Early Childhood Education Barry Persky, Leonard H. Golubchick. 1991 Early childhood education and child care are now widely perceived to be among the central social needs of the nation. Used by more than 100 universities and colleges, the new second edition of this anthology is a collection of over 70 articles which together provide a comprehensive overview of the early childhood situation from a historical, theoretical and practical perspective. These articles enable the reader to understand human development in young children, identify their intellectual strengths and weaknesses, and develop the most effective teaching techniques. Also included is a review of events and conditions resulting in current educational practices. Classroom theory and techniques are examined not only within the U.S., but also run the gamut from the Israeli kibbutz program to current teaching practices in the Soviet Union and China. Contents: National and Historical Perspectives; Philosophical and Theoretical Issues; Critical Issues; Exceptional Children; *Curri Realising REDD+* Arild Angelsen. 2009-01-01 REDD+ must be transformational. REDD+ requires broad institutional and governance reforms, such as tenure, decentralisation, and corruption control. These reforms will enable departures from business as usual, and involve communities and forest users in making and implementing policies that affect them. Policies must go beyond forestry. REDD+ strategies must include policies outside the forestry sector narrowly defined, such as

agriculture and energy, and better coordinate across sectors to deal with non-forest drivers of deforestation and degradation. Performance-based payments are key, yet limited. Payments based on performance directly incentivise and compensate forest owners and users. But schemes such as payments for environmental services (PES) depend on conditions, such as secure tenure, solid carbon data and transparent governance, that are often lacking and take time to change. This constraint reinforces the need for broad institutional and policy reforms. We must learn from the past. Many approaches to REDD+ now being considered are similar to previous efforts to conserve and better manage forests, often with limited success. Taking on board lessons learned from past experience will improve the prospects of REDD+ effectiveness. National circumstances and uncertainty must be factored in. Different country contexts will create a variety of REDD+ models with different institutional and policy mixes. Uncertainties about the shape of the future global REDD+ system, national readiness and political consensus require flexibility and a phased approach to REDD+ implementation.

The Secret Book of Flora Lea Patti Callahan Henry.2023-05-02 INSTANT NEW YORK TIMES BESTSELLER When a woman discovers a rare book that has connections to her past, long-held

secrets about her missing sister and their childhood spent in the English countryside during World War II are revealed. In the war-torn London of 1939, fourteen-year-old Hazel and five-year-old Flora are evacuated to a rural village to escape the horrors of the Second World War. Living with the kind Bridie Aberdeen and her teenage son, Harry, in a charming stone cottage along the River Thames, Hazel fills their days with walks and games to distract her young sister, including one that she creates for her sister and her sister alone—a fairy tale about a magical land, a secret place they can escape to that is all their own. But the unthinkable happens when young Flora suddenly vanishes while playing near the banks of the river. Shattered, Hazel blames herself for her sister's disappearance, and she carries that guilt into adulthood as a private burden she feels she deserves. Twenty years later, Hazel is in London, ready to move on from her job at a cozy rare bookstore to a career at Sotheby's. With a charming boyfriend and her elegantly timeworn Bloomsbury flat, Hazel's future seems determined. But her tidy life is turned upside down when she unwraps a package containing an illustrated book called *Whisperwood and the River of Stars*. Hazel never told a soul about the imaginary world she created just for Flora. Could this book hold the secrets to Flora's disappearance? Could it be a sign that her beloved sister is still alive after all these years? As Hazel embarks on a feverish quest, revisiting long-dormant relationships and bravely opening wounds from her past, her career and future hang in the balance. An astonishing twist ultimately reveals the truth in this transporting and refreshingly original novel about the bond between sisters, the complications of conflicted love, and the enduring magic of storytelling.

Queer Theory and the Prophetic Marriage Metaphor in the Hebrew Bible Stuart

Macwilliam.2016-04-08 The Hebrew Bible offers a metaphor of marriage that portrays men and women as complementary, each with their distinct and 'natural' roles. Queer Theory and the

Prophetic Marriage Metaphor in the Hebrew Bible draws on contemporary scholarship to critique this hetero-normativity. The book examines the methodological issues involved in the application of queer theory to biblical texts and draws on the concept of gender performativity - the construction of gender through action and behaviour - to argue for the potential of queer theory in political readings of the Bible. The central role of metaphor in reinforcing gender performativity is examined in relation to the books of Jeremiah, Hosea and Ezekiel. The book offers a radical reassessment of the relationship between biblical language and gender identity.
