It was written for both graduate and undergraduate students who already know the basics of academic writing but may still struggle to express their ideas using the right words. The Only Academic Phrasebook You'll Ever Need contains 600 sentence templates organized around the typical sections of an academic paper. Here are some examples: 1. Establishing a research territory: The last few years have seen an increased interest in _____. 2. Describing research gaps: To date, no study has looked specifically at _____. 3. Stating your aims: The aim of this study is to discuss the extent to which _____. 4. Describing the scope and organization of your paper: In chapter _____, the concept of _____ is further explored. 5. General literature review: A number of scholars have attempted to identify _____. 6. Referencing: In his 1799 study, Smith argued that _____. 7. Sampling and data collection: Participants were randomly selected based on _____. 8. Data analysis and discussion: The data provide preliminary evidence that _____. The Only Academic Phrasebook You'll Ever Need also contains 80 grammar and vocabulary tips for both native and non-native speakers. For example: 1. What's the difference between effect and affect? Imply and infer? They're, their and there? 2. Is irregardless correct? 3. Do you say the criteria was or the criteria were? The Only Academic Phrasebook You'll Ever Need is NOT a comprehensive academic writing textbook. It will NOT teach you key academic skills such as choosing the right research question, writing clear paragraphs, dealing with counter arguments and so on. But it will help you find the best way to say what you want to say so you can ace that paper!
