High Tech Start Up, Revised And Updated John L. Nesheim.2000-09-22 This revised and updated edition of Nesheim's underground Silicon Valley bestseller incorporates twenty-three case studies of successful start-ups, including tables of wealth showing how much money founders and investors realized from each venture. The phenomenal success of the initial public offerings (IPOs) of many new internet companies obscures the fact that fewer than six out of 1 million business plans submitted to venture capital firms will ever reach the IPO stage. Many fail, according to start-up expert John Nesheim, because the entrepreneurs did not have access to the invaluable lessons that come from studying the real-world venture experiences of successful companies. Now they do. Acclaimed by entrepreneurs the world over, this practical handbook is filled with hard-to-find information and guidance covering every key phase of a start-up, from idea to IPO: how to create a winning business plan, how to value the firm, how venture capitalists work, how they make their money, where to find alternative sources of funding, how to select a good lawyer, and how to protect intellectual property. Nesheim aims to improve the odds of success for first-time high-tech entrepreneurs, and offers an insider's perspective from firsthand experience on one of the toughest challenges they face -- convincing venture capitalists or investment banks to provide financing. This complete, classic reference tool is essential reading for first-time high-tech entrepreneurs, and entrepreneurs already involved in a start-up who want to increase their chances of success to rise to the top.

Public Administration in Times of Transnationalisation and Crisis Martina McCowan.2019 Coordination in public administration has changed. This book analyses change in organisational structures and actors' behaviour in times of transnationalisation and the global financial and eurozone crisis. It thereby goes one step further than the majority of existing studies, which focus on change in organisational structures and the impact of transnationalisation or crisis. This 'inclusive' approach enables the book to portray a nuanced and detailed picture of change in the Danish and German Ministries of Finance. Whilst cooperative forms of coordination indicate profound change in times of crisis, which is observable in the strengthening of actors' 'cosmopolitan identities', transnationalisation does not have the power to overrule actors' prevailing 'local identities', which is evidenced by the continuity of hierarchical coordination. The book thereby shows that crisis is a necessary condition for transnationalisation to realise its full transformative potential.

Rethinking Sustainability Jonathan Mark Harris.2009-11-12 Bringing together the thoughts of economists, political scientists, anthropologists, philosophers, and agricultural policy professionals, this volume focuses on the issues of sustainability in development. Examining such topics as international trade, political power, gender roles, legal institutions, and agricultural research, the contributors focus on the missing links in theory and practice that have been barriers to the achievement of truly sustainable development. Any theory of sustainable development must take into account economic, social, and environmental dimensions. Until recently, the question What is development? was often answered predominantly from the economist's perspective, with high priority being assigned to expansion of economic output. Social, political, institutional, and ethical aspects have often been neglected. But now that sustainable development has become a broadly accepted concept, it is impossible to maintain a narrowly economic view of development. For this reason, the varied perspectives offered by the contributors to this volume are crucial to understanding the process of development as it relates to environmental sustainability and human well-being. The selection of articles is meant to be stimulating and provocative rather than comp-rehensive. They are roughly divided between those dealing with broad theoretical issues concerning the economic, political, and social aspects of development (Part I) and those presenting more applied analysis (Part II). The common thread is a concern for examining which factors contribute to making development socially just and environmentally sound. Rethinking Sustainability will be of interest to economists and social scientists, development professionals, and instructors seeking to offer their students a broad perspective on development issues. Jonathan Harris is Senior Research Associate, Global Development and Environment Institute at Tufts University, as well as Adjunct Associate Professor of International Economics at Tufts University Fletcher School of Law.

Finanz-Check für Vereine Ronald Wadsack,Horst Lienig.2013-10-08 Finanzmanagement wird in den meisten Vereinen ein immer drängenderes Thema. Öffentliche Kassen kürzen ihre Ausgaben, Finanzämter kümmern sich intensiver um Vereine, ehrenamtliches Engagement findet sich schwieriger und die Ansprüche der Mitglieder steigen. Es reicht also nicht mehr aus, Tipps zu Geldquellen zu erhalten, vielmehr ist ein strategisches Vorgehen gefordert! Analyse der Finanzsituation, der lokalen Unterstützungsmöglichkeiten und des Vereinskonzepes sind nur einige Stichworte für die erforderliche Neuausrichtung. Und dies jeweils in Übereinstimmung mit den teilweise komplizierten steuerlichen Regelungen, die für Vereine gelten. Dieses Themenfeld wird zusammenhängend und anschaulich in Finanzcheck für Vereine aufbereitet.
