The United Nations World Water Development Report 2020 UNESCO.2020-03-27 The 2020 edition of the WWDR, titled Water and Climate Change illustrates the critical linkages between water and climate change in the context of the broader sustainable development agenda. Supported by examples from across the world, it describes both the challenges and opportunities created by climate change, and provides potential responses - in terms of adaptation, mitigation and improved resilience - that can be undertaken by enhancing water resources management, attenuating water-related risks, and improving access to water supply and sanitation services for all in a sustainable manner. It addresses the interrelations between water, people, environment and economics in a changing climate, demonstrating how climate change can be a positive catalyst for improved water management, governance and financing to achieve a sustainable and prosperous world for all. The report provides a fact-based, water-focused contribution to the knowledge base on climate change. It is complementary to existing scientific assessments and designed to support international political frameworks, with the goals of helping the water community tackle the challenges of climate change, and informing the climate change community about the opportunities that improved water management offers in terms of adaptation and mitigation.

Taxing Energy Use 2019 Using Taxes for Climate Action OECD.2019-10-15 Taxing Energy Use (TEU) 2019 presents a snapshot of where countries stand in deploying energy and carbon taxes, tracks progress made, and makes actionable recommendations on how governments could do better. The report contains new and original data on energy and carbon taxes in OECD and G20 countries, and in international aviation and maritime transport. Summits and Secrets Kurt Diemberger.2019-03-08 'A book grows rather like a snow crystal. One doesn't write it from start to finish but, in greater or less degree, all at the same time ... that is why my book is not in chronological order; for everything is of the present, held in the moment when thought captures it.' Kurt Diemberger's *Summits and Secrets* is a mountaineering autobiography like no other. Writing anecdotally, Diemberger provides an abstract look into his life and climbing career that is both fascinating and awe-inspiring to navigate. Known for surviving the 1986 K2 disaster - an account described in harrowing detail in his award-winning book *The Endless Knot* - Diemberger provides a captivating insight into his earlier climbs in *Summits and Secrets*. From climbing his first peak in the Tyrol mountains of Austria, to the epoch-making first ascent of Broad Peak with Hermann Buhl in 1957, and then summiting Dhaulagiri in 1960, where he became one of only two people to have made first ascents of two mountains over 8,000 metres, Diemberger recounts his experiences with wit, honesty and an infectious enthusiasm: 'Every climber knows the thrill ...

the unique inexplicable tension, which the regular shapes of the mountain world awake in him: huge pyramids, enormous rectangular slabs, piled-up triangles of rock, white circles, immense squares – the thrill of simplicity of shape and outline and the excitement of mastering them, to an unbelievable extent, by his own efforts, his own power ... ' Summits and Secrets is a must-read for those wanting an insight into the life and achievements of one of the toughest high-altitude climbers the world has ever known.

Building Resilience to Climate Change Angela Andrade Pérez, Bernal Herrera Fernández, Roberto Cazzolla Gatti.2010 With climate change now a certainty, the question is how much change there will be and what can be done about it. One of the answers is through adaptation. Many of the lessons that are being learned in adaptation are from success stories from the field. This publication contains eleven case studies covering different ecosystems and regions around the world. Its aim is to summarize some current applications of the Ecosystem-Based Adaptation concept and its tools used around the world, and also draw lessons from experiences in conservation adaptation.

Atoms in the Family Laura Fermi.2014-10-24 In this absorbing account of life with the great atomic scientist Enrico Fermi, Laura Fermi tells the story of their emigration to the United States in the 1930s—part of the widespread movement of scientists from Europe to the New World that was so important to the development of the first atomic bomb. Combining intellectual biography and social history, Laura Fermi traces her husband's career from his childhood, when he taught himself physics, through his rise in the Italian university system concurrent with the rise of fascism, to his receipt of the Nobel Prize, which offered a perfect opportunity to flee the country without arousing official suspicion, and his odyssey to the United States.

