**The History of Yiddish Literature** Leo Wiener.2018-12-03 A SUGGESTION to write the present book reached me in the spring of 1898. At that time my library contained several hundreds of volumes of the best Judeo-German (Yiddish) literature, which had been brought together by dint of continued attention and, frequently, by mere chance, for the transitoriness of its works, the absence of any and all bibliographies, the almost absolute absence of a guide into its literature, and the whimsicalness of its book trade made a systematic selection of such a library a difficult problem to solve. Not satisfied with the meagre details which could be gleaned from internal testimonies in the works of the Judeo-German writers, I resolved to visit the Slavic countries for the sake of gathering data, both literary and biographical, from which anything like a trustworthy history of its literature could be constructed.

**Omar Khayyam Poems** Omar Khayyam.2021-07-23 The poems attributed to Omar Khayyam have a universal and timeless philosophical theme: life is a meaningful journey even if brief and uncertain. They inspire an unconstrained free-thinking mindset and a wise realization that guides thinking persons: it is impossible to see the absolute truth, as the universe has its own reality that remains largely hidden, and that one must think and act accordingly. This book presents a selection of Khayyam's poems in their original Persian language along with their English translations in a faithful and modern version. By relying only on the original Persian version of Khayyam's poems, and using the author's own body of literary and linguistic knowledge, this book presents a modern translation

of Omar Khayyam's poems since Edward Fitzgerald's Rubaiyat in 1859.

Heritage Sites of Astronomy and Archaeoastronomy in the Context of the UNESCO World Heritage Convention Clive L. N. Ruggles, Michel Cotte.2017-11-30 This joint venture between ICOMOS, the advisory body to UNESCO on cultural sites, and the International Astronomical Union is the second volume in an ongoing exploration of themes and issues relating to astronomical heritage in particular and to science and technology heritage in general. It examines a number of key questions relating to astronomical heritage sites and their potential recognition as World Heritage, attempting to identify what might constitute outstanding universal value in relation to astronomy. Heritage Sites of Astronomy and Archaeoastronomy--Volume 2 represents the culmination of several years' work to

address some of the most challenging issues raised in the first ICOMOS-IAU Thematic Study, published in 2010. These include the recognition and preservation of the value of dark skies at both cultural and natural sites and landscapes; balancing archaeoastronomical considerations in the context of broader archaeological and cultural values; the potential for serial nominations; and management issues such as preserving the integrity of astronomical sightlines through the landscape. Its case studies are developed in greater depth than those in volume 1, and generally structured as segments of draft nomination dossiers. They include seven-stone antas (prehistoric dolmens) in Portugal and Spain, the thirteen towers of Chankillo in Peru, the astronomical timing of irrigation in Oman, Pic du Midi de Bigorre Observatory in France, Baikonur Cosmodrome in Kazakhstan, and Aoraki-Mackenzie International Dark Sky Reserve in New Zealand. A case study on Stonehenge, already a World Heritage Site, focuses on preserving the integrity of the solstitial sightlines. As for the first ICOMOS-IAU Thematic Study, an international team of authors including historians, astronomers and heritage professionals is led by Professor Clive Ruggles for the IAU and Professor Michel Cotte for ICOMOS.

*Imagery of Colour & Shining in Catullus, Propertius & Horace* Jacqueline Clarke.2003 In recent years there has been growing interest in the concepts of pictorial vividness («enargeia») and pictorial description («ekphrasis») in the works of ancient writers. Colour imagery can play a significant part in such pictorial effects. This book explores the visual and stylistic contributions that words for colour and shining make to the poetry of Catullus, Propertius, and Horace. First, the instances of colour usage by the three poets are analyzed and compared with the colour imagery of

other ancient poets and artists. «Colour readings» of selected poems follow, illustrating how colours are employed by these poets to heighten the visual impact of their poems and influence the reader's emotional responses. This book fills a gap in the scholarship on colour in ancient poetry and provides fresh perspectives on the work of three important poets.

*Wheat Landraces* Nusret Zencirci, Faheem S. Baloch, Ephrem Habyarimana, Gyuhwa

Chung. 2021-09-15 Landraces possess a very large genetic base in population structure and are dynamic populations of cultivated plants with historical origin, distinct identity, and without any formal crop improvement. They are often genetically diverse, locally adapted, and associated with traditional farming systems. Resistance genes to biotic and abiotic stress factors, which are especially diversified in landraces, are of great interest to plant breeders, faced with global climate challenge. In addition, gene pools made of different landraces grown in different ecological conditions can be used for wheat breeding to enhance quality; yield and other desirable agricultural parameters. An estimated 75% of the genetic diversity of crop plants was lost in the last century due to the replacement of high yielding modern varieties. There is, thus, an urgent need to preserve existing species, not only for posterity but also as a means to secure food supply for a rising world population. In this book, we provide an overview of wheat landraces with special attention to genetic diversities, conservation, and utilization.

