Evolution's Rainbow Joan Roughgarden. 2013-09-14 In this innovative celebration of diversity and affirmation of individuality in animals and humans, Joan Roughgarden challenges accepted wisdom about gender identity and sexual orientation. A distinguished evolutionary biologist, Roughgarden takes on the medical establishment, the Bible, social science—and even Darwin himself. She leads the reader through a fascinating discussion of diversity in gender and sexuality among fish, reptiles, amphibians, birds, and mammals, including primates. *Evolution's Rainbow* explains how this diversity develops from the action of genes and hormones and how people come to differ from each other in all aspects of body and behavior. Roughgarden reconstructs primary science in light of feminist, gay, and transgender criticism and redefines our understanding of sex, gender, and sexuality. Witty, playful, and daring, this book will revolutionize our understanding of sexuality. Roughgarden argues that principal elements of Darwinian sexual selection theory are false and suggests a new theory that emphasizes social inclusion and control of access to resources and mating opportunity. She disputes a range of scientific and medical concepts, including Wilson's genetic determinism of behavior, evolutionary psychology, the existence of a gay gene, the role of parenting in determining gender identity, and Dawkins's selfish gene as the driver of natural selection. She dares social science to respect the agency and rationality of diverse people; shows that many cultures across the world and throughout history accommodate people we label today as lesbian, gay, and transgendered; and calls on the Christian religion to acknowledge the Bible's many passages endorsing diversity in gender and sexuality. *Evolution's Rainbow* concludes with bold recommendations for improving education in biology, psychology, and medicine; for democratizing genetic engineering and medical practice; and for building a public monument to affirm diversity as one of our nation's defining principles.

Using Technology with Classroom Instruction That Works Howard Pitler, Elizabeth R. Hubbell, Matt Kuhn. 2012-08-02 Technology is ubiquitous, and its potential to transform learning is immense. The first edition of *Using Technology with Classroom Instruction That Works* answered some vital questions about 21st century teaching and learning: What are the best ways to incorporate technology into the curriculum? What kinds of technology will best support particular learning tasks and objectives? How does a teacher ensure that technology use will enhance instruction rather than distract from it? This revised and updated second edition of that best-selling book provides fresh answers to these critical questions, taking into account the enormous technological advances that have occurred since the first edition was published, including the proliferation of social networks, mobile devices, and web-based multimedia tools. It also builds on the up-to-date research and instructional planning framework featured in the new edition of *Classroom Instruction That Works*, outlining the most appropriate technology applications and resources for all nine categories of effective instructional strategies: \* Setting objectives and providing feedback \* Reinforcing effort and providing recognition \* Cooperative learning \* Cues, questions, and advance organizers \* Nonlinguistic representations \* Summarizing and note taking \* Assigning homework and providing practice \* Identifying similarities and differences \* Generating and testing hypotheses Each strategy-focused chapter features examples—across grade levels and subject areas, and drawn from real-life lesson plans and projects—of teachers integrating relevant technology in the classroom in ways that are engaging and inspiring to students. The authors also recommend dozens of word processing applications, spreadsheet generators, educational games, data collection tools, and online resources that can help make lessons more fun, more challenging, and—most of all—more effective.

**Entity-Oriented Search** Krisztian Balog. 2018-10-02 This open access book covers all facets of entity-oriented search—where “search” can be interpreted in the broadest sense of information

access—from a unified point of view, and provides a coherent and comprehensive overview of the state of the art. It represents the first synthesis of research in this broad and rapidly developing area. Selected topics are discussed in-depth, the goal being to establish fundamental techniques and methods as a basis for future research and development. Additional topics are treated at a survey level only, containing numerous pointers to the relevant literature. A roadmap for future research, based on open issues and challenges identified along the way, rounds out the book. The book is divided into three main parts, sandwiched between introductory and concluding chapters. The first two chapters introduce readers to the basic concepts, provide an overview of entity-oriented search tasks, and present the various types and sources of data that will be used throughout the book. Part I deals with the core task of entity ranking: given a textual query, possibly enriched with additional elements or structural hints, return a ranked list of entities. This core task is examined in a number of different variants, using both structured and unstructured data collections, and numerous query formulations. In turn, Part II is devoted to the role of entities in bridging unstructured and structured data. Part III explores how entities can enable search engines to understand the concepts, meaning, and intent behind the query that the user enters into the search box, and how they can provide rich and focused responses (as opposed to merely a list of documents)—a process known as semantic search. The final chapter concludes the book by discussing the limitations of current approaches, and suggesting directions for future research. Researchers and graduate students are the primary target audience of this book. A general background in information retrieval is sufficient to follow the material, including an understanding of basic probability and statistics concepts as well as a basic knowledge of machine learning concepts and supervised learning algorithms.