Stuart Goes to School Sara Pennypacker.2015-05-26 “[An] excellent sequel to Stuart’s Cape . . . Precocious readers looking for clever and unusual situations will not be disappointed. Hilarious.” —Kirkus Reviews (starred review) Our favorite worrier is back, and Stuart is about to start third grade. As he makes his way to the first day of school, wearing the worst outfit ever, what could a first-rate worrier do but worry? Stuart worries about getting stuck in the boys’ bathroom, about not having anything to show for show-and-tell, but most of all, about not making any friends. With his cape, though, Stuart is bound to have a day full of wacky adventures. “This humorous fantasy perfectly captures the child’s-eye view of elementary-school life . . . Young readers are sure to identify with Stuart’s persistent quest to find his place in the classroom society.” —School Library Journal “[A] wryly funny mix of the real and the magical, enhanced by Matje’s quirky line art.” —Publishers Weekly

The Curious Incident of the Dog in the Night-Time Mark Haddon.2009-02-24 A bestselling modern classic—both poignant and funny—narrated by a fifteen year old autistic savant obsessed with Sherlock Holmes, this dazzling novel weaves together an old-fashioned mystery, a contemporary coming-of-age story, and a fascinating excursion into a mind incapable of processing emotions. Christopher John Francis Boone knows all the countries of the world and their capitals and every prime number up to 7,057. Although gifted with a superbly logical brain, Christopher is autistic. Everyday interactions and admonishments have little meaning for him. At fifteen, Christopher's carefully constructed world falls apart when he finds his neighbour's dog Wellington impaled on a garden fork, and he is initially blamed for the killing. Christopher decides that he will track down the real killer, and turns to his favourite fictional character, the impeccably logical Sherlock Holmes, for inspiration. But the investigation leads him down some unexpected paths and ultimately brings him face to face with the dissolution of his parents' marriage. As Christopher tries to deal with the crisis within his own family, the narrative draws readers into the workings of Christopher's mind. And herein lies the key to the brilliance of Mark Haddon's choice of narrator: The most wrenching of emotional moments are chronicled by a boy who cannot fathom emotions. The effect is dazzling, making for one of the freshest debut in years: a comedy, a tearjerker, a mystery story, a novel of exceptional literary merit that is great fun to read.

Venice is a Fish: A Cultural Guide Tiziano Scarpa.2010-07-09 Built on an inverted forest, paved with a tortoiseshell of boulders, Venice is a maze of tiny alleys, bridges and squares. Tiziano Scarpa wanders through the city, recounting the customs and secrets that only Venetians know. With everything from practical advice for aspiring Venetian lovers to hints at where to find the best bacaro, Scarpa waves the tourist in the right direction and, without naming a single restaurant, hotel or bar, relates the secret language needed to experience the real Venice. So ignore the street signs - why fight the labyrinth? Venice, the fish, is ready to swallow you whole.

How Women Can Save The Planet Anne Karpf.2021-05-27 Here's a perverse truth: from New Orleans to Bangladesh, women—especially poor women of colour—are suffering most from a crisis they have done nothing to cause. Yet where, in environmental policy, are the voices of elderly European women dying in heatwaves? Of African girls dropping out of school due to drought? Our highest-profile climate activists are women and girls; but, at the top table, it's men deciding the earth's future. We're not all in it together—but we could be. Instead of expecting individual women to save the planet, what we need are visionary, global climate policies that are gender-inclusive and promote gender equality. Anne Karpf shines a light on the radical ideas, compelling research and tireless campaigns, led by and for women around the world, that have inspired her to hope. Her conversations with female activists show how we can fight back, with strength in diversity. And, faced with the most urgent catastrophe of our times, she offers a powerful vision: a Green New Deal for Women.

Maritime History as Global History Maria Fusaro, Amélia Polónia.2010 This study aims to provide new insights into the connections between maritime history and global history. It demonstrates the significance of maritime activity as a conduit of global exchange by examining local, national, and international interdependencies and trade networks, and a broad range of time periods, geographical areas, and various sub-divisions of maritime historical research. It is composed of ten essays, with an introductory chapter and concluding chapter. The first five essays discuss the effects globalisation on shipping in the early modern period; the following three discuss maritime transportation and the economics of industrialisation from the nineteenth century to the present day; the next discusses the impact of global entrepreneurialism on maritime history; the

penultimate discusses the connections and variables between maritime and global history; and the concluding chapter examines the theoretical assumptions surrounding the two disciplines, using the globalisation of Early Modern Spain as a case study to do so. The study demonstrates that the core strength of maritime history is its essential place in global history, and that the process of globalisation began at sea.

The Timaeus and The Critias Plato.2019-05 Among all the writings of Plato the Timaeus is the most obscure to the modern reader, and has nevertheless had the greatest influence over the ancient and mediaeval world. The Critias is a fragment and it was designed to be the second part of a trilogy. Timaeus had brought down the origin of the world to the creation of man, and the dawn of history was now to succeed the philosophy of nature. It tells us about Atlantis and Critias returns to this story, professing only to repeat what Solon was told by the priests. The war of which he was about to speak had occurred 9000 years ago. One of the combatants was the city of Athens, the other was the great island of Atlantis.