*Tribal Names of the Americas* Patricia Roberts Clark.2009-10-21 Scholars have long worked to identify the names of tribes and other groupings in the Americas, a task made difficult by the sheer number of indigenous groups and the many names that have been passed down only through oral tradition. This book is a compendium of tribal names in all their variants--from North, Central and South America--collected from printed sources. Because most of these original sources reproduced words that had been encountered only orally, there is a great deal of variation. Organized alphabetically, this book collates these variations, traces them to the spellings and forms that have become standardized, and supplies see and see also references. Each main entry includes tribal name, the parent group or ancestral tribe, original source for the tribal name, and approximate location of the name in the original source material.

*Aramis, Or The Love of Technology* Bruno Latour.1996-04-15 Bruno Latour has written a unique and wonderful tale of a technological dream gone wrong. The story of the birth and death of Aramis—the guided-transportation system intended for Paris—is told in this thought-provoking and fictional account by several different parties: an engineer and his professor; company executives and elected officials; a sociologist; and finally Aramis itself, who delivers a passionate plea on behalf of technological innovations that risk being abandoned by their makers. As the young engineer and professor follow Aramis’s trail—conducting interviews, analyzing documents, assessing the evidence—perspectives keep shifting: the truth is revealed as multilayered, unascertainable,

comprising an array of possibilities worthy of Rashomon. This charming and profound book, part novel and part sociological study, is Latour at his thought-provoking best.

*The Oxford Handbook of Names and Naming* Carole Hough.2016-05-03 In this handbook, scholars from around the world offer an up-to-date account of the state of the art in different areas of onomastics, in a format that is both useful to specialists in related fields and accessible to the general reader. Since Ancient Greece, names have been regarded as central to the study of language, and this has continued to be a major theme of both philosophical and linguistic enquiry throughout the history of Western thought. The investigation of name origins is more recent, as is the study of names in literature. Relatively new is the study of names in society, which draws on techniques from sociolinguistics and has gradually been gathering momentum over the last few decades. The structure of this volume reflects the emergence of the main branches of name studies, in roughly chronological order. The first Part focuses on name theory and outlines key issues about the role of names in language, focusing on grammar, meaning, and discourse. Parts II and III deal with the study of place-names and personal names respectively, while Part IV outlines contrasting approaches to the study of names in literature, with case studies from different languages and time periods. Part V explores the field of socio-onomastics, with chapters relating to the names of people, places, and commercial products. Part VI then examines the interdisciplinary nature of name studies, before the concluding Part presents a selection of animate and inanimate referents ranging from aircraft to animals, and explains the naming strategies adopted for them.

**Presenting the Past** Susan Porter Benson, Stephen Brier, Roy Rosenzweig. 1986 In recent years, history has been increasingly popularized through television docudramas, history museums, paperback historical novels, grassroots community history projects, and other public representations of historical knowledge. This collection of lively and accessible essays is the first examination of the rapidly growing field called public history. Based in part on articles written for the *Radical History Review*, these eighteen original essays take a sometimes irreverent look at how history is presented to the public in such diverse settings as children's books, Colonial Williamsburg, and the Statue of Liberty. *Presenting the Past* is organized into three areas which consider the role of mass media (Packaging the Past), the affects of applied history (Professionalizing the Past) and the importance of grassroots efforts to shape historical consciousness (Politicizing the Past). The first section examines the large-scale production and dissemination of popular history by mass culture. The contributors criticize many of these Hollywood and Madison Avenue productions that promote historical amnesia or affirm dominant values and institutions. In *Professionalizing the Past*, the authors show how non-university based professional historians have also affected popular historical consciousness through their work in museums, historic preservation, corporations, and government agencies. Finally, the book considers what has been labeled people's history--oral history projects, slide shows, films, and local exhibits--and assesses its attempts to reach such diverse constituents as workers, ethnic groups, women, and gays. Of essential interest to students of history, *Presenting the Past* also explains to the general reader how Americans have come to view themselves, their ancestors, and their heritage through the influence of mass media, popular culture, and public history. Author note: Susan Porter Benson is Associate Professor and Chair of History at Bristol Community College in Massachusetts. Stephen Brier is Director of the American Social History Project and Senior

Research Scholar at the Graduate Center, City University of New York. Roy Rosenzweig is Associate Professor of History and Director of the Oral History Program at George Mason University in Virginia.

*Romanticism Against the Tide of Modernity* Michael Löwy, Robert Sayre.2002-01-01 Romanticism is a worldview that finds expression over a whole range of cultural fields—not only in literature and art but in philosophy, theology, political theory, and social movements. In *Romanticism Against the Tide of Modernity* Michael Löwy and Robert Sayre formulate a theory that defines romanticism as a cultural protest against modern bourgeois industrial civilization and work to reveal the unity that underlies the extraordinary diversity of romanticism from the eighteenth to the twenty-first century. After critiquing previous conceptions of romanticism and discussing its first European manifestations, Löwy and Sayre propose a typology of the sociopolitical positions held by romantic writers—from “restitutionist” to various revolutionary/utopian forms. In subsequent chapters, they

give extended treatment to writers as diverse as Coleridge and Ruskin, Charles Peguy, Ernst Bloch and Christa Wolf. Among other topics, they discuss the complex relationship between Marxism and romanticism before closing with a reflection on more contemporary manifestations of romanticism (for example, surrealism, the events of May 1968, and the ecological movement) as well as its future. Students and scholars of literature, humanities, social sciences, and cultural studies will be interested in this elegant and thoroughly original book.