Read 180 .2002 READ 180 is a comprehensive reading intervention program designed to meet the needs of elementary to middle school students whose reading achievement is below the proficient level. The program directly addresses individual needs through differentiated instruction, adaptive and instructional software, high-interest literature, and direct instruction in reading, writing, and vocabulary skills. Stage A provides tools for young struggling readers in elementary school to develop critical literacy skills. Stage B provides middle school struggling readers with topics designed for their level of reading that hold their interest. System 44 was designed for the most challenged, older struggling readers, and helps these students understand that the English language is a finite system of 44 sounds and 26 letters that can be mastered. It uses validated assessment for screening and placement, research-based phonics instruction and highly motivating and age-appropriate adaptive technology.

**Promoting the Educational Success of Children and Youth Learning English** National Academies of Sciences, Engineering, and Medicine,Health and Medicine Division,Division of Behavioral and Social Sciences and Education,Board on Science Education,Board on Children, Youth, and Families,Committee on Fostering School Success for English Learners: Toward New Directions in Policy, Practice, and Research.2017-08-25 Educating dual language learners (DLLs) and English learners (ELs) effectively is a national challenge with consequences both for individuals and for American society. Despite their linguistic, cognitive, and social potential, many ELs—who account for more than 9 percent of enrollment in grades K-12 in U.S. schools—are struggling to meet the requirements for academic success, and their prospects for success in postsecondary education and in the workforce are jeopardized as a result. *Promoting the Educational Success of Children and Youth Learning English: Promising Futures* examines how evidence based on research relevant to the development of DLLs/ELs from birth to age 21 can inform education and health

policies and related practices that can result in better educational outcomes. This report makes recommendations for policy, practice, and research and data collection focused on addressing the challenges in caring for and educating DLLs/ELs from birth to grade 12.

**Cyberresearch on the Ancient Near East and Neighboring Regions** Vanessa Bigot Juloux, Amy Rebecca Gansell, Alessandro Di Ludovico. 2018 CyberResearch on the Ancient Near East and Neighboring Regions provides case studies on archaeology, objects, cuneiform texts, and online publishing, digital archiving, and preservation. Eleven chapters present a rich array of material, spanning the fifth through the first millennium BCE, from Anatolia, the Levant, Mesopotamia, and Iran. Customized cyber- and general glossaries support readers who lack either a technical background or familiarity with the ancient cultures. Edited by Vanessa Bigot Juloux, Amy Rebecca Gansell, and Alessandro Di Ludovico, this volume is dedicated to broadening the understanding and accessibility of digital humanities tools, methodologies, and results to Ancient Near Eastern Studies. Ultimately, this book provides a model for introducing cyber-studies to the mainstream of humanities research.

Nobody's Story Charles Dickens. 2018-10-12 Nobody's Story (+Biography and Bibliography) (Matte Cover Finish): He lived on the bank of a mighty river, broad and deep, which was always silently rolling on to a vast undiscovered ocean. It had rolled on, ever since the world began. It had changed its course sometimes, and turned into new channels, leaving its old ways dry and barren; but it had ever been upon the flow, and ever was to flow until Time should be no more. Against its strong, unfathomable stream, nothing made head. No living creature, no flower, no leaf, no particle of animate or inanimate existence, ever strayed back from the undiscovered ocean. The tide of the river set resistlessly towards it; and the tide never stopped, any more than the earth stops in its circling round the sun