Information is Beautiful David McCandless.2009 A visual guide to the way the world really works Every day, every hour, every minute we are bombarded by information - from television, from newspapers, from the internet, we're steeped in it, maybe even lost in it. We need a new way to relate to it, to discover the beauty and the fun of information for information's sake. No dry facts, theories or statistics. Instead, Information is Beautiful contains visually stunning displays of information that blend the facts with their connections, their context and their relationships - making information meaningful, entertaining and beautiful. This is information like you have never seen it before - keeping text to a minimum and using unique visuals that offer a blueprint of modern life - a map of beautiful colour illustrations that are tactile to hold and easy to flick through but intriguing and engaging enough to study for hours.

The Incredible Tide Alexander Key.2014-07-29 A castaway on a rocky island is captured by a gang of evil men He was born Conan of Orme, but Orme is no more. When nuclear war causes the oceans to swallow up the Western world, Conan escapes by chance, washing up on a craggy, desolate isle. After years of privilege, island life is a hard adjustment, but he grows strong—learning to fish, to make fire, and to befriend the birds. On moonless nights, he screams into the darkness, tortured by a loneliness he cannot overcome. One day, a ship appears on the horizon, and Conan believes himself saved. But for this young survivor, trouble is just beginning. The ship belongs to the New Order, cruel rulers who are rebuilding Earth through brute force. They send their new slave to the cutthroat city of Industria, intending to break his spirit. But Conan finds power on the island, and with it, he will remake the world.

Biodiversity in Time and Space Roberto Cazzolla Gatti.2018 The study of biodiversity is essential for the understanding of the complex phenomena upon which biological sciences are based. This book aims to be an updated and advanced source of the theoretical and practical aspects related to biological diversity suitable for graduated and Ph.D. students. This text seeks to open the doors to the study of biodiversity and its interconnections with ecology, evolution, economy and anthropogenic impacts starting from students to university teachers and researchers. The approach adopted embraces a comprehensive vision of biodiversity and introduces theoretical and practical information that can help to conduct rigorous studies, without omitting the space-temporal component in the analysis of a subject that merges ecological and evolutionary sciences. The novelty of the ideas presented in this book is underlined by the McArthur Fellowship winner and renowned complex systems biologist, Stuart A. Kauffman, who gifted the foreword of this publication by his scientific story. During the academic semesters of Biology, Natural Sciences, Forestry and Environmental Sciences, the discussions related to the evolutionary patterns and the analysis of biodiversity is based upon complex arguments with a few and often quite old reference textbooks. This book provides the most updated review of the literature concerning both the theoretical and practical study of biodiversity and offers new ideas for a better understanding of the proposed concepts. The degrees theses and scientific papers on this subject are increasing, but literature research is often conducted referring to outdated texts whose explanations of sometimes complex topics such as the evolution of ecological niches, the speciation and extinction patterns, the calculation of diversity indices, the estimation of accumulation and rarefaction curves, etc. are even more complicated. This book provides different empirical approaches to the study of biodiversity and applied examples to better link and understand the theoretical background. Moreover, it is accompanied by graphical schematizations, figures and insights that can easily simplify most of the difficult issues related to this developing science. This book, along with presenting an updated overview of the most useful and rigorous indices, measures, plots and graphical representations to monitor, analyse, and calculate biodiversity, provides an extended theoretical background. The parallel theoretical and practical approach of this proposed book can be useful at any user level: for graduate students to better understand complex concepts with concrete examples and graphics; for teachers to supply their students with updated and concrete notions that can be linked to a more theoretical basis; for researchers to use the data and information gathered by the application of the methods described in the book and to analyse and discuss the results obtained on the basis of the hypotheses furnished in the wide literature review, with the final aim of writing scientific reports about biodiversity research.

No Picnic on Mount Kenya Felice Benuzzi.2015 Imprisoned in a British P.O.W. camp in East Africa in 1943, Felice Benuzzi and his Italian comrades looked out onto the beautiful Mount Kenya, a symbol of everything that was beyond the grasp of their daily drudgery. For Felice, though, this was a temptation too far. Using only equipment manufactured from what was available in the camp, and stockpiling their meagre rations, Felice and two friends planned a daring escape past armed guards, and attempted to scale the 17,000 foot mountain. Encountering threats from rhinos and leopards, and risking perilous falls, deadly temperatures and starvation, this is an astonishing true story of courage and adventure; of three men who decided, in the midst of the horrors and banalities of the Second World War, that they had a mountain to climb.

