of powerpoint presentations, we must do a better job of creating presentations that fit the educational needs of students. Slides for Students does just that.Slides for Students is an open and honest discussion about powerpoint in the classroom. A need exists for thoughtfully designed and implemented classroom instruction that focuses on the learner rather than on the technology. This book was written to translate academic research findings into practical suggestions about powerpoint that educators can use. Divided into two parts, Slides for Students discusses the history of powerpoint, explores academic studies on the topic, and demonstrates how to design slides to best suit educational needs and engage with students to avoid the dreaded death by powerpoint.

Learning by Design and Second Language Teaching Gabriela C. Zapata.2022-04-20 Learning by Design and Second Language Teaching establishes theoretical, research, and practice connections between the multiliteracies framework Learning by Design and L2 teaching and learning. A comprehensive introductory chapter presents the theoretical tenets of the approach and is followed by four chapters devoted to the establishment of connections between the framework and L2 instruction, information on evidence-based pedagogical practices and suggestions for their implementation, and task examples that can be adapted for use in a variety of educational contexts. Each chapter links theory and research to practical steps instructors can take to select authentic materials and create tasks in each of the framework's knowledge processes with the objective of developing L2 students' performance in the interpersonal (speaking), interpretive (reading and listening), and presentational (writing) modes of communication. A selection of guidance charts, figures, templates, and extra digital resources are included within the text to support learning and teaching. The book will be of interest to graduate students and in-service and future L2 teachers in all levels of instruction. Chapter 1, Chapter 2 and Chapter 3 of this book are freely available as a downloadable Open Access PDF under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license available at <http://www.taylorfrancis.com>.

Assessing Middle and High School Mathematics & Science Sheryn Spencer-Waterman.2013-08-16 For middle and high school teachers of mathematics and science, this book is filled with examples of instructional strategies that address students' readiness levels, interests, and learning preferences. It shows teachers how to formatively assess their students by addressing differentiated learning targets. Included are detailed examples of differentiated formative assessment schedules, plus tips on how to collaborate with others to improve assessment processes. Teachers will learn how to adjust instruction for the whole class, for small groups, and for individuals. They will also uncover step-by-step procedures for creating their own lessons infused with opportunities to formatively assess students who participate in differentiated learning activities.

Proceedings of the International Conference on Educational Management and Technology (ICEMT 2022) Bambang Budi Wiyono,Asmaa Abusamra,Zainal Dimaukom Kulidtod,Jamal Nordin bin Yunus,Desi Eri Kusumaningrum,Ophat Kaosaiyaporn.2023-02-10 This is an open access book.

The International Conference on Educational Technology and Management (ICEMT) is held to bring together academics, researchers, teachers, educational entrepreneurs, practitioners, and policy makers. They are responsible for implementing educational technology by leveraging resources through education management to create and enable ecosystem capabilities and access to education. The Covid-19 pandemic teaches that aspects of information and communication technology in education management are full of limitations. Inevitably, educational users have moved dramatically to online channels. Students and teachers are accustomed to learning from home. There are opportunities, as well as challenges. Although the pandemic isn't over yet, future updates are needed.

Powerful PowerPoint for Educators David M. Marcovitz. 2012-05-15 This timely book helps educators unleash the interactive potential of PowerPoint to build their own multimedia material that perfectly matches the needs of their students. While PowerPoint affords powerful capabilities for creating dynamic classroom lessons and enriching curriculum, few educators understand how to take advantage of these built-in features. The second edition of this practical guide helps educators produce creative multimedia material for their students, regardless of their level of programming proficiency. *Powerful PowerPoint for Educators: Using Visual Basic for Applications to Make PowerPoint Interactive, Second Edition* discusses the educational benefits of multimedia instruction and provides a review of intermediate PowerPoint skills. Author David Marcovitz explains the concept of Visual Basic for Applications (VBA) scripting and provides progressively advanced skills and practice examples. While other books that describe VBA are written in a highly technical manner, this book is geared toward educators with little or no programming background and includes tips for modifying the practice examples for their own interactive multimedia projects.

The Use of Data in School Counseling Trish Hatch.2013-11-11 Reach ALL students and prove how critical your counseling program is! For school counselors, using data effectively doesn't have to be a burden. Data can make the difference for today's embattled school counseling programs, and this insightful book shows how to collect and manage it. School counseling scholar and advocate Dr. Trish Hatch describes how K-12 counselors can replace random acts of guidance with intentional, well-timed interventions, based on student data. Aligned with current research and the American School Counselor Association (ASCA) standards, this essential resource includes a complete set of tools and templates for data collection, action-planning and reporting. Readers will learn how to Develop a robust counseling curriculum that supports the Common Core Standards and drop-out prevention Measure progress through pre- and post-assessments Deliver compelling reports that demonstrate your program's impact This well-timed book is designed to help school counseling programs make the most of limited resources and measurably demonstrate how their work improves school performance. Trish Hatch provides extensive examples of how school counselors can enhance student achievement and well-being through the use of data. Not only does she provide useful examples and a framework from which counselors can explore data, she helps counselors understand some of the very common barriers to change within school systems. —Jennifer Betters-Bubon, Assistant Professor UW Whitewater, WI As practicing school counselors, we rarely find a text that tells us what to do, why we should do it, and how to do it. Priceless! —Franciene Sabens, School Counselor Chester High School, IL Looking for more resources on data in school counseling? Check out the online course Data! Data! Data!

Living Languages: An Integrated Approach to Teaching Foreign Languages in Secondary Schools Catherine Watts,Clare Forder.2013-06-17 Living Languages is simply bursting with practical and original ideas aimed at teachers and trainee teachers of foreign languages in secondary schools. Written by a team of experienced linguists, this book will inspire and motivate the foreign language classroom and the teachers who work within it. Living Languages comprises eight chapters and is structured around the integrated classroom, merging language learning with different aspects of the wider curriculum such as multimedia, theatre and music, celebrations and festivals, sport, and alternative approaches to teaching languages. A DVD is also included with the book containing additional teaching materials and the associated films and audio recordings which make this a fully developed and effective teaching resource. Twenty-eight real-life case studies and projects are presented, all of which have been tried and tested in the classroom with many having won recent educational awards. Ideas and activities outlined in this unique resource include: Languages and multimedia projects involving different uses of technology such as film-making, Digital Storytelling and subtitling in different languages; Languages and theatre and music including the work of the Théâtre Sans Frontières with its Marie Curie Science Project; Motivating pupils to learn languages whilst keeping fit including examples from Score in French, The German Orienteering Festival and Handball in Spanish; Continuing Professional Development to inspire secondary language teachers to continue their individual professional development. The chapter contains concrete examples

of others' experiences in this area and includes details of support organisations and practical opportunities. Each project is explored from the teachers' perspective with practical tips, lesson plans and reflections woven throughout the text such as what to budget, how to organise the pre-event period, how to evaluate the activity and whom to contact for further advice in each case. Activities and examples throughout are given in three languages - French, German and Spanish.