**Using Formative Assessment to Differentiate Middle School Literacy Instruction** Leslie Laud, Pooja Patel. 2012-11-28 Formative assessment and differentiated instruction made manageable We all recognize the countless benefits of differentiated instruction. The challenge is in its implementation. This start-to-finish guide will show you how through formative assessment and seven classroom-tested practices for maximizing student learning. Packed with vignettes, sample worksheets, and charts, this toolkit demonstrates how to: Establish new classroom norms Involve students in the use of assessment data and feedback to inform their next steps Clarify end-of-unit criteria to help map learning progression Apply assessment data to grouping students for tiered activities Differentiate assignments based on student readiness, characteristics, and interest *Informing Progress* John F. Pane. 2017 The basic concept of personalized learning (PL)--instruction that is focused on meeting students' individual learning needs while incorporating their interests and preferences--has been a longstanding practice in U.S. K-12 education. Options for personalization have increased as personal computing devices have become increasingly affordable and available in schools and developers created software to support individual student learning. In recent years, it has become more common for schools to embrace schoolwide models of PL. We collected data from schools in the Next Generation Learning Challenges (NGLC)'s Breakthrough School Models program. Our study seeks to describe the practices and strategies these schools used to implement PL, understand some of the challenges and facilitators, and consider these alongside achievement findings to discern patterns that may be informative. Teachers and students reported higher levels of many aspects of personalization than their counterparts in a national sample. These included time for one-on-one tailored support for learning; using up-to-date information on student progress to personalize instruction and group students; students tracking their own progress; competency-based practices; and flexible use of staff, space, and time. However, some more-difficult-to-implement aspects did not appear to differ from practices in schools nationally, such as student discussions with teachers on progress and goals; keeping up-to-date documentation of student strengths, weaknesses, and goals; and student choice of topics and materials. We estimate study students gained about 3 percentile points in mathematics relative to a comparison group of similar students. In reading, there was a similar trend, though it was not statistically significant.

Low-performing and high-performing students appeared to benefit--Publisher's description.

**Successful Charter Schools** U. S. Department of Education. 2004-12-01  
Twelve years after the first charter school was launched, the charter school movement is now entering its adolescence. Like many pre-teens, it's had its share of growing pains, but I am confident that it is about to hit a growth spurt. That is because charter schools are enormously popular with their primary clients --parents and students-- and because they are starting to show promising results in terms of student achievement. The basic tenets of charter schools--give them room to be innovative, hold them accountable for results, and let parents decide if they meet the needs of their children --are perfectly aligned with the historic No Child Left Behind Act (NCLB), which also focuses on accountability for results in return for more flexibility, and with providing more options for parents than ever before. One of the promises of charter schools is that they can serve as laboratories of innovation --they can be public education's R&D arm. Because they have greater autonomy than traditional public schools, and since they tend to attract pioneering educators, they can try out new approaches to education that, if proven effective, can be transplanted back into the larger public education system. It is in this spirit that we highlight eight of the most successful charter schools in the United States. These schools were chosen after an exhaustive national search. They were primarily selected because they have demonstrated success over time in boosting student achievement. Surely many more charter schools could have been identified, and these should not be considered the best charter schools in the nation. Nevertheless, they are among the best, and each has much to teach other charterschools --and traditional public schools-- about teaching and learning, management strategies, staff development, and many other topics.

*Venture Capital & the Finance of Innovation* Andrew Metrick. 2021-02  
Many interesting developments have occurred in the world of venture capital since the publication of the first edition of this book in 2006, which prompted us to revise the book for the second edition. While the organization of the book remains unchanged, many of the chapters are substantially rewritten. For example, in Chapter 5, we re-ranked top VC firms, incorporating the latest performance statistics, fundraising and investment activities, notable exits, and (as always) our subjective opinions. In Chapter 6, we examine further evidence of the deepening globalization of the industry. In Chapters 3, 4, and 7, we analyze the impact of the 1999-2000 Internet bubble years on the VC risk and returns, as investments made in those years are finally mature and thus now a part of the performance evaluation analysis. We also incorporated expositional improvements throughout the book based on reader feedback on the first edition. Another feature of the new edition is that the VCV model, used extensively in Part III of the book, is now available as a Web-based application available on <http://VCVtools.com>. Significant collaborative efforts went into developing this tool, which we believe will be of interest to a broad audience, including practitioners interested in valuing VC-backed company stocks and employee stock options

Visual, auditory and kinesthetic associations are used to remember the concepts. Training is recommended.