Jupiter's Travels Ted Simon.2007-01-25 Jupiter's Travels -Ted Simon's astonishing 4 year motorbike journey around the world The book that inspired Ewan McGregor's Long Way Round In the late 1970s Ted Simon set off on a Triumph and rode 63,000 miles over four years through fifty-four countries in a journey that took him around the world. Through breakdowns, prison, war, revolutions, disasters and a Californian commune, he travelled into the depths of fear and reached the heights of euphoria. He met astonishing people and was treated as a spy, a welcome stranger and

even a god. For Simon the trip became a journey into his own soul, and for many others - including bikers Charley Boorman and Ewan McGregor - it provides an inspiration they will never forget. This classic text, which has informed a whole genre of travel writing in the thirty years since it was first published, will never be bettered for sheer adventure, passion, humour and honesty. Brought up in England by a German mother and a Romanian father, Ted Simon found himself impelled by an insatiable desire to explore the world. It led him to abandon an early scientific career in favour of journalism, and he has worked for several newspapers and magazines on Fleet Street and elsewhere. Ted Simon is also the author of *Riding Home* and *The Gypsy in Me*.

The United Nations World Water Development Report 2021 .2021-03-22 Water is a finite and non-substitutable resource. As the foundation of life, societies and economies, it carries multiple values and benefits. But unlike most other natural resources, it has proven extremely difficult to determine its true 'value'. The 2021 edition of the United Nations World Water Development Report, titled "Valuing Water" assesses the current status of and challenges to the valuation of water across different sectors and perspectives and identifies ways in which valuation can be promoted as a tool to help improve its management and achieve global sustainable development.

The Brill Dictionary of Ancient Greek Franco Montanari.2015-05 The Brill Dictionary of Ancient Greek is also available online and as a two-volume boxed set. The Brill Dictionary of Ancient Greek is the English translation of Franco Montanari's *Vocabolario della Lingua Greca*. With an established reputation as the most important modern dictionary for Ancient Greek, it brings together 140,000 headwords taken from the literature, papyri, inscriptions and other sources of the archaic period up to the 6th Century CE, and occasionally beyond. The Brill Dictionary of Ancient Greek is an invaluable companion for the study of Classics and Ancient Greek, for beginning students and advanced scholars alike. Translated and edited under the auspices of The Center for Hellenic Studies in Washington, DC, The Brill Dictionary of Ancient Greek is based on the completely revised 3rd Italian edition published in 2013 by Loescher Editore, Torino. Features The principal parts of some 15,000 verbs are listed directly following the entry and its etymology. For each of these forms, the occurrence in the ancient texts has been certified. When found only once, the location is cited. Nearly all entries include citations from the texts with careful mention of the source. The dictionary is especially rich in personal names re-checked against the sources for the 3rd Italian edition, and in scientific terms, which have been categorized according to discipline. Each entry has a clear structure and typography making it easy to navigate. For a number of years now, scholars at ease in Italian have benefitted enormously from the riches, layout, concision, and accuracy of Professor Montanari's *Vocabolario della Lingua Greca*, with its added advantage of the inclusion of names. Hence classicists in general will welcome the English version of this very valuable resource. Professor Richard Janko, University of Michigan Franco Montanari is a giant in our field, and his Dictionary is a major leap forward for us . Professor Gregory Nagy, Harvard University

Odontocetes Boris M. Culik.2011 Toothed whales occur in a wide range of marine and freshwater habitats, from the Arctic to the tropics. Some species live in large river systems such as the Amazon, Ganges, Indus and Yangtze. This encyclopedia on all 72 species of toothed whales includes the most recent scientific findings on the distribution, migration, behaviour and threats to this group of whales.

