Global Child Myriam Denov, Claudia Mitchell, Marjorie Rabiau. 2023-01-13 Armed conflicts continue to wreak havoc on children and families around the world with profound effects. In 2017, 420 million children—nearly one in five—were living in conflict-affected areas, an increase in 30 million from the previous year. The recent surge in war-induced migration, referred to as a “global refugee crisis” has made migration a highly politicized issue, with refugee populations and host countries facing unique challenges. We know from research related to asylum seeking families that it is vital to think about children and families in relation to what it means to stay together, what it means for parents to be separated from their children, and the kinds of everyday tensions that emerge in living in dangerous, insecure, and precarious circumstances. In *Global Child*, the authors draw on what they have learned through their collaborative undertakings, and highlight the unique features of participatory, arts-based, and socio-ecological approaches to studying war-affected children and families, demonstrating the collective strength as well as the limitations and ethical implications of such research. Building on work across the Global South and the Global North, this book aims to deepen an understanding of their tri-pillared approach, and the potential of this methodology for contributing to improved practices in working with war-affected children and their families.

Disputed Archival Heritage James Lowry. 2022-10-10 *Disputed Archival Heritage* brings important new perspectives into the discourse on displaced archives. In contrast to shared or joint heritage framings, the book considers the implications of force, violence and loss in the displacement of archival heritage. With chapters from established and emerging scholars in archival studies, *Disputed Archival Heritage* extends and enriches the conversation that started with the earlier volume, *Displaced Archives*. Advancing novel theories and methods for understanding disputes and claims over archives, the volume includes chapters that focus on Indigenous records in settler colonial states; literary and community archives; sub-national and private sector displacements; successes in repatriating formerly displaced archives; comparisons with cultural objects seized by colonial powers and the relationship between repatriation and reparations. Analysing key concepts such as joint heritage and provenance, the contributors unsettle Western understandings of records, place and ownership. *Disputed Archival Heritage* speaks to the growing interest in shared archival heritage, repatriation of cultural artefacts and cultural diasporas. As such, it will be a useful resource for academics, students and practitioners working in the field of archives, records and information management, as well as cultural property and heritage management, peace and conflict studies and international law.

Maritime Transportation and Regional Sustainability Adolf Ng, Jason Monios, Jiang Chang. 2019-11 *Maritime Transport and Regional Sustainability* is a critical examination of the developing global connections between maritime transport and regional sustainability. This book provides a comprehensive, holistic examination on how the maritime transport sector helps regions to achieve their sustainability goals, especially focusing on the challenges posed by climate change. It analyzes maritime transport from multiple perspectives, establishing a strong theoretical framework drawn on evidence from both the developed and emerging economies across the globe. It identifies commonalities that contribute to a coherent transport-region relationship, including how maritime operations, planning, and management impact regional governance. Tracing the vital threads linking transport to its regional surroundings, *Maritime Transport and Regional Sustainability* analyses the major issues and challenges that maritime transport researchers, planners, and policymakers face.

Designing and Managing a Research Project Michael Jay Polonsky, David S. Waller. 2018-10-03 *Designing and Managing a Research Project: A Business Student's Guide* is a practical, step-by-step guide that shows business students how to successfully conduct a research project, from choosing the topic to presenting the results. The authors have applied their many years of experience in supervising student projects to provide examples of actual research problems and to offer practical solutions. The inclusion of topics such as supervision, group work and ethics, and both qualitative and quantitative data analysis, along with examples from real student research provide a unique perspective. The new Fourth Edition includes broader types of student project examples, such as an Economics thesis, additional international business cases, increased coverage of Questionnaire Design and Institutional Review Boards, and an integrated case throughout the book on High Performance Shoes with supporting materials and data. Additional resources including case studies, PowerPoint slides, and test bank are available on the authors' website.

Anthropological Research John J. Poggie Jr., Billie R. DeWalt, William W. Dressler. 1992-07-01 The authors of this book share a common assumption about anthropology—that replicable and systematic procedures of data collection and analysis are essential requirements for building useful cultural theory. They view cultural theory as both an aid to understanding sociocultural phenomena, and as an aid in changing existing social conditions. This book focuses on five specific themes representing a set of principles for conducting research: the importance of intra-cultural variation; the blending of qualitative and quantitative approaches; the search for micro/macro levels of generalization; the innovative matching of methodology to research problems; and the practical or applied merit of systematically generated and evaluated theory. It contributes to scientific anthropology and shows that the credibility and utility of anthropological research in policy matters is enhanced by scientific research methodology.

Big Data Analytics Venkat Ankam. 2016-09-28 A handy reference guide for data analysts and data scientists to help to obtain value from big data analytics using Spark on Hadoop clusters About This Book This book is based on the latest 2.0 version of Apache Spark and 2.7 version of Hadoop integrated with most commonly used tools. Learn all Spark stack components including latest topics such as DataFrames, DataSets, GraphFrames, Structured Streaming, DataFrame based ML Pipelines and SparkR. Integrations with frameworks such as HDFS, YARN and tools such as Jupyter,

Zeppelin, NiFi, Mahout, HBase Spark Connector, GraphFrames, H2O and Hivemall. Who This Book Is For Though this book is primarily aimed at data analysts and data scientists, it will also help architects, programmers, and practitioners. Knowledge of either Spark or Hadoop would be beneficial. It is assumed that you have basic programming background in Scala, Python, SQL, or R programming with basic Linux experience. Working experience within big data environments is not mandatory. What You Will Learn Find out and implement the tools and techniques of big data analytics using Spark on Hadoop clusters with wide variety of tools used with Spark and Hadoop Understand all the Hadoop and Spark ecosystem components Get to know all the Spark components: Spark Core, Spark SQL, DataFrames, DataSets, Conventional and Structured Streaming, MLLib, ML Pipelines and Graphx See batch and real-time data analytics using Spark Core, Spark SQL, and Conventional and Structured Streaming Get to grips with data science and machine learning using MLLib, ML Pipelines, H2O, Hivemall, Graphx, SparkR and Hivemall. In Detail Big Data Analytics book aims at providing the fundamentals of Apache Spark and Hadoop. All Spark components – Spark Core, Spark SQL, DataFrames, Data sets, Conventional Streaming, Structured Streaming, MLib, Graphx and Hadoop core components – HDFS, MapReduce and Yarn are explored in greater depth with implementation examples on Spark + Hadoop clusters. It is moving away from MapReduce to Spark. So, advantages of Spark over MapReduce are explained at great depth to reap benefits of in-memory speeds. DataFrames API, Data Sources API and new Data set API are explained for building Big Data analytical applications. Real-time data analytics using Spark Streaming with Apache Kafka and HBase is covered to help building streaming applications. New Structured streaming concept is explained with an IOT (Internet of Things) use case. Machine learning techniques are covered using MLLib, ML Pipelines and SparkR and Graph Analytics are covered with GraphX and GraphFrames components of Spark. Readers will also get an opportunity to get started with web based notebooks such as Jupyter, Apache Zeppelin and data flow tool Apache NiFi to analyze and visualize data. Style and approach This step-by-step pragmatic guide will make life easy no matter what your level of experience. You will deep dive into Apache Spark on Hadoop clusters through ample exciting real-life examples. Practical tutorial explains data science in simple terms to help programmers and data analysts get started with Data Science