**Deep Space Telecommunications Systems Engineering** Joseph H. Yuen.2013-04-17 The challenge of communication in planetary exploration has been unusual. The guidance and control of spacecraft depend on reliable communication. Scientific data returned to earth are irreplaceable, or replaceable only at the cost of another mission. In deep space, communications propagation is good, relative to terrestrial communications, and there is an opportunity to press toward the mathematical limit of microwave communication. Yet the limits must be approached warily, with reliability as well as channel capacity in mind. Further, the effects of small changes in the earth's atmosphere and the interplanetary plasma have small but important effects on propagation time and hence on the measurement of distance. Advances are almost incredible. Communication capability measured in 18 bits per second at a given range rose by a factor of 10 in the 19 years from Explorer I of 1958 to Voyager of 1977. This improvement was attained through ingenious design based on the sort of penetrating analysis set forth in this book by engineers who took part in a highly detailed and amazingly successful program. Careful observation and analysis have told us much about limitations

on the accurate measurement of distance. It is not easy to get busy people to tell others clearly and in detail how they have solved important problems. Joseph H. Yuen and the other contributors to this book are to be commended for the time and care they have devoted to explicating one vital aspect of a great adventure of mankind.

**Establishing the Family-Friendly Campus** Jaime Lester,Margaret Sallee.2023-07-03 The impact of changing demographics in higher education, and the importance of family-friendly policies, is well documented. There is an urgent need to keep PhDs in the higher education sector, to recruit talented scholars into academia, and retain them over the course of their academic careers. The key is instituting policies to enable all constituencies to balance work and personal responsibilities.This book covers the range of issues faced by all generations in academe, from PhD students, to the "sandwich generation" (those caring for children and aging parents simultaneously) through to older faculty and administrators. It addresses the causes for women faculty with children leaving the academy at a disproportionately higher rate than men, the conflicts women face between academic work and motherhood, and the difficulties they encounter in reentering the academy after having left the professoriate. In examining the need for family-friendly policies, this book documents the "best practices" currently in use at institutions across the United States. Each chapter highlights practices and programs from a variety of institutions and institutional types that address the needs of a more inclusive family-friendly campus and offers suggestions to others who are implementing similar change on their campuses. These examples provide context so that readers no longer have to develop practices in isolation, and without evidence of their effectiveness.The editors suggest that the most successful campuses are those that utilize a work-life systems framework to meet the needs of its employees. They also point to future growth trends, including expanding the focus from faculty and staff to incorporate all in the campus communityThis book offers guidance to department chairs, deans, faculty, administrators, and graduate students on setting a family-friendly agenda, and models for implementation.Contributors include: Emily Arms -- Kathleen Beauchesne -- Jill Bickett -- Sharon A. *Responding to Climate Change in New York State* Editorial Staff of Annals of the New York Academy of Sciences.2012-01-11 Climate change is already beginning to affect New York State and these impacts are projected to grow. At the same time, the state has the ability to develop adaptation strategies that will address many climate-related risks, thereby reducing impacts and taking advantage of possible opportunities. The ClimAID assessment presented in this volume provides information on climate change impacts and adaptation for eight sectors in New York State: water resources, coastal zones, ecosystems, agriculture, energy, transportation, telecommunications, and public health. Observed climate trends and future climate projections were developed for seven regions across the state. Within each of the sectors, climate risks, vulnerabilities, and adaptation strategies are identified. Integrating themes across all of the sectors are equity and environmental justice and economics. Case studies are used to examine specific vulnerabilities and potential adaptation strategies in each of the eight sectors. These case studies also illustrate the linkages among climate vulnerabilities, risks, and adaptation, and demonstrate specific monitoring needs. Stakeholder participation was critical to the ClimAID assessment process to ensure relevance to decision makers across the state. **Multisensory Imagery** Simon Lacey, Rebecca Lawson.2013-01-19 Is a pear sweeter than a peach? Which of Mona Lisa's hands is crossed over the other? What would the Moonlight Sonata sound like played by a brass band? Although these are questions that appeal to mental imagery in a variety of sensory modalities, mental imagery research has been dominated by visual imagery. With the emergence of a well-established multisensory research community, however, it is time to look at mental imagery in a wider sensory context. Part I of this book provides overviews of unisensory imagery in each sensory modality, including motor imagery, together with discussions of multisensory and cross-modal interactions, synesthesia, imagery in the blind and following brain

damage, and methodological considerations. Part II reviews the application of mental imagery research in a range of settings including individual differences, skilled performance such as sports and surgical training, psychopathology and therapy, through to stroke rehabilitation. This combination of comprehensive coverage of the senses with reviews from both theoretical and applied perspectives not only complements the growing multisensory literature but also responds to recent calls for translational research in the multisensory field.