A Renegade History of the United States Thaddeus Russell.2011-07-05 From the Publisher: In this groundbreaking book, noted historian Thaddeus Russell tells a new and surprising story about the origins of American freedom. Rather than crediting the standard textbook icons, Russell demonstrates that it was those on the fringes of society whose subversive lifestyles helped legitimize the taboo and made America the land of the free. In vivid portraits of renegades and their respectable adversaries, Russell shows that the nation's history has been driven by clashes between those interested in preserving social order and those more interested in pursuing their own desires - insiders versus outsiders, good citizens versus

bad. The more these accidental revolutionaries existed, resisted, and persevered, the more receptive society became to change. Russell brilliantly and vibrantly argues that it was history's iconoclasts who established many of our most cherished liberties. Russell finds these pioneers of personal freedom in the places that usually go unexamined - saloons and speakeasies, brothels and gambling halls, and even behind the Iron Curtain. He introduces a fascinating array of antiheroes: drunken workers who created the weekend; prostitutes who set the precedent for women's liberation, including Diamond Jessie Hayman, a madam who owned her own land, used her own guns, provided her employees with clothes on the cutting-edge of fashion, and gave food and shelter to the thousands left homeless by the 1906 San Francisco earthquake; there are also the criminals who pioneered racial integration, unassimilated immigrants who gave us birth control, and brazen homosexuals who broke open America's sexual culture. Among Russell's most controversial points is his argument that the enemies of the renegade freedoms we now hold dear are the very heroes of our history books - he not only takes on traditional idols like John Adams, Thomas Jefferson, Andrew Carnegie, John Rockefeller, Thomas Edison, Franklin Roosevelt, and John F. Kennedy, but he also shows that some of the most famous and revered abolitionists, progressive activists, and leaders of the feminist, civil rights, and gay rights movements worked to suppress the vibrant energies of working-class women, immigrants, African Americans, and the drag queens who founded Gay Liberation. This is not history that can be found in textbooks - it is a highly original and provocative portrayal of the American past as it has never been written before.

The Gap Thomas Suddendorf.2013-11-12 There exists an undeniable chasm between the capacities of humans and those of animals. Our minds have spawned civilizations and technologies that have changed the face of the Earth, whereas even our closest animal relatives sit unobtrusively in their dwindling habitats. Yet despite longstanding debates, the nature of this apparent gap has remained unclear. What exactly is the difference between our minds and theirs? In *The Gap*, psychologist Thomas Suddendorf provides a definitive account of the mental qualities that separate humans from other animals, as well as how these differences arose. Drawing on two decades of research on apes, children, and human evolution, he surveys the abilities most often cited as uniquely human -- language, intelligence, morality, culture, theory of mind, and mental time travel -- and finds that two traits account for most of the ways in which our minds appear so distinct: Namely, our open-ended ability to imagine and reflect on scenarios, and our insatiable drive to link our minds together. These two traits explain how our species was able to amplify qualities that we inherited in parallel with our animal counterparts; transforming animal communication into language, memory into mental time travel, sociality into mind reading, problem solving into abstract reasoning, traditions into culture, and empathy into morality. Suddendorf concludes with the provocative suggestion that our unrivalled status may be our own creation -- and that the gap is growing wider not so much because we are becoming smarter but because we are killing off our closest intelligent animal relatives. Weaving together the latest findings in animal behavior, child development, anthropology, psychology, and neuroscience, this book will change the way we think about our place in nature. A major argument for reconsidering what makes us human, *The Gap* is essential reading for anyone interested in our evolutionary origins and our relationship with the rest of the animal kingdom.

The Anthropocene as a Geological Time Unit Jan Zalasiewicz, Colin N. Waters, Mark Williams, Colin P. Summerhayes.2019-03-07 Reviews the evidence underpinning the Anthropocene as a geological epoch written by the Anthropocene Working Group investigating it. The book discusses ongoing changes to the Earth system within the context of deep geological time, allowing a comparison between the global transition taking place today with major transitions in Earth history.

The Magnetic Field of the Earth Ronald T. Merrill,M. W. McElhinny,Phillip L. McFadden.1998 Topics involved in studies of the Earth's magnetic field and its secular variation range from the intricate observations of geomagnetism, to worldwide studies of archeomagnetism and paleomagnetism, through to the complex mathematics of dynamo theory. Traditionally these different aspects of geomagnetism have in the main been studied and presented in isolation from each other. This text draws together these lines of inquiry into an integrated framework to highlight the interrelationships and thus to provide a more comprehensive understanding of the geomagnetic field.

The Origin of Continents and Oceans Alfred Wegener.1966-01-01 In 1915 Alfred Wegener's seminal work describing the continental drift was first published in German. Wegener explained various phenomena of historical geology, geomorphology, paleontology, paleoclimatology, and similar areas in terms of continental drift. This edition includes new data to support his theories, helping to refute the opponents of his controversial views. 64 illustrations.
